One of the non-governmental environmental interest organizations reiterated its concern that the rule proceeds on the assumption that Antarctic tourism is limited, controlled and easily subject to self-regulation by the industry, and that the projections for increases in Antarctic tourism have been deliberately understated perhaps requiring a new round of regulatory review in 5–10 years. EPA disagrees with these opinions. In keeping with the purpose and need for this rule-making, EPA's objective during the rule-making process, including the DEIS for the proposed rule, has not been to analyze the magnitude and impact of tourism on the Antarctic environment but rather to evaluate the environmental impacts of the alternatives for the final rule. EPA disagrees that the projections for increases in Antarctic tourism have been deliberately understated. The projections used by EPA are based on the available data and information in referenced sources in the DEIS. The rule delineates the environmental impact assessment process, a process that accounts for increases in tourism and assessment of any potential impacts, including cumulative impacts, that could result from such increases. EPA does not believe that increases in tourism will necessarily require new regulatory review. Rather, to the extent that increases in tourism would have the potential to result in impacts that are more than minor or transitory, an operator would prepare a CEE to be in compliance with the regulations.

One of the non-governmental environmental interest organizations' primary objections to the legal conclusions propounded in the rule includes objection that the rule does not broaden the definition of "operator;" in the opinion of the commentor, section 4(a)(6) of the Act extends applicability of the Act, and thus the rule, to any person who organizes, sponsors, operates or promotes a non-governmental expedition to the United States, and who does business in the

United States. In response, the authority for EPA's rule-making is 16 U.S.C. 2401 *et. seq.*, as amended, 16 U.S.C. 2403a. EPA does not believe that section 2403(a)(6) (e.g., section 4(a)(6) of the Act) is germane to this rule-making. EPA sought legal, and programmatic, assistance from the Department of State, the Department of Justice and the National Science Foundation on this issue; EPA stands by this analysis.

One of the non-governmental environmental interest organizations' primary objections to the legal conclusions propounded in the rule includes its opinion that the rule should include a requirement that environmental documentation demonstrate compliance with applicable Protocol and statutory provisions; further, the Act does not require parity between governmental and nongovernmental activities in this regard. EPA is not accepting this proposed modification for the following reasons. First, certain provisions of the Act are the responsibility of other federal agencies. Further, rather than imposing a blanket requirement that may add unnecessary burden on the operator, EPA maintains that the EIA documentation provides the mechanism to identify whether a proposed activity raises issues under other obligations of the Protocol or domestic law which need further review by the responsible authority. Operators may, and do, reference compliance with appropriate Protocol provisions and U.S. regulations as planned mitigation measures for their activities, measures which support the level of environmental documentation for the planned activities. A mandatory blanket requirement to demonstrate compliance would impose obligations not required under Annex I or the Act and would require considerations that may have no relevance to the activity and, thus, no effect in reducing environmental impacts. EPA acknowledges that the Act does not require consistency between the governmental and nongovernmental environmental impact assessment processes and regulations. However, regardless of whether the activities are governmental or nongovernmental, it is the U.S. government that has the responsibility to ensure that the U.S. is able to comply with its obligations under the Protocol. The National Science Foundation is charged with this responsibility for governmental activities, and EPA for purposes of nongovernmental activities. EPA believes it is reasonable that the governmental and nongovernmental processes be consistent with regard to the requirements of Article 8 and Annex I to the Protocol.

One of the non-governmental environmental interest organizations' primary objections to the legal conclusions propounded in the rule includes its opinion that Article 3 of the Protocol, unlike NEPA, imposes substantive requirements and because the rule does not impose substantive requirements, nongovernmental operators can file IEEs and CEEs that disclose substantial risks to the Antarctic environment or associated and dependent ecosystems and those activities could be approved. EPA sought legal, and programmatic, assistance from the Department of State and the National Science Foundation on the Article 3 issue. It is the U.S. government's position that Article 3 of the Protocol does not impose substantive obligations. Thus, EPA is not accepting this proposed modification. Further, as noted above, as with the Interim Final Rule, under the final rule, EPA does not "approve" activities. EPA, in consultation with other interested federal agencies, will review the environmental documentation to determine whether it meets the requirements of Article 8 and Annex I and the regulations.

One of the non-governmental environmental interest organizations expressed concerns that the Preamble language discussing harmonization between regulation of governmental and nongovernmental actors and cost/benefit analyses of the provisions of the rule have the effect of narrowing the scope of the regulatory regime. This commentor also maintains the regulatory regime is also narrowed by EPA's argument that if enhanced regulation and enforcement is adopted, U.S.-based operators will simply move to another country to evade such regulation or enforcement. EPA acknowledges that the Act does not require consistency between the governmental and nongovernmental environmental impact assessment processes and regulations. However, regardless of whether the activities are governmental or nongovernmental, it is the U.S. government that has the responsibility to ensure that the U.S. is able to comply with its obligations under the Protocol. As discussed above, the National Science Foundation is charged with this responsibility for governmental activities, and EPA for purposes of nongovernmental activities. EPA believes it is reasonable that the governmental and nongovernmental processes be consistent with regard to the requirements of Article 8 and Annex I of the Protocol. EPA further acknowledges that neither the Protocol nor the Act dictates a cost-benefit requirement but that it gave consideration to, amongst other things, the concern that U.S.-based operators continue to do business as U.S. operators and not move their Antarctic business operations to a non-Party country because of any undue burden imposed by the final rule. However, this was one of several considerations that EPA believed was reasonable in its analysis of the alternatives for the rule-making in the DEIS and the process to promulgate the final rule.

One of the non-governmental environmental interest organizations expressed concern that the Preamble language discussing IEEs as the appropriate level of environmental documentation has the effect of corrupting the integrity of the environmental impact assessment process and narrowing the scope of the regulatory regime. EPA disagrees with this opinion. The Preamble at section III.D.3.(b) includes reference to not only ATCM Recommendation XVIII–1 but also the relevant provisions of other U.S. statutes and Annexes II–V to the Protocol. The information in the Preamble is not regulatory, rather it is a guideline to operators. The regulations state the mandatory requirements that must be met by operators and include the criteria for the level of environmental documentation. EPA believes that providing a level of guidance to those subject to regulation does not corrupt the integrity of the regulatory process. Contrary to the commentor's assertion that EPA has made a conclusory statement regarding IEEs, including that a CEE may not be called for in some cases for nongovernmental activities, EPA's view is that, as stated in the Preamble, at a minimum, an IEE is the appropriate level of environmental documentation where multiples of the activity over time are likely and may create a cumulative impact.

One of the non-governmental environmental interest organizations expressed concern that the Preamble language discussing the criteria for a CEE narrows the scope of the regulatory regime. EPA disagrees with this opinion. In section III.D.4., EPA provides the new crushed rock airstrip or runway example as a level of guidance to those subject to regulation. EPA disagrees that a 10% increase in tourism activity would automatically trigger the need for a CEE. As with any activity, including the runway example or a 10% increase in tourism, the rule delineates the environmental impact assessment process to be employed by

an operator to determine the level of potential impact for the proposed activity and, thus, the level of environmental documentation required by the rule.

This final rule is being promulgated without change in response to comments for the reasons stated above and because these regulations are consistent with Annex I to the Protocol and ensure that the U.S. government is able to meet its obligations under the Protocol. This final rule ensures that nongovernmental operators identify and assess the potential impacts of their proposed activities, including tourism, on the Antarctic environment; that operators consider these impacts in deciding whether or how to proceed with proposed activities; and that operators provide environmental documentation pursuant to the Act and Annex I of the Protocol. This final rule also provides for coordination of the review of information regarding environmental impact assessment received from other Parties under the Protocol.

III. Description of Program and These Regulations

A. The Antarctic Treaty and Protocol

The Antarctic Treaty of 1959 entered into force in 1961 and guarantees freedom of scientific research in Antarctica, reserves Antarctica exclusively for peaceful purposes, establishes regular meetings of the Parties to the Treaty (Parties) to develop measures to implement the Treaty and to deal with issues that may arise, and freezes territorial claims. Currently 27 countries participate in decision-making under the Treaty as Consultative Parties. Eighteen other countries are Parties, but may not block decisions taken by consensus of the Consultative Parties.

As human activities in Antarctica intensified, concern grew regarding the effects of such activities on the Antarctic environment and the potential consequences of the development of mineral resources. In 1990, the U.S. Congress responded by passing the Antarctic Protection Act, which prohibited persons subject to U.S. jurisdiction from engaging in Antarctic mineral resource activities and called for the negotiation of an environmental protection agreement.

Over the years, the Antarctic Treaty Parties have adopted a variety of measures to protect the Antarctic environment. In 1991, the Parties adopted the Protocol on Environmental Protection which builds upon the Treaty by extending and strengthening Antarctic environmental protection. The Protocol designates Antarctica as a natural reserve dedicated to peace and science, and bans non-scientific mineral activities. The Protocol requires prior assessment of the possible environmental impacts of all activities to be carried out in Antarctica. It establishes the Committee for Environmental Protection (the Committee) to provide expert scientific and technical advice to the Parties on measures necessary to effectively implement the Protocol. The Protocol requires that draft CEEs for activities likely to have more than a minor or transitory impact on Antarctica and its dependent and associated ecosystems be provided to the Parties and to the Committee. Because legislation was needed in order for the United States to be able to implement its obligations under the Protocol, the Antarctic Science, Tourism, and Conservation Act of 1996 was enacted by Congress. The Act directs EPA to issue regulations implementing the requirements for environmental impact assessments of nongovernmental activities, including tourism, for which the U.S. is required to give advance notice under the Treaty.

B. The Purpose of These Regulations

The purpose of these final regulations is to provide for the evaluation of the potential environmental impact of those nongovernmental activities in Antarctica, including tourism, for which the United States is required to give advance notice under paragraph 5 of Article VII of the Treaty. The Treaty requires notice of, *inter alia*, "all expeditions to Antarctica organized in or proceeding from" the United States. In addition, these regulations provide for coordination of reviews of draft CEEs received from other Parties, in accordance with the Protocol. The Act states that these regulations are to be consistent with Annex I to the Protocol.

Among other things, these regulations specify the procedures that need to be followed by any person or persons organizing a nongovernmental expedition to or within Antarctica ("operator" or "operators") in evaluating the potential environmental impacts of their activities. These regulations include considerations and elements relevant to environmental documentation of the evaluation, as well as procedures for submission of environmental documentation that allow the EPA to review whether the evaluation meets the provisions of the regulations and the requirements of Annex I of the Protocol.

Operators currently provide information prior to each Antarctic summer season to the Department of State to meet U.S. obligations for notification pursuant to Article VII of the Treaty, which requires advance notice of expeditions to and within Antarctica. This information is also part of the basic information requirements for preparation of environmental documentation, as addressed in Section 8.4(a) of these regulations. While operators would be required to include this information in environmental documentation, they could also continue to provide this information directly to the Department of State.

C. Summary of the Protocol

This final rule implements Annex I to the Protocol, which describes procedures to be used in conducting environmental impact assessments of effects of activities in Antarctica. Article 8 of the Protocol provides that Parties to the Protocol ensure that the assessment procedures of Annex I are applied in planning processes leading to decisions about any activities, including nongovernmental activities, including tourism, to be undertaken in the Antarctic Treaty area for which advance notice is required under paragraph 5 of Article VII of the Treaty.

The procedures set forth in Annex I require that all proposed activities by operators be assessed, through one or more stages of environmental impact assessment. If an activity will have an impact that is less than minor or transitory, only a preliminary environmental assessment would need to be submitted in accordance with these regulations before the activity proceeds. For an activity that will have no more than a minor or transitory impact, an initial environmental evaluation (IEE) must be submitted in accordance with these regulations before the activity proceeds. Finally, if it is determined (through an IEE or otherwise) that an activity is likely to have more than a minor or transitory impact, a comprehensive environmental evaluation (CEE) must be submitted in accordance with these regulations before the activity proceeds.

An IEE describes an activity's purpose, location, duration and intensity, and considers alternatives and assesses impacts, including cumulative impacts, in light of existing and known proposed activities. A CEE is a detailed analysis that comprehensively evaluates the activity, its impacts, alternatives, mitigation and the like. A draft CEE must be provided to the Parties and the Committee at least 120 days before the next consultative meeting where the draft CEE may be addressed. No final decision shall be taken to proceed with any activity for which a CEE is prepared

unless there has been an opportunity for consideration of the draft CEE at an Antarctic Treaty Consultative Meeting (ATCM) on the advice of the Committee (unless the decision to proceed with the activity has already been delayed more than 15 months since the date of circulation of the draft CEE). A final CEE must be circulated at least 60 days before commencement of the proposed activity. Any decision by the operator on whether a proposed activity should proceed in either its original or modified form must be based upon the final CEE as well as other relevant considerations, and procedures must be put in place for monitoring the impact of any activity that proceeds following completion of a CEE.

Environmental impact assessments need to address Annex I to the Protocol. The information contained in an evaluation should allow the operator to make decisions based on a sound understanding of factors relevant to the likely impact of the proposed activity. An evaluation should, as appropriate, contain sufficient information to allow assessments of, and informed judgements about, the likely impacts of proposed activities on the Antarctic environment and on the value of the Antarctic environment for the conduct of scientific research. Depending on the specific circumstances surrounding the proposed activities, various factors may be relevant for consideration in the environmental impact assessment process such as the scope, duration and intensity of the activity proposed in Antarctica, cumulative impacts, impacts on other activities in the Antarctic Treaty area, and capacity to assess and verify adverse environmental impacts. Operators may also find it appropriate to consider the availability of technology and procedures for environmentally safe operations and whether there exists the capacity to respond promptly and effectively to accidents with environmental effects.

D. Activities Covered by These Regulations

1. Persons Required to Carry Out an EIA

The requirements of these final regulations apply to operators of nongovernmental expeditions organized in or proceeding from the territory of the United States to Antarctica. The term "expedition" is taken from paragraph 5 of Article VII of the Treaty and encompasses all actions or activities undertaken by a nongovernmental expedition while it is in Antarctica. These regulations do not apply to individual U.S. citizens or groups of citizens planning to travel to Antarctica on an expedition for which they are not acting as an operator.

For a commercial tour, typical functions of an operator would include, for example, acting as the primary person or group of persons responsible for acquiring use of vessels or aircraft, hiring expedition staff, planning itineraries, and other organizational responsibilities. Non-commercial expeditions covered by these regulations would include trips by yachts, skiing or mountaineering expeditions, privately funded research expeditions, and other nongovernmental or nongovernment-sponsored activities.

These regulations do not apply to U.S. citizens who participate in tours organized in and proceeding from countries other than the United States. As provided in the Protocol, the requirements do not apply to activities undertaken in the Antarctic Treaty area that are governed by the Convention on the Conservation of Antarctic Marine Living Resources or the Convention for the Conservation of Antarctic Seals. Persons traveling to Antarctica are subject to the requirements of the Marine Mammal Protection Act, 16 U.S.C. 1371 *et seq.*

2. Differences Between Governmental and Nongovernmental Activities

These regulations do not apply to governmental activities. C.f. 45 CFR 641.10 through 641.22 (National Science Foundation regulations for assessing impacts of governmental activities in Antarctica). However, EPA believes that, to the extent practicable, similar procedures should generally be used for assessing both governmental and nongovernmental activities. Consistent with this approach, these regulations generally establish procedures for assessing the impacts of nongovernmental activities in Antarctica similar to those used for governmental activities under the National Science Foundation regulations.

However, EPA also recognizes that it will not always be appropriate to apply identical standards and procedures for governmental and nongovernmental activities. Specifically, numerous mechanisms and processes exist to ensure public scrutiny and accountability of governmental activities. In some instances, no comparable mechanisms or processes exist for nongovernmental activities. Thus, these regulations provide for direct federal review of each nongovernmental environmental impact assessment by giving EPA authority to review, in consultation with other interested federal agencies, nongovernmental environmental impact assessments for compliance with the requirements of Annex I to the Protocol and these regulations.

To promote consistency regarding environmental documentation, EPA intends to consult with the National Science Foundation and other U.S. government agencies with appropriate expertise in the course of reviewing the assessments of proposed nongovernmental activities in the Antarctic. Further, following the final response from the operator to EPA's initial comments, EPA will obtain the concurrence of the National Science Foundation in making any determination that the environmental documentation submitted by an operator fails to meet the requirements under Article 8 and Annex I to the Protocol and the provisions of these regulations.

3. Appropriate Level of Environmental Documentation

(a) Preliminary Environmental Review Memorandum (PERM). These regulations provide that an operator who asserts that an expedition will have less than a minor or transitory impact must provide a Preliminary Environmental Review Memorandum (PERM) to the EPA no later than 180 days before the proposed departure of the expedition to Antarctica. The timing requirement has been established to provide sufficient time for the operator to prepare an IEE if one is needed. The EPA, in consultation with other interested federal agencies, will review the PERM to determine if it is sufficient to demonstrate that the activity will have less than a minor or transitory impact or whether additional environmental documentation, *i.e.*, an IEE or CEE, is required to meet the obligations of Annex I. The EPA will provide its comments to the operator within fifteen (15) days of receipt of the PERM, and the operator will have seventy-five (75) days to prepare a revised PERM or an IEE, if necessary. Following the final response from the operator, EPA may make a finding that the submitted environmental documentation does not meet the requirements of Article 8 and Annex I of the Protocol and the provisions of these regulations. This finding will be made with the concurrence of the National Science Foundation. If EPA does not provide notice of such a finding within thirty (30) days, the operator will be deemed to have met the requirements of these regulations.

If EPA recommends an IEE and one is prepared and submitted within the seventy-five (75) day response period,

the schedule for review will follow the time frames set out for an IEE in these regulations. (See: section II.D.3(b), below.) Should EPA recommend a CEE, timing requirements applicable to CEEs may necessitate a delay in plans to initiate a proposed activity. Operators are encouraged to consult with EPA on options in this regard.

(b) Initial Environmental Evaluation (IEE). Article 2 of Annex I to the Protocol requires that unless it has been determined that an activity will have less than a minor or transitory impact, or unless a CEE is being prepared in accordance with Article 3 of Annex I, an IEE must be prepared. Among the items to be included in an IEE to document that an activity will have no more than a minor or transitory impact are the cumulative impacts of the proposed activity in light of existing and known proposed activities. Expeditions, by their nature, involve the transport of persons to Antarctica that will result in physical impacts, which may include, but are not limited to: air emissions, discharges to the ocean, noise from engines, landings for sight-seeing, and activities by visitors near wildlife. Accordingly, it is EPA's view, which has been confirmed by its experience under the interim final regulations, that, at a minimum, an IEE is the appropriate level of environmental documentation for proposed activities where multiples of the activity over time are likely and may create a cumulative impact, unless an existing IEE or CEE supports a finding that the type of activity proposed results in a less than minor or transitory cumulative impact. However, as noted below, it is also EPA's view that the types of nongovernmental activities that are currently being carried out will typically be unlikely to have impacts that are more than minor or transitory assuming that activities will be carried out in accordance with the guidelines set forth in the ATCM Recommendation XVIII–1, Tourism and Non-Governmental Activities, the relevant provisions of other U.S. statutes, and Annexes II–V to the Protocol. In the event that a determination is made that a CEE is needed to meet the requirements of Annex I to the Protocol and the provisions of these regulations, timing requirements applicable to CEEs may necessitate a delay in plans to initiate a proposed activity, and operators are encouraged to consult with EPA on options.

Any operator who wishes to make an expedition to Antarctica is required to provide an IEE to EPA no less than ninety (90) days prior to the proposed departure of the expedition to Antarctica unless: (1) A decision has been made to prepare a CEE, or (2) the operator has submitted a PERM and there has not been a finding within the time limits of these regulations that the PERM fails to meet the requirements under Annex I to the Protocol and the provisions of these regulations.

The EPA will provide its comments to the operator within thirty (30) days of receipt of the IEE, and the operator will have forty-five (45) days to prepare a revised IEE, if necessary. Following the final response from the operator, EPA may make a finding that the documentation submitted does not meet the requirements of Article 8 and Annex I of the Protocol and the provisions of these regulations. This finding will be made with the concurrence of the National Science Foundation. If a notice of such a finding is required, EPA will provide it within fifteen (15) days of receiving the final IEE from the operator or, if the operator does not provide a final IEE, within sixty (60) days following EPA's comments on the original IEE. If EPA does not provide notice within these time limits, the operator will be deemed to have met the requirements of these regulations, provided that procedures, which may include appropriate monitoring, are carried out to assess and verify the impact of the activity.

If a CEE is required, the operator must adhere to the time limits applicable to such documentation. (See: section II.D.3.(c), below.) In the event that a determination is made that a CEE is required, EPA, at the operator's request, will consult with the operator regarding possible changes in the proposed activity that would allow preparation of an IEE.

The EPA, upon receipt of an IEE, will electronically publish notice of its receipt on the Office of Federal Activities' World Wide Web Site: *http://www.epa.gov/oeca/ofa/*. The Department of State will circulate to the Parties and make publicly available a copy of an annual list of IEEs prepared by U.S. operators in accordance with Article 2 of Annex I of the Protocol and any decisions taken in consequence thereof. Any IEE prepared in accordance with these regulations will be made available by the EPA on request.

(c) Comprehensive Environmental Evaluation (CEE). Article 3(4), of Annex I of the Protocol requires that draft CEEs be circulated to all Parties and the Committee 120 days in advance of the next Antarctic Treaty Consultative Meeting at which the CEE may be addressed. Since the 2001 ATCM occurred in July, CEEs prepared for nongovernmental activities in the 2001–2002 season would have to have been distributed by March 2001. Operators who are anticipating activities for the 2002–2003 season that may require a CEE are encouraged to consult with the EPA as soon as possible.

In order to meet the requirements of Article 3(4), of Annex I of the Protocol which requires that draft CEEs be circulated to all Parties and forwarded to the Committee 120 days in advance of the next Antarctic Treaty Consultative Meeting at which the CEE may be addressed, and because the ATCM generally meets in May, the regulations require the operator to submit a draft CEE the preceding December in order to ensure its timely distribution to all Parties and the Committee. Thus, for example, for the 2002–2003 season, any operator who plans an activity which would require a CEE will need to submit a draft of the CEE to EPA by December 1, 2001. Within fifteen (15) days of receipt of the draft CEE, EPA will send it to the Department of State for transmittal to other Parties, publish notice of receipt of the CEE in the **Federal Register**, and provide copies to any person upon request. The EPA will accept public comments on the CEE for a period of ninety (90) days following notice in the **Federal Register**. The EPA will make these public comments available to the operator.

The EPA, in consultation with other interested federal agencies, will review the CEE to determine if it meets the requirements under Annex I to the Protocol and the provisions of these regulations. EPA will transmit its comments to the operator within 120 days following publication of notice of availability in the **Federal Register** to allow for the inclusion of any additional information in the CEE. The operator must prepare a final CEE that addresses and includes or summarizes any comments on the draft CEE received from EPA, the public and the Parties. The final CEE must be sent to EPA at least seventy-five (75) days before the proposed departure date. Following the final response from the operator, the EPA will notify the operator if EPA, with the concurrence of the National Science Foundation, makes the finding that the submitted environmental documentation does not meet the requirements of Article 8 and Annex I of the Protocol and the provisions of these regulations. This notification will occur within fifteen (15) days of submittal of the final CEE if the CEE is submitted by the operator within the time limits set out in these regulations. If no final CEE is submitted by the operator, or if the operator fails to meet

these time limits, EPA will provide such notification sixty (60) days prior to departure of the expedition. If, after receipt of such notification, the operator proceeds with the expedition without fulfilling the requirements of these regulations, the operator will be subject to enforcement proceedings pursuant to Sections 7, 8, and 9 of the Antarctic Conservation Act, as amended by the Act; 16 U.S.C. 2407, 2408, 2409, and 45 CFR part 672. If EPA does not provide notice, the operator will be deemed to have met the requirements of these regulations provided that procedures, which include appropriate monitoring, are carried out to assess and verify the impact of the activity. The EPA will transmit the final CEE to the Department of State which will circulate it to all Parties no later than sixty (60) days before proposed departure of the expedition, along with a notice of any decisions by the operator relating to the CEE. The EPA will publish a notice of availability of the final CEE in the **Federal Register**.

Operators are encouraged to consult with the EPA as early as possible if there are questions as to whether a CEE will be required for a proposed expedition.

(d) Mitigation. If an operator chooses to mitigate the environmental impacts of its activity and the mitigation measures are the basis for the level of environmental documentation, EPA will assume that the operator will undertake these mitigation measures. Otherwise, the documentation may not have met the requirements of Article 8 and Annex I and the provisions of these regulations.

4. Criteria for a CEE

Article 3 of Annex I to the Protocol requires a CEE when it is determined that an activity is likely to have more than a minor or transitory impact. While the need for a CEE will be evaluated for each activity on a case-by-case basis, it is EPA's view that the type of nongovernmental activities that are currently being carried out will typically be unlikely to have impacts that are more than minor or transitory.

However, the need for a CEE could be triggered by a proposed activity that represents a major departure from current nongovernmental activities, resulting in a large increase in an adverse environmental impact at a site. Similarly, a CEE may be required if an activity is likely to give rise to particularly complex, cumulative, large-scale or irreversible effects, such as perturbations in unique and very sensitive biological systems. An example of an activity that might require a CEE would be the construction and operation of a new crushed rock airstrip or runway.

In evaluating whether a CEE is the appropriate level of environmental documentation, the EPA will consider the impact in terms of the context of the Antarctic environment and the intensity of the activity. The Antarctic environment is for the most part unspoiled, has intrinsic value, and is of great value to science and to humankind's overall understanding of the global environment. In addition, because of the location and uniqueness of the ecosystem, there would likely be great difficulty responding to environmental threats and mitigating damage to the Antarctic ecosystem. The EPA believes a comparable threshold should be applied in determining whether an activity may have an impact that is more than minor or transitory under these regulations as is used in determining if a Federal activity will have a significant effect for purposes of the National Environmental Policy Act (NEPA). See 40 CFR 1508.27. For this reason, for purposes of these regulations and consistent with the environmental impact assessment regulations for federal activities, the term "more than a minor or transitory impact" has been defined to have the same meaning as the term "significantly" under NEPA. 16 U.S.C. 2403a(a)(1)(B); 40 CFR 1508.27. The recommendation to add this definition to these regulations was made to EPA during the scoping process and was considered in the DEIS prepared by EPA.

5. Measures To Assess and Verify Environmental Impacts

The Protocol and these regulations require an operator to employ procedures to assess and provide a regular and verifiable record of the actual impacts of any activity that proceeds on the basis of an IEE or CEE. The record developed through these measures must be designed to: (a) Enable assessments to be made of the extent to which such impacts are consistent with the Protocol; and (b) provide information useful for minimizing and mitigating those impacts, and, where appropriate, on the need for suspension, cancellation, or modification of the activity. Moreover, an operator must monitor key environmental indicators for an activity proceeding on the basis of a CEE. An operator may also need to carry out monitoring in order to assess and verify the impact of an activity for which an IEE has been prepared.

For activities requiring an IEE, an operator should be able to use procedures currently being voluntarily utilized by operators to provide the required information. For example, such information could include, as appropriate and to the best of the operator's knowledge: identification of the number of tourists put ashore at each site, the number and location of each landing site, the total number of tourists at each site per ship and for the season; the number of times the site has been visited in the past; the number of times the site is expected to be visited in the forthcoming season; the times of the year that visits are expected to occur (e.g., before, during, or after the penguin breeding season); the number of visitors expected to be put ashore at the site at any one time and over the course of a particular visit; what visitors are expected to do while at the site; verification that guidelines for tourists are followed; description of any tourist exceptions to the landing guidelines; and a description of any activity requiring mitigation, the mitigative actions undertaken, and the actual or projected outcome of the mitigation.

These regulations do not set out detailed monitoring procedures for activities requiring a CEE because the Parties are still working to identify monitoring approaches that can best support the Protocol's implementation. Thus, should an activity require a CEE, the operator should consult with EPA to: (a) Identify the monitoring regime appropriate to that activity, and (b) determine whether and how the operator might utilize relevant monitoring data collected by the U.S. Antarctic Program. The EPA would consult with the National Science Foundation and other interested federal agencies regarding this monitoring regime.

E. Incorporation of Information, Consolidation of Environmental Documentation, Waiver or Modification of Deadlines, and Provision for Multi-Year Environmental Documentation

The EPA is strongly committed to minimizing unnecessary paperwork and to implementation of these regulations such that undue burden is not placed on operators, particularly in view of the time requirements associated with environmental documentation requirements. Therefore, provided that documentation complies with all applicable provisions of Annex I to the Protocol and these regulations, and, provided that the environmental documentation is appropriate in light of the specific circumstances of each operator's expedition or expeditions, the EPA will allow the following approaches to documentation: (1) Material may be incorporated by

referring to it in the environmental document with its content briefly described when the cited material is reasonably available to the EPA; (2) more than one proposed expedition by an operator may be included within one environmental document and may, if appropriate, include a single discussion of components of the environmental analysis that are applicable to some or all of the proposed expeditions; (3) one environmental document may also be used to address expeditions being carried out by more than one operator, provided that the environmental documentation includes the names of each operator for which the environmental documentation is being submitted pursuant to obligations under these regulations; and (4) one environmental document may be submitted by one or more operators for proposed expeditions for a period of up to five consecutive austral summer seasons, provided that the conditions described in the multi-year environmental document, including the assessment of cumulative impacts, are unchanged. The multi-year provision also allows operators to update basic information and to provide information on additional activities to supplement the multi-year environmental document without having to revise and re-submit the entire document. Further, the EPA may waive or modify the deadlines of these regulations where EPA determines an operator is acting in good faith and that circumstances outside the control of the operator created delays, provided that environmental documentation fully meets deadlines under the Protocol. The multi-year documentation provision was recommended to EPA during the scoping process and was considered in the DEIS prepared by EPA.

F. Submission of Environmental Documents

The operator must submit five copies of its environmental documentation, along with an electronic copy in HTML format, if available, to the EPA by mail at: U.S. Environmental Protection Agency; Office of Federal Activities; Director, NEPA Compliance Division—Mail Code 2252A; 1200 Pennsylvania Avenue, NW; Washington, DC 20460.

Environmental documents may also be sent by special delivery (Federal Express, United Parcel Service, etc.) or hand-carried to: U.S. Environmental Protection Agency; Office of Federal Activities; Director, NEPA Compliance Division—Room 7239A; Ariel Rios Building; 1200 Pennsylvania Avenue, NW; Washington, DC 20004.

An operator may submit environmental documentation at an earlier date than required by this final rule. The EPA review process, including notification for public review and comment, will commence with the submittal of environmental documentation and will follow deadlines for response indicated in the appropriate sections of this rule.

G. Prohibited Acts, Enforcement and Penalties

It is unlawful for any operator to violate these regulations. An operator who violates any of these regulations will be subject to enforcement proceedings, which may include civil and criminal enforcement proceedings, and penalties, pursuant to sections 7,8, and 9 of the Antarctic Conservation Act, as amended by the Act; 16 U.S.C. 2407, 2408, 2409, and 45 CFR part 672.

H. Provision for Categorical Exclusions

The National Environmental Policy Act defines 'categorical exclusion' as "a category of actions which do not individually or cumulatively have a significant effect on the human environment * * * and for which, therefore, neither an environmental assessment nor an environmental impact statement is required" (40 CFR 1508.4). Only narrow and specific classes of activities can be categorically excluded from environmental review. For example, EPA in its NEPA regulations at 40 CFR 6.107(d) excludes * * * actions which are solely directed toward minor rehabilitation of existing facilities * * * and the National Science Foundation in its environmental assessment regulations at 45 CFR 641(c)(1) and (2) excludes certain scientific activities (e.g., use of weather/research balloons that are to be retrieved) and interior remodeling and renovation of existing facilities. The DEIS considered a modification that would add a provision for categorical exclusion. The DEIS noted that the International Association of Antarctica Tour Operators (IAATO) recommended that Antarctic ship-based tourism organized under the "Lindblad Model" be categorically excluded. However, EPA does not have a specific definition for the "Lindblad Model." EPA also believes that a broad categorical exclusion covering ship-based tourism as now conducted does not fit well with the approach used by the U.S. government for categorical exclusions because it does not identify actions to be excluded in sufficient detail. Further, more needs to be known about potential cumulative impacts of nongovernmental activities undertaken by U.S.-based ship-based tour operators before deciding to exclude some or all of these specific activities. In the Preamble to the proposed rule, EPA requested comments on specific activities that the Agency should consider including as categorical exclusions in the final rule including the justification for this proposed designation. EPA did not receive any such comments, therefore, the final rule does not include a provision for categorical exclusions. However, if categorical exclusion activities are identified in the future, the rule could be amended.

IV. Coordination of Review of Information Received From Other Parties to the Treaty

Article 6 of Annex I to the Protocol provides that the following information shall be circulated to the Parties, forwarded to the Committee for Environmental Protection, and made publicly available: (1) A description of national procedures for considering the environmental impacts of proposed activities; (2) an annual list of any IEEs and any decisions taken in consequence thereof; (3) significant information obtained and any action taken in consequence thereof with regard to monitoring from IEEs and CEEs; and (4) information in a final CEE. In addition, Article 6 requires that any IEE be made available on request, and Article 3 requires that draft CEEs be circulated to all Parties, who shall make them publicly available. A period of ninety (90) days is allowed for the receipt of comments. To implement these requirements of the Protocol, this rule sets out the process for circulation of this information within the United States.

Upon receipt of a CEE from another Party, the Department of State will publish notice of receipt in the **Federal Register** and will circulate a copy of the CEE to all interested federal agencies. The Department of State will coordinate responses from federal agencies to the CEE and will transmit the coordinated response, if any, to the Party that has circulated the CEE. The Department of State will make a copy of the CEE available upon request to the public. Members of the U.S. public should comment directly to the operator who has drafted the CEE and provide a copy to the EPA for its consideration.

Upon receipt of the annual list from another Party of IEEs prepared in accordance with Article 2 of Annex I and any decisions taken in consequence thereof, the Department of State will circulate a copy to all interested federal agencies. The Department of State will make a copy of any list of IEEs from other Parties prepared in accordance

with Article 2 and any decisions taken in consequence thereof available upon request to the public.

Upon receipt of a description of appropriate national procedures for environmental impact assessments from another Party, the Department of State will circulate a copy to all interested federal agencies. The Department of State will make such descriptions available upon request to the public.

Upon receipt from another Party of significant information obtained, and any action taken in consequence therefrom from procedures put in place with regard to monitoring pursuant to Articles 2(2) and 5 of Annex I to the Protocol, the Department of State will circulate a copy to all interested federal agencies. The Department of State will make a copy of this information available upon request to the public.

Upon receipt of a final CEE from another Party, the Department of State will circulate a copy to all interested federal agencies. The Department of State will make a copy available upon request to the public.

V. Administrative Requirements

A. Executive Order 12866 Clearance

Under Executive Order 12866, (58 FR 51735 (October 4, 1993)) the EPA must determine whether the regulatory action is "significant" and therefore subject to the Executive Order and to review by the Office of Management and Budget (OMB). The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of Executive Order 12866, it has been determined that this rule is a "significant regulatory action." This rule raises novel legal or policy issues arising out of legal mandates under Public Law 104–227, the Antarctic Science, Tourism, and Conservation Act of 1996 and the Protocol on Environmental Protection to the Antarctic Treaty of 1959. Accordingly, this action was submitted to OMB for review. Changes made in response to OMB suggestions or recommendations are documented in the public record.

B. Regulatory Flexibility Act (RFA), as Amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA, 5 U.S.C. 601 et seq.)

The RFA generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

For purposes of assessing the impacts of today's rule on small entities, small entity is defined as: (1) A small business as defined by the Small Business Administration with the North American Industry Classification System (NAICS) code for "Tour Operators" (NAICS code 561520) with maximum annual receipts of $5.0 million (13 CFR part 121); and (2) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field. Under the Antarctic Science, Tourism, and Conservation Act of 1996, governmental jurisdictions are not subject to this rulemaking.

For purposes of assessing the potential impacts of the rule on small entities, EPA assessed the potential impacts the rule may have on the U.S.-based operators regulated under the interim final rule, that is, those for which the United States provided advance notice under Paragraph 5 of Article VII of the Treaty for proposed nongovernmental expeditions organized in or proceeding from the U.S. to the Antarctic Treaty area during the austral summer season 2000–2001, and other U.S.-based operators included in such documentation. The screening assessment indicated that of the twelve operators, four would qualify as small entities under the Small Business Administration definition. EPA has estimated that these small entities have annual operating expenditures (small organization) or annual sales (small business) ranging from about $100,000 to about $4,600,000. Based on costs estimated under the interim final rule, EPA estimated the potential impact on these small entities to range from an average of about $1,400 to about $4,200 for the 5-year period a multi-year environmental document could be in effect; this represents an impact in the range of less than 1% to about 1.4%. Even if the small entities did not take advantage of the additional cost-saving alternative provided in the multi-year provision of the rule, the impact of the rule would range from an average of about $2,300 to $6,800 for the same 5-year period. Of the four small entities subject to today's rule, only one may be impacted significantly. Therefore, this rule will not impact a substantial number of small entities. Moreover, the potential impact on that small entity arguably is not significant. In addition, as discussed below, EPA included in today's rule cost-saving alternatives that are available to all operators, including small operators. Under the interim final rule, all operators made use of the cost-saving alternatives and EPA expects them to continue using these alternatives and the additional alternative included in today's rule.

The cost reduction provisions in this final rule include: (1) Material may be incorporated by referring to it in the environmental document with its content briefly described when the cited material is reasonably available to the EPA; (2) more than one proposed expedition by an operator may be included within one environmental document and may, if appropriate, include a single discussion of components of the environmental analysis which are applicable to some or all of the proposed expeditions; (3) one environmental document may also be used to address expeditions being carried out by more than one operator, provided that the environmental documentation includes the names of each operator for which the environmental documentation is being submitted pursuant to obligations under these regulations; and (4) one environmental document may be submitted by one or more operators for proposed expeditions for a period of up to five consecutive austral summer seasons, provided that the conditions described in the multi-year environmental document, including the assessment of cumulative impacts, are unchanged. The multi-year provision also allows operators to update basic information and to provide information on additional activities to supplement the multi-year environmental document without having to revise and re-submit the entire document. Further, the EPA may waive or modify the deadlines of these regulations where EPA determines an operator is acting in good faith and that circumstances outside the control

of the operator created delays, provided that environmental documentation fully meets deadlines under the Protocol.

In determining whether a rule has a significant economic impact on a substantial number of small entities, the impact of concern is any significant adverse economic impact on small entities, since the primary purpose of the regulatory flexibility analysis is to identify and address regulatory alternatives "which minimize any significant economic impact of the rule on small entities." 5 U.S.C. 603 and 604. Thus, an agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, or otherwise has a positive economic effect on all of the small entities subject to the rule. The EPA believes that, because this rule only requires assessment of environmental impacts, the effects on any small entities will be limited primarily to the cost of preparing such an analysis and that the requirements are no greater than necessary to ensure that the United States will be in compliance with its international obligations under the Protocol and the Treaty. The costs are likely to be minimal because, in EPA's view, the types of activities currently being carried out typically will be unlikely to have impacts that are more than minor or transitory assuming that the activities will be carried out in accordance with the guidelines set forth in the ATCM Recommendation XVIII–1, Tourism and Non-Governmental Activities, the relevant provisions of other U.S. statutes, and Annexes II–V to the Protocol. Therefore, most activities will likely need only IEE documentation, the cost of which is minimal as shown in section VII, Paperwork Reduction Act. Further, EPA has included provisions in this final rule that are available to all respondents, including small entities, that will have a positive effect by minimizing the cost of such an analysis.

Therefore, after considering the economic impacts of today's final rule on small entities, I certify that this action will not have a significant economic impact on a substantial number of small entities.

C. Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures to State, local, and tribal governments, in the aggregate, or to the private sector, of $100 million or more in any one year.

Today's rule contains no Federal mandates for State, local, or tribal governments or the private sector. Furthermore, the UMRA does not apply to rules that are necessary for the national security or the ratification or implementation of international treaty obligations. These regulations are necessary to enable the United States to implement its obligations under the Protocol on Environmental Protection to the Antarctic Treaty of 1959. This rule does not apply to any governmental jurisdictions. For the private sector, there are currently less than 20 regulated operators and, because of the nature of business and the Antarctic location, this number is not expected to increase significantly. Moreover, as described in section V.B., above, this final rule provides alternatives that may be used by operators to reduce the burden and costs associated with the rule.

D. Paperwork Reduction Act

The Office of Management and Budget (OMB) has approved the information collection requirements contained in this rule under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* and has assigned OMB control number 2020–0007.

Public Law 104–227, the Antarctic Science, Tourism, and Conservation Act of 1996 (the Act) amends the Antarctic Conservation Act of 1978, 16 U.S.C. 2401 *et seq.*, to implement the provisions of the Protocol on Environmental Protection to the Antarctic Treaty of 1959. The Act provides that EPA must promulgate regulations to provide for the environmental impact assessment of nongovernmental activities, including tourism, for which the United States is required to give advance notice under Paragraph 5 of Article VII of the Treaty, and for coordination of the review of information regarding environmental impact assessment received from other Parties under the Protocol. This rule provides nongovernmental operators with the specific environmental documentation requirements they must meet in order to comply with the Protocol.

Nongovernmental operators, including tour operators, conducting expeditions to Antarctica are required to submit environmental documentation to EPA that evaluates the potential environmental impact of their proposed activities. If EPA has no comments, or if the documentation is satisfactorily revised in response to EPA's comments, and the operator does not receive a notice from EPA that the environmental documentation does not meet the requirements of Article 8 and Annex I of the Protocol and the provisions of these regulations, the operator would have no further obligations pursuant to the applicable requirements of these regulations provided that any appropriate measures, which may include monitoring, are put in place to assess and verify the impact of the activity. The type of environmental document required depends upon the nature and intensity of the environmental impacts that could result from the activity under consideration. Nongovernmental operators would be able to use the following approaches for submission of the environmental documentation required under the final rule: (1) Material may be incorporated by referring to it in the environmental document with its content briefly described when the cited material is reasonably available to the EPA; (2) more than one proposed expedition by an operator may be included within one environmental document and may, if appropriate, include a single discussion of components of the environmental analysis which are applicable to some or all of the proposed expeditions; (3) one environmental document may also be used to address expeditions being carried out by more than one operator, provided that the environmental documentation includes the names of each operator for which the environmental documentation is being submitted pursuant to obligations under these regulations; and (4) one environmental document may be submitted by one or more operators for proposed expeditions for a period of up to five consecutive austral summer seasons, provided that the conditions described in the multi-year environmental document, including the assessment of cumulative impacts, are unchanged. The multi-year provision also allows operators to update basic information and to provide information on additional activities to supplement the multi-year environmental document without having to revise and re-submit the entire document. EPA anticipates that operators will make one submittal per year for all of their expeditions for that year and that most operators will be able to use the multi-year environmental documentation provision. EPA does not expect or anticipate receipt of any confidential information. No capital costs or operational and maintenance

costs are anticipated to be incurred as a result of this ICR.

Frequency of Reporting: Once per year.

Affected Public: Businesses, other nongovernmental entities including for profit entities, and not-for-profit institutions.

Number of Respondents: 13 to 14.

Estimated Average Time Per Respondent: 29 to 185 Hours depending on the anticipated level of environmental documentation and the paperwork reduction provisions employed by the respondent.

Total Annual Burden Hours: 377 to 562 Hours depending on the anticipated level of environmental documentation and the paperwork reduction provisions employed by the respondent.

Estimated Average Cost Per Respondent To Prepare and Submit Environmental Documentation for the First Year: $2,668 to $13,405 depending on the anticipated level of environmental documentation and the paperwork reduction provisions employed by the respondent.

Estimated Average Cost Per Respondent To Prepare and Submit Environmental Documentation for Subsequent Years: $1,844 to $14,117 depending on the anticipated level of environmental documentation and the paperwork reduction provisions employed by the respondent.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

E. National Technology Transfer and Advancement Act of 1995 ("NTTAA"), Public Law 104–113, Section 12(d) (15 U.S.C. 272 note)

As noted in the proposed rule, section 12(d) of the National Technology Transfer and Advancement Act of 1995 ("NTTAA"), Public Law 104–113, section 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards. This rulemaking does not involve technical standards.

F. Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, 56 FR 7629 (1994), requires each Federal agency, to the greatest extent practicable and permitted by law, to make achieving environmental justice part of its mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minority or low-income populations, including Indian tribes. The provisions of Executive Order 12898 do not apply to this regulatory action because it does not have any effects on minority or low income populations.

G. Executive Order 13132, Federalism

Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government."

This final rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. No governmental jurisdictions including Federal, State, local and tribal governments are subject to this rulemaking. Thus, Executive Order 13132 does not apply to this rule.

H. Executive Order 13175, Consultation and Coordination with Tribal Governments

Executive Order 13175 took effect on January 6, 2001, and revoked Executive Order 13084 (Tribal Consultation) as of that date. EPA developed the proposed rule, however, during the period when Executive Order 13084 was in effect. Thus, EPA addressed tribal considerations under Executive Order 13084. Executive Order 13175, Consultation and Coordination with Tribal Governments, requires federal agencies to adhere to certain fundamental principles and policy making criteria when formulating or implementing policies with tribal implications and to establish a process to ensure that tribal officials have the opportunity to provide meaningful and timely input into regulatory policies that have tribal implications. Tribal governments are not subject to this rulemaking. Thus, neither Executive Order 13084 nor Executive Order 13175 apply to this rule.

I. Executive Order 13045, Protection of Children From Environmental Health Risks and Safety Risks

Executive Order 13045, "Protection of Children from Environmental Health Risks and Safety Risks," (62 FR 19885, April 23, 1997) applies to any rule that: (1) is determined to be "economically significant" as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency. This final rule is not subject to Executive Order 13045 because it does not establish an environmental standard intended to mitigate health or safety risks.

J. Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution and Use

Executive Order 13211 requires federal agencies to prepare a Statement of Energy Effects and to submit such statements to the Office of Management and Budget. This final rule is not subject to Executive Order 13211 because it does not significantly affect energy supply, distribution or use.

K. Submission to Congress and the Comptroller General of the United States

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that, before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2). This rule will be effective on January 7, 2002.

List of Subjects in 40 CFR Part 8

Environmental protection, Antarctica, Environmental impact statements, Penalties, Reporting and recordkeeping requirements.

Dated: November 29, 2001.

Christine Todd Whitman,

Administrator.

Therefore, for the reasons set forth in the Preamble, EPA hereby amends title 40 chapter 1 of the Code of Federal Regulations by revising part 8 to read as follows:

PART 8—ENVIRONMENTAL IMPACT ASSESSMENT OF NONGOVERNMENTAL ACTIVITIES IN ANTARCTICA

Sec.

8.1 Purpose.
8.2 Applicability and effect.
8.3 Definitions.
8.4 Preparation of environmental documents, generally.
8.5 Submission of environmental documents.
8.6 Preliminary environmental review.
8.7 Initial environmental evaluation.
8.8 Comprehensive environmental evaluation.
8.9 Measures to assess and verify environmental impacts.
8.10 Cases of emergency.
8.11 Prohibited acts, enforcement and penalties.
8.12 Coordination of reviews from other Parties.

Authority: 16 U.S.C. 2401 *et seq.*, as amended, 16 U.S.C. 2403a.

§ 8.1 Purpose.

(a) This part is issued pursuant to the Antarctic Science, Tourism, and Conservation Act of 1996. As provided in that Act, this part implements the requirements of Article 8 and Annex I to the Protocol on Environmental Protection to the Antarctic Treaty of 1959 and provides for:

(1) The environmental impact assessment of nongovernmental activities, including tourism, for which the United States is required to give advance notice under paragraph 5 of Article VII of the Antarctic Treaty of 1959; and

(2) Coordination of the review of information regarding environmental impact assessment received by the United States from other Parties under the Protocol.

(b) The procedures in this part are designed to: ensure that nongovernmental operators identify and assess the potential impacts of their proposed activities, including tourism, on the Antarctic environment; that operators consider these impacts in deciding whether or how to proceed with proposed activities; and that operators provide environmental documentation pursuant to the Act and Annex I of the Protocol. These procedures are consistent with and implement the environmental impact assessment provisions of Article 8 and Annex I to the Protocol on Environmental Protection to the Antarctic Treaty.

§ 8.2 Applicability and effect.

(a) This part is intended to ensure that potential environmental effects of nongovernmental activities undertaken in Antarctica are appropriately identified and considered by the operator during the planning process and that to the extent practicable, appropriate environmental safeguards which would mitigate or prevent adverse impacts on the Antarctic environment are identified by the operator.

(b) The requirements set forth in this part apply to nongovernmental activities for which the United States is required to give advance notice under paragraph 5 of Article VII of the Antarctic Treaty of 1959: All nongovernmental expeditions to and within Antarctica organized in or proceeding from its territory.

(c) This part does not apply to activities undertaken in the Antarctic Treaty area that are governed by the Convention on the Conservation of Antarctic Marine Living Resources or the Convention for the Conservation of Antarctic Seals. Persons traveling to Antarctica are subject to the requirements of the Marine Mammal Protection Act, 16 U.S.C. 1371 *et seq.*

§ 8.3 Definitions.

As used in this part:

Act means 16 U.S.C. 2401 *et seq.*, Public Law 104–227, the Antarctic Science, Tourism, and Conservation Act of 1996.

Annex I refers to Annex I, Environmental Impact Assessment, of the Protocol.

Antarctic environment means the natural and physical environment of Antarctica and its dependent and associated ecosystems, but excludes social, economic, and other environments.

Antarctic Treaty area means the area south of 60 degrees south latitude.

Antarctic Treaty Consultative Meeting (ATCM) means a meeting of the Parties to the Antarctic Treaty, held pursuant to Article IX(1) of the Treaty.

Antarctica means the Antarctic Treaty area; i.e., the area south of 60 degrees south latitude.

Comprehensive Environmental Evaluation (CEE) means a study of the reasonably foreseeable potential effects of a proposed activity on the Antarctic environment, prepared in accordance with the provisions of this part and includes all comments received thereon. (See: § 8.8.)

Environmental document or environmental documentation (Document) means a preliminary environmental review memorandum, an initial environmental evaluation, or a comprehensive environmental evaluation.

Environmental impact assessment (EIA) means the environmental review process required by the provisions of this part and by Annex I of the Protocol, and includes preparation by the operator and U.S. government review of an environmental document, and public access to and circulation of environmental documents to other Parties and the Committee on Environmental Protection as required by Annex I of the Protocol.

EPA means the Environmental Protection Agency.

Expedition means any activity undertaken by one or more nongovernmental persons organized

within or proceeding from the United States to or within the Antarctic Treaty area for which advance notification is required under Paragraph 5 of Article VII of the Treaty.

Impact means impact on the Antarctic environment and dependent and associated ecosystems.

Initial Environmental Evaluation (IEE) means a study of the reasonably foreseeable potential effects of a proposed activity on the Antarctic environment prepared in accordance with § 8.7.

More than a minor or transitory impact has the same meaning as the term "significantly" as defined in regulations under the National Environmental Policy Act at 40 CFR 1508.27.

Operator or *operators* means any person or persons organizing a nongovernmental expedition to or within Antarctica.

Person has the meaning given that term in section 1 of title 1, United States code, and includes any person subject to the jurisdiction of the United States except that the term does not include any department, agency, or other instrumentality of the Federal Government.

Preliminary environmental review means the environmental review described under that term in § 8.6.

Preliminary Environmental Review Memorandum (PERM) means the documentation supporting the conclusion of the preliminary environmental review that the impact of a proposed activity will be less than minor or transitory on the Antarctic environment.

Protocol means the Protocol on Environmental Protection to the Antarctic Treaty, done at Madrid October 4, 1991, and all annexes thereto which are in force for the United States.

This part means 40 CFR part 8.

§ 8.4 Preparation of environmental documents, generally.

(a) *Basic information requirements.* In addition to the information required pursuant to other sections of this part, all environmental documents shall contain the following:

(1) The name, mailing address, and phone number of the operator;

(2) The anticipated date(s) of departure of each expedition to Antarctica;

(3) An estimate of the number of persons in each expedition;

(4) The means of conveyance of expedition(s) to and within Antarctica;

(5) Estimated length of stay of each expedition in Antarctica;

(6) Information on proposed landing sites in Antarctica; and

(7) Information concerning training of staff, supervision of expedition members, and what other measures, if any, that will be taken to avoid or minimize possible environmental impacts.

(b) *Preparation of an environmental document.* Unless an operator determines and documents that a proposed activity will have less than a minor or transitory impact on the Antarctic environment, the operator will prepare an IEE or CEE in accordance with this part. In making the determination what level of environmental documentation is appropriate, the operator should consider, as applicable, whether and to what degree the proposed activity:

(1) Has the potential to adversely affect the Antarctic environment;

(2) May adversely affect climate or weather patterns;

(3) May adversely affect air or water quality;

(4) May affect atmospheric, terrestrial (including aquatic), glacial, or marine environments;

(5) May detrimentally affect the distribution, abundance, or productivity of species, or populations of species of fauna and flora;

(6) May further jeopardize endangered or threatened species or populations of such species;

(7) May degrade, or pose substantial risk to, areas of biological, scientific, historic, aesthetic, or wilderness significance;

(8) Has highly uncertain environmental effects, or involves unique or unknown environmental risks; or

(9) Together with other activities, the effects of any one of which is individually insignificant, may have at least minor or transitory cumulative environmental effects.

(c) *Type of environmental document.* The type of environmental document required under this part depends upon the nature and intensity of the environmental impacts that could result from the activity under consideration. A PERM must be prepared by the operator to document the conclusion of the operator's preliminary environmental review that the impact of a proposed activity on the Antarctic environment will be less than minor or transitory. (See § 8.6.) An IEE must be prepared by the operator for proposed activities which may have at least (but no more than) a minor or transitory impact on the Antarctic environment. (See § 8.7.) A CEE must be prepared by the operator if an IEE indicates, or if it is otherwise determined, that a proposed activity is likely to have more than a minor or transitory impact on the Antarctic environment (See § 8.8.)

(d) *Incorporation of information, consolidation of environmental documentation, and multi-year environmental documentation.* (1) An operator may incorporate material into an environmental document by referring to it in the document when the effect will be to reduce paperwork without impeding the review of the environmental document by EPA and other federal agencies. The incorporated material shall be cited and its content briefly described. No material may be incorporated by referring to it in the document unless it is reasonably available to the EPA.

(2) Provided that environmental documentation complies with all applicable provisions of Annex I to the Protocol and this part and is appropriate in light of the specific circumstances of the operator's proposed expedition or expeditions, an operator may include more than one proposed expedition within one environmental document and one environmental document may also be used to address expeditions being carried out by more than one operator provided that the environmental document indicates the names of each operator for which the environmental documentation is being submitted pursuant to obligations under this part.

(e) *Multi-year environmental documentation.* (1) Provided that environmental documentation complies with all applicable provisions of Annex I to the Protocol and this part, an operator may submit environmental documentation for proposed expeditions for a period of up to five consecutive austral summer seasons, provided that the conditions described in the multi-year environmental document, including the assessment of cumulative impacts, are unchanged and meets the provisions of paragraphs (e)(1) (i) through (iii) of this section.

(i) The operator shall identify the environmental documentation submitted for multi-year documentation purposes in the first year it is submitted. If the operator, or operators, fail to make this initial identification to EPA. this provision shall not be in effect although subsequent years' submissions by the operator, or operators, may use this environmental documentation as provided in paragraphs (d) (1) and (2) of this section.

(ii) In subsequent years, up to a total maximum of five years, the operator, or operators, shall reference the multi-year documentation identified initially if it is necessary to update the basic

information requirements listed in paragraph (a) of this section.

(iii) An operator, or operators, may supplement a multi-year environmental document for an additional activity or activities by providing information regarding the proposed activity in accordance with the appropriate provisions of this part. The operator, or operators, shall identify this submission as a proposed supplement to the multi-year documentation in effect. Addition of the supplemental information shall not extend the period of the multi-year environmental documentation beyond the time period associated with the documentation as originally submitted.

(2) Multi-year environmental documentation may include more than one proposed expedition within the environmental document and the multi-year environmental document may also be used to address expeditions being carried out by more than one operator provided that the environmental document indicates the names of each operator for which the environmental documentation is being submitted pursuant to obligations under this part.

(3) The schedules for multi-year environmental documentation depend on the level of the environmental document and shall be the same as the schedules for comparable environmental documentation submitted on an annual basis; *e.g.*, a multi-year PERM shall comply with the schedule in § 8.6, a multi-year IEE shall comply with the schedule in § 8.7, and a multi-year CEE shall comply with the schedule in § 8.8. These schedules apply to the operator's submission of the initial multi-year environmental document; the operator's subsequent annual submissions pursuant to paragraphs (e)(1) (ii) and (iii) of this section; EPA's review, in consultation with other interested federal agencies, and comment on the multi-year environmental documentation and subsequent annual submissions; and a finding the EPA may make, with the concurrence of the National Science Foundation, that the environmental documentation submitted does not meet the requirements of Article 8 and Annex I of the Protocol and the provisions of this part.

§ 8.5 Submission of environmental documents.

(a) An operator shall submit environmental documentation to the EPA for review. The EPA, in consultation with other interested federal agencies, will carry out a review to determine if the submitted environmental documentation meets the requirements of Article 8 and Annex I of the Protocol and the provisions of this part. The EPA will provide its comments, if any, on the environmental documentation to the operator and will consult with the operator regarding any suggested revisions. If EPA has no comments, or if the documentation is satisfactorily revised in response to EPA's comments, and the operator does not receive a notice from EPA that the environmental documentation does not meet the requirements of Article 8 and Annex I of the Protocol and the provisions of this part, the operator will have no further obligations pursuant to the applicable requirements of this part provided that any appropriate measures, which may include monitoring, are put in place to assess and verify the impact of the activity. Alternatively, following final response from the operator, the EPA, in consultation with other federal agencies and with the concurrence of the National Science Foundation, will inform the operator that EPA finds that the environmental documentation does not meet the requirements of Article 8 and Annex I of the Protocol and the provisions of this part. If the operator then proceeds with the expedition without fulfilling the requirements of this part, the operator is subject to enforcement proceedings pursuant to sections 7, 8, and 9 of the Antarctic Conservation Act, as amended by the Act; 16 U.S.C. 2407, 2408, 2409, and 45 CFR part 672.

(b) The EPA may waive or modify deadlines pursuant to this part where EPA determines an operator is acting in good faith and that circumstances outside the control of the operator created delays, provided that the environmental documentation fully meets deadlines under the Protocol.

§ 8.6 Preliminary environmental review.

(a) Unless an operator has determined to prepare an IEE or CEE, the operator shall conduct a preliminary environmental review that assesses the potential direct and reasonably foreseeable indirect impacts on the Antarctic environment of the proposed expedition. A Preliminary Environmental Review Memorandum (PERM) shall contain sufficient detail to assess whether the proposed activity may have less than a minor or transitory impact, and shall be submitted to the EPA for review no less than 180 days before the proposed departure of the expedition. The EPA, in consultation with other interested federal agencies, will review the PERM to determine if it is sufficient to demonstrate that the activity will have less than a minor or transitory impact or whether additional environmental documentation, *i.e.*, an IEE or CEE, is required to meet the obligations of Article 8 and Annex I of the Protocol. The EPA will provide its comments to the operator within fifteen (15) days of receipt of the PERM, and the operator shall have seventy-five (75) days to prepare a revised PERM or an IEE, if necessary. Following the final response from the operator, EPA may make a finding that the environmental documentation submitted does not meet the requirements of Article 8 and Annex I of the Protocol and the provisions of this part. This finding will be made with the concurrence of the National Science Foundation. If EPA does not provide such notice within thirty (30) days, the operator will be deemed to have met the requirements of this part provided that any required procedures, which may include appropriate monitoring, are put in place to assess and verify the impact of the activity.

(b) If EPA recommends an IEE and one is prepared and submitted within the seventy-five (75) day response period, it will be reviewed under the time frames set out for an IEE in § 8.7. If EPA recommends a CEE and one is prepared, it will be reviewed under the time frames set out for a CEE in § 8.8.

§ 8.7 Initial environmental evaluation.

(a) *Submission of IEE to the EPA.* Unless a PERM has been submitted pursuant to § 8.6 which meets the environmental documentation requirements under Article 8 and Annex I to the Protocol and the provisions of this part or a CEE is being prepared, an IEE shall be submitted by the operator to the EPA no fewer than ninety (90) days before the proposed departure of the expedition.

(b) *Contents.* An IEE shall contain sufficient detail to assess whether a proposed activity may have more than a minor or transitory impact on the Antarctic environment and shall include the following information:

(1) A description of the proposed activity, including its purpose, location, duration, and intensity; and

(2) Consideration of alternatives to the proposed activity and any impacts that the proposed activity may have on the Antarctic environment, including consideration of cumulative impacts in light of existing and known proposed activities.

(c) *Further environmental review.* (1) The EPA, in consultation with other interested federal agencies, will review an IEE to determine whether the IEE meets the requirements under Annex I to the Protocol and the provisions of this part. The EPA will provide its comments to the operator within thirty (30) days of receipt of the IEE, and the

operator will have forty-five (45) days to prepare a revised IEE, if necessary. Following the final response from the operator, EPA may make a finding that the documentation submitted does not meet the requirements of Article 8 and Annex I of the Protocol and the provisions of this part. This finding will be made with the concurrence of the National Science Foundation. If such a notice is required, EPA will provide it within fifteen (15) days of receiving the final IEE from the operator or, if the operator does not provide a final IEE, within sixty (60) days following EPA's comments on the original IEE. If EPA does not provide notice within these time limits, the operator will be deemed to have met the requirements of this part provided that any required procedures, which may include appropriate monitoring, are put in place to assess and verify the impact of the activity.

(2) If a CEE is required, the operator must adhere to the time limits applicable to such documentation. (See: § 8.8.) In this event EPA, at the operator's request, will consult with the operator regarding possible changes in the proposed activity which would allow preparation of an IEE.

§ 8.8 Comprehensive environmental evaluation.

(a) *Preparation of a CEE.* Unless a PERM or an IEE has been submitted and determined to meet the environmental documentation requirements of this part, the operator shall prepare a CEE. A CEE shall contain sufficient information to enable informed consideration of the reasonably foreseeable potential environmental effects of a proposed activity and possible alternatives to that proposed activity. A CEE shall include the following:

(1) A description of the proposed activity, including its purpose, location, duration and intensity, and possible alternatives to the activity, including the alternative of not proceeding, and the consequences of those alternatives;

(2) A description of the initial environmental reference state with which predicted changes are to be compared and a prediction of the future environmental reference state in the absence of the proposed activity;

(3) A description of the methods and data used to forecast the impacts of the proposed activity;

(4) Estimation of the nature, extent, duration and intensity of the likely direct impacts of the proposed activity;

(5) A consideration of possible indirect or second order impacts from the proposed activity;

(6) A consideration of cumulative impacts of the proposed activity in light of existing activities and other known planned activities;

(7) Identification of measures, including monitoring programs, that could be taken to minimize or mitigate impacts of the proposed activity and to detect unforeseen impacts and that could provide early warning of any adverse effects of the activity as well as to deal promptly and effectively with accidents;

(8) Identification of unavoidable impacts of the proposed activity;

(9) Consideration of the effects of the proposed activity on the conduct of scientific research and on other existing uses and values;

(10) An identification of gaps in knowledge and uncertainties encountered in compiling the information required under this section;

(11) A non-technical summary of the information provided under this section; and

(12) The name and address of the person or organization which prepared the CEE and the address to which comments thereon should be directed.

(b) *Submission of Draft CEE to the EPA and Circulation to Other Parties.* (1) Any operator who plans a nongovernmental expedition that would require a CEE must submit a draft of the CEE by December 1 of the preceding year. Within fifteen (15) days of receipt of the draft CEE, EPA will: send it to the Department of State which will circulate it to all Parties to the Protocol and forward it to the Committee for Environmental Protection established by the Protocol, and publish notice of receipt of the CEE and request for comments on the CEE in the **Federal Register**, and will provide copies to any person upon request. The EPA will accept public comments on the CEE for a period of ninety (90) days following notice in the **Federal Register**. The EPA, in consultation with other interested federal agencies, will evaluate the CEE to determine if the CEE meets the requirements under Article 8 and Annex I to the Protocol and the provisions of this part and will transmit its comments to the operator within 120 days following publication in the **Federal Register** of the notice of availability of the CEE.

(2) The operator shall send a final CEE to EPA at least seventy-five (75) days before commencement of the proposed activity in the Antarctic Treaty area. The CEE must address and must include (or summarize) any comments on the draft CEE received from EPA, the public, and the Parties. Following the final response from the operator, the EPA will inform the operator if EPA, with the concurrence of the National Science Foundation, makes the finding that the environmental documentation submitted does not meet the requirements of Article 8 and Annex I of the Protocol and the provisions of this part. This notification will occur within fifteen (15) days of submittal of the final CEE by the operator if the final CEE is submitted by the operator within the time limits set out in this section. If no final CEE is submitted or the operator fails to meet these time limits, EPA will provide such notification sixty (60) days prior to departure of the expedition. If EPA does not provide such notice, the operator will be deemed to have met the requirements of this part provided that procedures, which include appropriate monitoring, are put in place to assess and verify the impact of the activity. The EPA will transmit the CEE, along with a notice of any decisions by the operator relating thereto, to the Department of State which shall circulate it to all Parties no later than sixty (60) days before commencement of the proposed activity in the Antarctic Treaty area. The EPA will also publish a notice of availability of the final CEE in the **Federal Register**.

(3) No final decision shall be taken to proceed with any activity for which a CEE is prepared unless there has been an opportunity for consideration of the draft CEE by the Antarctic Treaty Consultative Meeting on the advice of the Committee for Environmental Protection, provided that no expedition need be delayed through the operation of paragraph 5 of Article 3 to Annex I of the Protocol for longer than 15 months from the date of circulation of the draft CEE.

(c) *Decisions based on CEE.* The decision to proceed, based on environmental documentation that meets the requirements under Article 8 and Annex I to the Protocol and the provisions of this part, rests with the operator. Any decision by an operator on whether to proceed with or modify a proposed activity for which a CEE was required shall be based on the CEE and other relevant considerations.

§ 8.9 Measures to assess and verify environmental impacts.

(a) The operator shall conduct appropriate monitoring of key environmental indicators as proposed in the CEE to assess and verify the potential environmental impacts of activities which are the subject of a CEE. The operator may also need to carry out monitoring in order to assess and verify the impact of an activity for which an IEE has been prepared.

(b) All proposed activities for which an IEE or CEE has been prepared shall include procedures designed to provide a regular and verifiable record of the impacts of these activities, in order, *inter alia*, to:

(1) Enable assessments to be made of the extent to which such impacts are consistent with the Protocol; and

(2) Provide information useful for minimizing and mitigating those impacts, and, where appropriate, information on the need for suspension, cancellation, or modification of the activity.

§ 8.10 Cases of emergency.

This part shall not apply to activities taken in cases of emergency relating to the safety of human life or of ships. aircraft, equipment and facilities of high value, or the protection of the environment, which require an activity to be undertaken without completion of the procedures set out in this part. Notice of any such activities which would have otherwise required the preparation of a CEE shall be provided within fifteen (15) days to the Department of State, as provided in this paragraph, for circulation to all Parties to the Protocol and to the Committee on Environmental Protection, and a full explanation of the activities carried out shall be provided within forty-five (45) days of those activities. Notification shall be provided to: The Director, The Office of Oceans Affairs, OES/OA, Room 5805, Department of State, 2201 C Street, NW, Washington, DC 20520–7818.

§ 8.11 Prohibited acts, enforcement and penalties.

(a) It shall be unlawful for any operator to violate this part.

(b) An operator who violates any of this part is subject to enforcement, which may include civil and criminal enforcement proceedings, and penalties, pursuant to sections 7,8, and 9 of the Antarctic Conservation Act, as amended by the Act; 16 U.S.C. 2407, 2408, 2409, and 45 CFR part 672.

§ 8.12 Coordination of reviews from other Parties.

(a) Upon receipt of a draft CEE from another Party, the Department of State shall publish notice in the **Federal Register** and shall circulate a copy of the CEE to all interested federal agencies. The Department of State shall coordinate responses from federal agencies to the CEE and shall transmit the coordinated response to the Party which has circulated the CEE. The Department of State shall make a copy of the CEE available upon request to the public.

(b) Upon receipt of the annual list of IEEs from another Party prepared in accordance with Article 2 of Annex I and any decisions taken in consequence thereof, the Department of State shall circulate a copy to all interested federal agencies. The Department of State shall make a copy of the list of IEEs prepared in accordance with Article 2 and any decisions taken in consequence thereof available upon request to the public.

(c) Upon receipt of a description of appropriate national procedures for environmental impact assessments from another Party, the Department of State shall circulate a copy to all interested federal agencies. The Department of State shall make a copy of these descriptions available upon request to the public.

(d) Upon receipt from another Party of significant information obtained, and any action taken in consequence therefrom from procedures put in place with regard to monitoring pursuant to Articles 2(2) and 5 of Annex I to the Protocol, the Department of State shall circulate a copy to all interested federal agencies. The Department of State shall make a copy of this information available upon request to the public.

(e) Upon receipt from another Party of a final CEE, the Department of State shall circulate a copy to all interested federal agencies. The Department of State shall make a copy available upon request to the public.

14 CFR Parts 107 and 108
Criminal History Records Checks; Final Rule

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 107 and 108

[Docket No. FAA–2001–10999; Amdt. Nos. 107–14 and 108–19]

RIN 2120–AH53

Criminal History Records Checks

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This rule requires each airport operator and aircraft operator that has adopted a security program under part 107 or part 108, respectively, to conduct fingerprint-based criminal history record checks (CHRC's) for individuals if they have not already undergone CHRC's. The rule applies to those who either have, or apply for: Unescorted access authority to the Security Identification Display Area (SIDA) of an airport; authority to authorize others to have unescorted access; and screening functions. The rule is needed because the FAA has determined that the current employment investigation method is not adequate. The rule will ensure that individuals in these positions do not have disqualifying criminal offenses.

DATES: This rule is effective December 6, 2001. Submit comments by January 7, 2002.

ADDRESSES: Address your comments to the Docket Management System, U.S. Department of Transportation, Room Plaza 401, 400 Seventh Street, SW, Washington, DC 20590. You must identify the docket number FAA–2001–10999 at the beginning of your comments, and you should submit two copies of your comments. If you wish to receive confirmation that the FAA received your comments, include a self-addressed, stamped postcard. You may also submit comments through the Internet to *http://dms.dot.gov.*

You may review the public docket containing comments to these proposed regulations in person in the Dockets Office between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. The Dockets Office is on the plaza level of the NASSIF Building at the Department of Transportation at the above address. Also, you may review public dockets on the Internet at http://dms.dot.gov.

FOR FURTHER INFORMATION CONTACT: Linda Valencia, Office of Civil Aviation Security Policy and Planning, Civil Aviation Security Division (ACP–100), Federal Aviation Administration, 800 Independence Ave., SW, Washington, DC 20591; telephone 202–267–3413.

SUPPLEMENTARY INFORMATION:

Comments Invited

This final rule is being adopted without prior notice and prior public comment. The Regulatory Policies and Procedures of the Department of Transportation (DOT) (44 FR 1134; Feb. 26, 1979), however provides that, to the maximum extent possible, operating administrations for the DOT should provide an opportunity for public comment on regulations issued without prior notice. Accordingly, interested persons are invited to participate in this rulemaking by submitting written data, views, or arguments. Comments relating to environmental, energy, federalism, or international trade impacts that might result from this amendment also are invited. Comments must include the regulatory docket or amendment number and must be submitted in duplicate to the address above. All comments received, as well as a report summarizing each substantive public contact with FAA personnel on this rulemaking, will be filed in the public docket. The docket is available for public inspection before and after the comment closing date.

The FAA will consider all comments received on or before the closing date for comments. Late-filed comments will be considered to the extent practicable. This final rule may be amended in light of the comments received.

See **ADDRESSES** above for information on how to submit comments.

Availability of Final Rule

You can get an electronic copy using the Internet by taking the following steps:

(1) Go to search function of the Department of Transportation's electronic Docket Management System (DMS) Web page (*http://dms.dot.gov/search*).

(2) On the search page type in the last four digits of the Docket number shown at the beginning of this notice. Click on "search."

(3) On the next page, which contains the Docket summary information for the Docket you selected, click on the final rule.

You can also get an electronic copy using the Internet through FAA's web page at *http://www.faa.gov/avr/arnhome.htm* or the Office of the Federal Register's web page at *http://www.access.gpo.gov/su_docs/aces/aces140html.*

You can also get a copy by submitting a request to the Federal Aviation Administration, Office of Rulemaking, ARM–1, 800 Independence Avenue, SW, Washington, DC 20591, or by calling (202) 267–9680. Make sure to identify the amendment number or docket number of this final rule.

Small Entity Inquiries

The Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996 requires the FAA to comply with small entity requests for information advice about compliance with statutes and regulations within the FAA's jurisdiction. Therefore, any small entity that has a question regarding this document may contact its local FAA official. Internet users can find additional information on SBREFA on the FAA's web page at http:www.faa.gov/avr/arm/sbrefa.htm and send electronic inquiries to the following Internet address: *9-AWA-SBREFA@faa.gov.*

SIDA—Security Identification Display Area

Background

In the wake of the September 11, 2001, terrorist attacks against four U.S. commercial aircraft resulting in the tragic loss of human life at the World Trade Center, the Pentagon, and southwest Pennsylvania, the potential for additional terrorist attacks exists. Those responsible for the attacks are believed to be affiliated with an organization possessing a near-global terrorist network. The leaders of the groups constituting this organization have publicly stated they will attack the United States for incarcerating their members and are vehemently opposed to U.S. foreign policy and presence in the Middle East. They retain a capability and willingness to conduct airline bombings, hijackings, and suicide attacks against U.S. targets. These attacks also indicate that the terrorists are willing to use aircraft as weapons to inflict significant damage on persons and property in the United States. Given the resources and reach of the organization, it is likely that it has sought or will seek to place members in

positions at airports to facilitate future attacks, or that it will attempt to co-opt individuals already in such positions. It should be underscored that, although other potential threats to U.S. civil aviation may be overshadowed at present, they have not disappeared. The uncertain course of the Middle East peace process involving Israel and the Palestinians, negative reactions to the U.S.-led military campaign in Afghanistan, and Iraqi opportunism in response to continued United Nations sanctions are among the developments that could give rise to attacks by groups or individuals not linked to the September 11 atrocities.

Since 1996, the FAA has required airport operators and aircraft operators to conduct checks on certain individuals to prevent individuals from working in those positions if they have a history of certain criminal convictions. See 14 CFR 107.31 and 108.33 (1997). Most of these checks include a 10-year employment investigation. If the employment investigation reveals one of four triggers listed in the rules, such as a 12-month gap in employment that is not satisfactorily explained, the investigation must include a Federal Bureau of Investigation (FBI) criminal history records check (CHRC) that is based on fingerprints of the individual. If the employment investigation or CHRC reveals a conviction in the 10 years before the investigation for one or more of the crimes listed in the regulations, the individual may not serve in the specified positions.

As discussed below, the Administrator has determined that the current employment investigation method is not adequate. This rule requires that all employees in the specified positions undergo a CHRC based on their fingerprints.

Title 14 of the Code of Federal Regulations (CFR) part 107 prescribes security requirements for airport operators that must adopt and carry out an FAA-approved security program. The airport operators' responsibilities include the security of the Security Identification Display Area (SIDA). The SIDA is an area of an airport in which individuals who have unescorted access authority must display approved identification media (ID). It includes the areas near the terminal where aircraft taxi, and other areas as necessary for security. See 14 CFR 107.3. The approved ID usually is issued by the airport operator, but in some cases is issued by the aircraft operator. In this preamble, the term "airport operator" refers to airport operators that hold security programs under part 107.

Title 14 CFR part 108 prescribes security rules for U.S. aircraft operators that must adopt and carry out an FAA-approved security program. Aircraft operators are responsible for screening passengers and property that are carried on their aircraft. They also have responsibilities for the security of the SIDA. As used in this document, the term "aircraft operator" refers to U.S. aircraft operators conducting operations under security programs under part 108.

History

Section 105 of the Aviation Security Improvement Act of 1990 (ASIA 1990), Pub. L. 101–604, added a new provision that is now codified at 49 U.S.C. 44936. It directed the FAA to "issue regulations to require individuals employed in, and individuals applying for, [certain positions] to be subjected to such employment investigations, including criminal history records check, as the Administrator determines necessary to ensure air transportation security." The positions covered were those in which the individual has unescorted access authority to aircraft operator or foreign air carrier aircraft, or to secured areas of airports serving aircraft operators or foreign air carriers.

The FAA issued rules to carry out ASIA 1990. *See* 60 FR 51854 (October 3, 1995). The rules, §§ 107.31 and 108.33 (1997), require each airport operator and aircraft operator to conduct a 10-year employment history investigation for each individual applying for certain positions on or after the effective date, January 31, 1996. These employment checks must be performed for individuals who are granted unescorted access authority to a SIDA and individuals who authorize others to have unescorted access authority (together referred to in this preamble as individuals with "unescorted access authority"). If the employment investigation reveals one of four conditions (triggers) listed in the rules the investigation must include a CHRC. The rule lists crimes that disqualify the individual from a position with unescorted access authority if the conviction occurred during the 10 years ending on the date of the investigation. Individuals who had unescorted access authority before the effective date were not subject to the rule. In the preamble to the rule the FAA stated that it would continue to evaluate the civil aviation security system to determine if further changes were warranted.

Effective November 14, 2001, § 107.31 was renumbered as § 107.209, and § 108.33 was renumbered as § 108.229, in connection with comprehensive revisions of those parts, Amendments 107–13 and 108–18. *See* 66 FR 37274 and 37330 (July 17, 2001).

Section 304 of the Federal Aviation Reauthorization Act of 1996, Pub. L. 104–264, directs the FAA to expand the checks to individuals who screen passengers and property that will be carried in an aircraft cabin in air transportation or intrastate air transportation and to supervisors of individuals with authority to perform screening functions (together referred to in this preamble as "individuals with authority to perform screening functions"). The act specifically requires that an employment investigation be performed for each individual hired to be a screener, and that a CHRC be done where the employment investigation reveals one of the four triggers.

The FAA amended § 108.33 to carry out the Reauthorization Act. See 63 FR 18076 (September 24, 1998). The amendment requires each aircraft operator to conduct a 10-year employment history investigation for individuals applying for positions as individuals with authority to perform screening functions on or after the effective date, November 23, 1998. It applies the same scheme as that for individuals with unescorted access authority, that is, a 10-year employment history investigation, with a CHRC if one of the four triggers exists.

Section 508 of the Wendell H. Ford Aviation Investment and Reform Act for the 21st Century (AIR–21), Pub. L. 106–181, gave the Administrator additional authority as to checks on individuals with authority to perform screening functions. In addition to the four triggers that provide a basis for a CHRC, it provided that a CHRC shall be done in any case in which "the Administrator decides it is necessary to ensure air transportation security with respect to passenger, baggage, or property screening at airports." See 49 U.S.C. 44936(a)(1)(C)(v).

Section 2 of the Airport Security Improvement Act of 2000 (ASIA 2000), Pub. L. 106–528, expands the use of CHRC's. It requires that, as of the effective dates, each individual applying for a position with unescorted access authority, or applying for a position as a screener, must undergo a CHRC. This is sometimes is referred to as "100% fingerprinting of applicants." The effective date is December 23, 2000, for individuals at airports defined as a Category X airport by the FAA. The effective date is November 23, 2003, for individuals at other airports. These requirements are self-executing. That means that the FAA did not need to

issue a rule to make 100% fingerprinting of applicants effective on December 23, 2000, at Category X airports, and does not need to issue a rule to make 100% fingerprinting of applicants effective on November 23, 2003, at non-Category X airports.

ASIA 2000 also added crimes that disqualify an individual from a position with unescorted access authority or as a screener. This provision is self-executing and became effective on December 23, 2000, for individuals at all airports.

In sum, there are some individuals who have had neither an employment investigation nor a CHRC, some individuals who have had employment investigations only, and some individuals who have had CHRC's, as follows:

Individuals with unescorted access authority—

- At all airports, individuals who were in positions before January 31, 1996, did not undergo an employment investigation or a CHRC.
- At Category X airports, individuals applying for positions on or after January 31, 1996, and before December 23, 2000, underwent an employment investigation, and only underwent a CHRC if one of the four triggers existed.
- At Category X airports, all individuals applying for positions on or after December 23, 2000, through the present, undergo a CHRC.
- At other airports, individuals applying for positions on or after January 31, 1996, through the present, undergo an employment investigation, and a CHRC only if one of the four triggers exists.

Individuals with authority to perform screening functions—

- At all airports, individuals who were in positions before November 23, 1998, did not undergo an employment investigation or a CHRC.
- At Category X airports, individuals applying for positions on or after November 23, 1998, and before December 23, 2000, underwent an employment investigation, and only underwent a CHRC if one of the four triggers existed.
- At Category X airports, all individuals applying for positions on or after December 23, 2000, through the present, undergo a CHRC.
- At other airports, individuals applying for positions on or after January 31, 1996, through the present, undergo an employment investigation, and a CHRC only if one of the four triggers exists.

While the FAA has not before required CHRC's for all covered individuals, the statute provides authority to do so. Further, section 138 of the Aviation Transportation Security Act (ATSA) provides that a new background check, including a criminal history record check, shall be required for individuals with unescorted access authority and individuals with authority to perform screening functions. This rulemaking accomplishes that requirement.

There may be some individuals who now are in the covered positions who will be disqualified under these new checks. For instance, there may be individuals who underwent an employment history investigation only before December 23, 2000, and did not have a history of a crime that was disqualifying at the time. If that individual has a disqualifying criminal offense for one of the crimes added in ASIA 2000, he or she will be disqualified. The legislative history for ASIA 2000 recognizes that this provision "may cause a few individuals to be removed from their jobs or prevent others from being hired. However, the number of people affected (convicted felons) will be few, and such actions will be taken to increase air travel security." S. Rep. No. 106–388, 106th Cong., 2nd Sess. 3 (2000), reprinted in 2000 U.S.C.C.A.N. 2252, 2254.

Note that individuals subject to §§ 107.209 and 108.229 have been required to report if they were convicted of a disqualifying crime after the initial investigation. See §§ 107.31 (l) and 108.33 (h) of the 1996 rule, and §§ 107.31 (l)(1) and 108.33 (l)(1) of the 1998 rule. The CHRC's conducted under this rule may reveal some individuals who did not report convictions that occurred after their original investigation. These individuals will no longer be able to have unescorted access authority or to perform screening functions.

ATSA also requires that additional background checks be done on both current employees and applicants for covered positions to the extent practicable. The additional checks include such things as a review of records of other governmental and international agencies. This rulemaking, which was written before ATSA was enacted, does not cover the additional background checks. They will be developed and adopted in the future.

Inadequacy of the Current Rules

In the past year the FAA has conducted nationwide assessments of aircraft operator and airport operator compliance with the regulatory requirements for employment history investigations. While the FAA has found numerous properly completed employment history investigations, it has also discovered serious problems with the use of employment history investigations as a means for determining when a CHRC must be accomplished.

Under current regulations, the applicant provides a 10-year employment history. The airport operator, aircraft operator, or designee verifies the most recent 5 years of that history, for example, by calling prior employers to verify employment. An airport operator or aircraft operator may only request a CHRC if one of four triggers exists, such as an unexplained gap of 12 months or more in the 10-year employment history. The determination of whether a trigger exists depends almost entirely on information provided by the applicant. This process has proven to be insufficiently reliable and subject to abuse.

In its review of hundreds of employment history investigations, the FAA has found many instances where gaps in employment greater than 12 months were accounted for by a friend or family member, or by third party firm in the United States that claimed to know the whereabouts of an applicant while he or she was living in a foreign country. While the FAA regards such information as unsatisfactory to account for a period of unemployment, screening companies, on behalf of aircraft operators, routinely accept this information as sufficient under the regulations. Accordingly, applications that the FAA considers to reveal a trigger, and therefore require a CHRC, have not been regarded as such by an aircraft operator.

Furthermore the FAA has found several cases where it appears that an applicant has provided false information of employment and another person to provide a false reference for time periods greater than 12 months. In these cases, the screening company may be duped when verifying the information, because the false reference is a co-conspirator in the applicant's falsification of his or her employment history. In other cases, the screening company may have been unable to contact the reference, therefore may have been unable to verify prior employment, but nonetheless did not request a CHRC. In either instance, the applicant has successfully avoided undergoing a CHRC.

Even when an employment history is complete and an investigation of that history is properly conducted, the FAA is concerned that the four triggers do not always identify applicants with disqualifying criminal histories. For instance, during an October 2001 audit,

the FAA and the Department of Transportation found that some current employees had disqualifying criminal convictions. For at least one such employee, the employment history investigation appears to have been properly completed, but it revealed no triggers that would have required a CHRC.

Accordingly, the Administrator has determined that the employment history and verification procedure in the current rule is inadequate to determine whether the individual has a history of a disqualifying crime.

In addition to the changes in this rulemaking, the FAA continues to review pertinent information and determine whether additional requirements are needed to enhance the background checks for individuals in various positions that affect security.

Section-by-Section Analysis

These amendments reflect the new requirements in ASIA 2000, which provides additional disqualifying crimes and 100% fingerprinting of applicants at Category X airports. These amendments also require 100% fingerprinting of all applicants at Category I through IV airports, and 100% fingerprinting of all current employees with unescorted access authority and all current employees with authority to perform screening functions who have not been subject to a CHRC under current rules.

In this preamble, references to "current" rules mean §§ 107.209 and 108.229 as they became effective on November 14, 2001, 66 FR 37274 and 37330 (July 17, 2001). References to "new" rules mean amendments made in this rulemaking.

Section 107.209 Fingerprint-Based Criminal History Records Checks (CHRC)

This section amends § 107.209, Employment history, verification, and criminal history records checks. It applies to airport operators and others.

Paragraph (a), Scope, sets out the scope of the section. It is essentially unchanged, except that the section now covers individuals not only applying for unescorted access authority, but also those who currently have unescorted access authority. This section does not apply to individuals with authority to perform screening functions because airport operators are not responsible for screening.

Paragraph (b), Individuals seeking unescorted access authority, states the basic requirement for CHRC's for individuals seeking unescorted access authority. This paragraph provides that the airport operator must ensure that no individual is granted unescorted access authority unless the individual has undergone a fingerprint-based CHRC that does not disclose that he or she has a disqualifying criminal offense. There are exceptions to this paragraph in paragraph (m).

Paragraph (c), Individuals who have not had a CHRC, states the requirements for individuals who currently have unescorted access authority. The airport operator must ensure that after December 6, 2002, no individual retains unescorted access authority unless the airport operator has obtained and submitted a fingerprint under part 107. This means that if the individual who currently has unescorted access authority was subject to a fingerprint-based CHRC under part 107 in the past, the individual does not need to undergo another CHRC. If the individual underwent only an employment history verification under part 107, or no check, the individual must now be fingerprinted and undergo a CHRC. There are exceptions to this paragraph in paragraph (m).

Paragraph (c)(2) provides that when a CHRC discloses a disqualifying criminal offense for which the conviction or finding of not guilty by reason of insanity was in the 10 years before December 6, 2001, the airport operator must immediately suspend that individual's authority. This is similar to current § 107.209 (l)(2), which in part provides that if the airport operator confirms that the individual has a disqualifying conviction the airport operator must withdraw any authority granted to that individual. An individual who believes that the CHRC is incorrect may seek to correct the record in accordance with paragraph (h).

Paragraph (d), Disqualifying criminal offenses, states what a disqualifying criminal offense is under the rule. A criminal offense is disqualifying if it meets several conditions: The individual must have been either convicted or found not guilty by reason of insanity; the crime must be listed in this section; and the conviction or finding must have occurred either during the 10 years before the date of the CHRC or while the individual has unescorted access authority. The disqualifying crimes are the crimes listed in current § 107.209 (b)(2), plus the crimes added in ASIA 2000. Further, 18 U.S.C. 37, Violence at international airports, is added.

The statute provides that the Administrator may make any other felony a disqualifying crime if she determines that the crime indicates a propensity for placing contraband aboard an aircraft in return for money. See 49 U.S.C. 44936(b)(1)(B)(xiv)(IX). If the Administrator determines that an additional crime should be disqualifying, these rules will be amended to so provide.

Paragraph (e), Fingerprint application and processing, describes how the airport operator obtains and processes the fingerprint. Paragraph (e)(1) describes the application. The application must contain only the items in this paragraph, for reasons discussed for paragraph (e)(1)(iii). The application must have the disqualifying criminal offenses described in paragraph (d). This will give the individual the opportunity to determine whether he or she is not qualified and to stop the application process at that point. The application must have a statement that the individual signing the form does not have a disqualifying criminal offense. The application must contain a statement informing the individual that he or she must advise the airport operator within 24 hours if he or she is convicted of any disqualifying criminal offense that occurs while the individual has unescorted access authority. This is a notification to the individual of his or her responsibility under paragraph (l)(2).

Under paragraph (e)(1)(iii) the application also must have a statement that the individual signing the application may be subject to prosecution under title 18 of the United States Code if he or she knowingly and willfully provides false information on the application. This will inform the individual of the serious nature of the application and the need to be truthful. This statement applies to information that the government determines is material for governmental purposes. Other information that the airport operator may want to have to make employment decisions, such as the individual's wages and duties in prior employment, is not material to the government for this purpose and cannot be subject to the warning regarding title 18 of the United States Code. For this reason the application may contain only the information in this paragraph.

The application must have a line for the printed name of the individual. Finally, the application must a line for the individual's signature and date of signature.

Paragraph (e)(2) provides that the individual must complete and sign the application prior to submitting his or her fingerprints.

Before the fingerprints are taken the airport operator must verify the identity of the individual with two forms of identification (ID). At least one ID must

have been issued by a government authority and at least one must include a photograph of the individual. One ID may satisfy the two latter requirements, together with one other ID. For instance, an individual may present one state driver's license with a photograph (which is both a government ID and an ID with a photograph) plus one other ID that is not issued by the government and does not have a photograph. This is a small expansion of the current rule. Current § 107.209 (e)(3) requires two forms of ID, at least one of which has a photo. The requirement for a government ID means that at least one of the ID's is from an official source.

Paragraph (e)(4) requires the airport operator to advise the individual that a copy of the criminal record received from the FBI will be provided to the individual if requested in writing. This is in current § 107.209 (g)(1). This paragraph also requires the airport operator to advise the individual that the Airport Security Coordinator is the point of contact for questions, as in current § 107.209 (d).

Under paragraph (e)(5) the airport operator must collect, control, and process one set of legible and classifiable fingerprints under direct observation by the airport operator or a law enforcement officer. These are essentially in current § 107.209 (e)(1) and (e)(2).

Paragraph (e)(6) makes clear that fingerprints may be either obtained and processed electronically, or on fingerprint cards approved by the FBI and distributed by the FAA for that purpose. Current § 107.209 (e)(1) provides only for obtaining fingerprints on cards. However, there now are electronic means of collecting fingerprints in use at a number of airports.

Paragraph (e)(7) provides that the fingerprints must be submitted in a manner specified by the Administrator, similar to current § 107.209 (e)(4).

Under paragraph (f), Fingerprint fees, the airport operator must pay for all fingerprints in a form and manner approved by the FAA. Current § 107.209 (e)(5) provides only for payment by corporate check, cash, or money order, due upon application. However, electronic fund transfers now are accepted, and credit cards and escrow accounts will be accepted in the future. This paragraph ensures that there is flexibility to develop new payment procedures for the efficiency of both the industry and the government. The rule specifically provides that individual personal checks are not acceptable. The FAA simply cannot handle checks from each individual who submits fingerprints.

Paragraph (g), Determination of arrest status, states that the airport operator must investigate arrests recorded in the CHRC for individuals seeking unescorted access authority and for individuals with unescorted access authority. This is essentially the same as current § 107.209 (f), except that this paragraph also expressly states that—

- The airport operator must determine that the arrest of an individual seeking unescorted access authority did not result in a disqualifying offense before granting the individual that authority.
- When a CHRC on an individual with unescorted access authority discloses an arrest for a disqualifying criminal offense without indicating a disposition, the airport operator must suspend the individual's authority within 45 days of obtaining the CHRC, unless the arrest did not result in a disqualifying criminal offense. This rule does not require immediate suspension of the individual's unescorted access authority. The CHRC may not be complete. For instance, the charges might have been withdrawn or there could have been a conviction for a crime that is not disqualifying. The 45-day period provides an opportunity to obtain current information on disposition of the arrest.
- The airport operator only makes this determination for individuals for whom it is issuing or has issued unescorted access authority, and who are not covered by a certification from the aircraft operator under paragraph (n). The airport operator may not make this determination for individuals described in § 108.229 (a).

Paragraph (h), Correction of FBI records and notification of disqualification, states the airport operator's duty to advise the individual about a disqualifying criminal offense in the CHRC received from the FBI, provide a copy of the record, and notify the individual of a final decision. This paragraph is essentially the same as current § 107.209 (g)(2) and (3), except that the new section also covers individuals who already have unescorted access authority, as well as those seeking authority.

Paragraph (i), Corrective action by the individual, describes how the individual may correct his or her record. Paragraph (i)(1) describes the action the individual may take to correct an inaccurate CHRC. It is similar to current § 107.209 (h) with some additions. The current rule provides that the FBI record must be revised, but this may take undue time. New paragraph (i)(1)(i) permits the airport operator to accept a certified true copy of the record from the appropriate court. For example, if the FBI record indicates that the individual was convicted, but does not also show that the conviction was reversed on appeal, the individual may obtain a certified true copy of the court record of that ruling. Certified true copies of court records may be obtained from the clerk of the court. This paragraph makes clear that the airport operator may either obtain the copy of the record itself, or accept a copy from the individual.

Paragraph (i)(2) provides a similar procedure for individuals who have unescorted access authority on December 6, 2001. If the individual corrects the information on the CHRC or provides a certified true copy of the information from the appropriate court, the individual's authority may be reinstated.

Paragraph (j), Limitations on dissemination of results, describes the limitations on disseminating the CHRC results. It is largely the same as current § 107.209 (i). This paragraph now expressly states that the CHRC may only be used to determine the appropriateness of granting unescorted access authority under this section. It also expressly states that the CHRC may be given to other airport operators who are determining whether to grant unescorted access to the individual under this part. It also states the information may be given to aircraft operators who are determining whether to grant unescorted access to the individual or authorize the individual to perform screening functions under part 108. If an individual has a need for unescorted access at two airports, for instance, one airport may conduct the CHRC and share the results with the second airport, so the individual only is fingerprinted once.

Paragraph (k), Recordkeeping, states the airport operator's duties to maintain records, and is essentially the same as current § 107.209 (k).

Paragraph (l), Continuing responsibilities, describes the continuing responsibilities of individuals, airport operators, and airport users regarding disqualifying criminal offenses occurring after the initial investigation. Paragraph (l)(1) addresses all individuals who currently have unescorted access authority. It requires them to report any disqualifying criminal offenses that have occurred in the 10 years before December 6, 2001. This applies to those who never underwent a background check under part 107 because they had unescorted access authority before the

1996 rule, to those who underwent an employment verification only under the 1996 rule, and to those who underwent a CHRC under the 1996 rule. This ensures that individuals who currently hold unescorted access authority are required to report offenses that are now listed in (d) and that disqualify them from continuing to serve in such a position.

Paragraphs (l)(2) and (l)(3) essentially repeat the current provisions of § 107.209 (l)(1) and (l)(2).

Paragraph (m), Exceptions, states the exceptions to this rule. Government employees, crewmembers of foreign air carriers and individuals who were previously employed in a position requiring a CHRC need not be fingerprinted under this rule, as described in this section. These exceptions are the same as in current § 107.209 (m). There are two changes to current paragraph (m). First, new paragraph (m) does not contain the exemption for certain individuals who were given access authority to U.S. Customs' secured areas before November 23, 1998. Section 138 of ATSA removes the exemption for the individuals with access to U.S. Customs' secured areas. Second, new paragraph (m) permits individuals who have unescorted access authority or authority to perform screening functions and who already have been subject to an FAA fingerprint-based CHRC to move to another employer or airport without being subject to another CHRC, provided that they have been continuously employed.

Paragraph (n), Certification by aircraft operators, states when the airport operator may accept a certification from an aircraft operator. Paragraph (n) permits the airport operator to accept a certification from an aircraft operator that it has complied with the requirements of the aircraft operator's rule, similar to current § 107.209 (n). This paragraph clarifies that if the airport operator accepts a certification from the aircraft operator, the airport operator may not also require a copy of the CHRC. If the airport operator is accepting a certification, it does not have a need for the CHRC.

Paragraph (o), Airport operator responsibilities, describes airport operator responsibilities, corresponding to current § 107.209 (o).

Paragraph (p), Airport user responsibility, states the airport user's responsibilities, similar to current § 107.209 (p).

Section 108.229 Fingerprint-Based Criminal History Records Checks (CHRC)

This section amends § 108.229, Employment history, verification, and criminal history records checks. It applies to aircraft operators and others.

Paragraph (a), Scope, sets out the scope of this section. Paragraph (a)(1) covers individuals applying for unescorted access or to have authority to perform screening functions on and after the December 6, 2001. Paragraph (a)(1)(i) covers each employee or contract employee covered under a certification made to an airport operator, pursuant to new § 107.209 (n), on and after December 6, 2001. These are employees who receive their unescorted access authority from the airport operator, based on the CHRC conducted by the aircraft operator. Paragraph (a)(ii) covers each individual, on and after December 6, 2001, issued aircraft operator identification media that one or more airports accepts as airport-approved media for unescorted access within a SIDA. Finally, paragraph (a)(1)(iii) covers each individual, on and after December 6, 2001, granted authority to perform certain screening functions within the United States. These functions are screening passengers or property that will be carried in a cabin of an aircraft, and serving as an immediate supervisor (checkpoint security supervisor (CSS)), or the next supervisory level (shift or site supervisor), to those individuals (referred to as individuals authorized to perform screening functions).

Paragraph (a)(2) covers individuals who were employed before the December 6, 2001. Paragraph (a)(2)(i) covers each employee or contract employee covered under a certification made to an airport operator pursuant to § 107.31 (n) as it existed before November 14, 2001, or pursuant to § 107.209 (n) before December 6, 2001. Paragraph (a)(2)(ii) covers individuals with unescorted access authority based on an aircraft operator identification media, and paragraph (a)(2)(iii) covers individuals authorized to perform screening functions.

Paragraph (b), Individuals seeking unescorted access authority or authority to perform screening functions, states the basic requirement for CHRC's for individuals identified in paragraph (a)(1). This paragraph provides that the aircraft operator must ensure that each individual has undergone a fingerprint-based CHRC that does not disclose that he or she has a disqualifying criminal offense before making a certification to an airport operator regarding that individual, issuing an aircraft operator identification media to that individual, or authorizing that individual to perform a screening function.

Paragraph (c), Individuals who have not had a CHRC, states the requirements for individuals who currently have unescorted access authority or who perform screening functions. Under paragraph (c), such individuals may not retain their unescorted access authority, and may not perform screening functions, after one year after the December 6, 2001, unless a CHRC has been conducted. Paragraph (c)(2) is essentially the same as current § 107.209 (c)(2).

Paragraph (d), Disqualifying criminal offenses, states what a disqualifying criminal offense is under the rule. It is essentially the same as new § 107.209 (d), discussed above, and corresponds to current § 108.229 (d).

Paragraph (e), Fingerprint application and processing, describes how the aircraft operator obtains and processes the fingerprints. It is essentially the same as new § 107.209 (f).

Paragraph (f), Fingerprint fees, describes the fees for fingerprinting, essentially the same as new § 107.209 (g). It corresponds to current § 108.29 (e)(5).

Paragraph (g), Determination of arrest status, requires the aircraft operator to investigate arrests recorded in the CHRC. It is essentially the same as new § 107.209 (g), and corresponds to current § 108.229 (f). The paragraph states that—

- When a CHRC on an individual described in paragraph (a)(1) discloses an arrest for a disqualifying criminal offense and does not indicate a disposition, an aircraft operator may not grant that individual unescorted access authority, either by making a certification to an airport operator or issuing identification media that is accepted by airport operators for unescorted access, or authority to perform screening functions.
- When a CHRC on an individual described in paragraph (a)(2) discloses an arrest for a disqualifying criminal offense and does not indicate a disposition, an aircraft operator must suspend the individual's unescorted access authority or authority to perform screening functions within 45 days after obtaining the CHRC unless the aircraft operator determines, after investigation, that the arrest did not result in a disqualifying criminal offense.
- An aircraft operator may only make this determination for individuals described in paragraph (a).

Paragraph (h), Correction of FBI records and notification of

disqualification, states the aircraft operator's duty to advise the individual about a disqualifying criminal offense in the CHRC, provide a copy of the record, and notify the individual of a final decision. It is essentially the same as new § 107.209 (h) and current § 108.229 (g).

Paragraph (i), Corrective action by the individual, describes the action the individual may take to correct an inaccurate CHRC. It is essentially the same as new § 107.209 (i) and current § 108.229(h).

Paragraph (j), Limits on dissemination of results, describes the limitations on disseminating the CHRC results. It is essentially the same as new § 107.209 (j) and current § 108.229(i). Paragraph (j)(2) clarifies that an aircraft operator may not provide CHRC results to an airport operator if the aircraft operator is providing a certification under part 107. In such a case, the airport operator does not have a need to see the CHRC under these rules. This is consistent with new § 107.209 (n).

Paragraph (k), Recordkeeping, states the airport operator's duties to maintain records, and is essentially the same as new § 107.209 (k) and current § 108.229 (k).

Paragraph (l), Continuing responsibilities, states the continuing responsibilities of the aircraft operator, each person with unescorted access authority, and each person performing screening functions, corresponding to new § 107.209 (l) and current § 108.229 (l).

Paragraph (m), Aircraft operator responsibility, states the aircraft operator responsibility corresponding to new § 107.209 (o) and current § 108.229 (m).

Compliance Dates

This rule becomes effective on December 6, 2001. On that date each airport operator and each aircraft operator may begin submitting fingerprints to complete the CHRC's required under this rule.

The compliance date for individuals seeking unescorted access authority, and for individuals seeking authority to perform screening functions, at non-Category X airports is December 6, 2001. On and after that date each individual seeking such authority must undergo a CHRC as provided in this rulemaking.

Under § 107.209 (c) and § 108.229 (c) the compliance date for submitting fingerprints for individuals who now have unescorted access authority and individuals who now have authority to perform screening functions is one year after the December 6, 2001. By that date, each airport operator and each aircraft operator must have submitted fingerprints for all such individuals.

The FAA considers it critical to promptly address the deficiencies in the current employment investigations described above. Based on discussions with the industry, the FAA believes that these dates can be met. Indeed, a number of airport operators agree that all covered individuals should be fingerprinted and are ready to undertake that task as soon as possible, and expect to complete it much sooner than one year.

Good Cause for Immediate Adoption

This action is necessary to prevent a possible imminent hazard to aircraft and persons and property within the United States. Because the circumstances described herein warrant immediate action, the Administrator finds that notice and public comment under 5 U.S.C. 553(b) are impracticable and contrary to the public interest. Further, the Administrator finds that good cause exists under 5 U.S.C. 553(d) for making this rule effective less than 30 days after publication in the **Federal Register**.

International Compatibility

In keeping with U.S. obligations under the Convention on International Civil Aviation, it is FAA policy to comply with International Civil Aviation Organization (ICAO) Standards and Recommended Practices to the maximum extent practicable. The FAA determined that there are no ICAO Standards and Recommended Practices that correspond to this rule.

Paperwork Reduction Act

This emergency rule contains information collection activities subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)). In accordance with section 3507 (j)(1)(B) of that statute, the FAA requested the Office of Management and Budget to grant an immediate emergency clearance on the paperwork package that was submitted. As protection provided by the Paperwork Reduction Act, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The collection of information was approved and assigned OMB Control Number 2120–0673. Following is a summary of the information collection activity.

Need: This rule requires information to be collected on individuals who perform, or seek to perform, security-related functions at domestic airports. The rule covers individuals at all categories of airports who were not subject to a fingerprint-based CHRC before December 6, 2001. Under current FAA rules and statutes, fingerprint-based criminal history record checks are conducted on applicants at Category X airports for employment as screeners and for positions with access to secured areas of the airport. At non-Category X airports criminal history record checks are done only in limited circumstances, that is, when a verification of their prior employment reveals certain triggers, such as an unexplained gap in employment of 12 months. No individual with access to secured areas had a background check before 1996, and no screener had a background check before 1998. Only limited numbers of individuals hired since 1996 and 1998 respectively have been subjected criminal history checks. The new rules will require that all individuals with access to secured areas and all screeners be fingerprinted and a criminal history check conducted if it has not been done in the past. The rules are an essential part of the response to the current threat of terrorist activity.

Description of Respondents: All new and existing personnel who have unescorted access authority to the security identification display area of an airport, individuals who authorize others to have unescorted access authority, individuals who screen passengers and property that will be carried in an aircraft cabin in air transportation or intrastate air transportation, and supervisors of screeners. The FAA estimates that there will be 1.06 million respondents during the first year.

Estimated Burden: This rule will constitute a recordkeeping burden for certificate holders operating under parts 107 and 108. All personnel will need to be fingerprinted. In the first year of this rule, 1.06 million employees will need to be processed; in subsequent years, it will average about 275,000 employees. The total ten-year burden for the estimated 3.52 million employees is 1,234,711 hours at a cost of $27,833,525. The annual burden sums to 123,471.1 hours at a cost of $2,783,352.50.

Economic Analyses

This rulemaking action is taken under an emergency situation within the meaning of Section 6(a)(3)(D) of Executive Order 12866, Regulatory Planning and Review. It also is considered an emergency regulation under Paragraph 11g of the Department of Transportation (DOT) Regulatory Policies and Procedures. In addition, it is a significant rule within the meaning of the Executive Order and DOT's policies and procedures. No regulatory

analysis or evaluation accompanies this rule. The FAA has not assessed of whether this rule will have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act of 1980. When no notice of proposed rulemaking has first been published, no such assessment is required for a final rule. The FAA recognizes that this rule will impose significant costs on airport operators and aircraft operators. The current security threat requires, however, that operators take all necessary measures to ensure the safety and security of their operations.

Executive Order 13132, Federalism

The FAA has analyzed this rule under the principles and criteria of Executive Order 13132, Federalism. We determined that this action will not have a substantial direct effect on the States, or the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, we have determined that this final rule does not have federalism implications.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (the Act), enacted as Pub. L. 104–4 on March 22, 1995 is intended, among other things, to curb the practice of imposing unfunded Federal mandates on State, local, and tribal governments. Title II of the Act requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a proposed or final agency rule that may result in a $100 million or more expenditure (adjusted annually for inflation) in any one year by State, local, and tribal governments, in the aggregate, or by the private sector; such a mandate is deemed to be a "significant regulatory action."

Based on the FAA's rough initial estimates the FAA does not believe that the rule will result in such a mandate. The requirements of Title II of the Unfunded Mandates Reform Act of 1995 do not apply when no notice of proposed rulemaking has first been published, however. Accordingly, the FAA has not prepared a statement under the Act.

Environmental Analysis

FAA Order 1050.1D defines FAA actions that may be categorically excluded from preparation of a National Environmental Policy Act (NEPA) environmental impact statement. In accordance with FAA Order 1050.1D, appendix 4, paragraph 4(j) this rulemaking action qualifies for a categorical exclusion.

Energy Impact

The energy impact of this rule has been assessed in accordance with the Energy Policy and Conservation Act (EPCA) Pub. L. 94–163, as amended (42 U.S.C. 6362) and FAA Order 1053.1. It has been determined that this rule is not a major regulatory action under the provisions of the EPCA.

14 CFR Part 107

Airports, Law enforcement officers, Reporting and recordkeeping requirements, Security measures.

14 CFR Part 108

Air carriers, Aircraft, Airports, Law enforcement officers, Reporting and recordkeeping requirements, Security measures.

The Amendments

For the reasons stated in the preamble, the Federal Aviation Administration amends 14 CFR chapter I as set forth below:

PART 107—AIRPORT SECURITY

1. The authority citation for part 107 continues to read as follows:

Authority: 49 U.S.C. 106(g), 5103, 40113, 40119, 44701–44702, 44706, 44901–44905, 44907, 44913–44914, 44932, 44935–44936, 46105.

2. Revise § 107.209 to read as follows:

§ 107.209 Fingerprint-based criminal history records checks (CHRC).

(a) *Scope.* The following persons are within the scope of this section—

(1) Each airport operator and airport user.

(2) Each individual currently having unescorted access to a SIDA, and each individual with authority to authorize others to have unescorted access to a SIDA (referred to as unescorted access authority).

(3) Each individual seeking unescorted access authority.

(4) Each airport user and aircraft operator making a certification to an airport operator pursuant to paragraph (n) of this section, or § 107.31 (n) as it existed before November 14, 2001 (see 14 CFR parts 60 to 139 revised as of January 1, 2001). An airport user, for the purposes of this section only, is any person other than an aircraft operator subject to § 108.229 of this chapter making a certification under this section.

(b) *Individuals seeking unescorted access authority.* Except as provided in paragraph (m) of this section, each airport operator must ensure that no individual is granted unescorted access authority unless the individual has undergone a fingerprint-based CHRC that does not disclose that he or she has a disqualifying criminal offense, as described in paragraph (d) of this section.

(c) *Individuals who have not had a CHRC.* (1) Except as provided in paragraph (m) of this section, each airport operator must ensure that after December 6, 2002, no individual retains unescorted access authority, unless the airport operator has obtained and submitted a fingerprint under this part.

(2) When a CHRC discloses a disqualifying criminal offense for which the conviction or finding of not guilty by reason of insanity was on or after December 6, 1991, the airport operator must immediately suspend that individual's authority.

(d) *Disqualifying criminal offenses.* An individual has a disqualifying criminal offense if the individual has been convicted, or found not guilty of by reason of insanity, of any of the disqualifying crimes listed in this paragraph in any jurisdiction during the 10 years before the date of the individual's application for unescorted access authority, or while the individual has unescorted access authority. The disqualifying criminal offenses are as follows—

(1) Forgery of certificates, false marking of aircraft, and other aircraft registration violation; 49 U.S.C. 46306.

(2) Interference with air navigation; 49 U.S.C. 46308.

(3) Improper transportation of a hazardous material; 49 U.S.C. 46312.

(4) Aircraft piracy; 49 U.S.C. 46502.

(5) Interference with flight crew members or flight attendants; 49 U.S.C. 46504.

(6) Commission of certain crimes aboard aircraft in flight; 49 U.S.C. 46506.

(7) Carrying a weapon or explosive aboard aircraft; 49 U.S.C. 46505.

(8) Conveying false information and threats; 49 U.S.C. 46507.

(9) Aircraft piracy outside the special aircraft jurisdiction of the United States; 49 U.S.C. 46502(b).

(10) Lighting violations involving transporting controlled substances; 49 U.S.C. 46315.

(11) Unlawful entry into an aircraft or airport area that serves air carriers or foreign air carriers contrary to established security requirements; 49 U.S.C. 46314.

(12) Destruction of an aircraft or aircraft facility; 18 U.S.C. 32.

(13) Murder.

(14) Assault with intent to murder.

(15) Espionage.
(16) Sedition.
(17) Kidnapping or hostage taking.
(18) Treason.
(19) Rape or aggravated sexual abuse.
(20) Unlawful possession, use, sale, distribution, or manufacture of an explosive or weapon.
(21) Extortion.
(22) Armed or felony unarmed robbery.
(23) Distribution of, or intent to distribute, a controlled substance.
(24) Felony arson.
(25) Felony involving a threat.
(26) Felony involving—
(i) Willful destruction of property;
(ii) Importation or manufacture of a controlled substance;
(iii) Burglary;
(iv) Theft;
(v) Dishonesty, fraud, or misrepresentation;
(vi) Possession or distribution of stolen property;
(vii) Aggravated assault;
(viii) Bribery; or
(ix) Illegal possession of a controlled substance punishable by a maximum term of imprisonment of more than 1 year.
(27) Violence at international airports; 18 U.S.C. 37.
(28) Conspiracy or attempt to commit any of the criminal acts listed in this paragraph.

(e) *Fingerprint application and processing.* (1) At the time of fingerprinting, the airport operator must provide the individual to be fingerprinted a fingerprint application that includes only the following—
(i) The disqualifying criminal offenses described in paragraph (d) of this section.
(ii) A statement that the individual signing the application does not have a disqualifying criminal offense.
(iii) A statement informing the individual that Federal regulations under 14 CFR 107.209 (l) impose a continuing obligation to disclose to the airport operator within 24 hours if he or she is convicted of any disqualifying criminal offense that occurs while he or she has unescorted access authority.
(iv) A statement reading, "The information I have provided on this application is true, complete, and correct to the best of my knowledge and belief and is provided in good faith. I understand that a knowing and willful false statement on this application can be punished by fine or imprisonment or both. (See section 1001 of Title 18 United States Code.)"
(v) A line for the printed name of the individual.
(vi) A line for the individual's signature and date of signature.

(2) Each individual must complete and sign the application prior to submitting his or her fingerprints.
(3) The airport operator must verify the identity of the individual through two forms of identification prior to fingerprinting, and ensure that the printed name on the fingerprint application is legible. At least one of the two forms of identification must have been issued by a government authority, and at least one must include a photo.
(4) The airport operator must advise the individual that:
(i) A copy of the criminal record received from the FBI will be provided to the individual, if requested by the individual in writing; and
(ii) The ASC is the individual's point of contact if he or she has questions about the results of the CHRC.
(5) The airport operator must collect, control, and process one set of legible and classifiable fingerprints under direct observation of the airport operator or a law enforcement officer.
(6) Fingerprints may be obtained and processed electronically, or recorded on fingerprint cards approved by the FBI and distributed by the FAA for that purpose.
(7) The fingerprint submission must be forwarded to the FAA in the manner specified by the Administrator.

(f) *Fingerprinting fees.* Airport operators must pay for all fingerprints in a form and manner approved by the FAA. The payment must be made at the designated rate (available from the local FAA security office) for each set of fingerprints submitted. Information about payment options is available though the designated FAA headquarters point of contact. Individual personal checks are not acceptable.

(g) *Determination of arrest status.* (1) When a CHRC on an individual seeking unescorted access authority discloses an arrest for any disqualifying criminal offense listed in paragraph (d) of this section without indicating a disposition, the airport operator must determine, after investigation, that the arrest did not result in a disqualifying offense before granting that authority.
(2) When a CHRC on an individual with unescorted access authority discloses an arrest for any disqualifying criminal offense without indicating a disposition, the airport operator must suspend the individual's unescorted access authority not later than 45 days after obtaining the CHRC unless the airport operator determines, after investigation, that the arrest did not result in a disqualifying offense.
(3) The airport operator may only make the determinations required in paragraphs (g)(1) and (g)(2) of this section for individuals for whom it is issuing, or has issued, unescorted access authority, and who are not covered by a certification from an aircraft operator under paragraph (n) of this section. The airport operator may not make determinations for individuals described in § 108.229 of this chapter.

(h) *Correction of FBI records and notification of disqualification.* (1) Before making a final decision to deny unescorted access authority to an individual described in paragraph (b) of this section, the airport operator must advise him or her that the FBI criminal record discloses information that would disqualify him or her from receiving or retaining unescorted access authority and provide the individual with a copy of the FBI record if he or she requests it.
(2) The airport operator must notify an individual that a final decision has been made to grant or deny unescorted access authority.
(3) Immediately following the suspension of unescorted access authority of an individual, the airport operator must advise him or her that the FBI criminal record discloses information that disqualifies him or her from retaining unescorted access authority and provide the individual with a copy of the FBI record if he or she requests it.

(i) *Corrective action by the individual.* The individual may contact the local jurisdiction responsible for the information and the FBI to complete or correct the information contained in his or her record, subject to the following conditions—
(1) For an individual seeking unescorted access authority on or after December 6, 2001, the following applies:
(i) Within 30 days after being advised that the criminal record received from the FBI discloses a disqualifying criminal offense, the individual must notify the airport operator in writing of his or her intent to correct any information he or she believes to be inaccurate. The airport operator must obtain a copy, or accept a copy from the individual, of the revised FBI record, or a certified true copy of the information from the appropriate court, prior to granting unescorted access authority.
(ii) If no notification, as described in paragraph (h)(1) of this section, is received within 30 days, the airport operator may make a final determination to deny unescorted access authority.

(2) For an individual with unescorted access authority before December 6, 2001, the following applies: Within 30 days after being advised of suspension because the criminal record received from the FBI discloses a disqualifying criminal offense, the individual must notify the airport operator in writing of his or her intent to correct any information he or she believes to be inaccurate. The airport operator must obtain a copy, or accept a copy from the individual, of the revised FBI record, or a certified true copy of the information from the appropriate court, prior to reinstating unescorted access authority.

(j) *Limits on dissemination of results.* Criminal record information provided by the FBI may be used only to carry out this section and § 108.229 of this chapter. No person may disseminate the results of a CHRC to anyone other than:

(1) The individual to whom the record pertains, or that individual's authorized representative.

(2) Officials of other airport operators who are determining whether to grant unescorted access to the individual under this part.

(3) Aircraft operators who are determining whether to grant unescorted access to the individual or authorize the individual to perform screening functions under part 108 of this chapter.

(4) Others designated by the Administrator.

(k) *Recordkeeping.* The airport operator must maintain the following information.

(1) *Investigations conducted before December 6, 2001.* The airport operator must maintain and control the access or employment history investigation files, including the criminal history records results portion, or the appropriate certifications, for investigations conducted before December 6, 2001.

(2) *Fingerprint application process on or after December 6, 2001.* Except when the airport operator has received a certification under paragraph (n) of this section, the airport operator must physically maintain, control, and, as appropriate, destroy the fingerprint application and the criminal record. Only direct airport operator employees may carry out the responsibility for maintaining, controlling, and destroying criminal records.

(3) *Certification on or after December 6, 2001.* The airport operator must maintain the certifications provided under paragraph (n) of this section.

(4) *Protection of records—all investigations.* The records required by this section must be maintained in a manner that is acceptable to the Administrator and in a manner that protects the confidentiality of the individual.

(5) *Duration—all investigations.* The records identified in this section with regard to an individual must be maintained until 180 days after the termination of the individual's unescorted access authority. When files are no longer maintained, the criminal record must be destroyed.

(l) *Continuing responsibilities.* (1) Each individual with unescorted access authority on December 6, 2001, who had a disqualifying criminal offense in paragraph (d) of this section on or after December 6, 1991, must, by January 7, 2002, report the conviction to the airport operator and surrender the SIDA access medium to the issuer.

(2) Each individual with unescorted access authority who has a disqualifying criminal offense must report the offense to the airport operator and surrender the SIDA access medium to the issuer within 24 hours of the conviction or the finding of not guilty by reason of insanity.

(3) If information becomes available to the airport operator or the airport user indicating that an individual with unescorted access authority has a disqualifying criminal offense, the airport operator must determine the status of the conviction. If a disqualifying offense is confirmed the airport operator must immediately revoke any unescorted access authority.

(m) *Exceptions.* Notwithstanding the requirements of this section, an airport operator may authorize the following individuals to have unescorted access authority:

(1) An employee of the Federal, state, or local government (including a law enforcement officer (LEO)) who, as a condition of employment, has been subjected to an employment investigation which includes a criminal records check.

(2) A crewmember of a foreign air carrier covered by an alternate security arrangement in the foreign air carrier's approved security program.

(3) An individual who has been continuously employed in a position requiring unescorted access authority by another airport operator, airport user, or aircraft operator, provided the grant for his or her unescorted access authority was based upon a fingerprint-based CHRC through the FAA.

(4) An individual who has been continuously employed by an aircraft operator, in a position with authority to perform screening functions, provided the grant for his or her authority to perform screening functions was based upon a fingerprint-based CHRC through the FAA.

(n) *Certifications by aircraft operators.* An airport operator is in compliance with its obligation under paragraph (b) or (c) of this section when the airport operator accepts, for each individual seeking unescorted access authority, certification from an aircraft operator subject to part 108 of this chapter indicating it has complied with § 108.229 of this chapter for the aircraft operator's employees and contractors seeking unescorted access authority. If the airport operator accepts a certification from the aircraft operator, the airport operator may not require the aircraft operator to provide a copy of the CHRC.

(o) *Airport operator responsibility.* The airport operator must—

(1) Designate the ASC, in the security program, or a direct employee if the ASC is not a direct employee, to be responsible for maintaining, controlling, and destroying the criminal record files when their maintenance is no longer required by paragraph (k) of this section.

(2) Designate the ASC, in the security program, to serve as the contact to receive notification from individuals applying for unescorted access authority of their intent to seek correction of their FBI criminal record.

(3) Audit the employment history investigations performed by the airport operator in accordance with this section and § 107.31 as it existed before November 14, 2001 (see 14 CFR parts 60 to 139 revised as of January 1, 2001), and those investigations conducted by the airport users who provided certification to the airport operator. The audit program must be set forth in the airport security program.

(p) *Airport user responsibility.* (1) The airport user must report to the airport operator information, as it becomes available, that indicates an individual with unescorted access authority may have a disqualifying criminal offense.

(2) The airport user must maintain and control, in compliance with paragraph (k) of this section, the employment history investigation files for investigations conducted before December 6, 2001, unless the airport operator decides to maintain and control the employment history investigation file.

(3) The airport user must provide the airport operator with either the name or title of the individual acting as custodian of the files described in this paragraph, the address of the location where the files are maintained, and the phone number of that location. The airport user must provide the airport operator and the FAA with access to these files.

PART 108—AIRCRAFT OPERATOR SECURITY

3. The authority for part 108 continues to read as follows:

Authority: 49 U.S.C. 106(g), 5103, 40113, 40119, 44701–44702, 44705, 44901–44905, 44907, 44913–44914, 44932, 44935–44936, 46105.

4. Revise § 108.229 to read as follows:

§ 108.229 Fingerprint-based criminal history records checks (CHRC).

(a) *Scope.* The following persons are within the scope of this section—

(1)(i) Each employee or contract employee covered under a certification made to an airport operator on or after December 6, 2001, pursuant to § 107.209(n) of this chapter.

(ii) Each individual issued on or after December 6, 2001, aircraft operator identification media that one or more airports accepts as airport-approved media for unescorted access authority within a security identification display area (SIDA), as described in § 107.205 of this chapter (referred to as unescorted access authority).

(iii) Each individual, on or after December 6, 2001, granted authority to perform the following screening functions at locations within the United States (referred to as authority to perform screening functions)—

(A) Screening passengers or property that will be carried in a cabin of an aircraft of an aircraft operator required to screen passengers under this part.

(B) Serving as an immediate supervisor (checkpoint security supervisor (CSS)), and the next supervisory level (shift or site supervisor), to those individuals described in paragraph (a)(1)(iii)(A) of this section.

(2)(i) Each employee or contract employee covered under a certification made to an airport operator pursuant to § 107.31(n) as it existed before November 14, 2001 (see 14 CFR parts 60 to 139 revised as of January 1, 2001), or pursuant to § 107.209(n) of this chapter before December 6, 2001.

(ii) Each individual who holds on December 6, 2001, an aircraft operator identification media that one or more airports accepts as airport-approved media for unescorted access authority within a security identification display area (SIDA), as described in § 107.205 of this chapter.

(iii) Each individual who is performing on December 6, 2001, a screening function identified in paragraph (a)(1)(iii) of this section.

(b) *Individuals seeking unescorted access authority or authority to perform screening functions.* Each aircraft operator must ensure that each individual identified in (a)(1) of this section has undergone a fingerprint-based CHRC that does not disclose that he or she has a disqualifying criminal offense, as described in paragraph (d) of this section, before—

(1) Making a certification to an airport operator regarding that individual;

(2) Issuing an aircraft operator identification medium to that individual; or

(3) Authorizing that individual authority to perform screening functions.

(c) *Individuals who have not had a CHRC.* (1) Each aircraft operator must ensure that, on and after December 6, 2002:

(i) No individual retains unescorted access authority, whether obtained as a result of a certification to an airport operator under § 107.31(n) as it existed before November 14, 2001 (see 14 CFR parts 60 to 139 revised as of January 1, 2001), or under § 107.209(n) of this chapter before December 6, 2001, or obtained as a result of the issuance of an aircraft operator's identification media, unless the individual has been subject to a fingerprint-based CHRC for unescorted access authority under this part.

(ii) No individual continues to have authority to perform screening functions described in paragraph (a)(1)(iii) of this section, unless the individual has been subject to a fingerprint-based CHRC under this part.

(2) When a CHRC discloses a disqualifying criminal offense for which the conviction or finding was on or after December 6, 1991, the aircraft operator must immediately suspend that individual's unescorted access authority or authority to perform screening functions.

(d) *Disqualifying criminal offenses.* An individual has a disqualifying criminal offense if the individual has been convicted, or found not guilty by reason of insanity, of any of the disqualifying crimes listed in this paragraph in any jurisdiction during the 10 years before the date of the individual's application for unescorted access authority or authority to perform screening functions, or while the individual has unescorted access authority or authority to perform screening functions. The disqualifying criminal offenses are as follows—

(1) Forgery of certificates, false marking of aircraft, and other aircraft registration violation; 49 U.S.C. 46306.

(2) Interference with air navigation; 49 U.S.C. 46308.

(3) Improper transportation of a hazardous material; 49 U.S.C. 46312.

(4) Aircraft piracy; 49 U.S.C. 46502.

(5) Interference with flight crew members or flight attendants; 49 U.S.C. 46504.

(6) Commission of certain crimes aboard aircraft in flight; 49 U.S.C. 46506.

(7) Carrying a weapon or explosive aboard aircraft; 49 U.S.C. 46505.

(8) Conveying false information and threats; 49 U.S.C. 46507.

(9) Aircraft piracy outside the special aircraft jurisdiction of the United States; 49 U.S.C. 46502(b).

(10) Lighting violations involving transporting controlled substances; 49 U.S.C. 46315.

(11) Unlawful entry into an aircraft or airport area that serves air carriers or foreign air carriers contrary to established security requirements; 49 U.S.C. 46314.

(12) Destruction of an aircraft or aircraft facility; 18 U.S.C. 32.

(13) Murder.

(14) Assault with intent to murder.

(15) Espionage.

(16) Sedition.

(17) Kidnapping or hostage taking.

(18) Treason.

(19) Rape or aggravated sexual abuse.

(20) Unlawful possession, use, sale, distribution, or manufacture of an explosive or weapon.

(21) Extortion.

(22) Armed or felony unarmed robbery.

(23) Distribution of, or intent to distribute, a controlled substance.

(24) Felony arson.

(25) Felony involving a threat.

(26) Felony involving—

(i) Willful destruction of property;

(ii) Importation or manufacture of a controlled substance;

(iii) Burglary;

(iv) Theft;

(v) Dishonesty, fraud, or misrepresentation;

(vi) Possession or distribution of stolen property;

(vii) Aggravated assault;

(viii) Bribery; or

(ix) Illegal possession of a controlled substance punishable by a maximum term of imprisonment of more than 1 year.

(27) Violence at international airports; 18 U.S.C. 37.

(28) Conspiracy or attempt to commit any of the criminal acts listed in this paragraph.

(e) *Fingerprint application and processing.* (1) At the time of fingerprinting, the aircraft operator must provide the individual to be fingerprinted a fingerprint application that includes only the following—

(i) The disqualifying criminal offenses described in paragraph (d) of this section.

(ii) A statement that the individual signing the application does not have a disqualifying criminal offense.

(iii) A statement informing the individual that Federal regulations under 14 CFR 108.229 impose a continuing obligation to disclose to the aircraft operator within 24 hours if he or she is convicted of any disqualifying criminal offense that occurs while he or she has unescorted access authority.

(iv) A statement reading, "The information I have provided on this application is true, complete, and correct to the best of my knowledge and belief and is provided in good faith. I understand that a knowing and willful false statement on this application can be punished by fine or imprisonment or both. (See section 1001 of Title 18 United States Code.)"

(v) A line for the printed name of the individual.

(vi) A line for the individual's signature and date of signature.

(2) Each individual must complete and sign the application prior to submitting his or her fingerprints.

(3) The aircraft operator must verify the identity of the individual through two forms of identification prior to fingerprinting, and ensure that the printed name on the fingerprint application is legible. At least one of the two forms of identification must have been issued by a government authority, and at least one must include a photo.

(4) The aircraft operator must:

(i) Advise the individual that a copy of the criminal record received from the FBI will be provided to the individual, if requested by the individual in writing; and

(ii) Identify a point of contact if the individual has questions about the results of the CHRC.

(5) The aircraft operator must collect, control, and process one set of legible and classifiable fingerprints under direct observation by the aircraft operator or a law enforcement officer.

(6) Fingerprints may be obtained and processed electronically, or recorded on fingerprint cards approved by the FBI and distributed by the FAA for that purpose.

(7) The fingerprint submission must be forwarded to the FAA in the manner specified by the Administrator.

(f) *Fingerprinting fees.* Aircraft operators must pay for all fingerprints in a form and manner approved by the FAA. The payment must be made at the designated rate (available from the local FAA security office) for each set of fingerprints submitted. Information about payment options is available though the designated FAA headquarters point of contact. Individual personal checks are not acceptable.

(g) *Determination of arrest status.* (1) When a CHRC on an individual described in paragraph (a)(1) of this section discloses an arrest for any disqualifying criminal offense listed in paragraph (d) of this section without indicating a disposition, the aircraft operator must determine, after investigation, that the arrest did not result in a disqualifying offense before granting unescorted access authority or authority to perform screening functions.

(2) When a CHRC on an individual described in paragraph (a)(2) of this section discloses an arrest for any disqualifying criminal offense without indicating a disposition, the aircraft operator must suspend the individual's unescorted access authority or authority to perform screening functions not later than 45 days after obtaining the CHRC unless the aircraft operator determines, after investigation, that the arrest did not result in a disqualifying criminal offense.

(3) The aircraft operator may only make the determinations required in paragraphs (g)(1) and (g)(2) of this section for individuals for whom it is issuing, or has issued, unescorted access authority; individuals for whom it is issuing, or has issued, authority to perform screening functions; and individuals who are covered by a certification from an aircraft operator under § 107.209 (n) of this chapter. The aircraft operator may not make determinations for individuals described in § 107.209 (a) of this chapter.

(h) *Correction of FBI records and notification of disqualification.* (1) Before making a final decision to deny authority to an individual described in paragraph (a)(1) of this section, the aircraft operator must advise him or her that the FBI criminal record discloses information that would disqualify him or her from receiving or retaining unescorted access authority or authority to perform screening functions and provide the individual with a copy of the FBI record if he or she requests it.

(2) The aircraft operator must notify an individual that a final decision has been made to grant or deny unescorted access authority or authority to perform screening functions.

(3) Immediately following the suspension of unescorted access authority or authority to perform screening functions, the aircraft operator must advise the individual that the FBI criminal record discloses information that disqualifies him or her from retaining his or her authority, and provide the individual with a copy of the FBI record if he or she requests it.

(i) *Corrective action by the individual.* The individual may contact the local jurisdiction responsible for the information and the FBI to complete or correct the information contained in his or her record, subject to the following conditions—

(1) For an individual seeking unescorted access authority or authority to perform screening functions on or after December 6, 2001, the following applies:

(i) Within 30 days after being advised that the criminal record received from the FBI discloses a disqualifying criminal offense, the individual must notify the aircraft operator in writing of his or her intent to correct any information he or she believes to be inaccurate. The aircraft operator must obtain a copy, or accept a copy from the individual, of the revised FBI record or a certified true copy of the information from the appropriate court, prior to granting unescorted access authority or authority to perform screening functions.

(ii) If no notification, as described in paragraph (h)(1) of this section, is received within 30 days, the aircraft operator may make a final determination to deny unescorted access authority or authority to perform screening functions.

(2) For an individual with unescorted access authority or authority to perform screening functions before December 6, 2001, the following applies: Within 30 days after being advised of suspension because the criminal record received from the FBI discloses a disqualifying criminal offense, the individual must notify the aircraft operator in writing of his or her intent to correct any information he or she believes to be inaccurate. The aircraft operator must obtain a copy, or accept a copy from the individual, of the revised FBI record, or a certified true copy of the information from the appropriate court, prior to reinstating unescorted access authority or authority to perform screening functions.

(j) *Limits on dissemination of results.* Criminal record information provided by the FBI may be used only to carry out this section and § 107.209 of this chapter. No person may disseminate the results of a CHRC to anyone other than:

(1) The individual to whom the record pertains, or that individual's authorized representative.

(2) Officials of airport operators who are determining whether to grant

unescorted access to the individual under part 107 of this chapter when the determination is not based on the aircraft operator's certification under § 107.209 (n) of this chapter.

(3) Other aircraft operators who are determining whether to grant unescorted access to the individual or authorize the individual to perform screening functions under this part.

(4) Others designated by the Administrator.

(k) *Recordkeeping.* The aircraft operator must maintain the following information.

(1) *Investigation conducted before December 6, 2001.* The aircraft operator must maintain and control the access or employment history investigation files, including the criminal history records results portion, for investigations conducted before December 6, 2001.

(2) *Fingerprint application process on or after December 6, 2001.* The aircraft operator must physically maintain, control, and, as appropriate, destroy the fingerprint application and the criminal record. Only direct aircraft operator employees may carry out the responsibility for maintaining, controlling, and destroying criminal records.

(3) *Protection of records—all investigations.* The records required by this section must be maintained in a manner that is acceptable to the Administrator and in a manner that protects the confidentiality of the individual.

(4) *Duration—all investigations.* The records identified in this section with regard to an individual must be maintained until 180 days after the termination of the individual's unescorted access authority or authority to perform screening functions. When files are no longer maintained, the criminal record must be destroyed.

(l) *Continuing responsibilities.* (1) Each individual with unescorted access authority or the authority to perform screening functions on December 6, 2001, who had a disqualifying criminal offense in paragraph (d) of this section on or after December 6, 1991, must, by January 7, 2002, report the conviction to the aircraft operator and surrender the SIDA access medium to the issuer and cease performing screening functions, as applicable.

(2) Each individual with unescorted access authority or authority to perform screening functions who has a disqualifying criminal offense must report the offense to the aircraft operator and surrender the SIDA access medium to the issuer within 24 hours of the conviction or the finding of not guilty by reason of insanity.

(3) If information becomes available to the aircraft operator indicating that an individual with unescorted access authority or authority to perform screening functions has a possible conviction for any disqualifying criminal offense in paragraph (d) of this section, the aircraft operator must determine the status of the conviction. If a disqualifying criminal offense is confirmed the aircraft operator must immediately revoke any unescorted access authority and authority to perform screening functions.

(m) *Aircraft operator responsibility.* The aircraft operator must—

(1) Designate an individual(s) to be responsible for maintaining and controlling the employment history investigations for those whom the aircraft operator has made a certification to an airport operator under § 107.209 (n) of this chapter, and for those whom the aircraft operator has issued identification media that are airport-accepted. The aircraft operator must designate a direct employee to maintain, control, and, as appropriate, destroy criminal records.

(2) Designate an individual(s) to maintain the employment history investigations of individuals with authority to perform screening functions whose files must be maintained at the location or station where the screener is performing his or her duties.

(3) Designate an individual(s) at appropriate locations to serve as the contact to receive notification from individuals seeking unescorted access authority or authority to perform screening functions of their intent to seek correction of their FBI criminal record.

(4) Audit the employment history investigations performed in accordance with this section and § 108.33 as it existed before November 14, 2001 (see 14 CFR parts 60 to 139 revised as of January 1, 2001). The aircraft operator must set forth the audit procedures in its security program. Section 138 of ATSA removes the exemption for the individuals with access to U.S. Customs' secured areas.

Issued in Washington, DC on December 3, 2001.

Jane F. Garvey,

Administrator.

REMINDERS

The items in this list were editorially compiled as an aid to Federal Register users. Inclusion or exclusion from this list has no legal significance.

RULES GOING INTO EFFECT DECEMBER 6, 2001

DEFENSE DEPARTMENT

Acquisition regulations:
- Multiyear contracting; published 12-6-01
- Performance-based contracting; published 12-6-01
- Technical amendments; published 12-6-01

ENVIRONMENTAL PROTECTION AGENCY

Air pollutants, hazardous; national emission standards:
- Hazardous waste combustors; published 12-6-01

Hazardous waste program authorizations:
- Indiana; published 12-6-01

TRANSPORTATION DEPARTMENT

Federal Aviation Administration

Air traffic operating and flight rules, etc.:
- Criminal history records checks; published 12-6-01

Airworthiness directives:
- Boeing; published 11-1-01

VETERANS AFFAIRS DEPARTMENT

Medical benefits:
- Inpatient hospital care and outpatient medical care; copayments; published 12-6-01

COMMENTS DUE NEXT WEEK

AGRICULTURE DEPARTMENT

Animal and Plant Health Inspection Service

Plant pest regulations; comments due by 12-10-01; published 10-9-01 [FR 01-25229]

AGRICULTURE DEPARTMENT

Animal and Plant Health Inspection Service

Plant Protection and Quarantine Treatment Manual; incorporation by reference:
- Limes; hot water treatment; comments due by 12-10-01; published 11-8-01 [FR 01-28065]

COMMERCE DEPARTMENT

National Oceanic and Atmospheric Administration

Fishery conservation and management:
- Alaska; fisheries of Exclusive Economic Zone—
  - King and tanner crab; comments due by 12-10-01; published 11-30-01 [FR 01-29772]
- Magnuson-Stevens Act provisions—
  - Domestic fisheries; exempted fishing permit applications; comments due by 12-14-01; published 11-29-01 [FR 01-29640]
  - Domestic fisheries; exempted fishing permit applications; comments due by 12-14-01; published 11-29-01 [FR 01-29641]

International fisheries regulations:
- Fraser River sockeye and pink salmon; inseason orders; comments due by 12-12-01; published 11-27-01 [FR 01-29495]

Marine mammals:
- Atlantic Large Whale Take Reduction Plan; comments due by 12-13-01; published 11-28-01 [FR 01-29601]

CONSUMER PRODUCT SAFETY COMMISSION

Flammable Fabrics Act:
- Mattresses/bedding; open flame ignition; flammability standard; comments due by 12-10-01; published 10-11-01 [FR 01-25442]

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

Testimony by employees and production of official records in legal proceedings; comments due by 12-14-01; published 11-14-01 [FR 01-28543]

EDUCATION DEPARTMENT

Postsecondary education:
- Higher Education Act Title IV program issues; negotiated rulemaking committees; intent to establish; comments due by 12-14-01; published 12-5-01 [FR 01-30260]

ENVIRONMENTAL PROTECTION AGENCY

Air quality implementation plans; approval and promulgation; various States:
- Wisconsin; comments due by 12-10-01; published 11-6-01 [FR 01-27829]

ENVIRONMENTAL PROTECTION AGENCY

Hazardous waste management system:
- RCRA hazardous waste management facilities; standardized permit, corrective action, and financial responsibility; comments due by 12-11-01; published 10-12-01 [FR 01-24204]

ENVIRONMENTAL PROTECTION AGENCY

Pesticides; tolerances in food, animal feeds, and raw agricultural commodities:
- Sethoxydim; comments due by 12-10-01; published 10-10-01 [FR 01-25021]

ENVIRONMENTAL PROTECTION AGENCY

Superfund program:
- National oil and hazardous substances contingency plan—
  - National priorities list update; comments due by 12-10-01; published 11-8-01 [FR 01-27831]

ENVIRONMENTAL PROTECTION AGENCY

Superfund program:
- National oil and hazardous substances contingency plan—
  - National priorities list update; comments due by 12-10-01; published 11-8-01 [FR 01-27832]

Water programs:
- Pollutants analysis test procedures; guidelines—
  - Mecury; measurement method; comments due by 12-10-01; published 10-9-01 [FR 01-24886]

Water supply:
- Underground injection control program—
  - Texas; Class I, III, IV, and V injection wells; comments due by 12-10-01; published 11-8-01 [FR 01-27835]
  - Texas; Class III brine mining injection wells; comments due by 12-10-01; published 11-8-01 [FR 01-27836]

FEDERAL COMMUNICATIONS COMMISSION

Digital television stations; table of assignments:
- Mississippi; comments due by 12-14-01; published 10-26-01 [FR 01-26943]

Practice and procedure:
- Satellite Digital Audio Radio Service; terrestrial repeater networks authorization; comments due by 12-14-01; published 11-23-01 [FR 01-29328]

Radio stations; table of assignments:
- Florida; comments due by 12-10-01; published 11-9-01 [FR 01-28205]
- Missouri; comments due by 12-10-01; published 10-31-01 [FR 01-27348]
- Texas; comments due by 12-10-01; published 10-31-01 [FR 01-27347]

FEDERAL COMMUNICATIONS COMMISSION

Television stations; table of assignments:
- Florida; comments due by 12-13-01; published 11-5-01 [FR 01-27639]

HEALTH AND HUMAN SERVICES DEPARTMENT

Food and Drug Administration

Animal drugs, feeds, and related products:
- Imported food products of animal origin; drug residue tolerances; comments due by 12-10-01; published 8-10-01 [FR 01-20161]

HEALTH AND HUMAN SERVICES DEPARTMENT

Grants:
- Substance Abuse and Mental Health Service Administration; mental health and substance abuse emergency response criteria; comments due by 12-10-01; published 10-11-01 [FR 01-25451]

HOUSING AND URBAN DEVELOPMENT DEPARTMENT

Federal Housing Enterprise Oversight Office

Practice and procedure:
- Federal National Mortgage Association (Fannie Mae) and Federal Home Loan Mortgage Corporation (Freddie Mac)—
  - Corporate governance; comments due by 12-13-01; published 11-9-01 [FR 01-28214]

INTERIOR DEPARTMENT

Fish and Wildlife Service

Migratory bird hunting:

Light goose populations; harvest management; comments due by 12-11-01; published 10-12-01 [FR 01-25612]

Correction; comments due by 12-14-01; published 11-7-01 [FR 01-27940]

JUSTICE DEPARTMENT

Drug Enforcement Administration

Schedules of controlled substances:

Tetrahydrocannabinols; placement into Schedule I

Clarification; comments due by 12-10-01; published 10-9-01 [FR 01-25023]

JUSTICE DEPARTMENT

Immigration and Naturalization Service

Immigration:

Foreign language alien broadcasters; special fourth preference immigrant visas; comments due by 12-10-01; published 10-11-01 [FR 01-25478]

LABOR DEPARTMENT

Employment and Training Administration

Disaster unemployment assistance program; eligibility clarification due to September 11 terrorist attacks; comments due by 12-13-01; published 11-13-01 [FR 01-28412]

NUCLEAR REGULATORY COMMISSION

Spent nuclear fuel and high-level radioactive waste; independent storage; licensing requirements:

Approved spent fuel storage casks; list; comments due by 12-14-01; published 11-14-01 [FR 01-28511]

NUCLEAR REGULATORY COMMISSION

Spent nuclear fuel and high-level radioactive waste; independent storage; licensing requirements:

Approved spent fuel storage casks; list; comments due by 12-14-01; published 11-14-01 [FR 01-28512]

SMALL BUSINESS ADMINISTRATION

Business loans:

Loan guaranty and amounts, minimum guaranteed dollar amount of 7(a) loans, financing percentages, etc.; comments due by 12-14-01; published 11-14-01 [FR 01-28371]

TRANSPORTATION DEPARTMENT

Coast Guard

Drawbridge operations:

Pennsylvania; comments due by 12-10-01; published 10-10-01 [FR 01-25425]

Vessel documentation:

Coastwise trade vessels; foreign ownership; "sold foreign" interpretation; comments due by 12-11-01; published 9-12-01 [FR 01-22815]

TRANSPORTATION DEPARTMENT

Federal Aviation Administration

Airworthiness directives:

Airbus; comments due by 12-14-01; published 11-19-01 [FR 01-28794]

Bell; comments due by 12-11-01; published 10-12-01 [FR 01-25695]

TRANSPORTATION DEPARTMENT

Federal Aviation Administration

Airworthiness directives:

Bell; comments due by 12-14-01; published 10-15-01 [FR 01-25692]

TRANSPORTATION DEPARTMENT

Federal Aviation Administration

Airworthiness directives:

Boeing; comments due by 12-10-01; published 10-24-01 [FR 01-26713]

General Electric Co.; comments due by 12-10-01; published 10-10-01 [FR 01-25400]

Pilatus Britten-Norman Ltd.; comments due by 12-10-01; published 11-7-01 [FR 01-27653]

Sikorsky; comments due by 12-11-01; published 10-12-01 [FR 01-25696]

SOCATA-Groupe AEROSPATIALE; comments due by 12-12-01; published 11-14-01 [FR 01-28420]

TRANSPORTATION DEPARTMENT

National Highway Traffic Safety Administration

Motor vehicle safety standards:

Side impact protection and fuel system integrity—

Radial tires instead of bias ply tires used on moving barriers; comments due by 12-10-01; published 10-10-01 [FR 01-25428]

Transportation Recall Enhancement, Accountability, and Documentation (TREAD) Act; implementation:

Foreign safety recalls and campaigns related to potential defects; information reporting; comments due by 12-10-01; published 10-11-01 [FR 01-25429]

TREASURY DEPARTMENT

Thrift Supervision Office

Savings and loan holding companies:

Authority to engage in financial activities; comments due by 12-10-01; published 11-8-01 [FR 01-27889]

VETERANS AFFAIRS DEPARTMENT

Loan guaranty:

Prepurchase counseling requirements; comments due by 12-10-01; published 10-11-01 [FR 01-25459]

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. This list is also available online at *http://www.nara.gov/fedreg/plawcurr.html*.

The text of laws is not published in the **Federal Register** but may be ordered in "slip law" (individual pamphlet) form from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–1808). The text will also be made available on the Internet from GPO Access at *http://www.access.gpo.gov/nara/nara005.html*. Some laws may not yet be available.

H.R. 768/P.L. 107–72

Need-Based Educational Aid Act of 2001 (Nov. 20, 2001; 115 Stat. 648)

H.R. 2620/P.L. 107–73

Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 2002 (Nov. 26, 2001; 115 Stat. 651)

H.R. 1042/P.L. 107–74

To prevent the elimination of certain reports. (Nov. 28, 2001; 115 Stat. 701)

H.R. 1552/P.L. 107–75

Internet Tax Nondiscrimination Act (Nov. 28, 2001; 115 Stat. 703)

H.R. 2330/P.L. 107–76

Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2002 (Nov. 28, 2001; 115 Stat. 704)

H.R. 2500/P.L. 107–77

Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 2002 (Nov. 28, 2001; 115 Stat. 748)

H.R. 2924/P.L. 107–78

To provide authority to the Federal Power Marketing Administration to reduce vandalism and destruction of property, and for other purposes. (Nov. 28, 2001; 115 Stat. 808)

Last List November 23, 2001

Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service of newly enacted public laws. To subscribe, go to *http://hydra.gsa.gov/archives/publaws-l.html* or send E-mail to **listserv@listserv.gsa.gov** with the following text message:

Federal Register

12–7–01 Friday
Vol. 66 No. 236 Dec. 7, 2001
Pages 63487–63620

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512-1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $699, or $764 for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $264. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $10.00 for each issue, or $10.00 for each group of pages as actually bound; or $2.00 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Title 3—

The President

Presidential Determination No. 02–04 of November 21, 2001

Presidential Determination on FY 2002 Refugee Admissions Numbers and Authorizations of In-Country Refugee Status Pursuant to Sections 207 and 101(a)(42), Respectively, of the Immigration and Nationality Act, and Determination Pursuant to Section 2(b)(2) of the Migration and Refugee Assistance Act, as Amended

Memorandum for the Secretary of State

In accordance with section 207 of the Immigration and Nationality Act (the "Act") (8 U.S.C. 1157), as amended, and after appropriate consultations with the Congress, I hereby make the following determinations and authorize the following actions:

The admission of up to 70,000 refugees to the United States during FY 2002 is justified by humanitarian concerns or is otherwise in the national interest; provided, however, that this number shall be understood as including persons admitted to the United States during FY 2002 with Federal resettlement assistance under the Amerasian immigrant admissions program, as provided below.

The 70,000 admissions numbers shall be allocated among refugees of special humanitarian concern to the United States in accordance with the following regional allocations; provided, however, that the number allocated to the East Asia region shall include persons admitted to the United States during FY 2002 with Federal refugee resettlement assistance under section 584 of the Foreign Operations, Export Financing, and Related Programs Appropriations Act of 1988, as contained in section 101(e) of Public Law 100–202 (Amerasian immigrants and their family members); provided further that the number allocated to the former Soviet Union shall include persons admitted who were nationals of the former Soviet Union, or in the case of persons having no nationality, who were habitual residents of the former Soviet Union, prior to September 2, 1991:

Africa	22,000
East Asia	4,000
Eastern Europe	9,000
Former Soviet Union	17,000
Latin America/Caribbean	3,000
Near East/South Asia	15,000

Unused admissions numbers allocated to a particular region may be transferred to one or more other regions if there is an overriding need for greater numbers for the region or regions to which the numbers are being transferred. You are hereby authorized and directed to consult with the Judiciary Committees of the Congress prior to reallocation of numbers from one region to another.

Pursuant to section 2(b)(2) of the Migration and Refugee Assistance Act of 1962, as amended, I hereby determine that assistance to or on behalf of persons applying for admission to the United States as part of the overseas refugee admissions program will contribute to the foreign policy interests of the United States and designate such persons for this purpose.

An additional 10,000 refugee admissions numbers shall be made available during FY 2002 for the adjustment to permanent resident status under section

290(b) of the Immigration and Nationality Act (8 U.S.C. 1159(b)) of aliens who have been granted asylum in the United States under section 208 of the Act (8 U.S.C. 1158), as this is justified by humanitarian concerns or is otherwise in the national interest.

In accordance with section 101(a)(42) of the Act (8 U.S.C. 1101(a)(42)) and after appropriate consultation with the Congress, I also specify that, for FY 2002, the following persons may, if otherwise qualified, be considered refugees for the purpose of admission to the United States within their countries of nationality or habitual residence:

(a) Persons in Vietnam

(b) Persons in Cuba

(c) Persons in the former Soviet Union

You are authorized and directed to report this determination to the Congress immediately and to publish it in the **Federal Register**.

14 CFR Part 71

[Airspace Docket No. 01–ASO–13]

Amendment of Class E Airspace; Dayton, TN; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; correction

SUMMARY: This action corrects an error in the geographic coordinates of a final rule amending the Class E airspace at Dayton, TN, that was published in the **Federal Register** on November 27, 2001, (66 FR 59136), 01–ASO–13.

EFFECTIVE DATE: 0901 UTC, February 21, 2002.

FOR FURTHER INFORMATION CONTACT: Walter R. Cochran, Manager, Airspace Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 305–5627.

SUPPLEMENTARY INFORMATION:

History

Federal Register document 01–29480, Airspace Docket No. 01–ASO–13, published on November 27, 2001 (66 FR 59136), amended Class E5 airspace at Dayton, TN. An error was discovered in the geographic coordinates for the Bradley Memorial Hospital point in space. This action corrects that error.

Correction to Final Rule

Accordingly, pursuant to the authority delegated to me, the geographic coordinates for the Class E5 airspace area at Dayton, TN, incorporated by reference at (14 CFR 71.1 and published in the **Federal Register** on November 27, 2001 (66 FR 59136), is corrected as follows:

§ 71.1 [Corrected]

ASO TN E5 Dayton, TN [CORRECTED]

1. On page 39136, column 3, under Bradley Memorial Hospital, Cleveland, TN, correct the geographic coordinates "(Lat. 35°10′45″ N, long 84°52′56″ W)" to read "(Lat. 35°10′52″ N, long. 84°52′56″ W)".

RIN 2120–AA66

Revision of Legal Descriptions of Multiple Federal Airways in the Vicinity of Salt Lake City, UT

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the legal descriptions of four Federal airways and eight jet routes that use the Salt Lake City, UT, very high frequency omnidirectional range/tactical air navigation (VORTAC) in their route structure. Currently, the Salt Lake City VORTAC and the Salt Lake City International Airport, UT, share the same location identifier. The fact that the VORTAC and the airport are not collocated has led to confusion among users. To eliminate this confusion, the Salt Lake City VORTAC will be renamed the "Wasatch VORTAC." All airways with "Salt Lake City VORTAC" included in their legal descriptions will be amended, concurrent with the effective date of this final rule, to reflect the name change.

EFFECTIVE DATE: 0901 UTC, April 18, 2002.

FOR FURTHER INFORMATION CONTACT: Ken McElroy, Airspace and Rules Division, ATA–400, Office of Air Traffic Airspace Management, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

The Rule

This action amends Title 14 CFR part 71 (part 71) by amending the legal descriptions of four Federal airways and eight jet routes that have "Salt Lake City VORTAC" included as part of their route structure. Currently, the Salt Lake City, UT, VORTAC and the Salt Lake City International Airport, UT, share the same location identifier. The fact that the VORTAC and the airport are not collocated has led to confusion among users. To eliminate this confusion, the Salt Lake City VORTAC will be renamed the "Wasatch VORTAC." All airways with "Salt Lake City VORTAC" included in their legal descriptions will be amended to reflect the name change. The name change of the VORTAC will coincide with the effective date of this rulemaking action.

Since this action merely involves editorial changes in the legal description of three Federal airways, and does not involve a change in the dimensions or operating requirements of that airspace, notice and public procedure under 5 U.S.C. 553(b) are unnecessary.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Jet Routes and domestic VOR Federal airways are published in paragraphs 2004 and 6010(a), respectively, of FAA Order 7400.9J, dated August 31, 2001, and effective September 16, 2001, which is incorporated by reference in 14 CFR 71.1. The jet routes and airways listed

in this document will be published subsequently in the order.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854,24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9], Airspace Designations and Reporting Points, dated August 31, 2001, and effective September 16, 2001, is amended as follows:

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR PART 12

[T.D. 01–86]

RIN 1515–AC95

Import Restrictions Imposed on Archaeological and Ethnological Materials From Bolivia

AGENCY: Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to reflect the imposition of import restrictions on certain archaeological and ethnological materials originating in Bolivia. These restrictions are being imposed pursuant to an agreement between the United States and Bolivia that has been entered into under the authority of the Convention on Cultural Property Implementation Act in accordance with the 1970 United Nations Educational, Scientific and Cultural Organization (UNESCO) Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property. The document amends the Customs Regulations by adding Bolivia to the list of countries for which an agreement has been entered into for imposing import restrictions. The document also contains the "Designated List of Archaeological and Ethnological Material From Bolivia" that describes the types of articles to which the restrictions apply.

EFFECTIVE DATE: December 7, 2001.

FOR FURTHER INFORMATION CONTACT: (Legal Aspects) Joseph Howard, Intellectual Property Rights Branch (202) 927–2336; (Operational Aspects) Al Morawski, Trade Operations (202) 927–0402.

SUPPLEMENTARY INFORMATION:

Background

The value of cultural property, whether archaeological or ethnological in nature, is immeasurable. Such items often constitute the very essence of a society and convey important information concerning a people's origin, history, and traditional setting. The importance and popularity of such items regrettably makes them targets of theft, encourages clandestine looting of archaeological sites, and results in their illegal export and import.

The U.S. shares in the international concern for the need to protect endangered cultural property. The appearance in the U.S. of stolen or illegally exported artifacts from other

countries where there has been pillage has, on occasion, strained our foreign and cultural relations. This situation, combined with the concerns of museum, archaeological, and scholarly communities, was recognized by the President and Congress. It became apparent that it was in the national interest for the U.S. to join with other countries to control illegal trafficking of such articles in international commerce.

The U.S. joined international efforts and actively participated in deliberations resulting in the 1970 UNESCO Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property (823 U.N.T.S. 231 (1972)). U.S. acceptance of the 1970 UNESCO Convention was codified into U.S. law as the "Convention on Cultural Property Implementation Act" (Pub.L. 97–446, 19 U.S.C. 2601 *et seq.*) ("the Act"). This was done to promote U.S. leadership in achieving greater international cooperation towards preserving cultural treasures that are of importance to the nations from where they originate and to achieving greater international understanding of mankind's common heritage.

During the past several years, import restrictions have been imposed on archaeological and ethnological artifacts of a number of signatory nations. These restrictions have been imposed as a result of requests for protection received from those nations as well as pursuant to bilateral agreements between the United States and other countries. More information on import restrictions can be found on the International Cultural Property Protection Web site (*http://exchanges.state.gov/education/culprop*).

Import restrictions are now being imposed on certain archaeological and ethnological materials originating in Bolivia as the result of a bilateral agreement entered into between the United States and Bolivia (the Agreement). The Agreement was entered into on December 4, 2001, pursuant to the provisions of 19 U.S.C. 2602. The archaeological materials subject to the Agreement represent pre-Columbian cultures of Bolivia and range in date from approximately 10,000 B.C. to A.D. 1532. The ethnological materials subject to the Agreement are from the Colonial and Republican periods and range in date from A.D. 1533 to 1900.

Accordingly, § 12.104g(a) of the Customs Regulations is being amended to indicate that restrictions have been imposed pursuant to the Agreement between the United States and Bolivia. This document amends the regulations by imposing import restrictions on certain archaeological and ethnological materials from Bolivia as described below.

It is noted that emergency import restrictions on antique ceremonial textiles from Coroma, Bolivia were previously imposed but are no longer in effect.(See T.D. 89–37, published in the **Federal Register** (54 FR 17529) on March 14, 1989, and T.D. 93–34 published in the **Federal Register** (58 FR 29348) on May 20, 1993.) The restrictions published in this document are separate and independent from these previously imposed emergency import restrictions. This document removes the reference in the Customs Regulations in § 12.104g(b) to these expired emergency import restrictions.

Material Encompassed in Import Restrictions

In reaching the decision to recommend protection for the cultural patrimony of Bolivia, the Acting Assistant Secretary for Educational and Cultural Affairs of the U. S. State Department determined, pursuant to the requirements of the Act, that the cultural patrimony of Bolivia is in jeopardy from the pillage of archaeological and ethnological materials and this pillage is widespread, on-going, and systematically destroying the non-renewable archaeological and ethnological record of Bolivia.

The archaeological materials which are the subject of the Acting Assistant Secretary's determination represent pre-Columbian cultures of Bolivia, range in date from approximately 10,000 B.C. to A.D. 1532, and include: (1) Objects comprised of textiles, featherwork, ceramics, metals, and lithics (stone); and (2) perishable remains, such as bone, human remains, wood, and basketry that represent cultures including but not limited to the Formative Cultures (such as Wankarani and Chiripa, Tiwanaku, and Inca), Tropical Lowland Cultures, and Aymara Kingdom. The ethnological materials which are the subject of the Acting Assistant Secretary's determination represent the Colonial and Republican periods, range in date from A.D. 1533 to 1900, and include: (1) Objects of indigenous manufacture and ritual, sumptuary, or funeral use related to the pre-Columbian past, which may include masks, wood, musical instruments, textiles, featherwork, and ceramics; and (2) objects used for rituals and religious ceremonies, including Colonial religious art, such as paintings and sculpture, reliquaries, altars, altar objects, and liturgical vestments.

The Acting Assistant Secretary also determined, pursuant to the requirements of the Act, that the archaeological materials covered by the Agreement are of cultural significance because they derive from numerous cultures that developed autonomously in the Andean region and attained a high degree of technological, agricultural, and artistic achievement, but whose underlying political, economic, and religious systems remain poorly understood. Also, the archaeological materials represent a legacy that serves as a source of identity and pride for the modern Bolivian nation. The Acting Assistant Secretary determined that the ethnological materials play an essential and irreplaceable role in indigenous Bolivian communities and are vested with symbolic and historic meaning. They are used in ceremonial and ritualistic practices and frequently serve as marks of identity within the society. Serving as testimony to the continuation of pre-Columbian cultural elements despite European political domination, they form an emblem of national pride in a society that is largely indigenous.

Also, pursuant to the requirements of the Act, the Acting Assistant Secretary determined that Bolivia has taken measures consistent with the Convention to protect its cultural patrimony, and that the application of import restrictions set forth in Section 307 of the Act is consistent with the general interest of the international community in the interchange of cultural property among nations for scientific, cultural, and educational purposes.

Designated List

The bilateral agreement between Bolivia and the United States covers the categories of artifacts described in a "Designated List of Archaeological and Ethnological Material from Bolivia," which is set forth below. Importation of articles on this list is restricted unless the articles are accompanied by an appropriate export certificate issued by the Government of Bolivia or documentation demonstrating that the articles left the country of origin prior to the effective date of the import restriction.

List of Archaeological and Ethnological Materials From Bolivia

Archaeological Materials

I. Pre-Columbian Ceramics

Ceremonial, sumptuary, and funerary ceramics representing the following principal cultures:

A. Formative Cultures (2000 B.C.–A.D. 400)

Decoration: Ceramics are monochrome in appearance from the use of red, tan, or pale orange slip against a fire-clouded surface; some forms are black and finely polished. Some show use of polychrome slip paints in red, orange, black, and yellow. The surface exterior is polished or burnished. There is some use of applique and incision.

Forms: Plates (*ch'illami*), open bowls, vases, double-cylinder vases with bridge handles, beakers with vertical handles, pitchers, incense burners, portrait jars, handled funerary jars, boot-shaped jars, tripod-base jars, canoe-shaped bowls, double-spout bottles, effigy jars in the shape of humans, animals and birds, and figurines.

Size: Varies according to form; miniatures average 2 cm. in height while over-sized *ch'illamis* can average 70 cm. in width/rim diameter.

Identifying features: Formative Period ceramics are plain in appearance but their shapes are distinct. Some are miniature or over-sized (bowls, or *ch'illami*); asymmetrical or lop-sided (boot-shaped jars); and unconventional (beakers with vertical handles, canoe-shaped vessels, "genie lamp" shape).

Styles: Formative Period style ceramics are distributed throughout Bolivia. These include: Chiripa, Fluke, Kaluyo/Qaluyu, Wankarani, Salar de Uyuni, Urus, Chipayas, Tupuraya, Mojocoya, Pocona, Mizque, Aiquile, Beni, Pando, Santa Cruz regions, and Mojeñas styles. Other terms used include: Quillacollo, Cliza, Llampara, Inquisivi, Navillera, Tapacarí, Capinota, Parotani, Chullpa Pampa, Sacaba, Tiraque, Chullpa Pata, Santa Lucia, Arani, Sierra Mokho, and Sauces.

B. Wankarani (1600 B.C.–A.D. 100)

Decoration: Typically monochrome, slipped vessels in red or black and well-polished. Black stripes against a red surface are also common. Incision, punctate, and applique are used for surface decoration on effigy vessels.

Forms: Plates (*ch'illami*), open bowls, vases, beakers with vertical handles, pitchers, incense burners, portrait jars, double-spout bottles, funerary urns, ladles, conical vases with circular bases, effigy jars in the shape of humans, animals and birds, and figurines.

Size: Varies according to form.

Identifying features: Plain forms and monochrome surface decoration that is well-polished. Most rim edges show a slight, rounded scallop that often gives the appearance of a misshapen vessel.

Styles: Wankarani ceramics are limited in distribution to northeast of Lake Titicaca and north of Lake Poopo. The term Wankarani is sometimes used broadly to refer to all Formative Period ceramics.

C. Chiripa (1500 B.C.–A.D. 200)

Decoration: Generally red or black slipped surfaces, with cream, yellow, or black painted geometric designs. Effigy vessels and fineware jars are often painted and incised. Yellow-painted, incised, and modeled flat-based jars are distinct.

Forms: Bowls, vases, pitchers, jars, effigy jars, and figurines. Flat-based restricted bowls with small, animal-shaped lug handles are common.

Size: Varies according to form.

Identifying features: Yellow-or cream-painted on red, incised, and modeled flat-based jars and bowls are distinct. The walls of the vessels are thick (5 cm. to 8 cm.) and the rims are thickened. The painted decoration is geometric, rendered in wide strokes.

Style: Linked to the Wankarani and Tiwanaku I styles of the Bolivian highlands.

D. Tiwanaku (A.D. 600–1200)

Decoration: Well-fired (hard), polychrome pottery in black on red or combined black, red, yellow, orange, gray, brown, and white. Design motifs include human and divine representations, pumas, jaguars, birds, and geometric elements. On many beakers, the design is complex. Plastic decoration includes modeling, incision, and applique.

Forms: Bowls, plates, urns, vases, *lebrillos*, flat-bottomed beakers, incense burners (*sahumerios*), lamps (*mechero*), effigy jars, portrait vessels, bottles, flat-bottomed bottles, challadores, and some tripod forms. The rim edges of some beakers are scalloped.

Size: Varies according to form; storage jars are known to be up to one meter in height.

Identifying features: Tiwanaku finewares are typically polychrome and often exhibit complex images of cats, llamas, or personages bearing a staff in each outstretched arm. Beakers and plates often bear an open-mouthed feline or llama adornment along the rim edge. Some decorated jars (*lebrillos*) are short-bodied with disproportionately large, outflaring rims.

Styles: Tiwanaku I-V, Qalasasaya, Qeya, Yampara, Mollo, Omereque, Uruquilla, Quillacasa, Yura, Tupuraya, Ciaco, Mojocoya, Lakatambo, Colla, and Presto-Puno. Linked to the Wari style of Ayacucho, Peru, and the earlier Chiripa style of Bolivia.

E. Aymara Kingdoms (A.D. 1200–1450)

Decoration: Monochrome and polychrome painted vessels utilizing red, grey, orange, white, black, and reddish-brown for intricate geometric designs.

Forms: Bowl, vase (*lebrillo*), pitcher, jar, figurine, cup, beaker (*kero*), portrait vessel, plate, oil lamp (*mechero*), incense burner (*sahumerio*), and challador.

Size: Varies according to form.

Identifying features: After the demise of the Tiwanaku empire, local ceramic traditions re-emerged. Design elements such as color and placement on the vessel are retained from Tiwanaku styles, but religious personages and deities are replaced by abstract, geometric designs.

Styles: Mollo, Pacajes, Uruquilla, Yuna, Chaqui, Lupaqa, Karanga, Charcas, Killaqa, Karanka, Kara Kara, Ciaco, Chuyes, Tomatas, Yampará, and Mizque Regional. Also referred to as "Decadent Tiwanaku."

F. Inca (A.D. 1450–1533)

Decoration: Monochrome and polychrome painted vessels utilizing red, grey, orange, white, black, and reddish-brown for intricate geometric designs arranged in bands.

Forms: Cook pot, bowl, vase (*lebrillo*), pitcher, jar (*aríbalo*), figurine, cup, kero (*beaker*), portrait vessel, plate, oil lamp (*mechero*), incense burner (*sahumerio*), funerary urn, bottle (*angara*), challador, storage vessel.

Size: Varies according to form; funerary urns and storage vessels can average one meter in height.

Identifying features: The most recognizable form of these ceramics is the flat-based beaker or *kero*. These average about 10 cm. in height and are painted with complex geometric and naturalistic designs in polychrome colors, often adorned at or near the rim by a modeled puma, llama, or jaguar head. *Keros* are often decorated in the style called Tocapu, an Inca design consisting of horizontally and vertically arranged squares with abstract and geometric motifs in each square.

Styles: Inca, Yampará, Lakatambo, Colla, Yura, and Pacajes.

G. Tropical Lowland Cultures (1400 B.C.–A.D. 1533):

Decoration: Often plain slipped in colors of red, tan, cream, orange, black, and yellow with bands of geometric designs.

Forms: Bowls, vases, pitchers, jars, funerary urn, plate, oil lamp, and challador.

Size: Varies according to form; some funerary urns are over one meter in height.

Identifying features: Soft pastes containing organic inclusions.

Styles: Casarabe, Mamoré, San Juán, Palmar, Vanegas, and Chané.

H. Ceramic Musical Instruments (Formative Cultures—Inca, including Tropical Lowland Cultures)

Decoration/Form: Ceramic musical instruments include whistles, flutes, rattles, and panpipes. Often plain slipped in colors of red, tan, cream, orange, black, and yellow or painted with intricate polychrome designs.

Size: Panpipes range between 20 cm. and 120 cm.; whistles and rattles are typically hand size; flutes range from 20 cm. to 120 cm.

Styles and distribution: Whistle/flute (*ocarina* or *silbato*); Rattle (*sonajera*); Flute/panpipe (zampoña). Distributed throughout all parts of Bolivia.

II. Pre-Columbian Textiles

Ceremonial, sumptuary, and funerary textiles representing the following principal cultures:

A. Tiwanaku

1. Shawl/mantle (*awayo, ahuayo, lliclla, llacota*): Square or rectangular garment composed of two pieces of cloth sewn together. Woven from cotton and/or camelid fibers and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. Fabric designs include: (1) Stripes arranged across the cloth in a vertical or horizontal pattern; (2) repetitive arrangements of llamas or other animal motifs; (3) patterns created from tie-dye, checkerboards, and repetitive squares or cloth patchwork. Average size is one square meter.

2. Tunic (*unku, ccahua*): Man's ceremonial vestment constructed from one piece of cloth which is folded in half and sewn up the sides, leaving openings for the arms at the top and an opening in the middle for the head. Woven from cotton and/or camelid fibers, often in tapestry weave, and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. Designs are typically found in the hip, sleeve, and neck areas but there are more elaborate examples where designs cover the entire garment: (1) Stripes arranged across the cloth in a vertical or horizontal pattern; (2) repetitive arrangements of llamas or other animal motifs; (3) patterns created from tie-dye, checkerboards, repetitive squares or cloth patchwork. Average size is 135 cm. x 92 cm.

3. Belts and bag belts (*chumpi, wak'a*): Worn by both men and women, woven from cotton or camelid fibers in a variety of widths, lengths, and colors. Found in either a solid color or simple polychrome geometricized design. Bag belts are long rectangular sashes comprised of one piece of cloth folded length-wise that contain an opening in the top and are secured to the waist by braided straps.

4. Hat, headband: Includes polychrome caps, four-cornered hats with tassels (gorro), headbands, and small cloths sometimes used as head-coverings by women (icuña) which were either woven or knotted and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. When present, designs are geometric or depict highly stylized animals, such as llamas and other camelids.

5. Bag/pouch (*ch'uspa, huallquepo*): Carried by both men and women; woven from cotton or camelid fibers in a variety of widths, lengths and colors. Found in either a solid color or simple polychrome stripe pattern arrangement with geometric motifs. These bags are usually square (20 cm.) or rectangular with a woven carrying strap. They often contain small pockets on the pouch exterior and are decorated with tassels.

6. Cloth: Square, rectangular, or fragmentary cloth woven from cotton or camelid fibers, or constructed from soft tree bark or other natural fiber, and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. Some examples are striped in a vertical or horizontal pattern. Tapestry wall-hangings often exhibit complex geometric or animal designs arranged in repetitive patterns. Average size ranges between six square centimeters and six square meters. Cloth may be fragmentary, folded flat, or bundled (q'epi) for use in ritual ceremonies. Women's ritual cloth, called icuña or tari, is also included in this category.

7. *Featherwork:* Colorful, tropical feathers attached to leather, cloth, wood, or other material, such as basketry, to create adornments worn on the wrists, ankles, neck, waist, back, and head, including the lips and ears. Most typically found are headdresses, which may consist of small crowns (30 cm. average) or large, towering bonnets of feathers (80 cm.). This category also includes feather-covered ritual belts and textiles (35–70 cm.), fans (250 cm. long), staves or batons (145–250 cm.), basketry supports, and healer's amulets or photadi (80–250 cm.).

B. Aymara Kingdom

1. Shawl/mantle (*awayo, ahuayo, lliclla, llacota, iscayo*): Square or rectangular garment composed of two pieces of cloth sewn together. Woven from cotton or camelid fibers and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. Designs are typically stripes arranged across the cloth in a vertical or horizontal pattern or along the margins of the garment. Average size is one square meter.

2. Tunic (*unku, ccahua*): Man's ceremonial vestment constructed from one piece of cloth which is folded in half and sewn up the sides, leaving openings for the arms at the top and an opening in the middle for the head. Woven from cotton or camelid fibers and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. Designs are typically found in the hip, sleeve, and neck areas, but there are examples of more elaborate designs which cover the entire garment; plain vertical stripe designs across the garment are also known. Average size is 135 cm. x 92 cm.

3. Dress (*aksu/urku*): Woman's ceremonial vestment woven from camelid fiber constructed from one piece of cloth that is wrapped around the body. These are dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. The vestments are plain or striped. Average length is 1.5 meters.

4. Belts and bag belts (*chumpi, wak'a*): Worn by both men and women; woven from cotton or camelid fibers in a variety of widths, lengths, and colors. Found in either a solid color or simple polychrome geometricized design. Bag belts are long rectangular sashes comprised of one piece of cloth folded length-wise that contain an opening in the top and are secured to the waist by braided straps.

5. Hat (*chucu*) or headband: The Aymara chucu is a conical shaped cap that is attached to the head with a headband. These were woven from camelid fibers and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. When present, designs are geometric or depict highly stylized animals, such as llamas and other camelids.

6. Bag/pouch (*ch'uspa, huallquepo, istalla*): Carried by both men and women, woven from cotton or camelid fibers in a variety of widths, lengths, and colors. Found in either a solid color or simple polychrome stripe pattern arrangement with geometric motifs. These bags are usually square (20 cm.) or rectangular with a woven carrying strap. They often contain small pockets

on the pouch exterior and are decorated with tassels.

7. *Cloth:* Square, rectangular, or fragmentary cloth woven from cotton or camelid fibers, or constructed from soft tree bark or other natural fiber, and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. Some examples are striped in a vertical or horizontal pattern. Average size ranges between six square centimeters and six square meters. Cloth may be fragmentary, folded flat, or bundled (*q'epi*) for use in ritual ceremonies. Woman's ritual cloth, called *icuña* or *tari*, is also included in this category.

8. *Featherwork:* Consists of colorful, tropical feathers attached to leather, cloth, wood, or other material, such as basketry, to create adornments worn on the wrists, ankles, neck, waist, back, and head, including the lips and ears. Most typically found are head dresses, which may consist of small crowns (30 cm. average) or large, towering bonnets of feathers (80 cm.). This category also includes feather-covered ritual belts and textiles (35–70 cm.), fans (250 cm. long), staves or batons (145–250 cm.), basketry supports, and healer's amulets or *photadi* (80–250 cm.).

C. Inca

1. Shawl/mantle (*awayo, ahuayo, lliclla, llacota, iscayo*): Square or rectangular garment composed of two pieces of cloth sewn together. Woven from cotton or camelid fibers and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. Designs are typically stripes arranged across the cloth in a vertical or horizontal pattern or along the margins of the garment. Average size is one square meter.

2. Tunic (unku, ccahua): Man's ceremonial vestment constructed from one piece of cloth which is folded in half and sewn up the sides, leaving openings for the arms at the top and an opening in the middle for the head. Woven from cotton and/or camelid fibers, often in tapestry weave, and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. Designs are typically found in the hip, sleeve, and neck areas, but there are more elaborate examples where designs cover the entire garment: (1) Stripes arranged across the cloth in a vertical or horizontal pattern; (2) repetitive arrangements of llamas or other animal motifs; (3) patterns created from tie-dye, checkerboards, and repetitive squares or cloth patchwork. Tunics are often decorated in the style called Tocapu, an Inca design consisting of horizontally and vertically arranged squares with abstract and geometric motifs in each square. Average size is 135 cm. x 92 cm.

3. Dress (aksu/urku): Woman's ceremonial dress woven from camelid fiber and constructed from a rectangular, two-piece cloth that is wrapped around the body and tied at the waist. These are dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. The vestments are normally plain or striped, but during the Inca Period, many were made from cumbi (see Inca cloth) and decorated in striped patterns (usually horizontal) of geometric motifs. Average length is 1.5 meters.

4. Belts and bag belts (*chumpi, wak'a*): Worn by both men and women, woven from cotton or camelid fibers in a variety of widths, lengths, and colors. Found in either a solid color or simple polychrome geometricized design. Bag belts are long rectangular sashes comprised of one piece of cloth folded length-wise that contain an opening in the top and are secured to the waist by braided straps.

5. Hat (*chuc, ñañaca*) or headband: The *chucu* is a conical shaped cap that is attached to the head with a headband. These were woven from camelid fibers and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. When present, designs are geometric or depict highly stylized animals, such as llamas and other camelids. Ñañacas are head coverings worn by women that range in size between 10 square cm. and one square meter.

6. Bag/pouch (*ch'uspa, huallquepo, istalla*): Carried by both men and women; woven from cotton or camelid fibers in a variety of widths, lengths, and colors. Found in either a solid color or simple polychrome stripe pattern arrangement with geometric motifs. These bags are usually square (20 cm.) or rectangular with a woven carrying strap. They often contain small pockets on the pouch exterior and are decorated with tassels.

7. Cloth and *cumbi:* Square, rectangular, or fragmentary cloth woven from fine cotton and/or camelid fibers, or constructed from soft tree bark or other natural fiber, and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. Some examples are striped in a vertical or horizontal pattern. Average size ranges between six square centimeters and six square meters. Cloth may be fragmentary, folded flat, or bundled (*q'epi*) for use in ritual ceremonies. Woman's ritual cloth, called *icuña, tari,* or *ñañaca,* is also included in this category. *Cumbi,* or "royal Inca cloth," refers to a finely woven, soft cloth produced for Inca dignitaries and is analogous to gold in value. Often baby alpaca wool was utilized.

8. Knotted Strings or *quipu* (*k'ipu, khipu*): *Quipus* are knotted string devices used to count and record. They were created from woven cotton and/or camelid fiber twine. They appear as sets of knotted strings in colors, such as tan, cream, brown, or coffee. *Quipus* range in size from hand-size to 2.5 meters in length.

9. *Featherwork:* Colorful, tropical feathers attached to leather, cloth, wood, or other material to create adornments worn on the wrists, ankles, neck, waist, back, and head, including the lips and ears. Most typically found are headdresses, which may consist of small crowns (30 cm. average) or large, towering bonnets of feathers (80 cm.). This category also includes feather-covered ritual belts and textiles (35–70 cm.), fans (250 cm. long), staves or batons (145–250 cm.), basketry supports, and healer's amulets or *photadi* (80–250 cm.).

D. Tropical Lowland Cultures

1. *Cloth:* Square, rectangular, or fragmentary cloth woven from cotton, or constructed from soft tree bark or other natural fiber, and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. Some examples are striped in a vertical or horizontal pattern. Average size ranges between six square centimeters and six square meters. Cloth may be fragmentary, folded flat, or bundled (*q'epi*) for use in ritual ceremonies.

2. *Featherwork:* Colorful, tropical feathers attached to leather, cloth, wood, or other material to create adornments worn on the wrists, ankles, neck, waist, back, and head, including the lips and ears. Most typically found are headdresses, which may consist of small, modest crowns (30 cm. average) or large, towering bonnets of feathers (80 cm.). This category also includes feather-covered ritual belts and textiles (35–70 cm.), fans (250 cm. long), staves or batons (145–250 cm.), and healer's amulets or *photadi* (80–250 cm.).

III. Pre-Columbian Metals

Ceremonial, sumptuary, and funerary metal objects produced and used by indigenous cultures from the Formative Period to A.D. 1533:

A. Axe: Made of copper, bronze, or gold. Generally flat with rounded head

and attached to a handle. Average size is 15 cm. long x 10 cm. wide. Formative Cultures—Inca.

B. Chisel: Made of copper, bronze, silver, gold, or tumbaga. Long stem(50 cm.) terminates at short bulbous head (10 cm.). Formative Cultures—Inca.

C. Clamps/tweezers: Made of copper, bronze, silver, gold, or tumbaga. Short stem (5 cm.) attaches to thin, flat heads, sometimes decorated (10 cm.). Formative Cultures—Inca.

D. Knife (*tumi*): Made of copper, bronze, silver, gold, or tumbaga. Flat surface with trapezoidal or squared handle and ovaloid or half-moon blade. Often incised, embossed, or applique decoration at base. Average size is 50 cm. in height. Formative Cultures—Inca.

E. Crown: Made of gold or silver. Generally flat metal with animal, bird, or geometric designs. Average size is 14 cm. in diameter. Formative Cultures—Inca.

F. Diadem: Made of gold or silver. Generally flat with animal, bird, or geometric designs. Average size is 35 cm. long × 45 cm. wide. Formative Cultures—Inca.

G. Bracelet: Made of copper, bronze, silver, gold, or tumbaga. Usually tubular form. Average size is 11 cm. in diameter. Formative Cultures—Inca.

H. Collar: Made of copper, bronze, silver, gold, or tumbaga. Normally a thin (4 cm.) band without clasps. Sometimes contains beads, disks, or pendants. Formative Cultures—Inca.

I. Earring or ear plug: Made of copper, bronze, silver, gold, or tumbaga. Generally discoid, ring shape, or pendant. Often inlaid with semi-precious stones or shell. Average size is 4 cm. in diameter. Tiwanaku—Inca.

J. Necklace: Made of copper, silver, gold, or tumbaga. Normally a thin(4 cm.) band without clasps. Sometimes contains beads, disks, or pendants. Formative Cultures—Inca.

K. Nose plug (*nariguera*): Made of copper, silver, gold, or tumbaga. Either ring shaped (plain, thin band) or a circular band with applique. Average size is 3 cm. in diameter. Formative Cultures—Inca.

L. Belt: Made of copper, bronze, silver, gold, or tumbaga. Usually consists of joined disks or chain links. Average size is one meter in length. Formative Cultures—Inca.

M. Figurine: Made of copper, bronze, silver, gold, or tumbaga. Usually human or animal (camelid) shape. Often found in pairs. Range in size from miniatures (2 cm. in height) to small statuettes (50 cm. in height). Lauraques are small (3 cm. to 7 cm.) amulet-like figurines of brass shaped like humans. Formative Cultures—Inca.

N. Mask: Made of copper, bronze, silver, gold, or tumbaga. Usually hammered, unadorned metal plaque that is sometimes inlaid with semi-precious stone or shell. Motifs include felines and humans or combinations of the two. Average size is 30 square cm.

O. Pectoral: Made of copper, silver, gold, or tumbaga. Flat surface with squared base and curved edge. Often decorated with fine incised lines. Average size is 70 cm. in height. Formative Cultures—Inca.

P. Sheet/plaque: Thin, hammered sheets of copper, silver, gold, or tumbaga. Often incised or embossed. Size varies. Formative Cultures—Inca.

Q. Garment pin (*tupu*): Made of copper, bronze, silver, gold, or tumbaga. A large pin with a long shaft (15 cm.) that usually terminates with flat, discoid head (4 cm.) often embossed with design. Tiwanaku—Inca.

IV. Pre-Columbian Stone

Ceremonial, sumptuary, and funerary stone objects produced and used by indigenous cultures from the Archaic period to A.D. 1533:

A. Projectile point: Made of red, black, brown, or transparent obsidian, chert, basalt, or other semi-precious stone. Leaf-shape, with or without stem. Average size is 7 cm. long x 3 cm. wide. Formative Cultures-Inca, including Tropical Lowland Cultures. Locally known as Vizcachani style.

B. Axe: Made of red, black, brown or transparent obsidian, chert, basalt, or other semi-precious stone. Leaf-shape, or rectangular shaped head, with or without notches where handle is attached. Average size is 12 cm. long x 6 cm. wide. Formative Cultures—Inca, including Tropical Lowland Cultures.

C. Sword: Made of red, black, brown or transparent obsidian, chert, basalt, or other semi-precious stone. Oblong, leaf-shaped, with or without notches where handle is attached. Formative Cultures—Inca, including Tropical Lowland Cultures.

D. Bead: Made of lapis lazuli, sodalite, obsidian, quartz, malachite, green stone, or other semi-precious stone. Usually are globular with fine aperture; pendants are also known. Average size is 1 cm., although much larger (4 cm.) and much smaller (2 mm.) sizes are recognized. Formative Cultures—Inca.

E. Lip plug: Made of lapis lazuli, sodalite, obsidian, quartz, malachite, green stone, or other semi-precious stone. Normally of discoidal shape. Average size is 2.5 cm. Formative Cultures—Inca, including Tropical Lowland Cultures.

F. Idol/*conopa*/figurine: Small human or animal shaped statuettes of turquoise, alabaster, lapis lazuli, sodalite, obsidian, quartz, malachite, green stone, or other semi-precious stone. Exterior is finely polished. Often found in matching pairs. Animals are usually camelids. Average size is 5 cm. in height. Formative Cultures—Inca, including Tropical Lowland Cultures.

G. Drinking vessel (*kero*): These are vase-shaped beakers, about 15 cm. in height, made from grey andesite or basalt. They often exhibit a puma or jaguar face on the vessel exterior or other stylized geometric design. Tiwanaku—Inca.

H. Snuff tablet: These are shallow, rectangular trays approximately 20 cm. long x 5 cm. wide x 1 cm. in height. May be constructed of andesite, basalt, alabaster, or other semi-precious stone, or of wood. These small trays are often carved with intricate designs and inlaid with semi-precious stone and/or shell. Formative Cultures—Inca, including Tropical Lowland Cultures.

I. Sculpture

1. Tenon head: Made of sandstone, basalt, granite, volcanic tuff, or other stone. These are carved ashlar stone heads, normally in the shapes of masked humans, jaguars, and pumas that either serve as architectural wall embellishments at temples and religious shrines or are portions of free-standing monoliths (*see also* stelae, monolith). Small round heads average 50 square cm., while the heads of columnar stelae average one square meter. Formative Cultures—Inca.

2. Animal-shaped: Made of sandstone, basalt, granite, volcanic tuff, or other stone. These are carved statues of the head and neck portions of llamas and other animals. Because they are not supported by a base or pedestal, they are unable to free-stand. Average size is 2 meters in height. Mostly Formative Cultures.

3. Plaques (*lapida*): Made of sandstone, basalt, granite, limestone, volcanic tuff, or other stone. These are rectangular ashlar slabs, 52 cm. long x 39 cm. wide x 3.5 cm. thick that are sculpted on both faces with elaborate human, animal, and geometric designs. Mostly Wankarani, Chiripa, and Formative Cultures.

4. Stelae: Made of sandstone, granite, andesite, or other stone. Includes free-standing columnar figures, inscribed columns, and door jambs. These are typically engraved with masked figures and other personages. Between one and three meters in height. Formative Cultures—Inca.

5. Monolith: Free-standing columnar sandstone, granite, andesite, or other

stone. Between one and three meters in height. Formative Cultures—Inca.

J. Rock art: Made of sandstone, basalt, granite, limestone, volcanic tuff or, other stone. These are portions of larger boulders or cave faces that have been chiseled off. They contain simple images, either painted, carved, or incised, of animals, humans, geometric, and abstract designs. Sizes range between hand-size and several square meters. Formative Cultures—Inca.

V. Pre-Columbian Shell Figurines

Ceremonial, sumptuary, and funerary shell figurines produced and used by indigenous cultures from the Formative period to A.D. 1533. Small human or animal shaped statuettes of *spondylus*, mother-of-pearl, and/or other shell. Exterior is finely polished. Often found in matching pairs. Animals are usually camelids. Average size is 5 cm. in height. Formative Cultures—Inca, including Tropical Lowland Cultures.

VI. Pre-Columbian Mummified Human Remains

Whole or partial mummified human remains, including modified skulls. May be wrapped in textiles. Individual limbs often contain bracelets and other precious metal and shell objects.

VII. Pre-Columbian Bone Objects

Ceremonial, sumptuary, and funerary bone objects produced and used by indigenous cultures from the Formative period to A.D. 1533:

A. Punch: Spike-like implement approximately 14 cm. long and 1 cm. wide that tapers to a pointed, sharp head. Formative Cultures—Inca, including Tropical Lowland Cultures.

B. Needle: Vary in size from 5 cm. to 15 cm. in length. Formative Cultures—Inca, including Tropical Lowland Cultures.

C. Hook: Semicircular implement of polished bone that often contains barb. Approximately 2 cm. in height. Formative Cultures—Inca, including Tropical Lowland Cultures.

D. Figurine: Usually human or animal (camelid) shape. Often found in matching pairs. Range in size from miniatures (2 cm. in height) to small statuettes (50 cm. in height). Formative Cultures—Inca.

E. Spindle: Long, spine-like object used in weaving to wind thread in conjunction with a spindle whorl. Appear as elongated needles with dull edges. Average size is 17 cm. long x 5 mm. wide. Formative Cultures—Inca.

F. Spindle whorl: Small globular, bead-shaped, or flat circular object that adds weight and balance to spindles used to wind thread. The whorl attaches to the spindle via an aperture in the whorl. Often engraved on the exterior with intricate designs. Bead size averages 2 square centimeters. Flat disks range from 3 cm. to 7 cm. in diameter. Formative Cultures—Inca.

G. Snuff tablet: These are shallow, rectangular trays approximately 20 cm. long x 5 cm. wide x 1 cm. in height. May be constructed of bone, stone, or wood. These small trays are often carved with intricate designs and inlaid with semi-precious stone and/or shell. Formative Cultures—Inca, including Tropical Lowland Cultures.

H. Inhaler tube: Small bones that have been hollowed, polished, and decorated on the exterior with engraved and polychrome painted designs. Average size is 8 cm. long x 3 cm. in diameter. Formative Cultures—Inca, including Tropical Lowland Cultures.

I. Amulet/talisman (*tembeta*): Can consist of a single bone engraved on the exterior with a design or a bead, amulet, or charm made from bone that has been polished, carved, and/or painted. Size ranges from 2 cm. to 40 cm. Formative Cultures—Inca, including Tropical Lowland Cultures.

J. Lip plug: Either ring shaped (plain, thin band) or disk shaped. Average size is 3 cm. in diameter. Formative Cultures—Inca, including Tropical Lowland Cultures.

K. Flute or panpipe (*zampoña*): Panpipes range between 20 cm. and 120 cm.; flutes range from 20 cm. to 120 cm. Formative Cultures—Inca, including Tropical Lowland Cultures.

VIII. Pre-Columbian Wood Objects

Ceremonial, sumptuary, and funerary wood objects produced and used by indigenous cultures from the Formative period to A.D. 1533:

A. Drinking vessel (*kero*): These are vase-shaped beakers, about 15 cm. in height. A puma or jaguar face is often modeled onto the vessel exterior and/or the wood is carved or engraved with a stylized geometric design. Tiwanaku—Inca.

B. Snuff tablet: Shallow, rectangular trays approximately 20 cm. long x 5 cm. wide x 1 cm. in height. May be constructed of wood, bone, or stone. These small trays are often carved with intricate designs and inlaid with semi-precious stone and/or shell. Formative Cultures—Inca, including Tropical Lowland Cultures.

C. Bowl or *challador:* Compartmented bowl carved from a single slab of wood, with or without handles. Carved or engraved decoration on the surface exterior. Size ranges from 9 cm. to 17 cm. in height.

D. Arrow shaft: Created from a solid piece of wood. Often tipped with gold spear. Size varies from 30 cm. to 3 meters long.

E. Necklace: A thin strip (4 cm.) without clasps. Sometimes contain beads, disks, seeds, or pendants. Formative Cultures—Inca.

F. Mask: These are created from a single slab of wood. Often carved in the shape of feline or human face, with slits for the eyes and mouth. Average size is 30 square cm. and 3 cm. thick. Formative Cultures—Inca, including Tropical Lowland Cultures.

G. Digging stick: These implements most often take the form of a central staff (one meter in height) to which an appendage is added. The central staff is often carved. The appendage may be secured to the staff with bands of precious metals such as gold. Inca Culture.

H. Spindle whorl: Small globular, bead-shaped, or flat circular object that adds weight and balance to spindles used to wind thread. The whorl attaches to the spindle via an aperture in the whorl. Often engraved on the exterior with intricate designs. Bead size averages 2 square centimeters. Flat disks range from 3 cm. to 7 cm. in diameter. Formative Cultures—Inca.

IX. Pre-Columbian Basketry

Ceremonial, sumptuary, and funerary basketry produced and used by indigenous cultures from the Formative Period to A.D. 1533:

A. Basket: Round, square, or rectangular containers with or without handles. May be constructed of reeds, vines, grasses, or other vegetal fibers. Sometimes construction is combined with cloth, animal skin, or wood. Size varies from 4 cm. to 1 meter in height. Formative Cultures—Inca, including Tropical Lowland Cultures.

B. Casket: Square or rectangular containers with lids and handles. May be constructed of reeds, vines, grasses, or other vegetal fibers. Sometimes construction is combined with cloth, animal skin, or wood. Size varies from 50 cm. to 1 meter in height. Formative Cultures—Inca, including Tropical Lowland Cultures.

C. Headdress: These are supports for featherwork worn on the head. Can be up to 60 cm. in length/height. Formative Cultures—Inca, including Tropical Lowland Cultures.

Ethnological Materials

Ethnological materials date from A.D. 1533 to 1900. Two broad categories are encompassed in the sections below. Sections I to VI describe artifacts that reflect Pre-Columbian traditions and are

considered religious in nature or are critically linked to indigenous identity and ancestral use and/or manufacture. Section VII encompasses artifacts produced for use in Catholic religious observance. Some of these items may occur in archaeological contexts.

I. Colonial and Republican Masks (A.D. 1533–1900)

These masks are constructed of wood, leather or skins, silver, tin, cloth, glass beads, oil painted plaster, fur, feathers, or some combination of these materials, with the intent of exaggerating the facial features, particularly the eyes and mouth, of the personage or animal in the dance. Common themes include the devil with horns, old men (*Awki*), African faces (*Moreno*), blonde haired/blue eyed men with bullet holes in their foreheads (*Chunchus*), angels, heroines (*China Supay*), and animals. Size varies according to the mask. Some are as small as 40 cm. or as large as 170 cm.

All masks produced until 1900 that are associated with the Christian or indigenous dance rituals of the Colonial and Republican Periods are included. These include but are not limited to masks of the following dances: Dance of La Diablada; Dance of La Morenada; Dance of Kullawada; Dance of La Llamerada; Dance of the Chunchus; Chutas Dance; Kusillos Dance; Chiriguano Dance; Dance of the Inca; Dance of the Chunchos; Dance of the Achuŝ; Dance of St. Ignatius of Moxos; Dance of the Little Angels; Moors and Christians Dance; Dance of the Sun and the Moon; Dance of the Little Bull; Dance of the Jucumari; Chiriguano Ritual; Dance of the Auqui Auqui; Dancer Ritual; Dance of the Misti'l Siku; Dance of the Little Bull; Dance of the Tundiquis; Dance of the Paqochis.

II. Colonial and Republican Wood Objects (A.D. 1533–1900)

Objects in wood that relate to indigenous ceremonial activities. These include:

A. Drinking vessels (*kero, keru, q'ero*): These are vase-shaped beakers, about 15 cm. in height. During the Colonial Period, these wooden cups were polychrome painted with elaborate scenes and designs.

B. Scepter (*Bastón de mando*): Wooden staff made of palm wood and encased in silver with semi-precious stones. Size varies from 45–120 cm.

C. Ceremonial vessels (*challador cups/vases*): The interiors of these vessels are segmented into compartments. Size ranges between 10–35 cm.

D. Bow: Constructed with wood, feathers, and other animal and vegetal fibers. Used for ritual purposes by the Araona Culture of the Tropical Lowlands. Size ranges from 120 cm. to 210 cm.

E. Tobacco pipe: Straight tubular shape, without a bowl, used by Tropical Lowland Cultures in religious ceremonies. Often, an X is painted as a clan symbol on one end of the tube. Size ranges from 10 cm. to 15 cm.

III. Colonial and Republican Musical Instruments (A.D. 1533–1900)

Musical instruments created for and used in indigenous ceremonies. These include:

A. *Charango:* Stringed instrument, similar to a mandolin or ukelele, manufactured of wood. The bowl of the instrument is sometimes decorated with animal pelts. About 50 cm. in length.

B. Drum (*Sancuti bombo, Wankara bombo, muyu muyu, q'aras*): Vary in size and shape. Generally the box is cylindrical and made of wood or tree bark with skins stretched over the frame to form the heads. Size ranges from 30 cm. to 60 cm.

C. Flutes

1. Flute (*rollano, chaxes, lawatos*): Made of hollowed wood with leather strips. These flutes are characterized by six holes. Size ranges from 40 cm. to 100 cm.

2. Flute (*chutu pinquillo*): Made of uncut flamingo bone with six holes. Size ranges from 25 cm. to 35 cm.

3. Flute (*pifano*): Made of bato bone. Size varies.

4. Flute (*jantarco, sicus*): Made of wood with flower designs engraved on the surface. Diamond shaped in cross-section. Size varies from 10 cm. to 35 cm.

D. Harp: Stringed instrument made of wood and animal skin. It contains 30 strings. Size ranges from 80 cm. to 150 cm.

E. Mandolin: Constructed of wood and often inlaid with shell. Size varies.

F. Whistle (*ocarina, willusco*): Small, hand-held whistle made of wood, 7 cm. Willusco is small, disk shaped whistle with design engraved on surface, 3 cm. to 7 cm.

G. Panpipe (*bajón*): Made of leaves formed into tubes, attached to each other with cotton thread. Characterized by 10 tubes. Size ranges from 120 cm. to 180 cm.

H. Violin (*tacuara*): Made of wood. Size ranges from 40 cm. to 50 cm.

IV. Colonial and Republican Textiles (A.D. 1533–1900)

Textiles woven by indigenous peoples for ceremonial or ritual use:

A. Indigenous Highland Traditions:

1. Poncho (*balandran, ponchito, choni, khawa, challapata*): Square or rectangular overgarment worn by men usually consisting of two pieces of hand-woven cloth sewn together, with a slit in the center for the head. May be dyed with natural or synthetic dyes in all colors. Plain or striped. Often woven from alpaca or other camelid fibers. Some with tassels. Average size is 80 cm. × 100 cm.

2. Dress (*almilla/urku/aksu*): The *almilla* is the dress adopted by indigenous women in the sixteenth century tailored from hand-woven wool cloth (*bayeta*). It consists of a gathered skirt attached to a fitted bodice. The *urku* is a pleated or gathered skirt characterized by a bold stripe pattern arranged horizontally. The *aksu* is a women's ceremonial dress woven from camelid fiber and constructed from a rectangular, two-piece cloth that is wrapped around the body and tied at the waist. May be dyed with natural or synthetic dyes in all colors. Average size is one square meter.

3. Mantle/shawl (*axsu, tsoc urjcu, tscoc irs, medio axsu, llacota, isallo, awayo, llixlla, iscayo, phullu, talo unkhuña, ñañaqa*): Square or rectangular garment composed of two pieces of cloth sewn together. May be dyed with natural or synthetic dyes in all colors. Plain or striped. Often woven from alpaca or other camelid fibers. Designs are typically stripes arranged across the cloth in a vertical or horizontal pattern or confined to the margins of one side of the garment. Average size is one square meter.

4. Tunic (*unku, ira, ccahua*): Man's ceremonial vestment constructed from one piece of cloth which is folded in half and sewn up the sides, leaving openings for the arms at the top and an opening in the middle for the head. Designs are typically found in the hip, sleeve, and neck areas, but there are more elaborate examples where stripes cover the entire garment, some with silver thread. May be dyed with natural or synthetic dyes in all colors. Usually made from camelid wool, especially alpaca. Average size is 135 cm. × 92 cm.

5. Bag (*chuspa, alforja, kapachos, huayacas*): Carried by both men and women; woven from cotton or camelid fibers in a variety of widths, lengths, and colors. Found in either a solid color or simple polychrome stripe pattern arrangement with geometric motifs. These bags are usually square (20 cm.) or rectangular with a woven carrying strap. They often contain small pockets on the pouch exterior and are decorated with tassels.

6. Belt (*w'aka, tsayi, chumpi, wincha, t'isnu*): Worn by both men and women; woven from cotton or camelid fibers in a variety of widths, lengths, and colors. Found in either a solid color or simple polychrome geometric design.

7. Scarf/muffler: Worn by both men and women; woven from camelid fibers or sheep's wool with natural dyes in a variety of widths, lengths, and colors. Consists of one rectangular piece. Approximately 50 cm. in length.

8. Hat: Caps (10 square cm.) worn by men and *nañacas* worn by women that range in size between 10 square cm. and one square meter. Both are woven from camelid fibers and silk, and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or a combination of colors. When present, designs are geometric or depict highly stylized animals such as llama and other camelids.

9. Sling (*wichi wichis, qorawas*): Rectangular band of cloth (25 cm. × 10 cm.); long ends taper to a loop where ropes are attached to either side.

10. Cloth: Square, rectangular, or fragmentary cloth woven from fine camelid fibers, silk, and/or silver and gold threads, or constructed from soft tree bark or other natural fiber, and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or combination of colors. Some examples are striped in a vertical or horizontal pattern. Average size ranges between six square centimeters and six square meters. Cloth may be fragmentary, folded flat, or bundled (*q'epi*) for use in ritual ceremonies. Woman's ritual cloth, called *icuña, tari,* or *ñañaca,* is also included in this category.

B. Indigenous Lowland Traditions (A.D. 1533–1900):

1. Long shirt (*camijeta/ tipois*): Tunic-like vestment made of cotton or vegetal material such as bark. Tassels often attached to lower edge. Size is 133 cm. long x 71 cm. wide.

2. Woman's Two Piece Vestment (*tsotomo and noca*): Long, straight skirt (*noca*) and separate bodice (*tsotomo*) made of cotton or vegetal material such as bark. Noca size is 50 cm. long × 40 cm. wide; *Tsotomo* size is 11.5 cm. deep x 35 cm. long.

3. Cloth: Square, rectangular, or fragmentary cloth woven from cotton, or constructed from soft tree bark or other natural fiber, and dyed with natural pigments in red, blue, green, orange, yellow, tan, brown, black, purple, or combination of colors. Some examples are striped in a vertical or horizontal pattern. Average size ranges between six square centimeters and six square meters. Cloth may be fragmentary, folded flat, or bundled (*q'epi*) for use in ritual ceremonies.

V. Colonial and Republican Featherwork (A.D. 1533–1900)

Featherwork produced for ceremonial use consists of colorful, tropical feathers attached to leather, cloth, wood, or other material, such as basketry, to create adornments worn on the wrists, ankles, neck, waist, back, and head, including the lips and ears. Most typically found are headdresses, which may consist of small, modest crowns (30 cm. average) or large, towering bonnets of Suri feathers (80 cm.). This category also includes feather-covered ritual belts and textiles (35–70 cm.), fans (250 cm. long), staves or batons (145–250 cm.), basketry supports, and healer's amulets or *photadi* (80–250 cm.).

VI. Colonial and Republican Ceramics (A.D. 1533–1900)

A. Ceremonial drinking vessels (*recipiente, andavete, trampavaso*): Containers and serving vessels used in the ceremonial context of chicha drinking. In post-Columbian times, these are hard ceramics with glassy surfaces resulting from the application of a mineral glaze. May be brown, green, blue, red, or any combination of colors. Vary in size and shape from handled jars, pitchers, cups, and vases, to animal-shapes (bull, tiger, llama, hoof).

B. Ritual smoking pipes: Tubular shape without tobacco bowl. The average size is from 10 cm. to 15 cm.

VII. Colonial and Republican Religious Art (A.D. 1533–1900)

A. Statues: Made of wood, maguey, gesso, silver, gold, bronze, alabaster, or other stone and often decorated with gilt paint. Typical statuary for this period includes depictions of patron saints (*santos/santas*), angels, Christ, the Virgin Mary, the apostles, and the Holy Family. Gold and silver crowns and other adornments in precious metals and precious stone are often found on these statues. Some are dressed with brocade and tapestry cloth made from gold and silver threads. Some are holding objects such as swords. Size varies from 30 cm. to two meters.

B. Crucifixes: Made of wood, maguey, alabaster, silver, gold, bronze, brass. Size varies from 5 cm. to 200 cm.

C. Oil paintings: Include depictions of patron saints (*santos/santas*), angels, Christ, the Virgin Mary, the apostles, and the Holy Family on wood, metal, canvas (*lienzo*), and other cloth. With or without frame. The archangel is a central theme. Oil painting is found on objects as small as reliquaries (3 cm.), mid-sized canvas (one square meter), or wall-sized renditions.

D. Reliquaries: Include painted and engraved depictions of patron saints (*santos/santas*), angels, Christ, the Virgin Mary, the apostles, and the Holy Family primarily on wood, ceramic, and metal such as silver. Bolivian reliquaries are essentially small lockets and do not always contain relics. Size ranges from 3 cm. to 25 cm.

E. Trunks/coffers (*petaca*): Made of leather and gilded wood or of silver. These small boxes (30 cm. length) or large trunks (1.5 meters in length) held altar objects, such as chalices and holy oil, during transport.

F. *Retablo:* Made of wood and precious metals such as gold or silver. These are altars or architectural wall facades behind existing altars that contain niches and a tabernacle. Often disassembled in pieces. May be as large as 20 meters high x 7 meters wide; portions vary—a niche may be one square meter. Small, self-contained units that appear as boxes with hinged doors are as small as 40 cm. in height. Miniatures average 5 cm. in height.

G. Altar pieces: Altars and their components (for example, frontal, grates, sacristy) made of gilded wood, gold, or silver. Often decorated in repousse. Average size is 1.6 meters x 1.2 meters.

H. Altar objects: These include chalices, monstrances/ostensoria, cruets, candelabras, lecterns, incense burners, hand bells typically made of gold and silver and decorated with precious stones, shell such as pearl, or other adornments. Size varies according to object. This category also includes ceramic, metal, and wooden *challadores* and ceremonial drinking cups.

I. Church furniture: Made of wood, silver gold, stone, brass, or bronze. Includes carved picture frames, confessionals, pulpits, pedestals, litters, choir stalls, chancels, banisters, lectern, saint's flags, and church bells and chimes. Size varies according to object.

J. Crowns and radiations: Made of silver and gold, these objects are found alone or in conjunction with religious statuary depicting the Virgin and Jesus. Size varies from 10 cm. to 30 cm.

K. Garment pin (*tupu/prendedor*): Made of copper, bronze, brass, silver, gold, or tumbaga. A large pin with a long shaft (15 cm.) that usually terminates with flat, discoid head (4 cm.), often embossed with design. Some heads are inlaid with semi-precious stone.

L. Liturgical vestments: Garments worn by the priest and/or other religious dignitaries made of fine cotton, silk, and gold and silver thread. This category

includes the chasuble, dalmatic, alb, stole, girdle, maniple, rochet, musette, mitre, and bonnet. Size varies according to garment.

Inapplicability of Notice and Delayed Effective Date

Because the amendments to the Customs Regulations contained in this document merely remove reference to expired import restrictions and impose import restrictions on the above-listed cultural property of Bolivia in response to a bilateral agreement entered into in furtherance of a foreign affairs function of the United States, pursuant to the Administrative Procedure Act (5 U.S.C. 553(a)(1)), no notice of proposed rulemaking or public procedure is necessary and a delayed effective date is not required.

Regulatory Flexibility Act

Because no notice of proposed rulemaking is required, the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) do not apply. Accordingly, this final rule is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Executive Order 12866

This amendment does not meet the criteria of a "significant regulatory action" as described in E.O. 12866.

Drafting Information

The principal author of this document was Bill Conrad, Regulations Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices participated in its development.

List of Subjects in 19 CFR Part 12

Customs duties and inspections, Imports, Cultural property.

Amendment to the Regulations

Accordingly, Part 12 of the Customs Regulations (19 CFR Part 12) is amended as set forth below:

PART 12—[AMENDED]

1. The general authority and specific authority citations for Part 12, in part, continue to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (General Note 22, Harmonized Tariff Schedule of the United States (HTSUS)), 1624;

* * * * *

Sections 12.104 through 12.104i also issued under 19 U.S.C. 2612;

* * * * *

2. In § 12.104g, paragraph (a), the list of agreements imposing import restrictions on described articles of cultural property of State Parties, is amended by adding Bolivia in appropriate alphabetical order, as follows, and paragraph (b), the list of emergency actions imposing import restrictions, is amended by removing the entry for "Bolivia":

§ 12.104g Specific items or categories designated by agreements or emergency actions.

(2) * * *

State party	Cultural property	T.D. No.
Bolivia	Archaeological and Ethnological Material from Bolivia.	T.D. 01–86
. . . .	. .	.

BILLING CODE 4820–02–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 510 and 558

New Animal Drugs; Change of Sponsor

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect a change of sponsor for six approved new animal drug applications (NADAs) from Koffolk, Inc., to Phibro Animal Health.

DATES: This rule is effective December 7, 2001.

FOR FURTHER INFORMATION CONTACT: Lonnie W. Luther, Center for Veterinary Medicine (HFV–102), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–0209, e-mail: lluther@cvm.fda.gov.

SUPPLEMENTARY INFORMATION: Koffolk, Inc., P.O. Box 675935, 14735 Las Quintas, Rancho Santa Fe, CA 92067, has informed FDA that it has transferred ownership of, and all rights and interest in, the following NADAs to Phibro Animal Health, 710 Rte. 46 East, suite 401, Fairfield, NJ 07004.

NADA Number	Established Names of Ingredients
9–476	Nicarbazin
98–378	Nicarbazin/Bacitracin Methylene Disalicylate
107–997	Nicarbazin/Lincomycin/Roxarsone
108–115	Nicarbazin/Roxarsone
108–116	Nicarbazin/Lincomycin
141–146	Nicarbazin/Bacitracin Zinc

Accordingly, the agency is amending the regulations in 21 CFR 558.366 to reflect the transfer of ownership.

Following the change of sponsor of these NADAs, Koffolk, Inc., is no longer the sponsor of any approved applications. Therefore, 21 CFR 510.600(c) is amended to remove the entries for this sponsor.

This rule does not meet the definition of "rule" in 5 U.S.C. 804(3)(A) because it is a rule of "particular applicability." Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808.

List of Subjects

21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR parts 510 and 558 are amended as follows:

PART 510—NEW ANIMAL DRUGS

1. The authority citation for 21 CFR part 510 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 353, 360b, 371, 379e.

§ 510.600 [Amended]

2. Section 510.600 *Names, addresses, and drug labeler codes of sponsors of approved applications* is amended in the table in paragraph (c)(1) by removing the entry "Koffolk, Inc.," and in the table in paragraph (c)(2) by removing the entry "063271".

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

3. The authority citation for 21 CFR part 558 continues to read as follows:

Authority: 21 U.S.C. 360b, 371.

4. Section 558.366 is amended by redesignating paragraphs (b) and (c) as paragraphs (c) and (d), respectively; by revising paragraph (a); by adding a new paragraph (b); and in the newly redesignated paragraph (d), in the table, under the headings "Limitations" and "Sponsor" by removing "063271" wherever it appears and by adding in its place "066104" to read as follows:

§ 558.366 Nicarbazin.

(a) *Specifications.* Type A medicated articles containing 25 percent nicarbazin.

(b) *Approvals.* See Nos. 000986, 060728, and 066104 in § 510.600(c) of this chapter for use as in paragraph (d) of this section.

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Monensin

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by MoorMan's, Inc. The supplemental NADA provides for use of approved monensin Type A medicated articles to make free-choice, medicated feed blocks used for prevention and control of coccidiosis caused by *Eimeria bovis* and *E. zuernii* in pasture cattle.

DATES: This rule is effective December 7, 2001.

FOR FURTHER INFORMATION CONTACT: Daniel A. Benz, Center for Veterinary Medicine (HFV–126), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–0223.

SUPPLEMENTARY INFORMATION: MoorMan's, Inc., 1000 North 30th St., Quincy, IL 62305–3115, filed a supplement to NADA 115–581 that provides for use of monensin Type A medicated articles to make free-choice, medicated protein/mineral blocks (MoorMan's Mintrate Blonde Block RU and MoorMan's Mintrate Red Block RU) used for increased rate of weight gain in cattle on pasture (slaughter, stocker, feeder cattle, and dairy and beef replacement heifers) which may require supplemental feed. The supplemental NADA provides for use of these medicated feed blocks for the prevention and control of coccidiosis caused by *Eimeria bovis* and *E. zuernii* in pasture cattle. The supplemental NADA is approved as of September 27, 2001, and the regulations are amended in 21 CFR 558.355 to reflect the approval. The basis of approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of 21 CFR part 20 and 514.11(e)(2)(ii), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852, between 9 a.m. and 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.33(a)(1) that these actions are of a type that do not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This rule does not meet the definition of "rule" in 5 U.S.C. 804(3)(A) because it is a rule of "particular applicability." Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808.

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR part 558 is amended as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

1. The authority citation for 21 CFR part 558 continues to read as follows:

Authority: 21 U.S.C. 360b, 371.

2. Section 558.355 is amended by revising paragraph (f)(3)(v)(*a*) to read as follows:

§ 558.355 Monensin.

* * * * *

(f) * * *

(3) * * *

(v) * * *

(a) Indications for use. For increased rate of weight gain and for prevention and control of coccidiosis caused by *Eimeria bovis* and *E. zuernii*.

* * * * *

Dated: November 8, 2001.

Claire M. Lathers,

Director, Office of New Animal Drug Evaluation, Center for Veterinary Medicine.

DEPARTMENT OF LABOR

Wage and Hour Division

29 CFR Parts 578, 579, and 580

RIN 1215–AB20

Adjustment of Civil Money Penalties for Inflation

AGENCY: Wage and Hour Division, Employment Standards Administration, Department of Labor.

ACTION: Final rule.

SUMMARY: This document adjusts the amount of civil money penalties that may be assessed under the Fair Labor Standards Act (FLSA) for repeated or willful violations of the minimum wage or overtime provisions of the FLSA, and for violations of the child labor provisions of the FLSA. These adjustments are required by the Federal Civil Penalties Inflation Adjustment Act of 1990, as amended by the Debt Collection Improvement Act of 1996. Under the amended Federal Civil Penalties Inflation Adjustment Act, Federal agencies must adjust their civil money penalties for inflation pursuant to a specified formula, and make periodic adjustments thereafter to account for inflation.

EFFECTIVE DATE: The rule is effective on January 7, 2002.

FOR FURTHER INFORMATION CONTACT: Richard M. Brennan, Deputy Director, Office of Enforcement Policy, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, Room S–3510, 200 Constitution Avenue, NW., Washington, DC 20210. Telephone (202) 693–0745 (this is not a toll-free number). Copies of this final rule may be obtained in alternative formats (Large Print, Braille, Audio Tape or Disc), upon request, by calling (202) 693–0023. TTY/TDD callers may dial toll-free 1–877–889–5627 to obtain information or request materials in alternative formats.

Questions of interpretation and/or enforcement of final regulations issued by this agency or referenced in this notice may be directed to the nearest Wage and Hour Division District Office. To locate the nearest office, telephone our toll-free information and helpline at 1–866–4USWAGE (1–866–487–9243) between 8 am and 5 pm in your local time zone, or log onto the Wage and Hour Division's website for a nationwide listing of Wage and Hour District and Area Offices at: *http://www.dol.gov/dol/esa/public/contacts/whd/america2.htm.*

SUPPLEMENTARY INFORMATION:

I. Paperwork Reduction Act

This rule contains no new information collection requirements which are subject to review and approval by the Office of Management and Budget under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*).

II. Background

The Debt Collection Improvement Act of 1996 (Pub. L. 104–134, 110 Stat. 1321) amended the Federal Civil Penalties Inflation Adjustment Act of 1990 (Pub. L. 101–410, 104 Stat. 890) to require Federal agencies to regularly adjust certain civil money penalties (CMPs) for inflation. As amended, the law requires each agency to initially adjust for inflation all covered civil money penalties, and to make further inflationary adjustments every four years thereafter. The adjustment prescribed in the amended Act is based on a cost-of living formula according to the amount that the Department of Labor's Consumer Price Index (CPI) for all urban consumers for June of the calendar year before the adjustment exceeds the June CPI for the calendar year that the CMP amount was last set or adjusted. The statute provides for rounding the penalty increases. Once the percentage change in the CPI is calculated, the amount of the adjustment is rounded according to a table in the Federal Civil Penalties Inflation Adjustment Act, which is scaled based on the dollar amount of the current penalty. The statute applies a cap that limits the amount of the first increase in penalty to 10 percent of the current penalty amount (for the *initial* adjustment only). Any increase under the Act applies prospectively to violations that occur after the date the increase takes effect.

Section 16(e) of the FLSA authorizes CMP assessments for the following violations: (1) Any person who violates the child labor provisions (section 12 or section 13(c)(5)) of the FLSA or any regulation thereunder may be subject to a CMP not to exceed $10,000 for each employee who was the subject of such a violation; and (2) any person who repeatedly or willfully violates the minimum wage (section 6) or overtime provisions (section 7) of the FLSA may be subject to a CMP not to exceed $1,000 for each such violation. In determining the amount of any such penalty in a particular case for either type of violation, the size of the business of the person charged and the gravity of the violation must be taken into consideration, among other appropriate factors.

The child labor CMP amount was last adjusted by the Congress in 1990 pursuant to the Omnibus Budget Reconciliation Act of 1990, Public Law 101–508 (November 5, 1990), which raised the former $1,000 maximum child labor CMP amount to $10,000 and directed that the amounts be deposited into the general fund of the U.S. Treasury. The $1,000 CMP amount for repeated and willful violations of the minimum wage and overtime provisions was established by the Congress under the 1989 FLSA Amendments, Public Law 101–157 (November 17, 1989). Due to inflation since these CMP amounts were last set in law or adjusted by the Congress, the first increase is limited to the maximum 10 percent cap initially permitted under the Debt Collection Improvement Act amendments to the Federal Civil Penalties Inflation Adjustment Act. The adjusted CMP amounts will apply only to violations occurring after the revised regulations become effective.

On December 28, 1998, the Department of Labor published a proposal in the **Federal Register** (63 FR 71405) to amend affected sections of parts 578 and 579 of Title 29 of the Code of Federal Regulations to increase the specified CMP amounts as described above. No comments were received on the proposal. Accordingly, the proposal is being adopted as a final rule.

III. Summary of Rule

The $1,000 maximum penalty amount in Section 578.3 for repeated or willful violations of the minimum wage or overtime requirements of the FLSA is increased to $1,100. The $10,000 maximum penalty amount in Section 579.5 for violations of the child labor provisions of the FLSA is increased to $11,000. Conforming changes are also made in other affected sections of the regulations to discuss the inflationary adjustment provisions of the Federal Civil Penalties Inflation Adjustment Act of 1990, as amended by the Debt Collection Improvement Act of 1996.

In addition, the following technical amendments are made to correct two typographical errors in parts 579 and 580. In Section 579.5(e) of part 579, the reference to "§ 579.6" is corrected to read "§ 580.6". In Section 580.5 of part 580, the reference to "§ 580.19" is corrected to read "§ 580.18'.

Executive Order 12866 and Significant Regulatory Actions

This rule is not a "significant regulatory action" within the meaning of Executive Order 12866. The rule will adjust for inflation the maximum civil money penalties under Section 16(e) of

the Fair Labor Standards Act. The adjustments and the formula for determining the amount of the adjustment were mandated by the Congress in the Federal Civil Penalties Inflation Adjustment Act of 1990, as amended by the Debt Collection Improvement Act of 1996. Thus, the Congress has required that the Department promulgate the amendments to this rule, and provided no discretion to the Department regarding the substance of the amendments. Moreover, for the three-year period prior to the proposed rule, the Department collected a total of $6,169,771 in CMPs for repeated or willful minimum wage or overtime violations that were assessed in 1,157 cases, for an average of $2,056,590 collected per year (less than $5,333 per case, on average). Over the same three-year period, the Department collected a total of $12,496,180 in CMPs for child labor violations that were assessed in 3,772 cases, for an average of $4,165,393 collected per year (approximately $3,314 per case, on average). With the initial increase in the maximum CMP limited to the statutory 10 percent cap, the total economic impact of the proposal was estimated at less than $623,000 per year. CMPs for the three most recent years are comparable in amounts. Thus, this action will not: (1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in Executive Order 12866. Therefore, no regulatory impact analysis was required or prepared.

Section 202 of the Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531 *et seq.*) directs agencies to assess the effects of Federal regulatory actions on State, local, and tribal governments, and the private sector, "* * * (other than to the extent that such regulations incorporate requirements specifically set forth in law)." For purposes of the Unfunded Mandates Reform Act, this rule includes only requirements that are specifically set forth in law pursuant to the Federal Civil Penalties Inflation Adjustment Act of 1990, as amended by the Debt Collection Improvement Act of 1996. In addition, the rule will not result in increased annual expenditures in excess of $100 million by State, local or tribal governments in the aggregate, or by the private sector.

Executive Order 13132

This rule does not have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government" under the terms of Executive Order 13132 regarding federalism. Therefore, under section 6 of that Order, we have determined that the rule does not have sufficient federalism implications to require consultations or a federalism summary impact statement.

Regulatory Flexibility Analysis

This rule will not have a significant economic impact on a substantial number of small entities. The rule does no more than ministerially increase certain statutory CMPs to account for inflation, pursuant to specific directions of the Congress in the Federal Civil Penalties Inflation Adjustment Act of 1990, as amended by the Debt Collection Improvement Act of 1996. Provisions of law specify the procedures for calculating the inflation adjustments and do not allow variations in the calculations to minimize the effects on small entities. Nevertheless, in each case the amount of the penalty assessed under Section 16(e) of the FLSA must take into consideration the size of the business of the person charged with the violations, which will further mitigate the ultimate effects of the rule on small businesses. Moreover, only persons who have willfully or repeatedly violated the minimum wage or overtime provisions of the FLSA, or violated the child labor requirements of the FLSA, will be affected by this rule. Based on the average CMP amounts collected for these types of violations over a three-year period as discussed above, we estimate that the effect of the rule will be to increase the average CMP collected for repeated or willful minimum wage or overtime violations by $533 per case, and increase the average CMP collected for child labor violations by $331 per case. Accordingly, the Department determined that this rule will not have a significant economic impact on a substantial number of small entities. The Department certified to this effect to the Chief Counsel for Advocacy of the U.S. Small Business Administration when the proposed rule was published. Therefore, no Regulatory Flexibility Analysis was required. No comments were received on any aspect of the rule or these conclusions as set forth in the proposed rule.

Small Business Regulatory Enforcement Fairness Act

This rule is not a "major rule" under the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801 *et seq.*) because it is not likely to result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Effects on Families

This rule has been assessed under section 654 of the Treasury and General Government Appropriations Act, 1999, for its effect on family well-being and we hereby certify that the rule will not adversely affect the well-being of families.

List of Subjects

29 CFR Part 578

Employment, Labor, Law enforcement, Penalties.

29 CFR Part 579

Child labor, Law enforcement, Penalties.

29 CFR Part 580

Administrative practice and procedure, Child labor, Employment, Labor, Law enforcement, Penalties.

Signed at Washington, DC, on this 30th day of November, 2001.

Annabelle T. Lockhart,

Acting Administrator, Wage and Hour Division.

For the reasons set forth above, 29 CFR parts 578, 579, and 580 are amended as set forth below.

PART 578—MINIMUM WAGE AND OVERTIME VIOLATIONS—CIVIL MONEY PENALTIES

1. The authority citation for part 578 is revised to read as follows:

Authority: Sec. 9, Pub. L. 101–157, 103 Stat. 938, sec. 3103, Pub. L. 101–508, 104 Stat. 1388–29 (29 U.S.C. 216(e)), Pub. L. 101–410, 104 Stat. 890 (28 U.S.C. 2461 note), as

amended by Pub. L. 104–134, section 31001(s), 110 Stat. 1321–358, 1321–373.

2. Section 578.1 is revised to read as follows:

§ 578.1 What does this part cover?

Section 9 of the Fair Labor Standards Amendments of 1989 amended section 16(e) of the Act to provide that any person who repeatedly or willfully violates the minimum wage (section 6) or overtime provisions (section 7) of the Act shall be subject to a civil money penalty not to exceed $1,000 for each such violation. The Federal Civil Penalties Inflation Adjustment Act of 1990 (Pub. L. 101–410), as amended by the Debt Collection Improvement Act of 1996 (Pub. L. 104–134, section 31001(s)), requires that inflationary adjustments be periodically made in these civil money penalties according to a specified cost-of-living formula. This part defines terms necessary for administration of the civil money penalty provisions, describes the violations for which a penalty may be imposed, and describes criteria for determining the amount of penalty to be assessed. The procedural requirements for assessing and contesting such penalties are contained in 29 CFR part 580.

3. The section heading and paragraph (a) of § 578.3 are revised to read as follows:

§ 578.3 What types of violations may result in a penalty being assessed?

(a) A penalty of up to $1,000 per violation may be assessed against any person who repeatedly or willfully violates section 6 (minimum wage) or section 7 (overtime) of the Act; Provided, however, that for any violation occurring on or after January 7, 2002 the civil money penalty amount will increase to up to $1,100. The amount of the penalty will be determined by applying the criteria in § 578.4.

* * * * *

PART 579—CHILD LABOR VIOLATIONS—CIVIL MONEY PENALTIES

4. The authority citation for part 579 is revised to read as follows:

Authority: 29 U.S.C. 203, 211, 212, 216; Reorg. Plan No. 6 of 1950, 64 Stat. 1263, 5 U.S.C. App.; secs. 25, 29, 88 Stat. 72, 76; Secretary of Labor's Order No. 4–2001, 66 FR 29656; Sec. 3103, Pub. L. 101–508; Pub. L. 101–410, 104 Stat. 890 (28 U.S.C. 2461 note), as amended by Pub. L. 104–134, section 31001(s), 110 Stat. 1321–358, 1321–373.

5. The section heading of Section 579.1 is revised, paragraph (b) of § 579.1 is redesignated as paragraph (c) of that section, and a new paragraph (b) is added, to read as follows:

§ 579.1 What does this part cover?

* * * * *

(b) The Federal Civil Penalties Inflation Adjustment Act of 1990 (Pub. L. 101–410), as amended by the Debt Collection Improvement Act of 1996 (Pub. L. 104–134, section 31001(s)), requires that Federal agencies periodically adjust their civil money penalties for inflation according to a specified cost-of-living formula. This law requires each agency to make an initial inflationary adjustment for all covered civil money penalties, and to make further inflationary adjustments at least once every four years thereafter. Any increase in the civil money penalty amount will apply only to violations that occur after the date the increase takes effect.

* * * * *

6. In § 579.5:

a. The section heading and paragraph (a) are revised; and

b. In paragraph (e), the reference to "§ 579.6" is revised to read "§ 580.6".

The revisions read as follows:

§ 579.5 How is the amount of the penalty determined?

(a) The administrative determination of the amount of the civil penalty, of not to exceed $10,000 for each employee who was the subject of a violation of section 12 or section 13(c)(5) of the Act relating to child labor or of any regulation issued under that section, will be based on the available evidence of the violation or violations and will take into consideration the size of the business of the person charged and the gravity of the violation as provided in paragraphs (b) through (d) of this section; Provided, however, that for any violation occurring on or after January 7, 2002 the civil money penalty amount will increase to not to exceed $11,000 for each employee who was the subject of a violation.

* * * * *

§ 579.9 [Removed]

7. Section 579.9 is removed.

PART 580—CIVIL MONEY PENALTIES—PROCEDURES FOR ASSESSING AND CONTESTING PENALTIES

8. The Authority citation for part 580 is revised to read as follows:

Authority: 29 U.S.C. 9a, 203, 211, 212, 216; Reorg. Plan No. 6 of 1950, 64 Stat. 1263, 5 U.S.C. App.; secs. 25, 29, 88 Stat. 72, 76; Secretary of Labor's Order No. 4–2001, 66 FR 29656; 5 U.S.C. 500, 503, 551, 559; sec. 9, Pub. L. 101–157, 103 Stat. 938; sec. 3103, Pub. L. 101–508.

§ 580.5 [Amended]

9. In § 580.5, the reference to "§ 580.19" is revised to read "§ 580.18".

BILLING CODE 4510–27–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 70

[CA065–Pt 70; FRL–7113–5]

Clean Air Act Full Approval of 34 Operating Permits Programs in California

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to fully approve the operating permits programs submitted by the California Air Resources Board (CARB) on behalf of the following 34 air districts: Amador County Air Pollution Control District (APCD), Bay Area Air Quality Management District (AQMD), Butte County AQMD, Calaveras County APCD, Colusa County APCD, El Dorado County APCD, Feather River AQMD, Glenn County APCD, Great Basin Unified APCD, Imperial County APCD, Kern County APCD, Lake County AQMD, Lassen County APCD, Mariposa County APCD, Mendocino County APCD, Modoc County APCD, Mojave Desert AQMD, Monterey Bay Unified APCD, North Coast Unified AQMD, Northern Sierra AQMD, Northern Sonoma County APCD, Placer County APCD, Sacramento Metro AQMD, San Diego County APCD, San Joaquin Valley Unified APCD, San Luis Obispo County APCD, Santa Barbara County APCD, Shasta County APCD, Siskiyou County APCD, South Coast AQMD, Tehama County APCD, Tuolumne County APCD, Ventura County APCD, and Yolo-Solano AQMD. These programs were submitted in response to the directive in the 1990 Clean Air Act (CAA) Amendments that permitting authorities develop, and submit to EPA, programs for issuing operating permits to all major stationary sources and to certain other sources within the permitting authorities' jurisdiction. On the dates listed in Table 1 below, EPA granted interim approval to the 34 operating permits programs. All 34 air districts revised their programs to satisfy the conditions of the interim approval, and EPA proposed full approval in the **Federal Register** on

the dates listed in Table 1. EPA received comments from several commenters on our proposed actions. After carefully reviewing and considering the issues raised by the commenters, EPA is taking final action to fully approve all 34 operating permits programs. EPA published 11 separate proposals to approve the 34 districts' title V operating permits programs. Today we are consolidating our final actions on those proposals into one final rule.

EFFECTIVE DATE: This rule is effective on November 30, 2001.

ADDRESSES: Copies of the 34 submittals and other supporting information used in developing these final full approvals are available for inspection during normal business hours at the following location: U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, California 94105.

FOR FURTHER INFORMATION CONTACT: Gerardo Rios, EPA Region 9, at 415–972–3974 or *rios.gerardo@epa.gov*.

SUPPLEMENTARY INFORMATION: This section contains additional information about our final rulemaking, organized as follows:

I. Background on the 34 operating permits programs.
II. Comments received by EPA on our proposed rulemakings and EPA's responses.
A. Comments received by EPA that apply to some or all of the 34 districts.
B. Comments received by EPA that are specific to Bay Area Air Quality Management District.
1. Comments from Communities for a Better Environment.
2. Comments from Our Children's Earth
3. Comments from Commonweal
III. EPA's final action.
IV. Effective date of EPA's full approval of the 34 operating permits programs.
V. What is the scope of EPA's full approval?
VI. Citizen comments on operating permits programs

I. Background on the 34 Operating Permits Programs

The Clean Air Act (CAA) Amendments of 1990 required all state and local permitting authorities to develop operating permits programs that meet certain federal criteria. The 34 California operating permits programs were submitted in response to this directive. Because the programs substantially, but not fully, met the requirements of part 70, EPA granted interim approval to the programs. The interim approval notices described the conditions that had to be met in order for the 34 programs to receive full approval. After the 34 air districts revised their programs to address the conditions of the interim approval, EPA promulgated proposals to fully approve these title V operating permits programs. Table 1 lists the dates and **Federal Register** citations for EPA's actions finalizing interim approval and proposing full approval of the 34 operating permits programs.

TABLE 1.—FEDERAL REGISTER CITATIONS AND PROGRAM SUBMITTAL DATES FOR THE 34 OPERATING PERMITS PROGRAMS

II. Comments Received by EPA on Our Proposed Rulemakings and EPA's Responses

We received several comment letters on EPA's proposed approval of the title V operating permits programs in California. Four comment letters applied to some or all of the 34 districts in California; a summary of these comments and our response are included in section II.A, below. Three other comment letters were directed specifically at our proposed approval of the Bay Area AQMD's operating permits program; a summary of the comments specific to Bay Area AQMD and our responses are included in section II.B below.

A. Comments Received by EPA That Apply to Some or All of the 34 Districts

We received four comment letters that specifically address the EPA's proposed approach of granting full program approval to the California districts' title V operating permits programs while deferring the permitting of agricultural operations involved in the growing of crops or the raising of fowl or animals for a brief period, not to exceed three years. We received comments objecting to our proposed approach on this issue from two coalitions of environmental groups and comments supporting our approach from a coalition of agricultural industry representatives and from the California Air Resources Board (CARB).[1]

The adverse comments we received from the environmental groups oppose EPA's proposed approach on both legal and technical grounds. The groups' comments assert that since the repeal of the statewide agricultural permitting exemption was a condition established by EPA for full title V program approval and the exemption is still in place, EPA cannot grant full approval to the California districts' operating permits programs. Moreover, they argue that the three-year deferral represents an inappropriate continuation of interim approval. In addition, they comment that EPA cannot exempt any major sources from title V permitting under the Act.

Their comments also question EPA's assertion that there is not a complete inventory of emissions associated with agricultural operations in California and maintain that there are reliable methodologies to determine emissions from certain animal feeding operations (e.g., dairies). The groups' comments also dispute the need for additional research on emissions from agricultural sources prior to implementing title V permitting of these sources and cite the results of San Joaquin Air District and CARB reports regarding the impact of agricultural pollution sources on air quality in the San Joaquin Valley. Finally, the groups request that EPA disapprove the California districts' title V operating permits programs, although they express support for EPA delegating part 71 to the local permitting authorities for all sources not subject to the agricultural exemption, if the Agency were to disapprove the districts' part 70 programs.

Comments received from the coalition of agricultural industry associations support EPA's proposed approval of the San Joaquin Valley Unified APCD's title V program as well as EPA's proposal to defer title V permitting of in-field agricultural operations for three years for all California air districts. The groups' comments confirm that reliable data and a complete inventory of emissions associated with production agricultural operations are not currently available and commit the California agricultural industry to participating in research efforts to better determine emission levels associated with in-field activities. CARB's comments also support EPA's proposal to grant full approval to all of the local title V programs in the State and to defer the permitting of State-exempted agricultural sources for a three-year period. CARB maintains that local districts have corrected all of the interim title V program deficiencies within their authority. CARB also reiterates the position conveyed in their September 19, 2001 letter to Jack Broadbent, Region 9 Air Director, that emissions from much of the equipment used in the pre-harvest activities exempted by State law cannot be included in title V applicability determinations, and that the potential to emit of California's exempt agricultural equipment is likely to be below title V major source thresholds.

EPA considered the comments raised in response to our proposed approval, and has decided to grant full approval to the title V operating permits programs in the State and to defer permitting of the limited category of State-exempt agricultural sources for a period of no more than three years. This approach will allow EPA and the State to evaluate the existing science, improve on assessment tools, collect and analyze additional data, remove any remaining legal obstacles, and issue any necessary guidance on implementation of the title V operating permits program for major agricultural stationary sources. At the same time, this approach will not impede local permitting authorities from issuing all of their initial round of title V permits as expeditiously as possible.

During the interim deferral period, EPA will continue to work with the agricultural industry and our state and federal regulatory partners to pursue, wherever possible, emission reduction strategies. At the end of this period, EPA will, taking into consideration the additional data gathered during the deferral, make a determination as to how the title V operating permits program will be implemented for any major agricultural stationary sources in the State.

B. Comments received by EPA That Are Specific to Bay Area Air Quality Management District

In addition to the comments discussed in II.A above that apply to all programs in California, EPA received several comment letters specific to our proposed full approval of the operating permits program for the Bay Area Air Quality Management District ("Bay Area," "District" or "BAAQMD"). These comments were received by EPA on November 19, 2001 from three organizations: Communities for a Better Environment ("CBE"); the Golden Gate University Environmental Law and Justice Clinic, acting on behalf of Our

[1] We also received a comment objecting to our proposal on this matter as it relates to the Bay Area AQMD operating permits program. See section II.B, below.

Children's Earth ("OCE"); and a Bay Area environmental organization called Commonweal. The following is a summary of the comments—and our responses—related to our proposed full approval of the Bay Area Air Quality Management District operating permits program.

1. Comments from Communities for a Better Environment

The CBE comments addressed our proposed approval of the District's revision of its definition of potential to emit ("PTE") at 2–6–218. We had proposed to approve this revised definition which allows a permit limitation, or the effect it would have on emissions, to be "enforceable by the District or EPA." The phrase, "enforceable by the District or EPA" replaced the term, "federally enforceable."

CBE stated that EPA should reject BAAQMD's revision to the definition of potential to emit at 2–6–218, or in the alternative, find the revision deficient and order BAAQMD to revise the definition. CBE stated that the proposed change to 2–6–218 is illegal because the rule change expands the definition of potential to emit beyond the bounds of the federal case law and EPA guidance on the subject. They assert that our position—that the new District definition of potential to emit is consistent with the new meaning under federal law as defined by the courts—is simply wrong. They claim that the phrase, "enforceable by the District or EPA" is vague, much broader than the current case law, and not defined anywhere in the District rule. CBE stated that it makes no sense to define "federally enforceable" in Rule 2–6–207 and then use a different phrase in the definition of potential to emit. CBE also discussed how the Manual of Procedures ("MOP"), without expressly saying so, appears to define the phrase, "enforceable by the district" as "a district or state requirement that has not been approved for inclusion in the SIP by EPA is not federally enforceable but can limit potential to emit for the purposes of major facility review." (MOP at page 3–2). CBE stated that if this is how the District intends to define the phrase, then it is much broader than what the courts allowed (see *Clean Air Implementation Project* v. *EPA No.* 96–1224 (D.C. Cir. June 28, 1996)). CBE also was opposed to our proposed action on this matter in which we rely on the District to implement its new definition of PTE to be consistent with federal case law. They said it is improper for us to approve the "vague and overly broad rule" and rely on our enforcement discretion as a means to correct any misapplication of the definition.

Finally, CBE stated that the definition of federally enforceable in the NSR rule is not consistent with the definition in the part 70 program and this would cause confusion, misinterpretation, and ambiguity surrounding enforcement actions. In particular, CBE is concerned that previous NSR actions where federally enforceable limits on the source's PTE were created under the NSR definition of PTE, could be altered under title V using "the expanded definition" to allow sources to no longer have limits on potential to emit that are federally enforceable.

EPA Response to CBE Comments: The comments made by CBE do not alter our position and today's final action approves the definition of potential to emit at District rule 2–6–218 (amended by BAAQMD on May 17, 2001). We hold to our proposed position in today's final action because the District's definition is consistent with federal case law and EPA policies. CBE is concerned that the phrase, "enforceable by the District or EPA," which replaced, "federally enforceable," is not consistent with the federal case law and EPA policies. Although the definition does not include the clarifying phrase that the state and local limits shall be, "legally and practicably enforceable" (See *Clean Air Act Implementation* v. *EPA* No. 96–1224 (D.C. Cir. June 28, 1996)), EPA does not believe that this phrase must be included before we can approve the definition in a part 70 rule. In our proposed rulemaking for Bay Area, we notified the BAAQMD of the practicable enforceability criteria and of our expectations as they implement the definition. Furthermore, the requirement that a limitation be "effective" or "practically enforceable" is inherent in any PTE limit.

In general, we agree with CBE that there could be ambiguity about the interpretation of the definition of potential to emit if it is defined differently under NSR compared to Part 70. While these differences may exist, the NSR rule is independent from the part 70 program and, therefore, a different definition of PTE in the NSR rule does not necessarily affect our ability to approve the District's definition of PTE for part 70 purposes. In response to CBE's concerns that sources would argue that certain limits on their PTE obtained during an earlier NSR action would no longer need to be federally enforceable under part 70, such arguments would not be valid because the District's NSR rules are SIP-approved and all terms and conditions of permits issued pursuant to the SIP-approved rules are federally enforceable applicable requirements for part 70 purposes.

2. Comments From Our Children's Earth

OCE provided comments on four interim approval issues, five program implementation issues, and several other changes the Bay Area had made to its rules which were not required to correct interim approval issues. We find that the five comments made by OCE on possible program implementation issues, are not related to Bay Area rule changes and are, therefore, outside the scope of today's rulemaking. (See OCE comments B.2, B.3, B.4, B.5, and B.6). Our proposal was limited to specific rule changes the district has made to its operating permits rule or program since interim approval was granted. The changes that we had identified in our proposal were made by Bay Area to either correct interim approval issues that we had earlier identified or to clarify the rule. The following are the comments that are within the scope of the rulemaking; our response follows each comment.

Issue #1—Insignificant Activities: OCE objected to our proposed approval because Bay Area did not provide a basis for defining significant source as those emission units with Hazardous Air Pollutant (HAP) emissions above 400 pounds.

EPA Response: The Bay Area established as "significant source" any emission unit that has a potential to emit of more than 2 tons per year of any regulated air pollutant or more than 400 pounds per year of any HAP. (See BAAQMD rule 2–6–238). Although the District has not provided a detailed determination of how they established this level, the emission levels for HAPs are well within the guidance EPA provided to California agencies on this matter. (See letter to Mike Tollstrup, CARB, from Gerardo Rios, EPA Region IX, dated February 22, 2001). This guidance originated from EPA's own title V permitting regulations at 40 CFR 71.5(c)(11)(ii)(B) in which we state that, "potential to emit of any HAP from any single emission unit shall not exceed 1,000 pounds per year * * *" Therefore, for this reason and the reasons described in our proposed approval action, EPA finds that the District has corrected the interim approval issue #1 and approves the District's definition of significant source.

Issue 11—Emissions Trading: OCE asserted that the District does not appear to have an emissions trading scheme in place to allow for emissions trading for Title V facilities. They said

that the inclusion of emissions trading procedures into the Title V program is inappropriate unless there are rules in place to implement emissions trading. Until this deficiency is remedied, they asked that full approval of the District's title V program be denied.

EPA Response: While we agree with the commenter that the District does not appear to have a SIP-approved rule to allow for emissions trading at title V sources, EPA does not agree that such provisions be in place before the District can adopt, and EPA can approve, part 70 program changes that would allow such trading consistent with 40 CFR 70.6(a)(10) once the applicable requirement allows for it. 40 CFR 70.6(a)(10) requires the part 70 permit contain "terms and conditions, if the permit applicant requests them, for the trading of emissions * * * to the extent that the applicable requirements provide for trading such increases and decreases * * *" [emphasis added]. Even if a permitting authority does not have applicable requirements (e.g., a SIP) that provide for such trading, it can still have provisions in its part 70 program to allow for such trading.

Issue #16—Regulated Air Pollutant: OCE was concerned about our approval of the definition of Regulated Air Pollutant at section 2–6–222.3 which includes, "[a]ny Class I or Class II ozone depleting substance subject to a. standard promulgated under Title VI of the Clean Air Act." OCE felt that this definition is inconsistent with 40 CFR 70.2(4) which only states that "[a]ny Class I or Class II subject to a standard promulgated under or established by title VI of the Act." OCE felt that by specifying "ozone depleting substance" in its regulations, the District may unnecessarily be narrowing the definition of a Class I or Class II substance. Therefore, they stated, the phrase 'ozone depleting substance' should be deleted from Regulation 2–6–222.3 to parallel the definition in 40 CFR 70.2(4). Further, OCE requested that Regulation 2–6–222.5 be amended to include the expanded language in 40 CFR 70.2(5) since the federal regulations set out a more specific explanation of regulated air pollutants. In the very least, they requested that EPA require the District to reference 40 CFR 70.2(5) in Regulation 2–6–222.5 before granting full program approval.

EPA Response: EPA disagrees with the commenter. We do not believe that the District's definition conflicts with Part 70's definition of regulated air pollutant; rather, we find it is redundant with the definition since Class I or Class II substances can reasonably be called, "ozone depleting substances." A Class I substance is a substance that, "the Administrator finds causes or contributes significantly to harmful effects on the stratospheric ozone layer." A Class II substance is, "any other substances that the Administrator finds is known or may reasonably be anticipated to cause or contribute to harmful effects on the stratospheric ozone layer." (See CAA section 602(a) and (b), respectively). Further, we disagree with OCE's comment that we should require the District to include a more complete reference of regulated pollutant at 40 CFR 70.2(5). In our interim approval notice we required that the District add the references to section 112 provisions because this was the only aspect of the definition that we found to be deficient. The District has made the required correction.

Issue #17—Agricultural Exemption: OCE commented that the District's Title V program is inadequate and should be denied because the California Legislature has failed to amend the Health and Safety Code to remove the agricultural exemption. OCE was concerned with EPA's proposal to grant the District full approval while agricultural sources remain exempt from the Title V program and stated that EPA cannot grant full approval to the District while allowing the deferral of Title V permitting of agricultural operations.

EPA Response to OCE Comment #4: Although this comment is specific to Bay Area, it is a statewide issue. Our response to this comment is provided in section II.A, above.

Comments received from OCE on non-interim approval rule changes: The following comments were made by OCE on our proposal to approve other rule changes made by Bay Area that were not required to correct interim approval deficiencies. We find that these comments are within the scope of the rulemaking and our response to these comments follow.

OCE Comment #5: Rule 2–6–113 (Exemption, Registered Portable Engines)—OCE expressed concern that the District exempts registered portable engines from its Title V program purportedly because the District does not regulate them.

EPA Response to OCE Comment #5: Rule 2–6–113 is not a provision that we proposed to approve (see table 2 in our proposed full approval dated October 19, 2001, 66 FR 53140), and therefore the comment is outside the scope of today's final rulemaking. Since the provision at 2–6–113 is not included in our final action, the provision does not exist in the federally approved part 70 program for Bay Area. Thus, the exemption for portable equipment at 2–6–113 is not available to sources in the Bay Area under the federally approved part 70 program.

OCE Comment #6: Rule 2–6–201 (Administrative Permit Amendment)—This provision defines "administrative permit amendment" and lists the changes at a title V source that can be considered for administrative permit amendment procedures. To correct an interim approval issue (see issue #6 in the proposed rulemaking) with this definition, Bay Area eliminated the phrase, "but not necessarily limited to" from the sentence introducing the list of what can be considered an administrative permit amendment. OCE commented that the definition still suffers from lack of clarity because it still uses the word "include" to introduce the list of what can be an administrative permit amendment. Further, they asked that the phrase "or new" be eliminated because new monitoring requirements are significant permit modifications to which the public ought to be able to comment.

EPA Response to OCE Comment #6: EPA disagrees with OCE's comment that the definition of Administrative Permit Amendment is still unclear. The District's deletion of the language, "not necessarily limited to" in the current rule must be considered to mean that the District considers this list to be exhaustive. Therefore, EPA considers the list to be all that is allowed. Regarding the request that the term, "new or" be eliminated, EPA does not believe it is necessary because we view "new" monitoring at an existing source to mean increasing the frequency of the existing monitoring. Furthermore, any significant change in monitoring is required to undergo a significant permit revision as defined at 2–6–226.

OCE Comment #7: Definition of Potential to Emit—OCE objected to the District replacing the phrase, "federally enforceable" with the phrase, "enforceable by the District." They stated that EPA has not yet made final decisions based on the recent court decisions, and they believed that EPA should await completion of its decision making process to review any proposed rules on potential to emit. In the alternative, they said that the phrase, "enforceable by the District or EPA" should be substituted with "federally enforceable or legally and practically enforceable by the District" consistent with EPA's guidance and comments in the proposed approval.

EPA Response to OCE Comment #7: EPA disagrees with the comment that the definition cannot be approved with the phrase, "enforceable by the District." Further, we can approve the

provision because the requirement that a limitation be "effective" or "practically enforceable" is inherent in any PTE limit. See also our response to the CBE comment above.

OCE Comment #8: Rule 2–6–231 (Synthetic Minor Operating Permit) means "a District operating permit that has been modified to include conditions imposing enforceable condition on a facility or source." OCE stated that the rule should reference Rule 2–6–218 "potential to emit." They felt that the title V program should not be approved without the clarification in this rule that exceedance of the synthetic minor limit voids the minor permit.

EPA's Response to OCE Comment #8: In light of the comments, we have re-considered our proposed action and find that EPA should defer final action on this provision. We are choosing to not take final action on this provision at this time and will complete our analysis and take appropriate action in the near future. For the time being, however, it is not part of the approved part 70 program for Bay Area.

OCE Comment #9: Rule 2–6–314 (Revocation): OCE stated that Part 70 requires a provision stating that the permittee must comply with all conditions of the Title V permit and that any noncompliance constitutes a violation of the Act and is grounds for enforcement action, and for permit termination and revocation, among other things. They stated that the Manual of Procedures makes clear that such a provision is part of a title V permit. However, OCE objected to EPA's proposed program approval to the extent that Rule 2–6–314 may be read to restrict any resources the citizen may have to enforce permit terms. In addition, they stated that the discretion to request the Hearing Board to hold a hearing should not reside solely with the Air Pollution Control Officer. They commented that any interested public member should be allowed to request the Hearing Board to hold a hearing to determine whether a major facility permit should be revoked.

EPA Response to OCE Comment #9: As the commenter acknowledges, BAAQMD's program is consistent with 70.6(a)(6)(i)'s requirements for permit content regarding non-compliance. The revocation procedures at 2–6–314 are a requirement of State law (see Health and Safety Code § 42307) and are not inconsistent with part 70 procedures, thus it is an approvable provision. In fact, part 70 does not require specific hearing board procedures for permitting agencies; therefore, the District can proceed in this way. Members of the public may avail themselves of federal remedies, including requesting revocation, under section 304 of the Clean Air Act.

OCE Comment #10: Rule 2–6–404 (Timely Application): OCE stated that there is no justification for extending the deadline for certain applications to October 20, 2000 and, for this reason, the program should not be approved.

EPA Response to OCE Comment #10: Rule 2–6–404.8 states that, "the initial application for a major facility review permit for a existing major facility with actual emissions lower than 50 tons per year of each regulated pollutant and 7 tons per year of any hazardous air pollutant shall be submitted by the applicant by October 20, 2000." This provision was adopted by the District Board on October 19, 1999 and provided warning to sources whose emissions were less than those specified, but whose PTE exceeded major source levels, that and initial application was due in one year. EPA finds that this provision is approvable because it was more restrictive than EPA policy on the matter at this time.[2] EPA's policy allowed a source to temporarily establish a potential to emit limit based on actual emissions to avoid major source status under section 112 and title V of the Clean Air Act. EPA's transition policy expired on December 31, 2000, which was after the October 20, 2000 date established by the District in its rule for these type of sources to submit timely title V applications.

OCE Comment #11: Rule 2–6–409 (Permit Content): The testing, monitoring, reporting and recordkeeping section of the rule should contain the requirement in 40 CFR 70.6(a)(3)(i)(C) for the requirements, as necessary, concerning the use, maintenance and, where appropriate, installation of monitoring equipment. This requirement could be included in Rule 2–6–503.

EPA Response to Comment #11: District rule 2–6–409.2 requires that permits include "all applicable requirements for monitoring, recordkeeping and reporting, including applicable test methods and analysis procedures." Furthermore, the District MOP at 4.6 includes a reference to numerous federal and local regulations that require monitoring (e.g., Federal New Source Performance Standards, etc.) and a statement that, "the requirements in the above regulations contain extensive instructions on monitoring procedures. They include details on the calibration of instruments, source testing for verification, number of data points per time period, averaging and statistical analysis. Such requirements will be included in the permit by reference." EPA finds that the MOP at section 4.6, and the general requirement at 2–6–409.2, adequately satisfy the part 70 requirement cited by the commenter. Therefore, we are approving 2–6–409.2.

OCE Comment #12: Rule 2–6–415 (Reopening for Cause): OCE objected to EPA's proposed program approval to the extent that Rule 2–6–314 may be read to restrict any resources the citizen may have to request revocation of permits. They stated that, consistent with the right provided to the public to enforce the terms of Title V permits and consistent with 40 CFR 70.6(a)(6)(i), any interested public member should be allowed to seek the remedy of revocation.

EPA Response to OCE Comment #12: We disagree with the comment. Part 70 does not require specific hearing board procedures to allow citizens to reopen or revoke a permit, but the Clean Air Act allows members of the public to sue to enforce permit requirements and to request appropriate relief from a court. See also our response to comment #9, above.

3. Comments From Commonweal

Commonweal raised concerns regarding provision 2–6–314, "Revocation" which states, "the Air Pollution Control Officer (APCO) may request the Hearing Board to hold a hearing to determine whether a major facility permit should be revoked if it is found that the holder of the permit is violating any provision in the permit or any applicable permit." Commonweal commented that this provision needs more specificity concerning when the APCO requests a hearing. Commonweal also stated it is necessary to require that the APCO "must" request the Hearing Board to hold a hearing about whether a permit should be revoked when a consistent pattern of permit violations has occurred. Commonweal provided two slightly different options for what they would like to the revocation language to state.

EPA's Response to Commonweal's Comment: EPA does not agree that the provision at 2–6–314 needs to be modified before it can be approved as part of the Bay Area's part 70 permitting

[2] *See* January 25, 1995 Memorandum from John Seitz, Director, OAQPS and Robert Van Heuvelen, Director, Office of Regulatory Enforcement, to various Regional EPA Air Program Directors, entitled, "Options for Limiting the Potential to Emit (PTE) of a Stationary Source Under section 112 and Title V of the Clean Air Act." *See* also, Memorandum dated December 20, 1999 entitled, "Third Extension of January 25, 1995 Potential to Emit Transition Policy," from John Seitz, Director, OAQPS and Eric Schaeffer, Director, Office of Regulatory Enforcement.

program. Part 70 does not require that the APCO request a public hearing to determine if a permit should be revoked. The permit revocation procedure described in 2–6–314, including all District Hearing Board proceedings, is an attribute of California State Law and is not inconsistent with any provision in Part 70 (see California Health and Safety Code § 42307). In general, part 70 requires that all permit proceedings undergo adequate public notice requirements including "offering an opportunity for public comment and a hearing on the draft permit." (See § 70.7(h)). Also, part 70 describes the procedures that must be followed if "the Administrator or the permitting authority determines that the permit must be revised or revoked to assure compliance with the applicable requirements." (See § 70.7(f)(1)(iv)).

III. EPA's Final Action

EPA is granting full approval to the 34 operating permits programs submitted by CARB based on the revisions submitted by the 34 districts, which satisfactorily address the program deficiencies identified in EPA's interim approvals for these districts. In addition, EPA is approving, as title V operating permits program revisions, other changes made by some districts that are unrelated to the changes required by EPA for full program approval. EPA is not taking action on certain other changes made by some districts that are also unrelated to the changes required by EPA for full program approval. For detailed descriptions of these changes and the basis for EPA's actions, readers should refer to the **Federal Register** notices published on October 19, 2001 and October 22, 2001 (see Table 1 above for **Federal Register** citations), in which EPA proposed full approval of the 34 operating permit programs, as well as the Technical Support Documents associated with those proposals.

Today EPA is also approving, as part of their revised operating permits programs, changes to the definition of potential to emit (PTE) made by Kern County APCD (KCAPCD) and Amador County APCD (ACAPCD). Both districts had revised the PTE definition in their local rules such that the requirement to count fugitives towards the major source threshold was inconsistent with the requirement in the definition of major source in 40 CFR Part 70, and was therefore not approvable. However, when EPA proposed to fully approve the KCAPCD and ACAPCD operating permits programs, on October 22, 2001 (66 FR 53354), the Agency proposed to approve the KCAPCD and ACAPCD definitions of potential to emit provided that EPA finalized revisions to the part 70 rule that would make the revised PTE definitions of KCAPCD and ACAPCD approvable. EPA promulgated a final rule on November 27, 2001 (66 FR 59161) that revised the definition of major source in part 70; the KCAPCD and ACAPCD definitions are now consistent with part 70 and EPA is approving them as part of these districts' revised title V programs.

Finally, for the Bay Area Air Quality Management District's operating permits program, our full approval includes all provisions except for:

—Provisions identified in table 2 from our proposed FR notice dated October 19, 2001. (66 FR 53140); and

—the definition of Synthetic Minor Operating Permit. Section 2–6–231.

IV. Effective Date of EPA's Full Approval of the 34 Operating Permits Programs

EPA is using the good cause exception under the Administrative Procedure Act (APA) to make the full approval of the 34 districts' programs effective on November 30, 2001. In relevant part, the APA provides that publication of "a substantive rule shall be made not less than 30 days before its effective date, except— * * * (3) as otherwise provided by the agency for good cause found and published with the rule." 5 U.S.C. 553(d)(3). Section 553(b)(3)(B) of the APA provides that good cause may be supported by an agency determination that a delay in the effective date is impracticable, unnecessary, or contrary to the public interest. EPA finds that it is necessary and in the public interest to make this action effective sooner than 30 days following publication. In this case, EPA believes that it is in the public interest for the programs to take effect before December 1, 2001. EPA's interim approval of the 34 districts' programs expires on December 1, 2001. In the absence of this full approval of 34 districts' amended programs taking effect on November 30, the federal program under 40 CFR part 71 would automatically take effect in the 34 districts and would remain in place until the effective date of the fully-approved state program. EPA believes it is in the public interest for sources, the public and 34 districts to avoid any gap in coverage of the district programs, as such a gap could cause confusion regarding permitting obligations. Furthermore, a delay in the effective date is unnecessary because the 34 districts have been administering the title V permit program for approximately six years under interim approvals. Through this action, EPA is approving a few revisions to the existing and currently operational programs. The change from the interim approved programs which substantially met the part 70 requirements, to the fully approved programs is relatively minor, in particular if compared to the changes between a district-established and administered program and the federal program.

V. What Is the Scope of EPA's Full Approval?

In its program submission, the 34 districts did not assert jurisdiction over Indian country. To date, no tribal government in California has applied to EPA for approval to administer a title V program in Indian country within the state. EPA regulations at 40 CFR part 49 govern how eligible Indian tribes may be approved by EPA to implement a title V program on Indian reservations and in non-reservation areas over which the tribe has jurisdiction. EPA's part 71 regulations govern the issuance of federal operating permits in Indian country. EPA's authority to issue permits in Indian country was challenged in *Michigan* v. *EPA*, (D.C. Cir. No. 99–1151). On October 30, 2001, the court issued its decision in the case, vacating a provision that would have allowed EPA to treat areas over which EPA determines there is a question regarding the area's status as if it is Indian country, and remanding to EPA for further proceedings. EPA will respond to the court's remand and explain EPA's approach for further implementation of part 71 in Indian country in a future action.

VI. Citizen Comments on Operating Permits Programs

On May 22, 2000, EPA promulgated a rulemaking that extended the interim approval period of 86 operating permits programs until December 1, 2001. (65 FR 32035) The action was subsequently challenged by the Sierra Club and the New York Public Interest Research Group (NYPIRG). In settling the litigation, EPA agreed to publish a notice in the **Federal Register** that would alert the public that they may identify and bring to EPA's attention alleged programmatic and/or implementation deficiencies in title V programs and that EPA would respond to their allegations within specified time periods if the comments were made within 90 days of publication of the **Federal Register** notice.

One member of the public commented on what he believes to be deficiencies with respect to the California title V programs. As stated in the **Federal Register** notices published on October

19, 2001 and October 22, 2001 proposing to fully approve the 34 operating permits programs, EPA takes no action on those comments in today's action. Rather, EPA will respond by December 14, 2001 to timely public comments on programs that have obtained interim approval, and by April 1, 2002 to timely comments on fully approved programs. We will publish a notice of deficiency (NOD) when we determine that a deficiency exists, or we will notify the commenter in writing to explain our reasons for not making a finding of deficiency. In addition, we will publish a notice of availability in the **Federal Register** notifying the public that we have responded in writing to these comments and how the public may obtain a copy of our response. A NOD will not necessarily be limited to deficiencies identified by citizens and may include any deficiencies that we have identified through our program oversight. Furthermore, in the future, EPA may issue an additional NOD if EPA or a citizen identifies other deficiencies.

Administrative Requirements

Under Executive Order 12866, "Regulatory Planning and Review" (58 FR 51735, October 4, 1993), this final approval is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) the Administrator certifies that this final approval will not have a significant economic impact on a substantial number of small entities because it merely approves state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. This rule does not contain any unfunded mandates and does not significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) because it approves pre-existing requirements under state law and does not impose any additional enforceable duties beyond that required by state law. This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175, "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000). This rule also does not have Federalism implications because it will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, "Federalism" (64 FR 43255, August 10, 1999). This rule merely approves existing requirements under state law, and does not alter the relationship or the distribution of power and responsibilities between the State and the Federal government established in the Clean Air Act. This final approval also is not subject to Executive Order 13045, "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997) or Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001), because it is not a significant regulatory action under Executive Order 12866. This action will not impose any collection of information subject to the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, other than those previously approved and assigned OMB control number 2060–0243. For additional information concerning these requirements, see 40 CFR part 70. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

In reviewing State operating permit programs submitted pursuant to title V of the Clean Air Act, EPA will approve State programs provided that they meet the requirements of the Clean Air Act and EPA's regulations codified at 40 CFR part 70. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a State operating permit program for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews an operating permit program, to use VCS in place of a State program that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2). This rule will be effective on November 30, 2001.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 5, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Operating permits, Reporting and recordkeeping requirements.

Dated: November 29, 2001.

Wayne Nastri,

Regional Administrator, Region 9.

40 CFR part 70, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 70—[AMENDED]

1. The authority citation for part 70 continues to read as follows:

Authority: 42 U.S.C. 7401, *et seq.*

2. Appendix A to part 70 is amended by revising paragraphs (a) through (hh) under California to read as follows:

Appendix A to Part 70—Approval Status of State and Local Operating Permits Programs

* * * * *

California

* * * * *

(a) Amador County Air Pollution Control District (APCD):

(1) Complete submittal received on September 30, 1994; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on April 10, 2001. The rule amendments contained in the April 10, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Amador County Air Pollution Control District is

hereby granted final full approval effective on November 30, 2001.

(b) Bay Area Air Quality Management District (AQMD):

(1) Submitted on November 16, 1993, amended on October 27, 1994, and effective as an interim program on July 24, 1995. Revisions to interim program submitted on March 23, 1995, and effective on August 22, 1995, unless adverse or critical comments are received by July 24, 1995. Approval of interim program, including March 23, 1995, revisions, expires December 1, 2001.

(2) Revisions were submitted on May 30, 2001. The rule amendments contained in the May 30, 2001 submittal adequately addressed the conditions of the interim approval effective on July 24, 1995. Bay Area Air Quality Management District is hereby granted final full approval effective on November 30, 2001.

(c) Butte County APCD:

(1) Complete submittal received on December 16, 1993; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on May 17, 2001. The rule amendments contained in the May 17, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Butte County APCD is hereby granted final full approval effective on November 30, 2001.

(d) Calaveras County APCD:

(1) Complete submittal received on October 31, 1994; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on July 27, 2001. The rule amendments contained in the July 27, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Calaveras County APCD is hereby granted final full approval effective on November 30, 2001.

(e) Colusa County APCD:

(1) Complete submittal received on February 24, 1994; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on August 22, 2001 and October 10, 2001. The rule amendments contained in the August 22, 2001 and October 10, 2001 submittals adequately addressed the conditions of the interim approval effective on June 2, 1995. Colusa County APCD is hereby granted final full approval effective on November 30, 2001.

(f) El Dorado County APCD:

(1) Complete submittal received on November 16, 1993; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on August 16, 2001. The rule amendments contained in the August 16, 2001 submittals adequately addressed the conditions of the interim approval effective on June 2, 1995. El Dorado County APCD is hereby granted final full approval effective on November 30, 2001.

(g) Feather River AQMD:

(1) Complete submittal received on December 27, 1993; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on May 22, 2001. The rule amendments contained in the May 22, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Feather River AQMD is hereby granted final full approval effective on November 30, 2001.

(h) Glenn County APCD:

(1) Complete submittal received on December 27, 1993; interim approval effective on August 14, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on September 13, 2001. The rule amendments contained in the September 13, 2001 submittal adequately addressed the conditions of the interim approval effective on August 14, 1995. Glenn County APCD is hereby granted final full approval effective on November 30, 2001.

(i) Great Basin Unified APCD:

(1) Complete submittal received on January 12, 1994; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on May 18, 2001. The rule amendments contained in the May 18, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Great Basin Unified APCD is hereby granted final full approval effective on November 30, 2001.

(j) Imperial County APCD:

(1) Complete submittal received on March 24, 1994; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on August 2, 2001. The rule amendments contained in the August 2, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Imperial County APCD is hereby granted final full approval effective on November 30, 2001.

(k) Kern County APCD:

(1) Complete submittal received on November 16, 1993; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on May 24, 2001. The rule amendments contained in the May 24, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Kern County APCD is hereby granted final full approval effective on November 30, 2001.

(l) Lake County AQMD:

(1) Complete submittal received on March 15, 1994; interim approval effective on August 14, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on June 1, 2001. The rule amendments contained in the June 1, 2001 submittal adequately addressed the conditions of the interim approval effective on August 14, 1995. Lake County AQMD is hereby granted final full approval effective on November 30, 2001.

(m) Lassen County APCD:

(1) Complete submittal received on January 12, 1994; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on August 2, 2001. The rule amendments contained in the August 2, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Lassen County APCD is hereby granted final full approval effective on November 30, 2001.

(n) Mariposa County APCD:

(1) Submitted on March 8, 1995; approval effective on February 5, 1996 unless adverse or critical comments are received by January 8, 1996. Interim approval expires on December 1, 2001.

(2) Revisions were submitted on September 20, 2001. The rule amendments contained in the September 20, 2001 submittal adequately addressed the conditions of the interim approval effective on February 5, 1996. Mariposa County APCD is hereby granted final full approval effective on November 30, 2001.

(o) Mendocino County APCD:

(1) Complete submittal received on December 27, 1993; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on April 13, 2001. The rule amendments contained in the April 13, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Mendocino County APCD is hereby granted final full approval effective on November 30, 2001.

(p) Modoc County APCD:

(1) Complete submittal received on December 27, 1993; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on September 12, 2001. The rule amendments contained in the September 12, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Modoc County APCD is hereby granted final full approval effective on November 30, 2001.

(q) Mojave Desert AQMD:

(1) Complete submittal received on March 10, 1995; interim approval effective on March 6, 1996; interim approval expires December 1, 2001.

(2) Revisions were submitted on June 4, 2001 and July 11, 2001. The rule amendments contained in the June 4, 2001 and July 11, 2001 submittals adequately addressed the conditions of the interim approval effective on March 6, 1995. Mojave Desert AQMD is hereby granted final full approval effective on November 30, 2001.

(r) Monterey Bay Unified Air Pollution Control District:

(1) Submitted on December 6, 1993, supplemented on February 2, 1994 and April 7, 1994, and revised by the submittal made on October 13, 1994; interim approval effective on November 6, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on May 9, 2001. The rule amendments contained in the May 9, 2001 submittal adequately addressed the conditions of the interim approval effective on November 6, 1995. Monterey Bay Unified Air Pollution Control District is hereby granted final full approval effective on November 30, 2001.

(s) North Coast Unified AQMD:

(1) Complete submittal received on February 24, 1994; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on May 24, 2001. The rule amendments contained in the May 24, 2001 submittal adequately addressed

the conditions of the interim approval effective on June 2, 1995. North Coast Unified AQMD is hereby granted final full approval effective on November 30, 2001.

(t) Northern Sierra AQMD:

(1) Complete submittal received on June 6, 1994; interim approval effective on June 2, 1995; interim approval expiresDecember 1, 2001.

(2) Revisions were submitted on May 24, 2001. The rule amendments contained in the May 24, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Northern Sierra AQMD is hereby granted final full approval effective on November 30, 2001.

(u) Northern Sonoma County APCD:

(1) Complete submittal received on January 12, 1994; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on May 21, 2001. The rule amendments contained in the May 21, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Northern Sonoma APCD is hereby granted final full approval effective on November 30, 2001.

(v) Placer County APCD:

(1) Complete submittal received on December 27, 1993; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on May 4, 2001. The rule amendments contained in the May 4, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Placer County APCD is hereby granted final full approval effective on November 30, 2001.

(w) The Sacramento Metropolitan Air Quality Management District:

(1) Complete submittal received on August 1, 1994; interim approval effective on September 5, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on June 1, 2001. The rule amendments contained in the June 1, 2001 submittal adequately addressed the conditions of the interim approval effective on September 5, 1995. The Sacramento Metropolitan Air Quality Management District is hereby granted final full approval effective on November 30, 2001.

(x) San Diego County Air Pollution Control District:

(1) Submitted on April 22, 1994 and amended on April 4, 1995 and October 10, 1995; approval effective on February 5, 1996, unless adverse or critical comments are received by January 8, 1996. Interim approval expires on December 1, 2001.

(2) Revisions were submitted on June 4, 2001. The rule amendments contained in the June 4, 2001 submittal adequately addressed the conditions of the interim approval effective on February 5, 1996. The San Diego County Air Pollution Control District is hereby granted final full approval effective on November 30, 2001.

(y) San Joaquin Valley Unified APCD:

(1) Complete submittal received on July 5 and August 18, 1995; interim approval effective on May 24, 1996; interim approval expires May 25, 1998. Interim approval expires on December 1, 2001.

(2) Revisions were submitted on June 29, 2001. The rule amendments contained in the June 29, 2001 submittal adequately addressed the conditions of the interim approval effective on May 24, 1996. San Joaquin Valley Unified APCD is hereby granted final full approval effective on November 30, 2001.

(z) San Luis Obispo County APCD:

(1) Complete submittal received on November 16, 1995; interim approval effective on December 1, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on May 18, 2001. The rule amendments contained in the May 18, 2001 submittal adequately addressed the conditions of the interim approval effective on December 1, 1995. San Luis Obispo County APCD is hereby granted final full approval effective on November 30, 2001.

(aa) Santa Barbara County APCD:

(1) Submitted on November 15, 1993, as amended March 2, 1994, August 8, 1994, December 8, 1994, June 15, 1995, and September 18, 1997; interim approval effective on December 1, 1995; interim approval expires on December 1, 2001.

(2) Revisions were submitted on April 5, 2001. The rule amendments contained in the April 5, 2001 submittal adequately addressed the conditions of the interim approval effective on December 1, 1995. Santa Barbara County APCD is hereby granted final full approval effective on November 30, 2001.

(bb) Shasta County AQMD:

(1) Complete submittal received on November 16, 1993; interim approval effective on August 14, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on May 18, 2001. The rule amendments contained in the May 18, 2001 submittal adequately addressed the conditions of the interim approval effective on August 14, 1995. Shasta County AQMD is hereby granted final full approval effective on November 30, 2001.

(cc) Siskiyou County APCD:

(1) Complete submittal received on December 6, 1993; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on September 28, 2001. The rule amendments contained in the September 28, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Siskiyou County APCD is hereby granted final full approval effective on November 30, 2001.

(dd) South Coast Air Quality Management District:

(1) Submitted on December 27, 1993 and amended on March 6, 1995, April 11, 1995, September 26, 1995, April 24, 1996, May 6, 1996, May 23, 1996, June 5, 1996 and July 29, 1996; approval effective on March 31, 1997. Interim approval expires on December 1, 2001.

(2) Revisions were submitted on August 2, 2001 and October 2, 2001. The rule amendments contained in the August 2, 2001 and October 2, 2001 submittals adequately addressed the conditions of the interim approval effective on March 31, 1997. South Coast AQMD is hereby granted final full approval effective on November 30, 2001.

(ee) Tehama County APCD:

(1) Complete submittal received on December 6, 1993; interim approval effective on August 14, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on June 4, 2001. The rule amendments contained in the June 4, 2001 submittal adequately addressed the conditions of the interim approval effective on August 14, 1995. Tehama County APCD is hereby granted final full approval effective on November 30, 2001.

(ff) Tuolumne County APCD:

(1) Complete submittal received on November 16, 1993; interim approval effective on June 2, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on July 18, 2001. The rule amendments contained in the July 18, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Tuolumne County APCD is hereby granted final full approval effective on November 30, 2001.

(gg) Ventura County APCD:

(1) Submitted on November 16, 1993, as amended December 6, 1993; interim approval effective on December 1, 1995; interim approval expires December 1, 2001.

(2) Revisions were submitted on May 21, 2001. The rule amendments contained in the May 21, 2001 submittal adequately addressed the conditions of the interim approval effective on December 1, 1995. Ventura County APCD is hereby granted final full approval effective on November 30, 2001.

(hh) Yolo-Solano AQMD:

(1) Complete submittal received on October 14, 1994; interim approval effective on June 2, 1995; interim approval expiresDecember 1, 2001.

(2) Revisions were submitted on May 9, 2001. The rule amendments contained in the May 9, 2001 submittal adequately addressed the conditions of the interim approval effective on June 2, 1995. Yolo-Solano AQMD is hereby granted final full approval effective on November 30, 2001.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 25 and 101

[IB Docket No. 98–172; FCC–01–323]

Redesignation of the 18 GHz Frequency Band, Blanket Licensing of Satellite Earth Stations in the Ka-band, and the Allocation of Additional Spectrum for Broadcast Satellite-Service Use

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document we grant in part and deny in part the petitions for reconsideration of the 18 GHz Order filed by Hughes Electronics Corporation (Hughes), the Fixed Wireless Communications Coalition (FWCC) and

Winstar Communications, Inc. (Winstar). We defer for action in a future Commission order certain issues raised by Hughes relating to the band plan adopted in the 18 GHz Order and blanket licensing. We also address a number of issues raised by Teledesic Corporation (Teledesic) in its letter to the Commission and its request for judicial review of the rules adopted by the Commission in the 18 GHz Order.

DATES: Effective January 7, 2002.

FOR FURTHER INFORMATION CONTACT: Richard Engelman, Planning & Negotiations Division, International Bureau, (202) 418–2150 or via electronic mail: *rengelma@fcc.gov*. In addition to filing comments with the Office of the Secretary, a copy of any comments on the information collections contained herein should be submitted to Judy Boley, Federal Communications Commission, Room 1–C804, 445 12th Street, SW., Washington, DC 20554, or via the Internet to *jboley@fcc.gov*.

SUPPLEMENTARY INFORMATION: The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room CY–A257) 445 12th Street, SW., Washington, DC and may also be purchased from the Commission's copy contractor, International Transcription Services (ITS), Inc., (202) 857–3800, 1231 20th Street, NW., Washington, DC 20036.

Summary of the Order on Reconsideration

1. In this First Order on Reconsideration we addressed issues raised by Hughes, FWCC, Winstar, and Teledesic in petitions to the Commission for reconsideration, and a petition to the United States Court of Appeals for the District of Columbia for judicial review of the *18 GHz Order*. The issues generally fall into one of four groups: 18 GHz band plan, licensing, Legacy List, and relocation.

2. With regard to the 18 GHz band plan, this Order gives the NGSO/FSS operators increased flexibility in relocating interfering terrestrial fixed stations by terminating after ten years the co-primary status of existing terrestrial fixed stations in the 19.26–19.3 GHz band, and low-power terrestrial fixed service stations in the 18.8–19.3 GHz band. This Order finds that it is appropriate to treat such operations in the same manner as other operations in the 18 GHz band, and that such treatment necessarily includes the right to compensation for relocation of both parts of a channel pair. Thus, this Order provides that, where it becomes necessary during the ten years to relocate an existing terrestrial fixed station in the 19.26–19.3 GHz band, or low-power terrestrial fixed service station in the 18.8–19.3 GHz band, the FS operator will be able to receive comparable facilities at no cost to the fixed operator.

3. We are persuaded by Hughes and several commenters to reverse the Legacy List policy that we adopted in the *18 GHz Order*. As a result, this Order removes § 25.145(i) of our rules and the requirement for a GSO/FSS space station licensee to use of the Legacy List coordination process to alleviate interference to a terrestrial fixed station.

4. This Order also generally affirms our basic findings in the *18 GHz Order* with regard to the blanket licensing rules. It changes, however the power flux-density (pfd) value for the 18.3–18.8 GHz frequency band to the values in § 25.208(c) to be consistent with the pfd limit in the Radio Regulations of the International Telecommunication Union and removes § 25.208(d). We also determine that the pfd level in § 25.138(a)(6) of −118 dBW/m2/MHz should apply to all Geostationary Satellite Orbit/Fixed Satellite Service (GSO/FSS) downlink bands in which the Commission permits blanket licensing. We amend § 101.97 to clarify that an incumbent Fixed Service (FS) licensee retains primary status notwithstanding a change in ownership or control. Further, we clarify that an incumbent licensee is entitled to a 12-month trial period after relocation to test the new facilities.

5. Finally, this Order generally denies the requests to reconsider the relocation issues, and reaffirms the Commission decision to adopt the relocation rules codified in §§ 101.89 and 101.91. This is in part because we find that it is appropriate to apply in the 18 GHz band the established policy that the Commission has employed in other similar circumstances. In addition, we find that it is Commission policy to enable an incumbent, that is required to relocate, to construct a comparable replacement system without the additional burden of undue costs. Moreover, this Order finds that the alternative proposals offered by Teledesic for measuring relocation costs are plainly inconsistent with this Commission goal. We further find that, contrary to the allegations made by Teledesic, new entrants benefit from the Commission policy of seeking to ensure that incumbents have every possible reasonable incentive to relocate promptly and voluntarily.

Supplemental Final Regulatory Flexibility Analysis

As required by the Regulatory Flexibility Act (RFA), a Final Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on small entities was incorporated in the *18 GHz Order*. The Commission sought written public comments on the proposals in the *18 GHz NPRM* including comment on the IRFA. This Supplemental Final Regulatory Flexibility Analysis (FRFA) conforms to the RFA.

A. Need for, and Objectives of, the Rules

In this First Order on Reconsideration, the Commission changes the pfd value for the 18.3–18.8 GHz frequency band to the values in § 25.208(c) to be consistent with the pfd limit in the Radio Regulations of the International Telecommunication Union and remove § 25.208(d). This First Order on Reconsideration also determines that the pfd level in § 25.138(a)(6) of −118 dBW/m2/MHz should apply to all Geostationary Satellite Orbit/Fixed Satellite Service (GSO/FSS) downlink bands in which the Commission permits blanket licensing. It amends § 101.97 to clarify that an incumbent Fixed Service (FS) licensee retains primary status notwithstanding a change in ownership or control. Further, this First Order on Reconsideration clarifies that an incumbent licensee is entitled to a twelve-month trial period after relocation to test the new facilities. Upon reconsideration, this First Order on Reconsideration also concludes that existing terrestrial services operating in the 19.26–19.3 GHz band will not be allowed to recover relocation reimbursement on a permanent basis, and will be subject to the ten year sunset period applicable to other FS operations in the 18 GHz band. This First Order on Reconsideration also takes the following steps to better reconcile the competing interests of the new entrants and the low-power terrestrial fixed service operators in satellite bands: (1) Cuts off any further low-power fixed service applications under § 101.147(r)(10) as of April 1, 2002 (outdoor applications were already cut off in the *18 GHz Order*); and (2) permits low-power services authorized pursuant § 101.147(r)(10) to continue to operate on a co-primary basis for a period of ten years, subject to the right of satellite providers to require low-power operators to relocate. Finally, this First Order on Reconsideration removes § 25.145(i) of our rules and reverses the Legacy List policy that the Commission adopted in the *18 GHz Order*; thus, the

Commission will no longer require the use of the Legacy List coordination process by an FSS space station licensee to alleviate interference to a terrestrial fixed station.

B. Summary of Significant Issues Raised by Public Comments in Response to the IRFA

No comments were submitted in direct response to the IRFA.

C. Description and Estimate of the Number of Small Entities To Which the Rules Will Apply

The RFA directs agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the adopted rules. The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction." In addition, the term "small business" has the same meaning as the term "small business concern" under the Small Business Act. A small business concern is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA). A small organization is generally "any not-for-profit enterprise which is independently owned and operated and is not dominant in its field." Nationwide, as of 1992, there were approximately 275,801 small organizations. "Small governmental jurisdiction" generally means "governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than 50,000." As of 1992, there were approximately 85,006 such jurisdictions in the United States. This number includes 38,978 counties, cities, and towns; of these, 37,566, or 96 percent, have populations of fewer than 50,000. The Census Bureau estimates that this ratio is approximately accurate for all governmental entities. Thus, of the 85,006 governmental entities, we estimate that 81,600 (91 percent) are small entities. Below, we further describe and estimate the number of small entity licensees that may be affected by the adopted rules.

1. International Services

The Commission has not developed a definition of small entities applicable to licensees in the international services. Therefore, the applicable definition of small entity is generally the definition under the SBA rules applicable to Communications Services, Not Elsewhere Classified (NEC). This definition provides that a small entity is one with $11.0 million or less in annual receipts. According to the Census Bureau, there were a total of 848 communications service providers, NEC, in operation in 1992, and a total of 775 had annual receipts of less than $9.999 million. The Census report does not provide more precise data.

2. Fixed Satellite Transmit/Receive Earth Stations

Currently there are no operational fixed satellite transmit/receive earth stations authorized for use in the 17.7–20.2 GHz and 27.5–30 GHz band. However, with 12 GSO/FSS licensees and 1 NGSO/FSS licensee, and our decision to adopt blanket licensing, we expect applications for FSS earth station licenses to be filed in the near future. We do not request or collect annual revenue information, and thus are unable to estimate the number of earth stations that would constitute a small business under the SBA definition.

3. Mobile Satellite Earth Station Feeder Links

We have granted one license for MSS earth station feeder links. We do not request or collect annual revenue information, and thus are unable to estimate of the number of mobile satellite earth stations that would constitute a small business under the SBA definition.

4. Space Stations (Geostationary)

Commission records reveal that there are 12 space station licensees. We do not request nor collect annual revenue information, and thus are unable to estimate of the number of geostationary space stations that would constitute a small business under the SBA definition, or apply any rules providing special consideration for Space Station (Geostationary) licensees that are small businesses.

5. Space Stations (Non-Geostationary)

There is one Non-Geostationary Space Station licensee and that licensee is operational. We do not request or collect annual revenue information, and thus are unable to estimate of the number of non-geostationary space stations that would constitute a small business under the SBA definition.

6. Direct Broadcast Satellites

Because DBS provides subscription services, DBS falls within the SBA definition of Cable and Other Pay Television Services (SIC 4841). This definition provides that a small entity is expressed as one with $11.0 million or less in annual receipts. As of December 1996, there were eight DBS licensees. However, the Commission does not collect annual revenue data for DBS and, therefore, is unable to ascertain the number of small DBS licensees that could be impacted by these proposed rules. Although DBS service requires a great investment of capital for operation, we acknowledge that there are several new entrants in this field that may not yet have generated more than $11 million in annual receipts, and therefore may be categorized as a small business, if independently owned and operated.

7. Auxiliary, Special Broadcast and Other Program Distribution Services

This service involves a variety of transmitters, generally used to relay broadcast programming to the public (through translator and booster stations) or within the program distribution chain (from a remote news gathering unit back to the station). At the frequencies under consideration in this proceeding there are no transmissions of this type directly to the public. The Commission has not developed a definition of small entities applicable to broadcast auxiliary licensees. Therefore, the applicable definition of small entity is the definition under the Small Business Administration (SBA) rules applicable to radio broadcasting stations (SIC 4832) and television broadcasting stations (SIC 4833). These definitions provide, respectively, that a small entity is one with either $5.0 million or less in annual receipts or $10.5 million in annual receipts. 13 CFR 121.201, SIC CODES 4832 and 4833. The numbers of these stations are very small. The FCC does not collect financial information on any broadcast facility and the Department of Commerce does not collect financial information on these auxiliary broadcast facilities. We believe, however, that by themselves most, if not all, of these auxiliary facilities could be classified as small businesses. We also recognize that most of these types of services are owned by a parent station which, in some cases, would be covered by the revenue definition of small business entity discussed above. These stations would likely have annual revenues that exceed the SBA maximum to be designated as a small business (as noted, either $5 million for a radio station or $10.5 million for a TV station). Furthermore, they do not meet the Small Business Act's definition of a "small business concern" because they are not independently owned and operated.

8. Microwave Services

Microwave services includes common carrier, private operational fixed, and

broadcast auxiliary radio services. At present, there are 22,015 common carrier licensees, approximately 61,670 private operational fixed licensees and broadcast auxiliary radio licensees in the microwave services. Inasmuch as the Commission has not yet defined a small business with respect to microwave services, we will utilize the SBA's definition applicable to radiotelephone companies—i.e., an entity with no more than 1,500 persons. 13 CFR 121.201, SIC CODE 4812. We estimate, for this purpose, that all of the Fixed Microwave licensees (excluding broadcast auxiliary licensees) would qualify as small entities under the SBA definition for radiotelephone companies.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

The Commission has adopted rules in this First Order on Reconsideration that involve no reporting requirements.

E. Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

The changes made by this First Order on Reconsideration do not affect small entities disproportionately and it is likely no additional outside professional skills will be necessary to comply with the rules and requirements here listed. The *18 GHz NPRM* solicited comment on several alternatives for spectrum sharing blanket licensing, and band segmentation. This First Order on Reconsideration considered comments offering alternatives, and has acted in response to stated concerns and suggestions, particularly those representing significant agreement or consensus by commenters. The decisions of this First Order on Reconsideration should positively impact both large and small businesses by providing a faster, more efficient, and less economically burdensome coordination and licensing procedure.

F. Report to Congress

The Commission will send a copy of this First Order on Reconsideration including this Supplemental FRFA, in a report to be sent to Congress pursuant to the Small Business Regulatory Enforcement Fairness Act of 1966, *see* 5 U.S.C. 801 (a)(1)(A). In addition, the Commission will send a copy of this First Order on Reconsideration, including this Supplemental FRFA, to the Chief Counsel for Advocacy of the Small Business Administration. A copy of this First Order on Reconsideration and Supplemental FRFA (or summaries thereof) will also be published in the **Federal Register**. *See* 5 U.S.C. 604(b).

Ordering Clauses

Pursuant to sections 1, 4(i), 4(j), 301, 302, 303(c), 303(e), 303(f), 303(r) and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154 (i), 154(j), 301, 302, 303(c), 303(e), 303(f), 303 (r), and 403, this *First Order on Reconsideration* is adopted and that parts 25 and 101 of the Commission's rules ARE AMENDED, as specified in the rules, Effective January 7, 2002.

The Regulatory Flexibility Analysis as required by section 604 of the Regulatory Flexibility Act and as set forth is adopted.

The Commission's Consumer Information Bureau SHALL SEND a copy of this *First Order on Reconsideration*, including the Supplemental Final Regulatory Flexibility Analysis to the Chief Counsel for Advocacy of the Small Business Administration.

This proceeding is terminated pursuant to sections 4(i) and 4(j) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), and 154 (j).

List of Subjects

47 CFR Part 25

Communications common carriers, communications equipment, Radio, Satellites, Telecommunications.

47 CFR Part 101

Communications equipment, Radio.

Federal Communications Commission.

William F. Caton,

Deputy Secretary.

Rule Changes

For the reasons set forth in the preamble, parts 25, and 101 of title 47 of the Code of Federal Regulations are amended as follows:

PART 25—SATELLITE COMMUNICATIONS

1. The authority citation for part 25 continues to read as follows:

Authority: 47 U.S.C. 701–744. Interprets or applies § 303, 47 U.S.C. 303. 47 U.S.C. §§ 154, 301, 302, 303, 307, 309 and 332, unless otherwise noted.

2. Section 25.138 is amended by revising paragraph (a)(6) to read as follows:

§ 25.138 Blanket licensing provisions of GSO FSS Earth Stations in the 18.58–18.8 GHz (space-to-Earth), 19.7–20.2 GHz (space-to-Earth), 28.35–28.6 GHz (Earth-to-space) and 29.5–30.0 GHz (Earth-to-space) bands.

(a) * * *

(6) Power flux-density (PFD) at the Earth's surface produced by emissions from a space station for all conditions, including clear sky, and for all methods of modulation shall not exceed a level of −118 dBW/m²/MHz, in addition to the limits specified in § 25.208 (d).

* * * * *

3. Section 25.145 is amended by revising paragraph (h) and removing paragraph (i) to read as follows:

§ 25.145 Licensing Conditions for the Fixed-Satellite Service in the 20/30 GHz Bands.

* * * * *

(h) *Policy governing the relocation of terrestrial services from the 18.58 to 19.3 GHz band.* Frequencies in the 18.58–19.3 GHz band listed in parts 21, 74, 78, and 101 of this chapter have been reallocated for primary use by the Fixed-Satellite Service, subject to various provisions for the existing terrestrial licenses. Fixed-Satellite Service operations are not entitled to protection from the co-primary operations until after the period during which terrestrial stations remain co-primary has expired. (see §§ 21.901(e), 74.502(c), 74.602(g), 78.18(a)(4), and 101.147(r) of this chapter).

4. In § 25.202, footnote 7 of the table following paragraph (a)(1) is revised to read as follows:

§ 25.202 Frequencies, frequency tolerance and emission limitations.

* * * * *

[7] The band 18.8–19.3 GHz is shared co-equally with terrestrial radiocommunications services until June 8, 2010.

* * * * *

5. Section 25.208 is amended by revising paragraph (c), removing paragraph (d), and redesignating paragraph (e) as paragraph (d) and paragraph (f) as paragraph (e) to read as follows:

§ 25.208 Power flux-density limits.

* * * * *

(c) In the 18.3–18.8 GHz, 19.3–19.7 GHz, 22.55–23.00 GHz, 23.00–23.55 GHz, and 24.45–24.75 GHz frequency bands, the power flux-density at the Earth's surface produced by emissions from a space station for all conditions and for all methods of modulation shall not exceed the following values:

(1) −115 dB (W/m²) in any 1 MHz band for angles of arrival between 0 and 5 degrees above the horizontal plane.

(2) −115+0.5 (d–5) dB (W/m²) in any 1 MHz band for angles of arrival d (in degrees) between 5 and 25 degrees above the horizontal plane.

(3) −105 dB (W/m²) in any 1 MHz band for angles of arrival between 25

and 90 degrees above the horizontal plane.

* * * * *

PART 101—FIXED MICROWAVE SERVICES

6. The authority citation for part 101 continues to read as follows:

Authority: 47 U.S.C. 154, and 303.

7. Section 101.85 is amended by revising paragraph (b) to read as follows:

§ 101.85 Transition of the 18.58–19.3 GHz band from the terrestrial fixed services to the fixed-satellite service (FSS).

* * * * *

(b) FS operations in the 18.58–19.30 GHz band that remain co-primary under the provisions of §§ 21.901(e), 74.502(c), 74.602(d), 78.18(a)(4) of this chapter, and § 101.147(r) will continue to be co-primary with the FSS users of this spectrum until June 8, 2010 or until the relocation of the fixed service operations, whichever occurs sooner, except for operations in the band 19.26–19.3 GHz and low power systems operating pursuant to § 101.47(r) (10), which shall operate on a co-primary basis until October 31, 2011. If no agreement is reached during the negotiations, an FSS licensee may initiate relocation procedures. Under the relocation procedures, the incumbent is required to relocate, provided that the FSS licensee meets the conditions of § 101.91.

* * * * *

8. Section 101.91 is amended by adding a sentence to the end of paragraph (c) to read as follows:

§ 101.91 Involuntary relocation procedures.

* * * * *

(c) * * * The FS licensee may take up to 12 months to make such adjustments and perform such testing.

* * * * *

9. Section 101.95 is amended by revising the section heading to read as follows:

§ 101.95 Sunset provisions for licensees in the 18.58–19.30 GHz band.

* * * * *

10. Section 101.97 is amended by adding a new paragraph (a)(9) to read as follows:

§ 101.97 Future licensing in the 18.58–19.30 GHz band.

(a) * * *

(9) Changes in ownership or control.

* * * * *

11. Section 101.147 is amended by revising paragraph (r) introductory text and by adding a sentence at the end of paragraph (r)(10)(iv) to read as follows:

§ 101.147 Frequency assignments.

* * * * *

(r) *17,700 to 19,700 and 24,250 to 25,250 MHz:* Stations operating on the following frequencies in the band 18.58–18.8 GHz that were licensed or had applications pending before the Commission as of June 8, 2010 may continue those operations on a shared co-primary basis with other services under parts 21, 25, and 74 of the Commission's rules until June 8, 2010, except for operations in the band 19.26–19.3 GHz and low power systems operating pursuant to paragraph (r)(10) of this section, which shall operate on a co-primary basis until October 31, 2011. Those stations operating on the following frequencies in the band 18.8–19.3 GHz that were licensed or had applications pending before the Commission as of September 18, 1998 may continue those operations on a shared co-primary basis with other services under parts 21, 25, and 74 of the Commission's rules until June 8, 2010. After this date, operations in the 18.58–19.30 GHz band are not entitled to protection from fixed-satellite service operations and must not cause unacceptable interference to fixed-satellite service station operations. No new part 101 licenses will be granted in the 18.58–19.3 GHz band after June 8, 2010, except for certain low power operations authorized under paragraph (r)(10) of this section, which may continue to be licensed until April 1, 2002. Licensees may use either a two-way link or one frequency of a frequency pair for a one-way link and must coordinate proposed operations pursuant to the procedures required in § 101.103. (Note, however, that stations authorized as of September 9, 1983, to use frequencies in the band 17.7–19.7 GHz may, upon proper application, continue to be authorized for such operations, consistent with the conditions related to the 18.58–19.3 GHz band.)

* * * * *

(10) * * *

(iv) * * * No new licenses will be authorized for applications received after April 1, 2002.

* * * * *

BILLING CODE 6712–01–P

Proposed Rules

Federal Register
Vol. 66, No. 236
Friday, December 7, 2001

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Office of Thrift Supervision

12 CFR Part 584

[No. 2001–76]

RIN 1550–AB52

Authority for Certain Savings and Loan Holding Companies To Engage in Financial Activities

AGENCY: Office of Thrift Supervision, Treasury.

ACTION: Notice of extension of comment period.

SUMMARY: The Office of Thrift Supervision is extending the comment period for the proposed rule published on November 8, 2001. The proposed rule would clarify what financial activities are authorized for certain savings and loan holding companies after the Gramm-Leach-Bliley Act. This extension will allow interested persons until January 10, 2002 to provide comments on the proposed rule.

DATES: Comments must be received by January 10, 2002.

ADDRESSES:

Mail: Send comments to Regulations Comments, Chief Counsel's Office, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552, Attention Docket No. 2001–69.

Delivery: Hand deliver comments to the Guard's Desk, East Lobby Entrance, 1700 G Street, NW., from 9 a.m. to 4 p.m. on business days, Attention Regulation Comments, Chief Counsel's Office, Docket No. 2001–69.

Facsimile: Send facsimile transmissions to FAX Number (202) 906–6518, Attention Docket No. 2001–69.

E-mail: Send e-mail to "*regs.comments@ots.treas.gov*", Attention Docket No. 2001–69, and include your name and telephone number.

Availability of comments: You may access the public comments and an index of comments on the OTS Internet Site at "*www.ots.treas.gov*". In addition, you may inspect comments at the Public Reference Room, 1700 G Street, NW., by appointment. To make an appointment for access, call (202) 906–5922, send an e-mail message to *public.info@ots.treas.gov*, or send a facsimile transmission to (202) 906–7755. (Please identify the materials you would like to inspect, to assist us in serving you.) We schedule appointments on business days between 10 a.m. until 4 p.m. In most cases, appointments will be available the next business day following the date we receive your request.

FOR FURTHER INFORMATION CONTACT: Donna M. Deale, (202) 906–7488, Manager, Holding Company and Affiliate Policy, Office of Supervision Policy; Kevin A. Corcoran, (202) 906–6962, Assistant Chief Counsel for Business Transactions, Business Transactions Division, Office of Chief Counsel; and Sally Warner Watts, (202) 906–7380, Counsel (Banking and Finance), Regulations and Legislation Division, Office of Chief Counsel; Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552. If you want to access any of these telephone numbers by text telephone (TTY), you may call the toll-free Federal Information Relay Service at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: On November 8, 2001, OTS published a proposed rule on financial activities that are authorized for certain savings and loan holding companies after the Gramm-Leach-Bliley Act (66 FR 56488). That rule required interested persons to submit their comments by December 10, 2001.

During the comment period, OTS received a written request to extend the comment period until January 10, 2002. The requestor, an association representing financial organizations, sought an extension to permit its member institutions to have time to review the proposal, consider its implications, and develop meaningful comments.

In response to this request, OTS is extending the comment period for the proposed rule until January 10, 2002. This will allow time for the requestor and other interested persons to develop and submit comments on the proposed rule.

OTS encourages e-mail or facsimile submissions to ensure that it receives comments in a timely manner, in light of recent experience with postal service interruptions in the Washington, DC area.

Dated: December 3, 2001.

By the Office of Thrift Supervision.

Ellen Seidman,

Director.

14 CFR Part 71

[Docket No. FAA–2001–10743; Airspace Docket No. 01–ASW–16]

Proposed Realignment of Federal Airway V–385; TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This action proposes to realign Federal Airway 385(V–385) between Lubbock, TX, and Abilene, TX, so that aircraft navigating on the airway will be able to remain clear of the newly established Lancer Military Operations Area (MOA).

DATES: Comments must be received on or before January 28, 2002.

ADDRESSES: Send comments on this proposal to the Docket Management System, U.S. Department of Transportation, Room Plaza 401, 400 Seventh Street, SW., Washington, DC 20590–0001. You must identify the docket numbers FAA–2001–10743/ Airspace Docket No. 01–ASW–16 at the beginning of your comments.

You may also submit comments through the Internet to *http://dms.dot.gov*. You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Dockets Office (telephone 1–800–647–5527) is on the plaza level of the NASSIF Building at the Department of Transportation at the above address.

An informal docket may also be examined during normal business hours

at the office of the Regional Air Traffic Division, Federal Aviation Administration, 2601 Meacham Blvd; Fort Worth, TX 76193–0500.

FOR FURTHER INFORMATION CONTACT: Steve Rohring, Airspace and Rules Division, ATA–400, Office of Air Traffic Airspace Management, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Nos. FAA 2001–10743/ Airspace Docket No. ASD 01–ASW–16." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

An electronic copy of this document may be downloaded through the Internet at *http://dms.dot.gov*.

Additionally, any person may obtain a copy of this action by submitting a request to the Federal Aviation Administration, Office of Air Traffic Airspace Management, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267–8783. Communications must identify both docket numbers of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should call the FAA's Office of Rulemaking, (202) 267–9677, for a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Background

On February 21, 2002, the Lancer MOA will be designated between Lubbock, TX, and Abilene, TX. Currently, V–385 (between Lubbock and Abilene) passes through the eastern boundary of the new MOA. By moving a turning point (BOOMR intersection) on V–385, the airway would be relocated approximately seven miles to the east of its present location. With this realignment, aircraft may continue to use V–385 to navigate between Lubbock and Abilene without encroaching upon the new Lancer MOA.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to realign V–385 between Lubbock, TX, and Abilene, TX, by relocating the BOOMR intersection and moving the airway approximately seven miles to the east of its present location. This realignment will allow aircraft to navigate on the airway between Lubbock, TX, and Abilene, TX, without encroaching upon the new Lancer MOA.

This regulation is limited to an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since it has been determined that this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Federal airways are published in paragraph 6010(a) of FAA Order 7400.9J dated August 31, 2001, and effective September 16, 2001, which is incorporated by reference in 14 CFR 71.1. The Federal airway listed in this document would be published subsequently in the Order.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1D, Policies and Procedures for Considering Environmental Impacts. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR Part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9J, Airspace Designations and Reporting Points, dated August 31, 2001, and effective September 16, 2001, is amended as follows:

Paragraph 6010(a)—Domestic VOR Federal Airways

* * * * *

V–385 [Revised]

From Lubbock, TX, INT Lubbock 105°T(094°M) and Abilene, TX, 329°T(319°M) radials; Abilene.

* * * * *

Issued in Washington, DC, on December 3, 2001.

Reginald C. Matthews,

Manager, Airspace and Rules Division.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 500

[Docket No. 01N–0284]

Import Tolerances; Extension of Comment Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Advance notice of proposed rulemaking; extension of comment period.

SUMMARY: The Food and Drug Administration (FDA) is extending to March 11, 2002, the comment period for the advance notice of proposed rulemaking (ANPRM) that appeared in the **Federal Register** of August 10, 2001 (66 FR 42167). The ANPRM gave notice that FDA was proposing a regulation for establishing import tolerances. The ANPRM was soliciting comments on issues related to the implementation of the import tolerances provision in section 4 of the Animal Drug Availability Act of 1996 (ADAA). The ADAA authorizes FDA to establish drug residue tolerances (import tolerances) for imported food products of animal origin for drugs that are used in other countries, but that are unapproved new animal drugs in the United States. Food products of animal origin that are in compliance with the import tolerance will not be considered adulterated under the Federal Food, Drug, and Cosmetic Act (the act) and may be imported into the United States. FDA is taking action because it has rescheduled the public meeting on the issue and wishes to allow time for the consideration of comments made after the meeting.

DATES: Submit written or electronic comments by March 11, 2002.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–235), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Submit electronic comments to *http://www.fda.gov/dockets/ecomments.*

FOR FURTHER INFORMATION CONTACT: Frances Pell, Center for Veterinary Medicine (HFV–235), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–0188, e-mail: *fpell@cvm.fda.gov.*

SUPPLEMENTARY INFORMATION:

I. Extension of Comment Period

In the **Federal Register** of August 10, 2001 (66 FR 42167), FDA published an ANPRM that gave notice that FDA intends to propose a regulation for establishing import tolerances. Interested persons were given until December 10, 2001, to comment on the ANPRM. The ANPRM is available on the Internet at: *http://www.fda.gov/OHRMS/DOCKETS/98fr/081001a.htm.* Because the agency has rescheduled the meeting of the Veterinary Medicine Advisory Committee (VMAC) from September 2001 to January 2002 (66 FR 58052, November 21, 2001), the agency is extending the comment period 90 days. The VMAC will be asked to discuss answers to questions similar to those posed in the ANPRM.

II. Comments

Interested persons may submit written or electronic comments regarding the ANPRM by March 10, 2002. Written or electronic comments should be submitted to the Dockets Management Branch (address above). Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Comments may also be submitted electronically on the Internet at: *http://www.fda.gov/dockets/ecomments.* Once on the Internet site, select 01N–0284 Import Tolerances and follow the directions.

Dated: November 30, 2001.

Margaret M. Dotzel,

Associate Commissioner for Policy.

Friday, December 7, 2001

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Notice of Request for Approval of a New Information Collection

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the intention of the Commodity Credit Corporation to request approval for collecting information necessary to pre-approve producers who request Loan Deficiency Payments online. This request does not involve any revisions to program rules or eligibility. The proposed "Request for E–LDP Services" collects information that is necessary to determine whether the producer is eligible to obtain an LDP online.

DATES: Comments on this notice must be received on or before February 5, 2002, to be assured consideration.

FOR FURTHER INFORMATION CONTACT: Kimberly V. Graham, USDA/Farm Service Agency, 1400 Independence Avenue, SW., STOP 0512; Washington, DC 20250–0512, telephone number (202) 720–9154. Comments may also be submitted by e-mail to: *Kimberly_Graham@wdc.usda.gov*.

SUPPLEMENTARY INFORMATION:

Title: Request for Electronic LDP Services.

OMB Control Number: 0560–NEW.

Type of Request: Approval of a new information collection.

Abstract: On behalf of CCC, the Farm Service Agency (FSA) has developed an Electronic Loan Deficiency Payment pilot project. This internet-based process would allow producers to request an LDP online. The capability to request LDPs online would provide producers an alternative method for obtaining loan deficiency payments. The purpose for obtaining this information is to determine producer eligibility and establish producer profiles in support of the online process. The reporting method is customer/producer-based and focuses on collecting and maintaining information needed to authorize producers access to E–LDP Services.

Estimate of Burden: Public reporting burden for the collection of information is estimated to average 4 minutes per producer.

Respondents: Producers/corporations.

Estimated Number of Respondents: 500.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 25 hours.

Proposed topics for comment include: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility and protect the interests of CCC and the producer; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of the information on those who respond, including the use of appropriated automated, electronic, mechanical, or techniques or other forms of information technology.

Comments should be sent to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 and to Kimberly V. Graham, USDA/Farm Service Agency, 1400 Independence Avenue, SW., STOP 0512; Washington, DC 20250–0512, telephone number (202) 720–9154. All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Signed at Washington, DC, on November 15, 2001.

James R. Little,

Administrator, Farm Service Agency.

[FR Doc. 01–30312 Filed 12–6–01; 8:45 am]

BILLING CODE 3410–05–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to and deletions from the Procurement List.

SUMMARY: This action adds to the Procurement List a commodity and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and deletes from the Procurement List commodities previously furnished by such agencies.

EFFECTIVE DATE: January 7, 2002.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Jefferson Plaza 2, Suite 10800, 1421 Jefferson Davis Highway, Arlington, Virginia 22202–3259.

FOR FURTHER INFORMATION CONTACT: Sheryl D. Kennerly (703) 603–7740.

SUPPLEMENTARY INFORMATION: On August 17, September 21, October 5, October 12 and October 19, 2001, the Committee for Purchase From People Who Are Blind or Severely Disabled published notices (66 FR 43180, 48661, 51005, 52095 and 53201) of proposed additions to and deletions from the Procurement List:

Additions

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the commodity and services and impact of the additions on the current or most recent contractors, the Committee has determined that the commodity and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity and services to the Government.

2. The action will not have a severe economic impact on current contractors for the commodity and services.

3. The action will result in authorizing small entities to furnish the commodity and services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodity and services proposed for addition to the Procurement List.

Accordingly, the following commodity and services are hereby added to the Procurement List:

Commodity

Trunklocker, Wood
8460–00–NSH–0003

Services

Administrative Services

U.S. Customs Service Academy, Glynco, Georgia.

Janitorial/Custodial

U.S. Army Reserve Center, Newington, Connecticut.

Mailroom Operation

At the following location: GSA Washington, 18th & F Streets NW, Washington, DC.

GSA Arlington

Crystal Mall #3, 1931 Jefferson Davis Highway, Arlington, Virginia.
GSA Regional Office Building 7th & D Streets, SW, Washington, DC.

Mailroom Operation

Internal Revenue Service, San Patricio Office Center Building, #7 Tabonuco Street, Guaynabo, Puerto Rico.

This action does not affect current contracts awarded prior to the effective date of this addition or options that may be exercised under those contracts.

Deletions

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action will not have a severe economic impact on future contractors for the commodity and services.

3. The action will result in authorizing small entities to furnish the commodity and services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodity and services deleted from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the commodities listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

Accordingly, the following commodities are deleted from the Procurement List:

Commodities

Skin Protectant Plus, Effective Prevention
6505–01–474–7707
6505–01–474–7343
Skin Protectant, Plus
6505–01–474–7724
Suspension Assembly, Liner, Helmet
8470–00–880–8814

Sheryl D. Kennerly,
Director, Information Management.

BILLING CODE 6353–01–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Addition

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed addition to Procurement List.

SUMMARY: The Committee is proposing to add to the Procurement List a service to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: January 7, 2002.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Jefferson Plaza 2, Suite 10800, 1421 Jefferson Davis Highway, Arlington, Virginia 22202–3259.

FOR FURTHER INFORMATION CONTACT: Sheryl D. Kennerly (703) 603–7740.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed addition, the entities of the Federal Government identified in this notice for each service will be required to procure the service listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the service to the Government.

2. The action will result in authorizing small entities to furnish the service to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46—48c) in connection with the service proposed for addition to the Procurement List. Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

The following service is proposed for addition to Procurement List for production by the nonprofit agencies listed:

Service

Commissary Shelf Stocking, Custodial & Warehousing

U.S. Coast Guard Support Center, Kodiak, Alaska.
NPA: MQC Enterprises, Inc., Anchorage, Alaska.
Government Agency: Defense Commissary Agency, Fort Lee, Virginia.

Sheryl D. Kennerly,
Director, Information Management.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–580–816]

Notice of Rescission of Antidumping Duty Administrative Review: Certain Corrosion-Resistant Carbon Steel Flat Products From Korea

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of rescission of the antidumping duty administrative review of certain corrosion-resistant carbon steel flat products from Korea.

SUMMARY: On October 1, 2001, the Department of Commerce ("Department") published a notice of initiation of an antidumping duty administrative review on certain corrosion-resistant carbon steel flat

products from Korea (66 FR 49924). This review covers three manufacturers/exporters of the subject merchandise. The period of review ("POR") is August 1, 2000 through July 31, 2001. This review has now been rescinded as a result of a timely withdrawal of the request for administrative review by the interested parties.

EFFECTIVE DATE: December 7, 2001.

FOR FURTHER INFORMATION CONTACT: Marlene Hewitt or Jim Doyle, Enforcement Group III, Office 9, Import Administration, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue, NW., Washington, DC 20230, telephone 202–482–1385 (Hewitt) or 202–482–0159 (Doyle), fax 202–482–1388.

SUPPLEMENTARY INFORMATION:

Applicable Statute

Unless otherwise indicated, all citations to the Tariff Act of 1930 ("Act") are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act ("URAA"). In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations at 19 CFR part 351 (2001).

Background

On August 1, 2001, the Department published a notice of opportunity to request an administrative review of this order for the period August 1, 2000 through July 31, 2001. *See Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity to Request Administrative Review*, 66 FR 39729 (August 1, 2001). Pohang Iron & Steel Co., Ltd. ("POSCO"), Dongbu Steel Co., Ltd. ("Dongbu") and Union Steel Manufacturing Co., Ltd. ("Union"), Korean producers or exporters of subject merchandise (collectively "respondents"), timely requested that the Department conduct an administrative review of their sales of subject merchandise to the United States. On October 1, 2001, in accordance with section 751(a) of the Act, the Department published in the **Federal Register** a notice of initiation of this antidumping duty administrative review. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocation in Part*, 66 FR 49924 (October 1, 2001).

Rescission of Review

Dongbu and Union withdrew their request for review on November 5, 2001 and POSCO withdrew its request for review on November 7, 2001. The Department's regulations provide that the Secretary will rescind an administrative review "if a party that requested a review withdraws the request within 90 days of the date of publication of notice of initiation of the requested review." *See* 19 CFR 351.213(d)(1). Respondents withdrew their review requests within the 90 day time limit. There were no other requests for administrative review from petitioners or other interested parties. Therefore, in accordance with section 351.213(d)(1) of the Department's regulations, we are rescinding this administrative review. *See* Memorandum to the File from Marlene Hewitt, Enforcement Group III: Recission of Eighth Review (November 21, 2001). The Department will issue appropriate assessment instructions to the U.S. Customs Service.

This notice serves as a reminder to parties subject to administrative protective order ("APO") of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This notice is published in accordance with section 751(a)(1) of the Act, and section 351.213(d) of the Department's regulations.

Dated: November 29, 2001.

Barbara E. Tillman,

Acting Deputy Assistant Secretary for Import Administration, Group III.

[FR Doc. 01–30377 Filed 12–6–01; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–834–807, A–533–823]

Notice of Postponement of Final Determinations for Antidumping Duty Investigations: Silicomanganese From Kazakhstan and India

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of extension of time limit for final determinations in the antidumping duty investigations of silicomanganese from Kazakhstan and India.

SUMMARY: The Department of Commerce ("Department") is extending the time limit for the final determinations in the antidumping duty investigations of silicomanganese from Kazakhstan and India.

EFFECTIVE DATE: December 7, 2001.

FOR FURTHER INFORMATION CONTACT: Jean Kemp (Kazakhstan), at (202) 482–4037, and Sally Gannon (India) at (202) 482–0162, at the Import Administration, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue, NW., Washington, DC 20230.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended ("Act"), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act ("URAA"). In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations codified at 19 CFR part 351 (2001).

Postponement of Final Determinations and Extension of Provisional Measures

On November 9, 2001, the affirmative preliminary determinations were published for the investigations of silicomanganese from Kazakhstan and India. *See Notice of Preliminary Determination of Sales at Less Than Fair Value: Silicomanganese from Kazakhstan*, 66 FR 56639 (November 9, 2001) and *Notice of Preliminary Determination of Sales at Less Than Fair Value: Silicomanganese from India*, 66 FR 56644 (November 9, 2001). Pursuant to section 735(a)(2) of the Act and section 351.210(b)(2)(ii) of the Department's regulations, on November 8, 2001, Transnational Co. Kazchrome and its Aksu Ferroalloy Plant ("Kazchrome"), Considar, Inc. ("Considar"), and Alloy 2000 ("Alloy 2000") requested that the Department extend the period for final determination for silicomanganese from Kazakhstan. On November 16, 2001, Kazchrome, Considar, and Alloy 2000 submitted an amended request that the Department extend provisional measures (i.e., suspension of liquidation) from a four-month period to a period not to exceed six months, pursuant to 19 CFR 351.210(e)(2). On November 20, 2001, Universal Ferro & Allied Chemicals, Ltd ("Universal"), requested that the Department postpone the final determination of silicomanganese from India until not later than 135 days after the date of the publication of the preliminary determination in the **Federal Register** and requested an extension of provisional measures.

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by petitioners. The Department's regulations, at 19 CFR 351.210(e)(2), require that requests by respondents for postponement of a final determination be accompanied by a request for extension of provisional measures from a four-month period to not more than six months.

In accordance with 19 CFR 351.210(b)(2)(ii), because (1) The preliminary determinations for silicomanganese from Kazakhstan and India are affirmative, (2) the respondents requesting a postponement account for a significant proportion of exports of the subject merchandise from their respective countries, and (3) no compelling reasons for denial exist, we are granting the respondents' requests and are postponing the final determinations to March 25, 2002, which is not later than 135 days after the publication of the preliminary determinations in the **Federal Register**. Suspension of liquidation will be extended accordingly.

Furthermore, in the Department's November 9, 2001 preliminary determination on silicomanganese from Kazakhstan, the Department invited public comment with respect to Kazakhstan's status as a non-market economy ("NME") country on factors listed in section 771(18) of the Act, which the Department must take into account in making a market/non-market economy determination. *See Notice of Preliminary Determination of Sales at Less Than Fair Value: Silicomanganese from Kazakhstan*, 66 FR 56641 (November 9, 2001). Public comments are currently due no later than December 10, 2001. The Department further requests any rebuttal comments be submitted no later than January 24, 2002.

This notice of postponement is published pursuant to 19 CFR 351.210(g).

Dated: December 3, 2001.

Bernard Carreau,

Acting Assistant Secretary for Import Administration.

Certain Cold-Rolled Carbon Steel Flat Products From Argentina, Brazil, France, and the Republic of Korea: Extension of Time Limit for Preliminary Determinations in Countervailing Duty Investigations

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of extension of time limit for preliminary determinations in countervailing duty investigations.

SUMMARY: The Department of Commerce is extending the time limit of the preliminary determinations in the countervailing duty ("CVD") investigations of certain cold-rolled carbon steel flat products from Argentina, Brazil, France, and the Republic of Korea from December 22, 2001 until no later than January 28, 2002. This extension is made pursuant to section 703(c)(1)(B) of the Tariff Act of 1930, as amended by the Uruguay Round Agreements Act.

EFFECTIVE DATE: December 7, 2001.

FOR FURTHER INFORMATION CONTACT: Suresh Maniam (Argentina and France), at (202) 482–0176; Sean Carey (Brazil), at (202) 482–3964; and Tipten Troidl (the Republic of Korea), at (202) 482–1767, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 ("the Act") by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations codified at 19 CFR part 351 (2001).

Extension of Due Date for Preliminary Determinations

On October 18, 2001, the Department of Commerce ("the Department") initiated the CVD investigations of certain cold-rolled carbon steel flat products from Argentina, Brazil, France, and the Republic of Korea. *See Notice of Initiation of Countervailing Duty Investigations: Certain Cold-Rolled Carbon Steel Flat Products From Argentina, Brazil, France, and the Republic of Korea*, 66 FR 54218 (October 26, 2001). Currently, the preliminary determinations are due no later than December 22, 2001. However, pursuant to section 703(c)(1)(B) of the Act, we have determined that these investigations are "extraordinarily complicated" and are therefore extending the due date for the preliminary determinations by 37 days to no later than January 28, 2002. The Department notes that on November 27, 2001, petitioners submitted a letter to the Department indicating that they would not object to a 35-day postponement of the preliminary determinations. This requested postponement would result in a deadline that would fall on Saturday, January 26, 2002. Therefore, the Department has extended the due date for its preliminary determinations by 37 days, until the following Monday, January 28, 2002.

Under section 703(c)(1)(B), the Department can extend the period for reaching a preliminary determination until not later than the 130th day after the date on which the administering authority initiates an investigation if:

(B) The administering authority concludes that the parties concerned are cooperating and determines that

(i) the case is extraordinarily complicated by reason of

(I) the number and complexity of the alleged countervailable subsidy practices;

(II) the novelty of the issues presented;

(III) the need to determine the extent to which particular countervailable subsidies are used by individual manufacturers, producers, and exporters; or

(IV) the number of firms whose activities must be investigated; and

(ii) additional time is necessary to make the preliminary determination.

Regarding the first requirement, we find that in each case all concerned parties are cooperating. Regarding the second requirement for extraordinarily complicated cases, it is the Department's position that the appropriate criterion for analysis is not the number of programs in question, but rather, the *specific transactions*, e.g., equity infusions, debt-to-equity conversions, etc., applied under those programs, which are numerous and appropriately categorized as "practices." With respect to the issue of the complexity of the practice, these practices are complex in nature as reflected in the extensive analysis required to address these subsidies.

Therefore, we find that each of these four cases is extraordinarily complicated as described below.

Argentina

The Argentine investigation is extraordinarily complicated because a number of the alleged countervailable subsidies practices are complex or novel. For example, the Department must analyze complicated equity and debt assumption issues, involving multiple transactions, and conduct extensive and complex financial analysis. In addition, the Department is examining a "committed investment" which requires the examination of complicated circumstances and documents surrounding the privatization of the respondent. Furthermore, the Department is analyzing significant amounts of information in order to determine whether the respondent was "creditworthy" when the government provided equity and loans to the company (*i.e.*, whether a private investor would have provided the types of financing that the government provided) and/or was "equityworthy" when the government made certain equity infusions (*i.e.*, examining the government's investment decision against that of a private investor). In making these decisions, the Department must also determine the extent to which the particular countervailable subsidies are used by the individual respondent producers/exporters.

Brazil

The Brazilian investigation is extraordinarily complicated by reason of the number and complexity of the alleged countervailable subsidy practices. The Department has to reexamine the privatization of Brazilian mills under its new change-in-ownership methodology, which will involve the analysis of complicated circumstances and documents. In addition, petitioners have submitted additional allegations of new programs involving complex issues which will require novel and detailed analysis. In making these decisions, the Department must also determine the extent to which the particular countervailable subsidies are used by the individual respondent producers/exporters.

France

The French investigation is extraordinarily complicated because a number of the alleged programs are complex or novel. For example, the Department must analyze complicated equity and loan financing issues, involving extensive and complex financial analysis. The shareholder advance allegation will require the Department to delve into the investment decision process of the government. In addition, the Department is examining novel tax issues, involving tax benefits for foreign branches. Also, the Department will be analyzing several programs that have never been examined before or were deferred in a previous case, including government advances for SODIs, funding for electric arc furnaces, and a repayable grant to Sollac for "pre-coating" technology. Finally, the Department will be examining several allegations that the European Union provided new, additional funding to programs that were previously found not to be used on several occasions, requiring the Department to re-analyze the countervailability of some of these programs.

The Republic of Korea

The Korean investigation is extraordinarily complicated due to the number and complexity of the alleged countervailable subsidy practices. Specifically, there are nineteen programs which the Department is investigating, which involve numerous and complicated issues. Over one-fourth of these programs have never been investigated before and present novel issues, and over one-half of these programs require a significant amount of information and complex analysis, such as the various tax exemptions and credit programs. In addition, the subsidized infrastructure and R&D allegations are complex, and require various types of data and information. In making these decisions, the Department must also determine the extent to which the particular countervailable subsidies are used by the individual respondent producers/exporters.

Accordingly, we deem these investigations to be extraordinarily complicated and determine, with regard to the third requirement noted above, that additional time is necessary to make the preliminary determinations. Therefore, pursuant to section 703(c)(1)(B) of the Act, we are postponing the preliminary determinations in these investigations to January 28, 2002.

This notice is published pursuant to section 703(c)(2) of the Act.

Dated: November 30, 2001.

Richard W. Moreland,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in the People's Republic of China

December 4, 2001.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 10, 2001.

FOR FURTHER INFORMATION CONTACT: Roy Unger, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927–5850, or refer to the U.S. Customs website at http://www.customs.ustreas.gov. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The current limits for certain categories are being increased for carryforward.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 65 FR 82328, published on December 28, 2000). Also see 65 FR 81846, published on December 27, 2000.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 4, 2001.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on December 20, 2000, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products,

produced or manufactured in China and exported during the twelve-month period which began on January 1, 2001 and extends through December 31, 2001.

Effective on December 10, 2001, you are directed to increase the limits for the following categories, as provided for under the terms of the current bilateral textile agreement between the Governments of the United States and the People's Republic of China:

Category	Adjusted twelve-month limit [1]
Sublevels in Group I	
200	845,614 kilograms.
218	12,656,591 square meters.
237	2,315,711 dozen.
313	47,207,417 square meters.
314	56,352,424 square meters.
315	141,936,331 square meters.
317/326	24,719,048 square meters of which not more than 4,685,451 square meters shall be in Category 326.
331	5,826,384 dozen pairs.
334	362,498 dozen.
335	423,568 dozen.
336	197,343 dozen.
338/339	2,545,931 dozen of which not more than 1,932,640 dozen shall be in Categories 338–S/339–S [2].
340	869,692 dozen of which not more than 434,845 dozen shall be in Category 340–Z [3].
341	753,581 dozen of which not more than 439,590 dozen shall be in Category 341–Y [4]
342	296,652 dozen.
345	139,912 dozen.
347/348	2,544,403 dozen.
351	646,055 dozen.
352	1,794,941 dozen.
359–V [4]	1,001,152 kilograms.
360	8,984,782 numbers of which not more than 6,128,490 numbers shall be in Category 360–P [5]
361	4,903,526 numbers.
362	8,144,309 numbers.
363	24,053,920 numbers.
433	22,745 dozen.
434	14,543 dozen.
435	26,712 dozen.
438	28,797 dozen.
442	43,550 dozen.
443	140,697 numbers.
445/446	311,712 dozen.
447	77,031 dozen.
631	1,490,680 dozen pairs.
633	65,064 dozen.
634	707,861 dozen.
635	746,670 dozen.
636	608,711 dozen.
638/639	2,684,688 dozen.
640	1,512,506 dozen.
641	1,432,787 dozen.
642	385,198 dozen.
643	575,784 numbers.
644/844	4,061,951 numbers.
645/646	894,653 dozen.
647	1,730,578 dozen.
648	1,236,487 dozen.
651	878,123 dozen of which not more than 150,305 dozen shall be in Category 651–B [6].
652	3,209,352 dozen.
659–C [7]	464,888 kilograms.
659–H [8]	3,239,176 kilograms.
666	4,026,236 kilograms.
845	2,543,417 dozen.
Group II	
330, 332, 349, 353, 354, 359–O [9], 431, 432, 439, 459, 630, 632, 653, 654 and 659–O [10], as a group.	136,222,783 square meters equivalent.
Group III	
201, 220, 222, 223, 224–V [11], 224–O [12], 225, 227, 229, 369–O [13], 400, 414, 464, 465, 469, 600, 603, 604–O [14], 606, 618–622, 624–629, 665, 669–O [15] and 670–O [16], as a group.	282,573,291 square meters equivalent.
Group IV	
832, 834, 838, 839, 843, 850–852, 858 and 859, as a group.	13,396,518 square meters equivalent.

[1] The limits have not been adjusted to account for any imports exported after December 31, 2000.

[2] Category 338–S: all HTS numbers except 6109.10.0012, 6109.10.0014, 6109.10.0018 and 6109.10.0023; Category 339–S: all HTS numbers except 6109.10.0040, 6109.10.0045, 6109.10.0060 and 6109.10.0065.

[3] Category 340–Z: only HTS numbers 6205.20.2015, 6205.20.2020, 6205.20.2050 and 6205.20.2060.

[4] Category 341–Y: only HTS numbers 6204.22.3060, 6206.30.3010, 6206.30.3030 and 6211.42.0054.

[5] Category 360–P: only HTS numbers 6302.21.3010, 6302.21.5010, 6302.21.7010, 6302.21.9010, 6302.31.3010, 6302.31.5010, 6302.31.7010 and 6302.31.9010.

[6] Category 651–B: only HTS numbers 6107.22.0015 and 6108.32.0015.

[7] Category 659–C: only HTS numbers 6103.23.0055, 6103.43.2020, 6103.43.2025, 6103.49.2000, 6103.49.8038, 6104.63.1020, 6104.63.1030, 6104.69.1000, 6104.69.8014, 6114.30.3044, 6114.30.3054, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.9010, 6211.33.0010, 6211.33.0017 and 6211.43.0010.

[8] Category 659–H: only HTS numbers 6502.00.9030, 6504.00.9015, 6504.00.9060, 6505.90.5090, 6505.90.6090, 6505.90.7090 and 6505.90.8090.

[9] Category 359–O: all HTS numbers except 6103.42.2025, 6103.49.8034, 6104.62.1020, 6104.69.8010, 6114.20.0048, 6114.20.0052, 6203.42.2010, 6203.42.2090, 6204.62.2010, 6211.32.0010, 6211.32.0025, 6211.42.0010 (Category 359–C); 6103.19.2030, 6103.19.9030, 6104.12.0040, 6104.19.8040, 6110.20.1022, 6110.20.1024, 6110.20.2030, 6110.20.2035, 6110.90.9044, 6110.90.9046, 6201.92.2010, 6202.92.2020, 6203.19.1030, 6203.19.9030, 6204.12.0040, 6204.19.8040, 6211.32.0070 and 6211.42.0070 (Category 359–V).

[10] Category 659–O: all HTS numbers except 6103.23.0055, 6103.43.2020, 6103.43.2025, 6103.49.2000, 6103.49.8038, 6104.63.1020, 6104.63.1030, 6104.69.1000, 6104.69.8014, 6114.30.3044, 6114.30.3054, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.9010, 6211.33.0010, 6211.33.0017, 6211.43.0010 (Category 659–C); 6502.00.9030, 6504.00.9015, 6504.00.9060, 6505.90.5090, 6505.90.6090, 6505.90.7090, 6505.90.8090 (Category 659–H); 6112.31.0010, 6112.31.0020, 6112.41.0010, 6112.41.0020, 6112.41.0030, 6112.41.0040, 6211.11.1010, 6211.11.1020, 6211.12.1010 and 6211.12.1020 (Category 659–S).

[11] Category 224–V: only HTS numbers 5801.21.0000, 5801.23.0000, 5801.24.0000, 5801.25.0010, 5801.25.0020, 5801.26.0010, 5801.26.0020, 5801.31.0000, 5801.33.0000, 5801.34.0000, 5801.35.0010, 5801.35.0020, 5801.36.0010 and 5801.36.0020.

[12] Category 224–O: all HTS numbers except 5801.21.0000, 5801.23.0000, 5801.24.0000, 5801.25.0010, 5801.25.0020, 5801.26.0010, 5801.26.0020, 5801.31.0000, 5801.33.0000, 5801.34.0000, 5801.35.0010, 5801.35.0020, 5801.36.0010 and 5801.36.0020 (Category 224–V).

[13] Category 369–O: all HTS numbers except 6302.60.0010, 6302.91.0005 and 6302.91.0045 (Category 369–D); 4202.22.4020, 4202.22.4500, 4202.22.8030 (Category 369–H); 4202.12.4000, 4202.12.8020, 4202.12.8060, 4202.92.1500, 4202.92.3016, 4202.92.6091 and 6307.90.9905 (Category 369–L); and 6307.10.2005 (Category 369S)

[14] Category 604–O: all HTS numbers except 5509.32.0000 (Category 604–A).

[15] Category 669–O: all HTS numbers except 6305.32.0010, 6305.32.0020, 6305.33.0010, 6305.33.0020 and 6305.39.0000 (Category 669–P).

[16] Category 670–O: only HTS numbers 4202.22.4030, 4202.22.8050 and 4202.32.9550.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–S

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Reduction of Charges for Certain Cotton Textile Products Produced or Manufactured in the Republic of Turkey

December 4, 2001.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs reducing charges.

EFFECTIVE DATE: December 11, 2001.

FOR FURTHER INFORMATION CONTACT: Roy Unger, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

On June 26, 2001, in response to a request from the Government of Turkey, CITA published an adjusted limit for Category 350 from Turkey. On November 21, 2001, CITA reduced charges against this limit by 9,533 dozen (see 66 FR 58123, published on November 20, 2001, with an amendment published on November 29, 2001 in 66 FR 59602). As a result of further discussions with the Government of Turkey, CITA is instructing U.S. Customs to reduce the charges applied to the limit established in the directive dated October 27, 2000, for goods exported in 2001, for Category 350 by an additional 20,000 dozens.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 4, 2001.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Pursuant to further discussions with the Government of Turkey, effective on December 11, 2001, you are directed to reduce the charges applied to the limit established in the directive dated October 27, 2000, for goods exported in 2001, for Category 350 by 20,000 dozens.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–S

DEPARTMENT OF EDUCATION

Submission for OMB Review; Comment Request

AGENCY: Department of Education.

SUMMARY: The Leader, Regulatory Information Management Group, Office of the Chief Information Officer invites comments on the submission for OMB review as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before January 7, 2002.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Karen Lee, Desk Officer, Department of Education, Office of Management and Budget, 725 17th Street, NW., Room 10202, New Executive Office Building, Washington, DC 20503 or should be electronically mailed to the internet address *Karen_F._Lee@omb.eop.gov.*

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Leader, Regulatory Information Management Group, Office of the Chief Information Officer, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, *e.g.* new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment.

Dated: December 3, 2001.

John Tressler,

Leader, Regulatory Information Management, Office of the Chief Information Officer.

Office of Educational Research and Improvement

Type of Review: New.

Title: Generic Application Package for Discretionary Grant Programs.

Frequency: Annually.

Affected Public: Individuals or household; Businesses or other for-profit; Not-for-profit institutions; State, Local, or Tribal Gov't, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden:

Responses: 300.

Burden Hours: 7,525.

Abstract: This is a generic application package using ED standard forms and instructions and will be used for Office of Educational Research and Improvement (OERI) discretionary grant program competitions. The purpose is to provide a common and easily recognizable format for applicants to experiment with research and demonstration programs.

This information collection is being submitted under the Streamlined Clearance Process for Discretionary Grant Information Collections (1890–0001). Therefore, the 30-day public comment period notice will be the only public comment notice published for this information collection.

Requests for copies of the proposed information collection request may be accessed from *http://edicsweb.ed.gov,* or should be addressed to Vivian Reese, Department of Education, 400 Maryland Avenue, SW, Room 4050, Regional Office Building 3, Washington, DC 20202–4651. Requests may also be electronically mailed to the Internet address *OCIO.RIMG@ed.gov* or faxed to 202–708–9346. Please specify the complete title of the information collection when making your request. Comments regarding burden and/or the collection activity requirements should be directed to Kathy Axt at (540) 776–7742 or via her Internet address *Kathy.Axt@ed.gov.* Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Talent Search Program

AGENCY: Department of Education.

ACTION: Notice reopening competition and establishing a new application deadline date for fiscal year (FY) 2002.

SUMMARY: The Department of Education (we) announces the reopening of the competition for new awards under the Talent Search Program for FY 2002. We also establish a new deadline date for the transmittal of applications. We are taking these actions because recent disruptions in the U.S. Postal Service may have interfered with our receipt of many applications. The reopening is intended to help potential applicants compete fairly under this competition.

DATES: The new deadline date for transmitting applications is December 17, 2001. The previous date was October 19, 2001. The new deadline date for the transmittal of State process recommendations by State Single Points of Contact (SPOCs) and comments by other interested parties under Executive Order 12372 is February 15, 2002. The previous date was December 19, 2001.

ADDRESSES: The addresses and telephone numbers for obtaining applications for, or information about, this competition were in the original application notice published in the **Federal Register** on June 11, 2001 (66 FR 31338–31339).

If you use a telecommunications device for the deaf (TDD), you may call the TDD number, if any, listed in the individual application notice. If we have not listed a TDD number, you may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

If you want to transmit a recommendation or comment under Executive Order 12372, you can find the latest list and addresses of individual SPOCs on the Web site of the Office of Management and Budget at the following address: *http://www.whitehouse.gov/omb/grants.*

SUPPLEMENTARY INFORMATION: On June 11, 2001, we published in the **Federal Register** a notice inviting applications for new awards under this program for FY 2002 and establishing a deadline date for the transmittal of applications.

In the application package, which hundreds of potential applicants requested, we stated that if you send your application by mail or if you or your courier deliver it by hand, our Application Control Center will mail a Grant Application Receipt Acknowledgment to you.

We further stated that if you do not receive the notification of application receipt within 15 days from the date of mailing the application, you should call the U.S. Department of Education Application Control Center at (202) 708–9493.

In recent weeks numerous applicants have called to say that they did not get a notification that we had received their respective applications even though they had proof of having mailed the applications. Through a search of our records, we determined that we had not received those applications. In addition, we determined that we had received far fewer applications for new awards under this program than we had received in previous years and far fewer than we had expected for the FY 2002 competition.

We have concluded that many applications may be delayed because of the recent disruptions of normal mail service, particularly in the Washington, DC area. Because we do not know when delayed applications may be delivered, we have decided to reopen this competition to give all applicants a chance to transmit their applications to us. This reopening and new deadline date for transmittal of applications apply to the entire country, as well as to eligible Territories.

Please note that there are alternative methods of transmittal besides the U.S. Postal Service. These include commercial carriers and courier services, as well as hand delivery. If you use a commercial carrier, please make sure to get a dated shipping label, invoice, or receipt from the carrier. If you use one of these alternative means of transmittal, we will mail a Grant Application Receipt Acknowledgment to you.

Note: If you have already submitted an application by mail and have not received a notification of application receipt from us by now, we urge you to resubmit your application and to indicate on the application that this is a resubmission. You may also wish to consider an alternative means of transmittal. Otherwise, we may not receive your application in time to consider it.

Assistance for Individuals With Disabilities

If you are an individual with a disability, you may obtain a copy of this notice in an alternative format (e.g., Braille, large print, audiotape, or computer diskette) on request to the contact person listed under **FOR FURTHER INFORMATION CONTACT** in the application notice.

Electronic Access to This Document

You may view this document, as well as all other Department of Education documents published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at the following site: *www.ed.gov/legislation/FedRegister.*

To use PDF you must have Adobe Acrobat Reader, which is available free at this site. If you have questions about using PDF, call the U.S. Government Printing Office (GPO), toll free, at 1–888–293–6498; or in the Washington, DC area at (202) 512–1530.

Note: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available on GPO Access at: *http://www.access.gpo.gov/nara/index.html.*

Dated: December 3, 2001.

Maureen A. McLaughlin,

Deputy Assistant Secretary for Policy, Planning, and Innovation, Office of Postsecondary Education.

BILLING CODE 4000–01–U

DEPARTMENT OF ENERGY

Office of Science; Biological and Environmental Research Advisory Committee; Renewal

AGENCY: Department of Energy.

ACTION: Notice of renewal.

SUMMARY: Pursuant to section 14(a)(2)(A) of the Federal Advisory Committee Act, and in accordance with section 102–3.65, title 41 of the Code of Federal Regulations, and following consultation with the Committee Management Secretariat, General Services Administration, notice is hereby given that the Biological and Environmental Research Advisory Committee has been renewed for a two-year period beginning in November 2001. The Committee will provide advice to the Director, Office of Science, on the Biological and Environmental Research Program managed by the Office of Biological and Environmental Research.

The renewal of the Biological and Environmental Research Advisory Committee has been determined to be essential to the conduct of the Department of Energy business and to be in the public interest in connection with the performance of duties imposed upon the Department of Energy by law. The Committee will operate in accordance with the provisions of the Federal Advisory Committee Act, the Department of Energy Organization Act (Public Law No. 95–91), and rules and regulations issued in implementation of those Acts.

Further information regarding this Advisory Committee can be obtained from Ms. Rachel M. Samuel at (202) 586–3279.

Issued in Washington, DC on November 27, 2001.

James N. Solit,

Advisory Committee Management Officer.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Idaho Operations Office; University Research for the Geothermal Program

AGENCY: Idaho Operations Office, DOE.

ACTION: Notice of Competitive Financial Assistance Solicitation.

SUMMARY: The U.S. Department of Energy (DOE) Idaho Operations Office (ID) is seeking applications for research projects in earth science at universities to expand the geothermal knowledge base. The knowledge gained from this work will result in new and improved technology that will help meet geothermal program goals. University earth science research and development is sought to enhance exploration tools, increase reservoir productivity, and improve reservoir management. The Program's overarching goal is to reduce the levelized cost of generating geothermal power to 3 to 5 cents/kWh by 2010, as compared to 5 to 8 cents/kWh in 2000.

DATES: The Standard Form 424, and the technical application (20 page maximum), must have an IIPS transmission time stamp of not later than *5 p.m. ET on Thursday, February 28, 2002.*

ADDRESSES: Completed applications are required to be submitted via the U.S. Department of Energy Industry Interactive Procurement System (IIPS) at the following URL: *http://e-center.doe.gov.*

FOR FURTHER INFORMATION CONTACT: Elizabeth Dahl, Contract Specialist at *dahlee@id.doe.gov,* facsimile at (208) 526–5548, or by telephone at (208) 526–7214.

SUPPLEMENTARY INFORMATION: Approximately $2,000,000 dollars in Federal funds is expected to be available over the next three fiscal years. A maximum of $500,000 dollars is expected to be available in fiscal year 2002 to totally fund the first year of selected research efforts. DOE anticipates awarding three to five grants, each with a duration of three years or less. U.S. institutions of higher education may submit applications in response to this solicitation. National laboratories will not be eligible for an award under this solicitation. Multi-partner collaborations between U.S. universities and U.S. industry are encouraged. Cost share is not required but encouraged. The issuance date of Solicitation Number DE–PS07–02ID14263 is on or about November 29, 2001. The solicitation is available in its full text via the Internet at the following address: *http://e-center.doe.gov.* The statutory authority for this program is the Department of Energy Organization Act of 1977, Public Law 95–238, Section 207, and Public Law 101–218. The Catalog of Federal Domestic Assistance (CFDA) Number for this program is 81.087, Renewable Energy Research and Development.

Issued in Idaho Falls on November 29, 2001.

R.J. Hoyles,

Director, Procurement Services Division.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP02–22–000]

Michigan Gas Storage Company; Notice of Application

December 3, 2001.

Take notice that on November 9, 2001, Michigan Gas Storage Company (Michigan Gas), 212 West Michigan Avenue, Jackson, Michigan, 49201, filed an application pursuant to section 1(c) of the Natural Gas Act (NGA), as amended, and section 152.1 of the Commission's regulations, for a declaration of exemption from the provisions of NGA. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance).

Any person desiring to be heard or make any protest with reference to said application should on or before December 24, 2001, file with the Commission 888 First Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedures (19 CFR sections 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR section 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the Protestants parties to the proceedings. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition in accordance with the Commission's Rules. Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

Take notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no protest or motion to intervene is filed within the time required herein. At that time, the Commission, on its own review of the matter, will determine whether granting the abandonment is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advise, it will be unnecessary for Michigan to appear or be represented at the hearing.

Linwood A. Watson, Jr.,

Acting Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL02–26–000]

Nevada Power Company and Sierra Pacific Power Company, Complainants, v. Duke Energy Trading and Marketing, Inc., Respondent; Notice of Complaint

December 3, 2001.

Take notice that on November 30, 2001, Nevada Power Company (NPC) and Sierra Pacific Power Company (SPPC) (collectively, the Nevada companies) filed a complaint requesting that the Commission mitigate unjust and unreasonable prices in sales contracts between NPC and Duke Energy Trading and Marketing, Inc. (Duke) and between SPPC and Duke entered into in late 2000 and the first half of 2001 for delivery after January 1, 2001.

The Nevada companies request that the Commission set a refund effective

date of 60 days from the date of filing of their complaint.

Copies of the Nevada companies' filing were served on Duke and the Public Utilities Commission of Nevada.

Any person desiring to be heard or to protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests must be filed on or before December 20, 2001. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Answers to the complaint shall also be due on or before December 20, 2001. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EG02–39–000, et al.]

Rocky Mountain Power, Inc., et al.; Electric Rate and Corporate Regulation Filings

November 30, 2001.

Take notice that the following filings have been made with the Commission:

1. Rocky Mountain Power, Inc.

[Docket No. EG02–39–000]

Take notice that on November 27, 2001, Rocky Mountain Power, Inc. tendered for filing with the Federal Energy Regulatory Commission (Commission) an application for determination of exempt wholesale generator status pursuant to part 365 of the Commission's regulations.

Rocky Mountain Power is a Montana corporation that will be engaged directly and exclusively in the business of owning and operating all or part of one or more eligible facilities to be located in Hardin, Montana. The eligible facilities will consist of an approximately 110 MW coal-fired single cycle electric generation plant and related interconnection facilities. The output of the eligible facilities will be sold at wholesale or market based rates.

Comment date: December 21, 2001, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

2. Consumers Energy Company

[Docket Nos. ER92–331–010 and ER92–332–010]

Take notice that on November 27, 2001, Consumers Energy Company (Consumers) tendered for filing the following tariff sheets as part of its FERC Electric Tariff No. 5 in compliance with Order No. 614, dealing with tariff sheet designations: Second Revised Volume Original Sheet Nos. 1.00 through 14.00.

The second sheet listed is to have an effective date of June 21, 1993. The remaining sheets are to have an effective date of May 2, 1992.

Copies of these sheets were served upon the Michigan Public Service Commission and upon those on the official service lists in these proceedings.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

3. Northeast Utilities Service Company, Select Energy, Inc., and Northeast Generation Company

[Docket Nos. ER96–496–010, ER99–14–007 and ER99–4463–001]

Take notice that on November 27, 2001, Northeast Utilities Service Company (NUSCO), on behalf of The Connecticut Light and Power Company, Western Massachusetts Electric Company, Holyoke Water Power Company, Holyoke Power and Electric Company, and Public Service of New Hampshire (the NU Operating Companies), and Select Energy, Inc. (Select), and Northeast Generation Company (NGC) (collectively, Applicants) jointly filed with the Federal Energy Regulatory Commission an updated market power analysis. This filing serves as the triennial updated market power analysis in Docket Nos. ER96–496–000 for the NU Operating Companies; ER99–3658–000 for Select; and ER99–4463–000 for NGC. In addition, Applicants request the Commission to synchronize their future triennial market power updates.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

4. Carolina Power & Light Co. and Florida Power Corporation

[Docket Nos. ER01–1807–007 and ER01–2020–004]

Take notice that on November 26, 2001, Progress Energy, Inc. (Progress Energy), on behalf of Carolina Power & Light Company (CP&L), tendered for filing revised service agreements under CP&L's open access transmission tariff, FERC Electric Tariff, Third Revised Volume No. 3 in compliance with the Commission's June 25, 2001 and September 21, 2001 orders in these proceedings. See Carolina Power & Light Co. and Florida Power Corp., 95 FERC ¶ 61,429 (2001). Progress Energy also tendered for filing an index of Revised Service Agreements and Notices of Cancellation for certain of CP&L's currently-effective service agreements.

Progress Energy respectfully requests that the Revised Service Agreements become effective on the date set forth on the cover sheet for each Revised Service Agreement and that the Notices of Cancellation become effective as of November 26, 2001.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

5. New York Independent System Operator, Inc.

[Docket Nos. ER01–3009–002, ER01–3153–002 andEL00–90–002]

Take notice that on November 27, 2001, the New York Independent System Operator, Inc. (NYISO) tendered for filing with the Federal Energy Regulatory Commission (Commission) a compliance filing in accordance with the Commission's October 25, 2001, order in the above-captioned proceedings.

A copy of this filing was served upon all persons designated on the official service list compiled by the Secretary in the above-captioned proceedings.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

6. Wisconsin Public Service Corporation

[Docket No. ER02–157–001]

Take notice that on November 27, 2001, Wisconsin Public Service Commission (WPSC) filed a letter withdrawing its October 23, 2001 filing in Docket No. ER02–157–000 as required by the Commission's staff.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

7. PacifiCorp

[Docket No. ER02–408–000]

Take notice that on November 27, 2001, PacifiCorp tendered for filing with the Federal Energy Regulatory Commission (Commission) in accordance with 18 CFR part 35 of the Commission's Rules and Regulations, a fully executed Integration and Exchange Agreement (Agreement) dated October 22, 2001 between Seattle City Light and PacifiCorp.

PacifiCorp has requested a November 26, 2001 effective date.

Copies of this filing were supplied to the Washington Utilities and Transportation Commission and the Public Utility Commission of Oregon.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

8. Exelon Generation Company, LLC

[Docket No. ER02–409–000]

Take notice that on November 27, 2001, Exelon Generation Company, LLC (Exelon Generation), submitted for filing a power sales service agreement between Exelon Generation and Aquila Energy Marketing Corporation, under Exelon Generation's wholesale power sales tariff, FERC Electric Tariff Original Volume No. 2.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

9. Florida Power Corporation

[Docket No. ER02–410–000]

Take notice that on November 27, 2001, Florida Power Corporation (FPC) filed a Service Agreement with Exelon Generation Company, LLC under FPC's Short-Form Market-Based Wholesale Power Sales Tariff (SM–1), FERC Electric Tariff No. 10.

FPC is requesting an effective date of November 1, 2001 for this Agreement.

A copy of this filing was served upon the Florida Public Service Commission and the North Carolina Utilities Commission.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

10. Southern Company Services, Inc.

[Docket No. ER02–411–000]

Take notice that on November 27, 2001, Southern Company Services, Inc. (SCS), acting on behalf of Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, and Savannah Electric and Power Company (collectively referred to as Southern Companies), filed one (1) agreement for network integration transmission service between Southern Companies and Generation Energy Marketing, a Department of SCS, as agent for Mississippi Power Company, under the Open Access Transmission Tariff of Southern Companies (FERC Electric Tariff, Fourth Revised Volume No. 5). Under this agreement, power will be delivered to the South Mississippi Electric Power Association's Coastal EPA Cedar Lake Delivery Point. Additionally, the agreement provides for Generation Energy Marketing to pay the Direct Assignment Facilities Charges specified in the agreement. This agreement is being filed in conjunction with a power sale by SCS, as agent for Mississippi Power Company, to the South Mississippi Electric Power Association under Southern Companies' Market-Based Rate Power Sales Tariff, as was approved in FERC Docket No. ER01–1284–000.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

11. American Transmission Company LLC

[Docket No. ER02–412–000]

Take notice that on November 27, 2001, American Transmission Company LLC (ATCLLC) tendered for filing an executed Distribution-Transmission Interconnection Agreement between ATCLLC and the City of Wisconsin Rapids.

ATCLLC requests an effective date of July 26, 2001.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

12. Arizona Public Service Company

[Docket No. ER02–413–000]

Take notice that on November 27, 2001 , Arizona Public Service Company (APS) tendered for filing a cancellation of APS FERC Rate Schedule No. 231, a Wholesale Power Agreement between the Colorado River Commission of Nevada and APS.

A copy of this filing has been served on the Colorado River Commission of Nevada and the Arizona Corporation Commission.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

13. California Independent System Operator Corporation

[Docket No. ER02–414–000]

Take notice that on November 27, 2001, the California Independent System Operator Corporation (ISO) tendered for filing Second Revised Service Agreement No. 229 Under ISO Rate Schedule No.1, which is a Participating Generator Agreement (PGA) between the ISO and Geysers Power Company, LLC (Geysers). The ISO has revised the PGA to modify the description of generating units contained in Schedule 1 of the PGA, and to modify Schedule 3 of the PGA to reflect the new addresses, phone numbers, and fax numbers for Jacob Rudisill and Calpine's Western Region Office.

The ISO requests that the agreement be made effective as of August 22, 2000.

The ISO states that this filing has been served on all entities that are on the official service list for Docket No. ER99–2820–000, Geysers, and the Public Utilities Commission of the State of California.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

14. LG&E Power Monroe LLC

[Docket No. ER02–415–000]

Take notice that on November 27, 2001, LG&E Power Monroe LLC (Power Monroe) tendered for filing a service agreement between Power Monroe and LG&E Energy Marketing Inc. executed pursuant to Power Monroe's FERC Electric Tariff No. 1.

Power Monroe requests an effective date of November 28, 2001.

Copies of the filing were served upon LG&E Energy Marketing Inc.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

15. Florida Power Corporation

[Docket No. ER02–416–000]

Take notice that on November 26, 2001, Progress Energy, Inc. (Progress Energy), on behalf of Florida Power Corporation (FPC), tendered for filing revised service agreements (Revised Service Agreements) under FPC's open-access transmission tariff (OATT), FERC Electric Tariff, Second Revised Volume No. 6 (FPC's OATT), to comply with the Commission's June 25, 2001 and September 21, 2001 orders in Carolina Power & Light Co. and Florida Power Corp., 95 FERC ¶ 61,429 (2001). Progress Energy also tendered for filing an index of Revised Service Agreements as filed under FPC's OATT.

Copies of the filing were served upon the Commission's official service list and the North Carolina Utilities Commission, the South Carolina Public Service Commission and the Florida Public Service Commission.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP02–17–000]

Texas Eastern Transmission, LP; Notice of Intent To Prepare an Environmental Assessment for the Proposed Freehold Project and Request for Comments on Environmental Issues

December 3, 2001.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Freehold Project involving the construction and operation of facilities by Texas Eastern Transmission, LP (Texas Eastern) in Somerset and Hunterdon Counties, New Jersey.[1] These facilities would consist of one 5,000 horsepower (hp) compressor station and facilities related to the uprate of certain segments of its mainline facilities east of Lambertville, New Jersey. This EA will be used by the Commission in its decisionmaking process to determine whether the project is in the public convenience and necessity.

If you are a landowner receiving this notice, you may be contacted by a pipeline company representative about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The pipeline company would seek to negotiate a mutually acceptable agreement. However, if the project is approved by the Commission, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings in accordance with state law.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" was attached to the project notice Texas Eastern provided to landowners. This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is available for viewing on the FERC Internet Web site (*www.ferc.fed.us*).

Summary of the Proposed Project

Texas Eastern proposes to provide service to New Jersey Natural Gas Company's local distribution system at Texas Eastern's Freehold Lateral M&R Stations 953 and 2210. Texas Eastern proposes to:

- Construct and operate a 5,000-horsepower electric motor-driven compressor station in Somerset County, New Jersey (Freehold Compressor Station);
- Uprate the maximum allowable operating pressure of the 36-inch-diameter Line No. 20 and the 42-inch-diameter Line No. 38 from 975 pounds per square inch gauge (psig) to 1,170 psig from milepost (MP) 0.0 to MP 13.9;
- Install two pressure limiting devices at MP 13.9 of Line Nos. 20 and 38, respectively; and
- Replace five road crossings on Line No. 38 with heavier wall thickness pipeline at the following locations in Somerset and Hunterdon Counties, New Jersey:
  - County Road 605/Queens Road (MP 0.06);
  - State Route 31 (MP 2.69);
  - County Road 607/Rileyville Road (MP 6.12);
  - Montgomery Road (MP 9.37); and
  - Long Hill Road (MP 10.44).

The general location of Texas Eastern's proposed facilities is shown on the map attached as appendix 1.[2]

Land Requirements for Construction

The proposed Freehold Compressor Station would be constructed on a 5-acre site which Texas Eastern would own. Texas Eastern indicated it would need an additional 25 acres which it would acquire through easements, for use as a noise buffer. Construction of the proposed pressure limiting devices and the five road crossings would require a total of about 6.9 acres of land, of which about 5.9 acres consist of existing and maintained right-of-way. The remaining 1.0 acres of land would be restored and allowed to revert to its former use.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us to discover and address concerns the public may have about proposals. We[3] call this "scoping". The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission requests public comments on the scope of the issues it will address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern.

The EA will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- Geology and soils
- Water resources, fisheries, and wetlands

---

[1] Texas Easterns's application was filed with the Commission on October 26, 2001, under Section 7 of the Natural Gas Act and Part 157 of the Commission's regulations.

[2] The appendices referenced in this notice are not being printed in the **Federal Register**. Copies are available on the Commission's website at the "RIMS" link or from the Commission's Public Reference and Files Maintenance Branch, 888 First Street, NE., Room 2A, Washington, DC 20426, or call (202) 208–1371. For instructions on connecting to RIMS refer to the last page of this notice. Copies of the appendices were sent to all those receiving this notice in the mail.

[3] "We," "us," and "our" refer to the environmental staff of the Office of Energy Projects.

- Vegetation and wildlife
- Endangered and and threatened species
- Land use
- Cultural resources
- Air quality and noise
- Public safety

We will also evaluate possible alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

Our independent analysis of the issues will be in the EA. Depending on the comments received during the scoping process, the EA may be published and mailed to Federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we make our recommendations to the Commission.

To ensure your comments are considered, please carefully follow the instructions in the public participation section beginning on page 5.

Currently Identified Environmental Issues

We have already identified several issues that we think deserve attention based on a preliminary review of the proposed facilities and the environmental information provided by Texas Eastern. This preliminary list of issues may be changed based on your comments and our analysis.

- Potential impact on 3 Federally-listed threatened reptile (1) and plant (2) species.
- Conversion to industrial use of about 30 acres of land that is registered with the New Jersey Green Acres program.
- Proximity of the proposed facilities to homes and residential land-use impacts.
- Impact and routing of a 25 kilovolt electric service line, about 1.5 miles long, to be installed by Public Service Electric & Gas Company.
- The Franklin Township Board of Education is in the process of acquiring land for construction of a new high school within 0.25 mile of the proposed Freehold Compressor Station site.
- Noise impacts due to operation of the proposed Freehold Compressor Station.
- Impact of operation of the proposed Freehold Compressor Station on Franklin Township Board of Education's plan to construct a new high school.

Public Participation

You can make a difference by providing us with your specific comments or concerns about the project. By becoming a commentor, your concerns will be addressed in the EA and considered by the Commission. You should focus on the potential environmental effects of the proposal, alternatives to the proposal (including alternative locations), and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be. Please carefully follow these instructions to ensure that your comments are received in time and properly recorded:

- Send an original and two copies of your letter to: Secretary, Federal Energy Regulatory Commission, 888 First St., NE., Room 1A, Washington, DC 20426.
- Label one copy of the comments for the attention of Gas/Hydro, PJ–11.3.
- Reference Docket No. CP02–17–000; and
- Mail your comments so that they will be received in Washington, DC on or before January 15, 2002.

Comments, protests, and interventions may be filed electronically via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

If you do not want to send comments at this time but still want to remain on our mailing list, please return the Information Request (appendix 3). If you do not return the Information Request, you will be removed from the environmental mailing list.

Due to current events, we cannot guarantee that we will receive mail on a timely basis from the U.S. Postal Service, and we do not know how long this situation will continue. However, we continue to receive filings from private mail delivery services, including messenger services in a reliable manner. The Commission encourages electronic filing of any comments or interventions or protests to this proceeding. We will include all comments that we receive within a reasonable time frame in our environmental analysis of this project.

Becoming an Intervenor

In addition to involvement in the EA scoping process, you may want to become an official party to the proceeding known as an "intervenor." Intervenors play a more formal role in the process. Among other things, intervenors have the right to receive copies of case-related Commission documents and filings by other intervenors. Likewise, each intervenor must provide 14 copies of its filings to the Secretary of the Commission and must send a copy of its filings to all other parties on the Commission's service list for this proceeding. If you want to become an intervenor you must file a motion to intervene according to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214) (see appendix 2). Only intervenors have the right to seek rehearing of the Commission's decision.

Affected landowners and parties with environmental concerns may be granted intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which would not be adequately represented by any other parties. You do not need intervenor status to have your environmental comments considered.

Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket #" and follow the instructions (call 202–208–2222 for assistance).

Similarly, the "CIPS" link on the FERC Internet website provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings. From the FERC Internet website, click on the "CIPS" link, select "Docket#" from the CIPS menu, and follow the instructions. For assistance with access to CIPS, the CIPS helpline can be reached at (202) 208–2474.

Linwood A. Watson, Jr.,

Acting Secretary.

Environmental Impact Statements; Notice of Availability

Responsible Agency: Office of Federal Activities, General Information (202) 564–7167 or *www.epa.gov/oeca/ofa.*

Weekly receipt of Environmental Impact Statements

Filed November 26, 2001 Through November 30, 2001

Pursuant to 40 CFR 1506.9.

EIS No. 010501, Draft Supplement, FHW, NM, US 70 Corridor Improvement, Between Ruidoso Downs to Riverside, New Information and Circumstances, Implementation, Right-of-Way Acquisition, Lincoln County, NM, Comment Period Ends:

January 22, 2002, Contact: Gregory D. Rawlings (505) 820–2027.

EIS No. 010502, Draft EIS, NAS, CA, Programmatic EIS—NASA Ames Development Plan (NADP) for Ames Research Center, New Research and Development Uses, Implementation, San Francisco Bay, Santa Clara County, CA, Comment Period Ends: January 28, 2002, Contact: Sandy Olliges (650) 604–3355. This document is available on the Internet at: *http://researchpark.arc.nasa.gov.*

EIS No. 010503, Final Supplement, AFS, UT, Rendezvous Vegetation Management Project, To the South Spruce Ecosystem Rehabilitation Project, Implementation, Dixie National Forest, Cedar City Ranger District, Iron and Kane Counties, UT, Wait Period Ends: January 07, 2002, Contact: Phillip G. Eisenhauer (435) 865–3200.

EIS No. 010504, Final EIS, FHW, TX, IH–10 West from Taylor Street to FM–1489, Construction and Reconstruction, Central Business District (CBD), Funding, Right-of-Way Permit and COE Section 404 Permit, Harris, Fort Bend and Waller Counties, TX, Wait Period Ends: January 07, 2002, Contact: John R. Mack (512) 536–5960.

EIS No. 010505, Draft Supplement, COE, FL, Central and Southern Florida Project, Tamiami Trail Feature (US Highway 41), Modified Water Deliveries to Everglades National Park, Dade County, FL, Comment Period Ends: February 04, 2002,

Contact: Jon Moulding (904) 232–2286.

Amended Notices

EIS No. 010419, Draft EIS, AFS, UT, Ray's Valley Road Realignment, Proposal to Reduce or Eliminate Adverse Impacts to Watershed, and Aquatic Species, Provide Safer Driving Conditions, Uinta National Forest, Spanish Fork Ranger District, Utah County, UT, Due: January 11, 2002, Contact: Renee Flanagan (801) 342–5145. Revision of FR notice published on 11/16/2001: CEQ Comment Period Ending 01/02/2002 has been Corrected to 1/11/2002.

Dated: December 4, 2001.

Joseph C. Montgomery,

Director, NEPA Compliance Division, Office of Federal Activities.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the OFFICE OF FEDERAL ACTIVITIES at (202) 564–7167.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated May 18, 2001 (66 FR 27647).

Draft EISs

ERP No. D–AFS–K65236–AZ Rating LO, Buck Springs Range Allotment Rangeland Management, Implementation, Blue Ridge Coconino National Forest, Coconino County, AZ.

Summary: EPA supports the dual objectives of providing grazing land and protecting sensitive habitat analyzed in the Buck Springs Range Allotment DEIS. EPA has no objections to the proposed project.

ERP No. D–AFS–L65390–ID Rating EO2, Garnet Stars and Sands Project, To Test and Develop Future Recreation, Garnet, Idaho Panhandle National Forests, St. Joe Ranger District, Latah, Shoshone and Benewah Counties, ID.

Summary: EPA had environmental objections because the proposed project would likely worsen already impaired water quality and degrade habitat for listed and sensitive fish species and riparian areas. EPA recommended that the final EIS contain sufficient mitigation measures to conserve aquatic resources consistent with section 313 of the Clean Water Act, section 7(a)(1) of the Endangered Species Act and the Forest Plan, utilize the Forest Service's Protocol for 303(d) Waters and include a comprehensive monitoring plan specifically tied to the project.

ERP No. D–APH–A65169–00 Rating EC2, Programmatic—EIS Rangeland Grasshopper and Mormon Cricket Suppression Program, Authorization, Funding and Implementation in 17 Western States, AZ, CA, CO, ID, KS, MT, NB, NV, NM, ND, OK, OR, SD, TX, UT, WA and WY.

Summary: EPA expressed environmental concerns since the draft EIS did not fully identify a proposed action nor fully analyze a reasonable range of alternatives. EPA requested that additional information and analyses be available in the final EIS.

ERP No. D–BLM–K65235–AZ Rating LO, Las Cienegas Resource Management Plan, Implementation, Las Cienegas National Conservation Area (NCA) and Sonoita Valley Acquisition Planning District, AZ.

Summary: EPA expressed a lack of environmental objections to the proposed project. ERP No. D–FHW–F40398–IN Rating EO2, Indianapolis Northeast Corridor Transportation Connections Study, To Identify Actions to Reduce Expected Year 2025 Traffic Congestion and Enhance Mobility, Between I–69: from I–465 to IN–328; I–465: from US 31 to I–70; I–70: from I–65 to I–465: IN–37 from I–69 to Allisonville Road (Noblesville), Marion and Hamilton Counties, IN.

Summary: EPA expressed objections to and requested additional information regarding: Alternatives, noise, air quality, wetlands, threatened and endangered species habitat, water quality/storm water management, flood plains and mitigation.

ERP No. D–NOA–K36136–CA Rating EC2, Goat Canyon Enhancement Project, Implementation, Tijuana River Estuary, City and County of San Diego, CA.

Summary: EPA expressed environmental concerns regarding impacts to water quality, cumulative impacts and the objectives for improvements to Monument Road and the trail system. EPA requested that additional information be provided to address EPA's concerns on these issues.

ERP No. DS–COE–E39054–FL Rating LO, Cape Sable Seaside Sparrow Protection, Interim Operating Plan (IOP), Updated Information on a New Alternative 7 for Emergency Sparrow Protection Actions, Implementation, Everglades National Park, Miami-Dade County, FL.

Summary: EPA had no objection to the proposed action sinceAlternative 7 appears to address our previous water quality concerns, but still provides adequate protection to the Cape Sable Seaside Sparrow.

Final EISs

ERP No. F–AFS–L65232–OR, Deep Vegetation Management Project, Implementation, Ochoco National Forest, Paulina Ranger District, Crook and Wheeler Counties, OR.

Summary: The final EIS adequately discloses the impacts and satisfactorily responded to most of EPA's previous comments on the draft EIS. In addition, the project overall should benefit the landscape. Therefore, EPA has no objection to the action as proposed.

ERP No. F–DOE–E09807–TN Programmatic EIS—Oak Ridge Y–12 Plant Mission, Processing and Storage of Highly Enriched Uranium, U.S. Nuclear Weapons Stockpile, Anderson County, TN.

Summary: EPA continues to have environmental concerns about construction impacts of the project.

Dated: December 4, 2001.

Joseph C. Montgomery,

Director, NEPA Compliance Division, Office of Federal Activities.

ENVIRONMENTAL PROTECTION AGENCY

[PF–970; FRL–6737–9]

Notice of Filing Pesticide Petitions to Establish a Tolerance for a Certain Pesticide Chemicals in or on Food

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the initial filing of pesticide petitions proposing the establishment of regulations for residues of certain pesticide chemicals in or on various food commodities.

DATES: Comments, identified by docket control number PF–970, must be received on or before January 7, 2002.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I.C. of the **SUPPLEMENTARY INFORMATION**. To ensure proper receipt by EPA, it is imperative that you identify docket control number PF–970 in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: By mail: Adam Heyward, Antimicrobials Division (7510C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone numbers: (703) 308–6422; e-mail address: heyward.adam@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does This Action Apply to Me?

You may be affected by this action if you are an agricultural producer, food manufacturer or pesticide manufacturer. Potentially affected categories and entities may include, but are not limited to:

Categories	NAICS codes	Examples of potentially affected entities
Industry	111 112 311 32532	Crop production Animal production Food manufacturing Pesticide manufacturing

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action might apply to certain entities. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

B. How Can I Get Additional Information, Including Copies of This Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations," "Regulations and Proposed Rules," and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/.

2. *In person.* The Agency has established an official record for this action under docket control number PF–970. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as confidential business information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

C. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number PF–970 in the subject line on the first page of your response.

1. *By mail.* Submit your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier.* Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. The PIRIB is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

3. *Electronically.* You may submit your comments electronically by e-mail to: "opp-docket@epa.gov", or you can submit a computer disk as described above. Do not submit any information electronically that you consider to be CBI. Avoid the use of special characters and any form of encryption. Electronic submissions will be accepted in Wordperfect 6.1/8.0 or ASCII file format. All comments in electronic form must be identified by docket control number PF–970. Electronic comments may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI That I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record.

Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified under "FOR FURTHER INFORMATION CONTACT."

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Provide specific examples to illustrate your concerns.

6. Make sure to submit your comments by the deadline in this notice.

7. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. What Action is the Agency Taking?

EPA has received pesticide petitions as follows proposing the establishment and/or amendment of regulations for residues of certain pesticide chemicals in or on various food commodities under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a. EPA has determined that these petitions contain data or information regarding the elements set forth in section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petitions. Additional data may be needed before EPA rules on the petitions.

List of Subjects

Environmental protection, Agricultural commodities, Feed additives, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: November 28, 2001.

Frank Sanders,

Director, Antimicrobials Division, Office of Pesticide Programs.

Summaries of Petitions

Petitioner summaries of the pesticide petitions are printed below as required by section 408(d)(3) of the FFDCA. The summaries of the petitions were prepared by the petitioners and represent the views of the petitioners. . The petition summaries announces the availability of a description of the analytical methods available to EPA for the detection and measurement of the pesticide chemical residues or an explanation of why no such method is needed.

I. Ecolab Inc.

PP 0F6193

EPA has received a pesticide petition (0F6193) from Ecolab Inc., 370 N. Wabasha Street, St. Paul MN 55102 proposing, pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(d), to amend 40 CFR part 180 to establish an exemption from the requirement of a tolerance for pelargonic acid nonanoic acid in or on the raw agricultural commodity, in processed commodities, and in or on meat and meat byproducts of cattle, sheep, hogs, goats, horses, and poultry, milk, and dairy products, eggs, seafood, and shellfish, and fruits and vegetables when such residues results from the use of pelargonic acid as a component of a food contact surface sanitizing solution for use in food handling establishments. The request is for unlimited clearance. EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition. Additional data may be needed before EPA rules on the petition.

A. Residue Chemistry

1. *Analytical method.* Because Ecolab Inc. is petitioning for an exemption from the requirement of a tolerance, an enforcement method for pelargonic acid is not needed.

2. *Magnitude of residues.* The residues which transfer from the sanitized dish or utensil to food are not of toxicological significance.

B. Toxicological Profile

1. *Acute toxicity.* From published literature values the acute oral LD_{50} in rats was determined to be greater than 3.2 gram/kilogram (g/kg); the acute oral LD_{50} in mice was 15 g/kg. The dermal LD_{50} is greater than 5 g/kg. It is considered to be essentially non-toxic via the oral and dermal routes.

2. *Genotoxicity.* Nothing in the available literature indicates that the pelargonic acid is genotoxic.

3. *Reproductive and developmental toxicity.* Nothing in the available literature indicates the pelargonic acid is a developmental or reproductive toxin. No evidence of maternal or developmental toxicity was seen in a rat oral developmental toxicity screen with pelargonic acid at a dose of 1,500 milligrams/kilograms/day (mg/kg/day).

4. *Subchronic toxicity.* Nothing in the available literature indicates chronic exposure of pelargonic acid products any adverse toxicological effects unless it is ingested at an extremely high concentration. A 14-day oral toxicity test with rats revealed no adverse effects from pelargonic acid at any dose level, including the highest dietary concentration of 20,000 ppm, (equivalent to 1,834 mg/kg/day, a level exceeding the limit dose of 1,000 mg/kg/day). In another study, eight rats were exposed to a diet consisting of 4.19% pelargonic acid for 4 weeks equivalent to approximately 2,090 mg/kg/day). There was no effect on survival. At normal dietary intake levels in the human diet, no adverse effects would result.

5. *Chronic toxicity.* Chronic exposure would not produce any additional effect over what is noted in subchronic exposure, therefore, no additional concerns were warranted. Nothing in the literature indicates that pelargonic acid may be carcinogenic.

6. *Endocrine disruption.* A review of information from the Agency of Toxic Substances and Disease Registry indicates that potential endocrine effects from exposure to pelargonic acid have not been studied. The best of our knowledge, nothing in the available literature suggests that nonanoic acids as an endocrine disrupter or that it possesses intrinsic hormonal activity.

C. Aggregate Exposure

1. *Dietary exposure*—i. *Acute.* There are no acute toxicology concerns for pelargonic acid, an acute dietary risk assessment is not required.

ii. *Chronic indirect.* Using a worst-case scenario, the exposure resulting from the use of this material in a sanitizer would be 0.005 mg/kg/day for a 70 kg person (adult) and 0.007 mg/kg/day for a 28 kg person (child).

2. *Food—Chronic direct.* A typical adult ingest significant quantities of pelargonic acid via diet. When pelargonic acid is used as a compound

of a food contact surface sanitizer, the residue that would be introduce into food will be insignificant. Based on this, there are no toxicological concerns resulting from exposures to residues of pelargonic acid from the use of sanitizing solutions.

3. *Drinking water*—i. *Acute.* Since there are no acute toxicological concerns for pelargonic acid, an acute drinking water risk assessment is not required.

ii. *Chronic.* There are no toxicological concerns about the exposure of low concentrations of pelargonic acid in the drinking water. Although it is possible that the trace amounts pelargonic acid resulting for its use as a sanitizer may ultimately get into drinking water, no adverse health effects would results.

4. *Non-dietary exposure.* The potential for significant additional non-occupational exposure to the general population (including children) is unlikely.

D. Cumulative Effects

Potentially small amounts of pelargonic acid exposure will be the result of non-food uses. The amount of pelargonic acid exposure resulting from direct exposure to sanitizing solutions will be minuscule. Since pelargonic acid in the diet poses no toxicological risk, the cumulative toxicity resulting form this additional exposure is negligible.

E. Safety Determination

1. *U.S. population.* Since there are no adverse toxicological effects resulting from normal dietary concentrations of pelagonic acid, there is no need to determine aggregate risks, or to conduct a safety determination. Pelargonic acid is generally recognized as safe and the incremental exposure due to its use as an inert in a food contact surface sanitizer is negligible.

2. *Infants and children.* As in adults, infants and children ingest pelargonic acid in their diet. Children are at no greater "risk" from exposure to pelargonic acid. Therefore, as with adults, a safety determination is not appropriate.

F. International Tolerances

No codex maximum residue levels have been established for pelargonic acid.

II. Ecolab Inc.

PP 0F6194

EPA has received a pesticide petition (0F6194) from Ecolab Inc., 370 N. Wabasha St., St. Paul MN 55102 proposing, pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(d), to amend 40 CFR part 180 to establish an exemption from the requirement of a tolerance for decanoic acid in or on the raw agricultural commodity, in processed commodities, and in or on meat and meat byproducts of cattle, sheep, hogs, goats, horses, and poultry, milk, and dairy products, eggs, seafood, and shellfish, and fruits and vegetables when such residues results from the use of decanoic acid as a component of a food contact surface sanitizing solution for use in food handling establishments. The request is for unlimited clearance. EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition. Additional data may be needed before EPA rules on the petition.

A. Residue Chemistry

1. *Analytical method.* Because Ecolab Inc. is petitioning for an exemption from the requirement of a tolerance, an enforcement method for decanoic acid is not needed.

2. *Magnitude of residues.* The residues which transfer from the sanitized dish or utensil to food are not of toxicological significance.

B. Toxicological Profile

1. *Acute toxicity.* From published literature values the acute oral LD_{50} in rats ranged from 3.2 g/kg to greater than 10 g/kg. The dermal LD_{50} in rats greater than 5 g/kg.

2. *Genotoxicity.* Nothing in the available literature indicates that the decanoic acid is genotoxic.

3. *Reproductive and developmental toxicity.* Nothing in the available literature indicates the decanoic acid is a developmental or reproductive toxin. It is generally recognized as safe and is normal constituent in the human diet.

4. *Subchronic toxicity.* Long term studies with decanoic acid have shown that this material is a relatively non-toxic. In on study, rats were fed decanoic acid in their diet at the level of 10% for 150 days. No adverse effects were observed at the conclusion of the study. In another study rats were administered decanoic acid at dietary levels 8% (corresponding to approximately 4 g/kg/day for 6 weeks. These animals exhibited reduced body weight gain and increased plasma triglyceride levels. Dogs fed approximately 4.4 g/kg/day of decanoic acid for 102 days showed no adverse effects.In another study, rats were fed 2.5 g/kg/day of decanoic acid (as the triglyceride) for 47 weeks. These animals showed no abnormalities in the cellular structure of the liver or intestine. Other animals ingesting 5 g/kg/day for 150 days did not develop abnormal tissues in the gastrointestinal tract. No other tissues were examined.

5. *Chronic toxicity.* Chronic exposure would not produce any additional effect over what is noted in subchronic exposure, therefore, no additional concerns were warranted. Nothing in the literature indicates that decanoic acid may be carcinogenic.

6. *Endocrine disruption.* A review of information from the Agency for Toxic Substances and Disease Registry indicates that potential endocrine effects from exposure to decanoic acid have not been studied. The best of our knowledge, nothing in the available literature suggests that decanoic acid acts as an endocrine disrupter or that is possesses intrinsic hormonal activity.

C. Aggregate Exposure

1. *Dietary exposure*— i. *Acute.* There are no acute toxicology concerns for decanoic acid, an acute dietary risk assessment is not required.

ii. *Chronic indirect.* Using a worst-case scenario, the exposure resulting from the use of this material in a sanitizer would be 0.0008 mg/kg/day for a 70 kg person (adult) and 0.0010 mg/kg/day for a 28 kg person (child).

2. *Food—Chronic direct.* A typical adult ingest significant quantities of decanoic acid via diet. When decanoic acid is used as a compound of a food contact surface sanitizer, the residue that would be introduce into food will be insignificant compared to the normal dietary intake. Based on this, there are no toxicological concerns resulting from exposures to residues of decanoic acid from the use of sanitizing solutions.

3. *Drinking water*— i. *Acute.* Since there are no acute toxicological concerns for decanoic acid, an acute drinking water risk assessment is not required.

ii. *Chronic.* There are no toxicological concerns about the exposure of low concentrations of decanoic acid in the drinking water. Although it is possible that the trace amounts decanoic acid resulting for its use as a sanitizer may ultimately get into drinking water, no adverse health effects would results.

4. *Non-dietary exposure.* The potential for significant additional non-occupational exposure to the general population (including children) is unlikely.

D. Cumulative Effects

Over 99% of the exposure to decanoic acid is expected to be via the diet.

Potentially small amounts of decanoic acid exposure will be the result of non-food uses. The amount of decanoic acid exposure resulting from indirect exposure to sanitizing solutions will be minuscule. Since decanoic acid in the diet pose no toxicological risk, the cumulative toxicity resulting from the additional exposure is negligible.

E. Safety Determination

1. *U.S. population.* Since there are no adverse toxicological effects resulting from normal dietary concentrations of decanoic acid, there is no need to determine aggregate risks, or to conduct a safety determination. Decanoic acid is generally recognized as safe and the incremental exposure due to its use as an inert in a food contact surface sanitizer is negligible.

2. *Infants and children.* As in adults, infants and children ingest decanoic acid in their diet. Children are at no greater "risk" from exposure to decanoic acid. Therefore, as with adults, a safety determination is not appropriate.

F. International Tolerances

No codex maximum residue levels have been established for decanoic acid.

BILLING CODE 6560–50–S

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS–51979; FRL–6815–6]

Certain New Chemicals; Receipt and Status Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5 of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture (defined by statute to include import) a new chemical (i.e., a chemical not on the TSCA Inventory) to notify EPA and comply with the statutory provisions pertaining to the manufacture of new Chemicals. Under sections 5(d)(2) and 5(d)(3) of TSCA, EPA is required to publish a notice of receipt of a premanufacture notice (PMN) or an application for a test marketing exemption (TME), and to publish periodic status reports on the Chemicals under review and the receipt of notices of commencement to manufacture those Chemicals. This status report, which covers the period from September 17, 2001 to October 24, 2001, consists of the PMNs and TMEs, both pending or expired, and the notices of commencement to manufacture a new chemical that the Agency has received under TSCA section 5 during this time period. The "S" and "G" that precede the chemical names denote whether the chemical idenity is specific or generic.

DATES: Comments identified by the docket control number OPPTS–51979 and the specific PMN number, must be received on or before January 7, 2002.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I. of the **SUPPLEMENTARY INFORMATION.** To ensure proper receipt by EPA, it is imperative that you identify docket control number OPPTS–51979 and the specific PMN number in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: Barbara Cunningham, Director, Office of Program Management and Evaluation, Office of Pollution Prevention and Toxics (7401), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (202) 554–1404; e-mail address: TSCA-Hotline@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does This Action Apply to Me?

This action is directed to the public in general. As such, the Agency has not attempted to describe the specific entities that this action may apply to. Although others may be affected, this action applies directly to the submitter of the premanufacture notices addressed in the action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

B. How Can I Get Additional Information, Including Copies of This Document and Other Related Documents?

1. *Electronically.* You may obtain copies of this document and certain other available documents from the EPA Internet Home Page at http://www.epa.gov/. On the Home Page select "Laws and Regulations"," Regulations and Proposed Rules, and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/.

2. *In person.* The Agency has established an official record for this action under docket control number OPPTS–51979. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as confidential business information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, any test data submitted by the Manufacturer/Importer is available for inspection in the TSCA Nonconfidential Information Center, North East Mall Rm. B–607, Waterside Mall, 401 M St., SW., Washington, DC. The Center is open from noon to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number of the Center is (202) 260–7099.

C. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number OPPTS–51979 and the specific PMN number in the subject line on the first page of your response.

1. *By mail.* Submit your comments to: Document Control Office (7407), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier.* Deliver your comments to: OPPT Document Control Office (DCO) in EPA East Building Rm. 6428, 1201 Constitution Ave., NW., Washington, DC. The DCO is open from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number for the DCO is (202) 564–8930.

3. *Electronically.* You may submit your comments electronically by e-mail to: "oppt.ncic@epa.gov," or mail your computer disk to the address identified in this unit. Do not submit any information electronically that you consider to be CBI. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on standard disks in WordPerfect 6.1/8.0 or ASCII file format. All comments in electronic form must be identified by docket control number OPPTS–51979 and the specific PMN number. Electronic comments may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI That I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Provide specific examples to illustrate your concerns.

6. Offer alternative ways to improve the notice or collection activity.

7. Make sure to submit your comments by the deadline in this document.

8. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. Why Is EPA Taking This Action?

Section 5 of TSCA requires any person who intends to manufacture (defined by statute to include import) a new chemical (i.e., a chemical not on the TSCA Inventory to notify EPA and comply with the statutory provisions pertaining to the manufacture of new Chemicals. Under sections 5(d)(2) and 5(d)(3) of TSCA, EPA is required to publish a notice of receipt of a PMN or an application for a TME and to publish periodic status reports on the Chemicals under review and the receipt of notices of commencement to manufacture those Chemicals. This status report, which covers the period from September 17, 2001 to October 24, 2001, consists of the PMNs and TMEs, both pending or expired, and the notices of commencement to manufacture a new chemical that the Agency has received under TSCA section 5 during this time period.

III. Receipt and Status Report for PMNs and TMEs

This status report identifies the PMNs and TMEs, both pending or expired, and the notices of commencement to manufacture a new chemical that the Agency has received under TSCA section 5 during this time period. If you are interested in information that is not included in the following tables, you may contact EPA as described in Unit II. to access additional non-CBI information that may be available. The "S" and "G" that precede the chemical names denote whether the chemical idenity is specific or generic.

In table I, EPA provides the following information (to the extent that such information is not claimed as CBI) on the PMNs received by EPA during this period: the EPA case number assigned to the PMN; the date the PMN was received by EPA; the projected end date for EPA's review of the PMN; the submitting manufacturer; the potential uses identified by the manufacturer in the PMN; and the chemical identity.

I. 102 PREMANUFACTURE NOTICES RECEIVED FROM: 09/17/01 TO 10/24/01

Case No.	Received Date	Projected Notice End Date	Manufacturer/Importer	Use	Chemical
P–01–0921	09/17/01	12/16/01	Arch Chemicals, Inc.	(S) Component in a photoresist formulation to be use in the manufacture of semiconductor and related devices	(G) Derivatized ethoxylated polystyrene resin
P–01–0922	09/17/01	12/16/01	Xerox Corporation	(G) Open, non-dispersive use as a constituent in solid, crayon like inks for computer printers	(G) Copper phthalocyanine
P–01–0923	09/17/01	12/16/01	CBI	(G) Ingredients for use in consumer products: highly dispersive use	(G) Cycloalkyl acetate
P–01–0924	09/17/01	12/16/01	CBI	(G) Ingredients for use in consumer products: highly dispersive use	(G) Carbo cyclic oxime
P–01–0925	09/17/01	12/16/01	CBI	(G) Sealant	(G) Substituted methoxysilane
P–01–0926	09/17/01	12/16/01	CBI	(G) Sealant	(G) Acrylic polymer
P–01–0927	09/18/01	12/17/01	CBI	(G) An open, non-dispersive use	(G) Polycarbonate and polyester-type polyurethane
P–01–0928	09/18/01	12/17/01	CBI	(G) Catalyst	(G) Alkoxysilane
P–01–0929	09/19/01	12/18/01	BASF Corporation	(S) Protective colloid	(S) 1,3-benzenedicarboxylic acid, 5-sulfo-, monosodium salt, polymer with 1,3-benzenedicarboxylic acid, 1,4-benzenedicarboxylic acid, 1,2-ethanediol, 2,2′-[1,2-ethanediylbis(oxy)]bis[ethanol] and 2,2′-oxybis[ethanol]
P–01–0930	09/18/01	12/17/01	International Flavors and Fragrances, Inc.	(S) Raw material for use in fragrances for soaps, detergents, cleaners and other household products	(S) 3-hexene, 1-[(2-methyl-2-propenyl)oxy]-, (3z)-

I. 102 PREMANUFACTURE NOTICES RECEIVED FROM: 09/17/01 TO 10/24/01—Continued

Case No.	Received Date	Projected Notice End Date	Manufacturer/Importer	Use	Chemical
P–01–0931	09/21/01	12/20/01	The Goodyear Tire and Rubber Company	(S) Polymerization catalyst	(G) Neodymium ziegler-natta catalyst
P–01–0932	09/24/01	12/23/01	CBI	(S) Coatings; additives	(G) Aliphatic epoxide
P–01–0933	09/24/01	12/23/01	CBI	(G) Open, non-dispersive use	(G) Aromatic alkanoate
P–01–0934	09/24/01	12/23/01	CBI	(G) This product will be used to manufacture flexible polyurethane foam	(G) Polymeric polyol
P–01–0936	09/26/01	12/25/01	Crompton Corporation	(G) Catalyst	(S) Zirconium, dichloro[rel-(7ar,7'ar)-1,2-ethanediylbis[(1,2,3,3a,7a-.eta.)-4,5,6,7-tetrahydro-1h-inden-1-ylidene]]-
P–01–0937	09/21/01	12/20/01	The Procter and Gamble Company	(S) Industrial lubricant for metal finishing	(S) Fatty acids, C_{16-18} and C_{18}-unsatd., esters with sucrose
P–01–0938	09/21/01	12/20/01	The Procter and Gamble Company	(S) Industrial lubricant for metal finishing	(S) Fatty acids, C_{18} and C_{18}-unsatd., esters with sucrose
P–01–0939	09/21/01	12/20/01	The Procter and Gamble Company	(S) Industrial lubricant for metal finishing	(G) Methyl esters of long-chain fatty acids and sucrose
P–01–0940	09/21/01	12/20/01	The Procter and Gamble Company	(S) Industrial lubricant for metal finishing	(S) alpha-d-glucopyranoside, beta-d-fructofuranosyl, docosanoate
P–01–0941	09/21/01	12/20/01	The Procter and Gamble Company	(S) Industrial lubricant for metal finishing	(S) alpha-d-glucopyranoside, beta-d-fructofuranosyl, hexadecanoate

FEDERAL COMMUNICATIONS COMMISSION

[EB 01–66; DA 01–2775]

Emergency Alert Systems

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: The Commission has received an *ex parte* submission from the Media AccessProject regarding the use of Emergency Alert System (EAS) decoders at low power FM broadcast stations. The Commission also received an *ex parte* submission jointly filed by the National Cable & Telecommunications Association, the National Association of the Deaf and the Telecommunications for the Deaf regarding the use of EAS decoders at small cable television systems. The Commission requests specific information regarding these requests to assist it in reaching an informed decision.

DATES: Comments are due on or before December 24, 2001.

ADDRESSES: Federal Communications Commission, Office of the Secretary, TW–A325, 445 12th Street, SW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: George Dillon of the Enforcement Bureau at (202) 418–1215 or by e-mail at *gdillon@fcc.gov*.

SUPPLEMENTARY INFORMATION: The Media Access Project (MAP) submitted an ex parte presentation regarding the use of certified Emergency Alert System (EAS) decoders at low power FM broadcast stations. The National Cable & Telecommunications Association, the Telecommunications for the Deaf, Inc. and the National Association of the Deaf (NCTA/NAD) submitted an *ex parte* presentation regarding the use of Emergency Alert System (EAS) decoders in connection with the Commission's Notice of Proposed Rule Making, Amendment of Part 11 of the Commission's Rules Regarding the Emergency Alert System, EB Docket No. 01–66.

MAP notes that the Commission adopted rules in the Low Power FM proceeding that recognized the budgetary constraints under which low power FM stations would operate and permitted low power FM station to install a FCC certified EAS decoder in lieu of an EAS encoder/decoder. MAP states that when the Commission adopted this requirement it recognized that FCC certified EAS decoders were not available, but expected certified decoders to become available at a cost similar to non-certified decoders. MAP states that there are no certified EAS decoders available and that it does not believe that they will become available at a reasonable price. In this regard, MAP indicates that the cost of a certified decoder would likely be at or near the cost of a certified EAS encoder/decoder. MAP requests that the FCC consider alternatives to the EAS requirement for Low Power FM stations, such as temporarily exempting low power FM stations from the requirement to install EAS decoders.

NCTA/NAD filed a joint *ex parte* submission requesting that the Commission permit small cable systems to use EAS decoders rather than an EAS encoder/decoder. NCTA/NAD state that the use of an EAS decoder could serve as an alternative to the Commission's EAS rules for cable systems that serve fewer than 5,000 subscribers and will meet the "best practices" procedures that the Commission agreed to consider in the Second Report and Order amending the EAS rules.

We seek to supplement the record in this docket with respect to MAP's request for alternative arrangements for EAS alerting and NCTA/NAD's request that small cable systems be permitted to install an EAS decoder as an alternative to the requirements of section 11.11 of the Commission's rules for small cable systems. We also seek specific comment from EAS manufacturers about the likelihood that they will manufacture and certify an EAS decoder. The date by which a FCC certified decoder would likely be available for purchase and the cost of any such decoder.

We note that small cable systems are required to install EAS encoder/decoders by October 1, 2002. This request for supplemental comment on the NCTA/NAD ex parte submission does not alter that requirement.

Interested parties may file comments concerning this matter on or before December 24, 2001. All filings must reference EB Docket No. 01–66 and should be sent to Magalie Roman Salas, Secretary, Federal Communications Commission, TW-A325, 445 12th Street, SW., Washington, DC 20554. Two copies should also be sent to the Technical and Public Safety Division, 445 12th Street, SW., Suite 7–C802, Washington, DC, 20554. Comments may also be filed using the Commission's Electronic Comment Filing System (ECFS). Comments filed through the ECFS can be sent as an electronic file via the Internet to *http://www.fcc.gov/e-file/ecfs.html*. Generally, only one copy of an electronic submission must be filed. In completing the transmittal screen, electronic filers should include their full name, Postal Service mailing address, and the applicable docket or rulemaking number. Parties may also submit an electronic comment by Internet e-mail. To receive filing instructions for e-mail comments, commenters should send an e-mail to *ecfs@fcc.gov*, and should include the following words in the body of the message, "get form <your e-mail address>." A sample form and directions will be sent in reply. This is a "permit but disclose" proceeding pursuant to section 1.1206 of the Commission's rules. Presentations to or from Commission decision-making personnel are permissible provided that *ex parte* presentations are disclosed pursuant to section 1.1206(b) of the Commission's rules.

The full text of the comments is available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portals II, 445 12th Street, SW., Room CY–A257, Washington, DC, 20554. The documents may also be purchased from the Commission's duplicating contractor, Qualex International, Portals II, 445 12th Street, SW., Room CY–B402, Washington, DC, 20554, telephone 202–863–2893, facsimile 202–863–2898, or via e-mail *qualexint@aol.com*. A copy of the requests from MAP and NCTA/NAD may also be viewed online at the FCC's E-filing System located at *http://gullfoss2.fcc.gov/cgi-bin/ws.exe/prod/ecfs/comsrchv.hts* by typing EB 01–66 in the Proceeding Block and clicking on Retrieve Document.

Federal Communications Commission.

[Report No. 2517]

Petition For Reconsideration and Clarification of Action in Rulemaking Proceeding

November 30, 2001.

Petition for Reconsideration and Clarification has been filed in the Commission's rulemaking proceeding listed in this Public Notice and published pursuant to 47 CFR section 1.429(e). The full text of this document is available for viewing and copying in Room CY–A257, 445 12th Street, SW., Washington, DC or may be purchased from the Commission's copy contractor, Qualex International (202) 863–2893. Oppositions to this petition must be filed by December 24, 2001. See section 1.4(b)(1) of the Commission's rules (47 CFR 1.4(b)(1)). Replies to an opposition must be filed within 10 days after the time for filing oppositions has expired.

Subject: In the Matter of Inquiry Regarding Software Defined Radios (ET Docket No. 00–47).

Number of Petitions Filed: 1.

BILLING CODE 6725–01–M

FEDERAL RESERVE SYSTEM

Change In Bank Control Notices; Acquisition of Shares of Bank or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the office of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than December 21, 2001.

A. Federal Reserve Bank of Kansas City (Susan Zubradt, Assistant Vice President) 925 Grand Avenue, Kansas City, Missouri 64198–0001:

1. M. Charles Kellogg, Overland Park, Kansas; individually, and as Trustee of the C.H. Goppert Trust; to acquire voting shares of Country Agencies & Investments, Inc., Odessa, Missouri, and thereby indirectly acquire voting shares of Bank of Odessa, Odessa, Missouri, Commercial Bank of Oak Grove, Oak Grove, Missouri, and LaMonte Community Bank, LaMonte, Missouri.

Board of Governors of the Federal Reserve System, December 3, 2001.

Robert deV. Frierson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at www.ffiec.gov/nic/.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 31, 2001.

A. Federal Reserve Bank of Chicago (Phillip Jackson, Applications Officer) 230 South LaSalle Street, Chicago, Illinois 60690–1414:

1. Peoples Bancorp, Rock Valley, Iowa; to become a bank holding company by acquiring 100 percent of the voting shares of Peoples Bank, Rock Valley, Iowa.

In connection with this application, Applicant also has applied to acquire Peoples Financial Inc., Rock Valley, Iowa, and thereby engage in insurance activities in a place of less than 5,000 in population, pursuant to § 225.28(b)(11)(iii) of Regulation Y.

B. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 2200 North Pearl Street, Dallas, Texas 75201–2272:

1. Texas Regional Bancshares, Inc., McAllen, Texas, and Texas Regional Delaware, Inc., Wilmington, Delaware; to merge with Riverway Holdings, Inc., Houston, Texas, and thereby indirectly acquire Riverway Bank, Houston, Texas.

Board of Governors of the Federal Reserve System, December 3, 2001.

Robert deV. Frierson,

Deputy Secretary of the Board.

[FR Doc. 01–30301 Filed 12–6–01; 8:45 am]

BILLING CODE 6210–01–S

FEDERAL TRADE COMMISSION

Charges for Certain Disclosures

AGENCY: Federal Trade Commission.

ACTION: Notice regarding charges for certain disclosures.

SUMMARY: The Federal Trade Commission announces that the ceiling on allowable charges under Section 612(a) of the Fair Credit Reporting Act ("FCRA") will increase from $8.50 to $9.00 on January 1, 2002. Under 1996 amendments to the FCRA, the Federal Trade Commission is required to increase the $8.00 amount referred to in

paragraph (1)(A)(i) of Section 612(a) on January 1 of each year, based proportionally on changes in the Consumer Price Index ("CPI"), with fractional changes rounded to the nearest fifty cents. The CPI increased 10.16 percent between September 1997, the date the FCRA amendments took effect, and September 2001. This increase in the CPI and the requirement that any increase be rounded to the nearest fifty cents results in an increase in the current maximum allowable charge to $9.00 effective January 1, 2002.

EFFECTIVE DATE: January 1, 2002.

ADDRESSES: Federal Trade Commission, Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Keith B. Anderson, Bureau of Economics, Federal Trade Commission, Washington, DC 20580, 202–326–3428.

SUPPLEMENTARY INFORMATION: Section 612(a)(1)(A) of the Fair Credit Reporting Act, as amended in 1996, states that, where a consumer reporting agency is permitted to impose a reasonable charge on a consumer for making a disclosure to the consumer pursuant to Section 609, the charge shall not exceed $8 and shall be indicated to the consumer before making the disclosure. Section 612(a)(2) goes on to state that the Federal Trade Commission ("the Commission") shall increase the $8.00 maximum amount on January 1 of each year, based proportionally on changes in the Consumer Price Index, with fractional changes rounded to the nearest fifty cents. The allowable charge was increased from $8.00 to $8.50 on January 1, 2000. (See 64 FR 69769 (December 14, 1999).)

The Commission considers the $8 amount referred to in paragraph (1)(A)(i) of Section 612(a) to be the baseline for the effective ceiling on reasonable charges dating from the effective date of the amended FCRA, *i.e.*, September 30, 1997. Each year the Commission calculates the proportional increase in the Consumer Price Index (using the most general CPI, which is for all urban consumers, all items) from September 1997 to September of the current year. The Commission then determines what modification, if any, from the original base of $8 should be made effective on January 1 of the subsequent year, given the requirement that fractional changes be rounded to the nearest fifty cents.

Between September 1997 and September 2001, the Consumer Price Index for all urban consumers and all items increased by 10.61 percent—from an index value of 161.2 in September 1997 to a value of 178.3 in September 2001. An increase of 10.61 percent in the $8.00 base figure would lead to a new figure of $8.85. However, because the statute directs that the resulting figure be rounded to the nearest $0.50, the allowable charge should be $9.00.

The Commission therefore determines that the allowable charge for the year 2002 will be $9.00

By direction of the Commission.

Donald S. Clark,

Secretary.

BILLING CODE 6750–01–M

GENERAL ACCOUNTING OFFICE

[Document No. JFMIP–SR–01–03]

Joint Financial Management Improvement Program (JFMIP)—Federal Financial Management System Requirements (FFMSR)

AGENCY: Joint Financial Management Improvement Program (JFMIP).

ACTION: Notice of document availability.

SUMMARY: The JFMIP is seeking public comment on an exposure draft entitled "Acquisition/Financial Systems Interface Requirements," dated November 2001. The draft is the first Federal Financial Management System Requirements (FFMSR) document to address standard financial requirements for Federal acquisition/financial systems. The document is intended to assist agencies when developing, improving or evaluating benefit systems. It provides the baseline functionality that agency systems must have to support agency missions and comply with laws and regulations. When issued in final, the document will augment the existing body of FFMSR that define financial system functional requirements which are used in evaluating compliance with the Federal Financial Management Improvement Act (FFMIA) of 1996.

DATES: Comments are due by February 28, 2002.

ADDRESSES: Copies of the exposure draft have been mailed to senior financial officials, chief information officers, and procurement executives, together with a transmittal memo listing items of interest for which JFMIP is soliciting feedback. The Exposure Draft, transmittal memo, and comment response matrix are available on the JFMIP Web site: *www.jfmip.gov* Responses should be addressed to JFMIP, 1990 K Street, NW., Suite 430, Washington, DC 20006.

FOR FURTHER INFORMATION: Dennis Mitchell, (202) 219–0529 or *dennis.mitchell@gsa.gov.*

SUPPLEMENTARY INFORMATION: The FFMIA of 1996 mandated that agencies implement and maintain systems that comply substantially with FFMSR, applicable Federal accounting standards, and the U.S. Government Standard General Ledger at the transaction level. The FFMIA statute codified the JFMIP financial system requirements documents as a key benchmark that agency systems must meet to substantially comply with systems requirements provisions under FFMIA. To support the provisions outlined in the FFMIA, the JFMIP is updating obsolete requirements documents and publishing additional requirements documents. Comments received will be reviewed and the exposure draft will be revised as necessary. Publication of the financial document will be mailed to agency financial officials, procurement executives, chief information officers, and others, and will be available on the JFMIP website. An open house is scheduled for Thursday, December 13, 2001, from 9:30 a.m. to noon in the General Services Administration (GSA) Auditorium in the main GSA Building, located at 18th and F Streets NW, to provide additional information on the Exposure Draft. The name, organization, telephone number, and e-mail address for attendees should be e-mailed to *dennis.Mitchell@gsa.gov* or faxed to 202–219–0549.

Karen Cleary Alderman,

Executive Director, Joint Financial Management Improvement Program.

BILLING CODE 1610–02–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 01D–0519]

Medical Devices: Draft Guidance on Cardiac Ablation Catheters Generic Arrhythmia Indications for Use; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of the draft guidance entitled "Cardiac Ablation Catheters Generic Arrhythmia Indications for Use." This draft guidance document encourages manufacturers of approved conventional cardiac ablation catheters to submit supplements to broaden their

labeling from arrhythmia-specific indications to a generic arrhythmic treatment indication. The Center for Devices and Radiological Health (CDRH) is issuing this draft guidance document to allow companies to label these products for a broader indication without submitting additional clinical information. This recommendation is based on a comprehensive search of the medical literature. This draft guidance is neither final nor is it in effect at this time.

DATES: Submit written or electronic comments concerning this draft guidance by March 7, 2002.

ADDRESSES: Submit written requests for single copies on a 3.5″ diskette of the draft guidance document entitled "Cardiac Ablation Catheters Generic Arrhythmia Indications for Use" to the Division of Small Manufacturers, International and Consumer Assistance (HFZ–220), Center for Devices and Radiological Health, Food and Drug Administration, 1350 Piccard Dr., Rockville, MD 20850. Send two self-addressed adhesive labels to assist that office in processing your request, or fax your request to 301–443–8818. Submit written comments concerning this draft guidance to the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Submit electronic comments to http://www.fda.gov/dockets/ecomments. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance.

FOR FURTHER INFORMATION CONTACT: Donna-Bea Tillman, Center for Devices and Radiological Health (HFZ–450), Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20850, 301–443–8517.

SUPPLEMENTARY INFORMATION:

I. Background

The draft guidance document recommends that manufacturers of approved conventional cardiac radiofrequency ablation catheters submit a premarket approval supplement to obtain a generic indication for creating endocardial lesions to treat arrhythmias. The draft guidance document provides evidence from the medical literature to support this broadening of indications from arrhythmia-specific indications to a generic arrhythmia treating indication.

II. Significance of Guidance

The draft guidance document, when finalized, represents the agency's current thinking on generic indications for cardiac ablation catheters. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the applicable statute and regulations.

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). This draft guidance document is issued as a level 1 guidance in accordance with the GGP regulations.

III. Electronic Access

In order to receive "Cardiac Ablation Catheters Generic Arrhythmia Indications for Use" via your fax machine, call the CDRH Facts-On-Demand system at 800–899–0381 or 301–827–0111 from a touch-tone telephone. Press 1 to enter the system. At the second voice prompt press 1 to order a document. Enter the document number 1382 followed by the pound sign (#). Follow the remaining voice prompts to complete your request.

Persons interested in obtaining a copy of the draft guidance may also do so using the Internet. CDRH maintains an entry on the Internet for easy access to information including text, graphics, and files that may be downloaded to a personal computer with Internet access. Updated on a regular basis, the CDRH home page includes the civil money penalty guidance documents package, device safety alerts, **Federal Register** reprints, information on premarket submissions (including lists of approved applications and manufacturers' addresses), small manufacturers' assistance, information on video conferencing and electronic submissions, Mammography Matters, and other device-oriented information. The CDRH home page may be accessed at http://www.fda.gov/cdrh. Guidance documents are also available on the Dockets Management Branch Web site at http://www.fda.gov/ohrms/dockets/default.htm.

IV. Comments

Interested persons may submit to the Dockets Management Branch (address above) written or electronic comments on the draft guidance by March 7, 2002. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. The draft guidance document and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 28, 2001.

Linda S. Kahan,

Deputy Director, Center for Devices and Radiological Health.

BILLING CODE 4160–01–S

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4630–C–35]

Announcement of Funding Awards; Indian Housing DrugElimination Program; Fiscal Year 2001; Correction

AGENCY: Office of Native American Programs, HUD.

ACTION: Announcement of funding awards for fiscal year 2001; Correction.

SUMMARY: On October 19, 2001 (66 FR 53242), the Department published a notice that announced the funding awards for Fiscal Year (FY) 2001 funding for its Indian Housing Drug Elimination Program. This document makes a correction to the list of funded applicants.

FOR FURTHER INFORMATION CONTACT: Please contact the office or individual identified in the notice published in the **Federal Register** on October 19, 2001 for further information.

SUPPLEMENTARY INFORMATION: On October 19, 2001 (66 FR 53242), the Department published a notice that announced the funding awards for Fiscal Year (FY) 2001 funding for its Indian Housing Drug Elimination Program. In Appendix A, Awarded Applicants, HUD incorrectly stated that the Housing Authority of the Cherokee Nation received a grant award. Through this document, HUD corrects the successful applicant's name.

Accordingly, FR Doc. 01–26333, Announcement of Funding Awards for the Indian Housing Drug Elimination Program for Fiscal Year 2001, published in the **Federal Register** on October 19, 2001 at 66 FR 53242, is corrected as follows:

- On page 53244, Appendix A.—Awarded Applicants FY 2001 Indian Housing Drug Elimination Program, is corrected to delete the Housing Authority of the Cherokee Nation from the list of awarded applicants, and to revise the Applicant name to read as follows: Cherokee Nation.

Dated: December 3, 2001.

Michael Liu,

Assistant Secretary for Public and Indian Housing.

Bureau of Land Management

[CO–130–01–1610–DS–241A]

Notice of Intent To Prepare an Environmental Impact Statement (EIS)

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent.

SUMMARY: The Bureau of Land Management(BLM) announces its intent to prepare a management plan for the CCNCA. This notice initiates the public scoping, the planning review process; and the EIS associated with completion of the CCNCA Management Plan. The Act establishing the CCNCA directs the Secretary of the Interior to develop a "comprehensive plan for the long-range protection and management of the Conservation Area" by October 24, 2003.

DATES: The formal scoping comment period will commence with the publication of this notice and end 60 days after publication of this notice. Comments on issues, alternatives, and the preliminary planning criteria to be addressed in the CCNCAManagement Plan and EIS should be received on or before the end of the scoping period at the address listed below. During this formal scoping comment period, an open house will be held in Grand Junction, Colorado, where BLM personnel will be available to respond to questions and provide other information pertaining to the preparation of the documents. There will be subsequent public review periods and open houses where additional public comment will be requested, including a formal comment period on the draft EIS/CCNCA Management Plan. At least 15 days public notice will be given for the open houses or other public meetings. Written comments will be accepted throughout the planning process at the address shown below. All open house and comment deadlines will be announced through the local news media, newsletters and on the CCNCA website (*http://www.co.blm.gov/gjra/ccnca/ccncahome.htm*).

ADDRESSES: For further information, to provide written comments, or to be placed on the mailing list, contact Bureau of LandManagement, CCNCA RMP Amendment, 2815 H Road, Grand Junction,Colorado 81506; e-mail *Jane__Ross@co.blm.gov;* Telephone (970) 244-3000. Individual respondents may request confidentiality. If you wish to withhold your name and/or address

from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written comment. Such requests will be honored to the extent allowed by law. We will not, however, consider anonymous comments. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, are available for public inspection in their entirety.

SUPPLEMENTARY INFORMATION: The CCNCA is located in both Colorado and Utah, and preparation of the CCNCA plan may involve amendment of both the Grand Junction RMP in Colorado and the Grand RMP in Utah. The Grand Junction Field Office, located in Colorado, is responsible for management of the CCNCA and preparation of the CCNCA plan. The BLM will work closely with interested parties to identify the management discussions that are best suited to the needs of the public. This collaborative process will take into account local, regional, and national needs and concerns. The Act establishing the 122,300 acre CCNCA in western Colorado and eastern Utah was signed into law by the President on October 24, 2000. The purpose of the Act is to conserve, protect, and enhance for the benefit and enjoyment of present and future generations the unique and nationally important values of the public lands in the CCNCA, including geology, recreation, cultural, paleontological, biological, wilderness, wildlife, educational, and scenic resources. The Act also designates 75,550 acres of the CCNCA as the Black Ridge Canyons Wilderness Area. There are 5,500 acres of the CCNCA located in the state of Utah. The Grand Junction Field Office in Colorado will coordinate with the Moab Field Office in Utah during preparation of the CCNCA Management Plan.

Management of the CCNCA is currently guided by the Ruby Canyon/Black Ridge Integrated Management Plan completed in March 1998. The Grand Junction RMP and the Grand RMP, in addition to several activity level management plans, include other decisions affecting the CCNCA. On February 13, 2001, the BLM Colorado State Director issued interim guidance for management of the CCNCA pending completion of the final Management Plan. All of these documents will be reviewed during preparation of the CCNCA Management Plan.

The CCNCA Plan and associated EIS will be prepared by an interdisciplinary team. Disciplines to be represented on the team include: Archaeology, botany, fisheries, geology, hydrology, paleontology, range management, realty, recreation, soils, wilderness, and wildlife. Pursuant to the Act establishing the CCNCA, an advisory council is currently being established to advise the BLM the management of the CCNCA. The advisory council is also anticipated to take an active role in preparation of the CCNCA Management Plan.

Preliminary issues identified by the BLM for the CCNCA plans include travel management, recreation, use authorizations such as rights-of-ways and grazing, management of natural resources, wilderness stewardship, and integration of the CCNCA Management Plan with other agency and community plans. Public involvement gained through the initial scoping comment period will be utilized to refine these topics and identify any additional issues to be evaluated.

Planning criteria are the standards, rules, and other factors used in formulating judgements about data collection, analysis, and decision making associated with preparation of the CCNCA Management Plan. These criteria establish parameters and help focus preparation of the effort. Public comment is also welcomed on the following preliminary planning criteria, which will be utilized in the preparation of the CCNCA Management Plan.

A. The CCNCA Management Plan will be completed in compliance with the Federal Land Policy and Management Act and all other applicable laws.

B. The project team will work cooperatively with the States of Colorado and Utah, tribal governments, county and municipal governments, other Federal agencies, and all other interested groups, agencies, and individuals. Public participation will be encouraged throughout the process.

C. Completion of the CCNCA Management Plan will include preparation of an EIS that will comply with the National Environmental Policy Act.

D. The CCNCA Management Plan will evaluate valid existing rights in the various alternative management schemes.

E. The lifestyles and concerns of area residents, including the activities of grazing, recreational use, off-highway vehicle use, and wilderness management will be addressed in the CCNCA Management Plan.

F. Preparation of the CCNCA Management Plan will involve coordination with Native American tribal governments and will provide strategies for the protection of recognized traditional uses.

G. Decisions in the CCNCA Management Plan will strive to be compatible with existing plans and policies of adjacent local, State and Federal agencies.

H. The CCNCA Management Plan will comply with the legislative directives, needs, and obligations set forth by the legislation establishing the CCNCA.

Catherine Robertson,
Field Manager, Grand Junction Field Office.

BILLING CODE 4310–JB–P

DEPARTMENT OF THE INTERIOR

National Park Service

Final Environmental Impact Statement/General Management Plan Lassen Volcanic National Park Lassen, Plumas, Shasta, Tehama Counties, CA; Notice of Availability

SUMMARY: Pursuant to § 102 (2) © of the National Environmental Policy Act of 1969 (Pub.L. 91–190 as amended), the National Park Service, Department of the Interior, has prepared a Final Environmental Impact Statement identifying four alternatives for (and assessing the potential impacts of) a proposed General Management Plan for Lassen Volcanic National Park, located in northeastern California. Upon approval, the new General Management Plan will serve as a "blueprint" for the management and use of Lassen Volcanic National Park over the next 10–15 years.

Proposal and Alternatives Considered

The "no action" alternative, Alternative A, assumes that physical facilities and ongoing activities would remain largely unchanged, and that staffing and operational funding would remain constant over the planning period.

Alternative B: Resource Preservation and Basic Visitor Service, provides a program for preserving, and where necessary, restoring significant park resources. It includes essential staffing and funding increases for the park's cultural and natural resource management functions, restores key elements of the park's infrastructure, provides for restoration of several specific sites with natural system conflicts, establishes a standards-based management zoning system, and proposes designation of approximately

25,000 acres as part of the National Wilderness Preservation System (increasing the total amount of designated Wilderness to approximately 104,000 acres). The plan also includes program increases and visitor facility improvements to provide for quality basic visitor service.

Alternative C: The Proposed General Management Plan—Resource Protection and Enhanced Visitor Experience. This plan includes all the features of Alternative B, and provides enhancement to visitor experience by making more facilities available during winter months, and increasing interpretive services, facilities, and information.

Alternative D: Resource Protection and Expanded Visitor Opportunities, includes all of the features of Alternative C and, in addition, provides for expansion of family and group campgrounds at several locations. It also expands winter access at the north entrance by plowing the park road an additional 9 miles to the Devastated Area, and keeping one loop of the campground open for winter camping.

Significant adverse environmental impacts and potential impairment of park values would be expected to result from Alternative A as a number of cultural, natural, and environmental resources are undergoing deterioration under current conditions. All of the action alternatives include programs to arrest the deterioration of resources and mitigation features to avoid or reduce impacts, which might ensue from implementation of project features. It was determined that the "environmentally preferred" alternative is Alternative C.

Public Comment

A Notice of Intent to prepare an EIS was published in the **Federal Register** on July 24, 1998. During the subsequent scoping phase leading to development of the Draft EIS, the NPS conducted seven public meetings, three agency meetings, and several Tribal meetings. In all, information provided by 120 commentors and 49 letters was obtained. A Notice of Availability of the Draft EIS was published in the **Federal Register** on August 18, 2000. During the subsequent public comment period, seven public workshops were conducted and over 650 copies of the Draft EIS were distributed. Throughout the process contacts were undertaken with Tribes, the State Historic Preservation Office, U.S. Forest Service, the four surrounding County Boards of Supervisors, and other entities. Altogether 189 comment letters were received; these as well as the responses obtained during the scoping phase are filed in the administrative record.

Copies

Inquiries and requests for printed copies of the final EIS for the proposed General Management Plan may be directed to Superintendent, Lassen Volcanic National Park, P.O. Box 100, Mineral, California 96063–0100, or via telephone at (530) 595–4444 ext.5101. Public review copies will also be available at area libraries.

During the Ano action" period following release of the Final EIS, if any individuals submit comments and request that their name or/and address be withheld from public disclosure, it will be honored to the extent allowable by law. Such requests must be stated prominently in the beginning of the comments. There also may be circumstances wherein the NPS will withhold a respondent's identity as allowable by law. As always: NPS will make available to public inspection all submissions from organizations or businesses and from persons identifying themselves as representatives or officials of organizations and businesses; and, anonymous comments may not be considered.

Decision

A Record of Decision may be approved by the Regional Director, Pacific West Region, no sooner than 30 days after publication of a Notice of filing of this Final EIS in the **Federal Register** by the Environmental Protection Agency. The official responsible for the final decision is the Regional Director, Pacific West Region; subsequently the official responsible for implementation of the plan is the Superintendent, Lassen Volcanic National Park.

Dated: October 25, 2001.

Martha K. Leicester,

Acting Regional Director, Pacific West Region.

Aniakchak National Monument Subsistence Resource Commission Meeting

AGENCY: National Park Service, Interior.

ACTION: Announcement of Subsistence Resource Commission meeting.

SUMMARY: The Superintendent of Aniakchak National Monument and the Chairperson of the Subsistence Resource Commission for Aniakchak National Monument announce a forthcoming meeting of the Aniakchak National Monument Subsistence Resource Commission. The following agenda items will be discussed:

(1) Call to order (Chair).

(2) SRC Roll Call and Confirmation of Quorum.

(3) Welcome and Introductions.

(4) Review and Adopt Agenda.

(5) Review and adopt minutes from last meeting.

(6) Commission Purpose.

(7) Status of Membership.

(8) Public and Agency Comments.

(9) Old Business:

a. Customary Trade.

b. Status of Subsistence Management Plan.

c. Status of Hunting Plan Recommendation 97–1, Establish One-Year Minimum Residency Requirement for Resident Zone Communities.

d. Status of Aniakchak National Preserve Non-Subsistence User Permit Request.

(1) New Business:

a. October 2001 Chairs Workshop Report.

b. Federal Subsistence Board and Bristol Bay Regional Council Report.

c. Land Status Map.

d. Subsistence Access.

e. Hunting Guide Issues

(11) Election of SRC Chair and Vice Chair.

(13) Public and Agency Comments.

(14) SRC work session (draft proposals, letters, and recommendations).

(15) Set time and place of next SRC meeting.

(16) Adjournment.

DATES: The meeting will begin at 10 a.m. on Tuesday, February 12, 2002 and conclude at approximately 6 p.m. The meeting will reconvene at 9 a.m. on Wednesday, February 13, 2002 and adjourn at approximately 1 p.m.

Location: The meeting will be held at the Chignik Lake Subsistence Community Building, Chignik Lake, Alaska, (907) 845–2212.

FOR FURTHER INFORMATION CONTACT: Mary McBurney at Phone (907) 257–2633, or Tom O'Hara, Subsistence Manager, Aniakchak National Monument, P.O. Box 7, King Salmon, Alaska 99613. Phone (907) 246–2101.

SUPPLEMENTARY INFORMATION: The Subsistence Resource Commissions are authorized under Title VIII, section 808, of the Alaska National Interest Lands Conservation Act, Pub. L. 96–487, and operate in accordance with the provisions of the Federal Advisory Committees Act.

In light of a recent attempt to relocate National Park Service administrative personnel and offices in Washington, DC, this notice may not be published at least 15 days prior to the meeting. The National Park Service regrets these events, but is compelled to hold the meeting as scheduled because of the significant sacrifice re-scheduling would require of commission members who have adjusted their schedules to accommodate the proposed meeting dates.

Draft minutes of the meeting will be available for public inspection approximately 6 weeks after the meeting at the Aniakchak National Monument Office, P.O. Box 7, King Salmon, Alaska 99613. Phone (907) 246–2101.

Robert L. Arnberger,

Regional Director.

Subsistence Resource Commission Meeting

AGENCY: National Park Service, Interior.

ACTION: Announcement of Subsistence Resource Commission meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770, 5 U.S.C. App. 1, Section 10), notice is hereby given that the Superintendent of Gates of the Arctic National Park and Preserve and the Chairperson of the Subsistence Resource Commission for Gates of the Arctic National Park announce a forthcoming meeting of the Gates of the Arctic National Park Subsistence Resource Commission. The following agenda items will be discussed:

(1) Call to order.
(2) Roll call. Confirm quorum.
(3) Approval of summary of meeting minutes for November 13–14, 2001 meeting in Fairbanks.
(4) Review agenda.
(5) Superintendent's Welcome.
(6) Introductions of Guests and Agency Staff.
(7) Review Commission Role and Purpose.
(8) Superintendent's Management and Research Update.
(9) Public and agency comments.
(10) Old Business:
a. October 2001 SRC Chair's Workshop Report.
b. Status Gates of the Arctic National Park and Preserve Subsistence Management Plan.
c. Status Customary Trade Hunting Plan Recommendation 99–01.
(11) New Business:
a. Review Federal Subsistence Board and Regional Advisory Council Proposals and Record of Actions Taken.
b. Federal Subsistence Fisheries Management Update.
c. SRC Work Session.
(12) SRC Elections for Chair and Vice Chair.
(13) Set time and place of next SRC meeting.
(14) Adjournment.

DATES: The meeting will be held from 8:30 a.m. to 5 p.m. on Thursday, December 13, 2001, and 8:30 a.m. to 5 p.m. on Friday, December 14, 2001.

Location: The meeting will be held at Wedgewood Manor Resorts, 212 Wedgewood Drive, University Ave., Fairbanks, Alaska 99701, Tel. (907) 452–1442.

FOR FURTHER INFORMATION CONTACT: Dave Mills, Superintendent and Fred Andersen, Subsistence Manager, 201 First Avenue, Doyon Bldg., Fairbanks, Alaska 99701, Telephone (907) 456–0281.

SUPPLEMENTARY INFORMATION: The Subsistence Resource Commissions are authorized under Title VIII, section 808, of the Alaska National Interest Lands Conservation Act, Public Law 96–487 and operate in accordance with the provisions of the Federal Advisory Committees Act.

In light of a recent attempt to relocate National Park Service administrative personnel and offices in Washington, DC, this notice may not be published at least 15 days prior to the meeting. The National Park Service regrets these events, but is compelled to hold the meeting as scheduled because of the significant sacrifice rescheduling would require of commission members who have adjusted their schedules to accommodate the proposed meeting dates.

Draft minutes of the meeting will be available for public inspection approximately 6 weeks after the meeting at the Gates of the Arctic National Park & Preserve Office, 201 First Avenue, Doyon Bldg., Fairbanks, Alaska 99701, Telephone (907) 456–0281.

BILLING CODE 4310–70–P

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Intent To Repatriate Native American Cultural Items in the Possession of the U.S. Department of the Interior, National Park Service, Capitol Reef National Park, Torrey, UT

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act, 43 CFR 10.10 (a)(3), of the intent to repatriate three cultural items in the possession of the U.S. Department of the Interior, National Park Service, Capitol Reef National Park, Torrey, UT.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 43 CFR 10.2 (c). The determinations within this notice are the sole responsibilities of the National Park Service unit that has control or possession of these Native American cultural items. The Assistant Director, Cultural Resources Stewardship and Partnerships is not responsible for the determinations within this notice.

In 1926, Ephraim P. Pectol discovered three buffalo-hide shields cached in a rock crevice on public lands southeast of Torrey, UT. Though he had not obtained the permit required to remove an object of antiquity from Federal lands, Mr. Pectol removed the shields from the rock crevice and took them to his home and place of business. In 1932, a Federal agent seized the shields and returned them to Federal control, though they remained in the possession of Mr. Pectol. Capitol Reef National Monument acquired the shields in 1953. The three shields have been designated as CARE-11, CARE-12, and CARE-191.

CARE-11 is a roughly circular piece of buffalo hide with a diameter of approximately 79 centimeters. The original shape and dimensions of the shield have been altered by minor damage along its perimeter probably caused by rodent gnawing and/or exposure to weathering processes while in the cache. The face of the shield is concave and is decorated with a wing-shaped design of red pigment and a fan-shaped section of radiating green stripes. The convex side of the shield exhibits some red pigment stain and some incised triangular patterns. Three buckskin ties hang from the face as fringe and, on the back of the shield, serve to fasten an arm strap. A looping piece of buckskin is tied to 2 holes about 20 centimeters apart on the perimeter of the shield. A series of 12 holes in a straight line angles outward from the center of the shield to the perimeter. A tear in the rawhide, about 1.9 centimeter long, has been repaired with a hide lace.

CARE-12 is a roughly circular piece of buffalo hide measuring approximately 88 centimeters by 70 centimeters. The original shape and dimensions of the shield have been altered by damage along its perimeter probably caused by rodent gnawing and/or exposure to weathering processes while in the cache. It is believed to have been circular when originally constructed. The face of the shield is convex and is decorated with parallel rows of unpainted, stenciled dots on a painted field. Approximately two-thirds of the painted field is black and one-third is covered with a rust-colored pigment. Five buckskin ties hang from the face as a fringe and, on the back of the shield, some serve to fasten an arm sling. The arm sling has a padded piece of hide. The shield exhibits a cut mark along one edge, probably caused when a radiocarbon dating sample was removed by researchers in the 1960s.

CARE-191 is a roughly circular piece of buffalo hide measuring approximately 95 centimeters by 74 centimeters. The original shape and dimensions of the shield have been altered by damage along its perimeter probably caused by rodent gnawing and/or exposure to weathering processes while in the cache. It is believed to have been circular when originally constructed. The face of the shield is convex and is decorated in four painted quadrants. One quadrant is painted with a rust-colored pigment. One quadrant is painted red. One quadrant is painted black. One quadrant is painted with green bands. Three buckskin ties hang from the face as fringe and hold a buckskin arm strap on the back.

An assessment of the three shields was made by National Park Service professional staff, specially contracted independent scholars, and representatives of the Navajo Nation, Arizona, New Mexico and Utah; Hopi Tribe of Arizona; Jicarilla Apache Tribe of the Jicarilla Apache Indian Reservation, New Mexico; and Kaibab

Band of Paiute Indians of the Kaibab Indian Reservation, Arizona. Representatives of the Confederated Tribes of the Goshute Reservation, Nevada and Utah; Las Vegas Tribe of Paiute Indians of the Las Vegas Indian Colony, Nevada; Paiute Tribe of Utah (Cedar City, Indian Peak, Kanosh, Koosharem, Shivwits Bands); Pueblo of Acoma, New Mexico; Pueblo of Cochiti, New Mexico; Pueblo of Isleta, New Mexico; Pueblo of Jemez, New Mexico; Pueblo of Laguna, New Mexico; Pueblo of Nambe, New Mexico; Pueblo of Picuris, New Mexico; Pueblo of Pojoaque, New Mexico; Pueblo of San Ildefonso, New Mexico; Pueblo of San Juan, New Mexico; Pueblo of Sandia, New Mexico; Pueblo of Santa Ana, New Mexico; Pueblo of Santa Clara, New Mexico; Pueblo of Santo Domingo, New Mexico; Pueblo of Taos, New Mexico; Pueblo of Tesuque, New Mexico; Pueblo of Zia, New Mexico; San Juan Southern Paiute Tribe of Arizona; Southern Ute Indian Tribe of the Southern Ute Reservation, Colorado; Ute Indian Tribe of the Uintah and Ouray Reservation, Utah; Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico and Utah; and Zuni Reservation, New Mexico also were contacted but did not participate in consultation regarding the three shields.

Over the years, several researchers have considered the cultural origin and age of the Capitol Reef shields. Archeologist Noel Morss (1931) observed similarities among the three shields, known Apache shields, and historic-era pictographs of shields in association with horses. He attributed the Capitol Reef shields to recent (post-introduction of the horse) Apaches or Navajos. While subsequent radiocarbon dating indicates that the Capitol Reef shields pre-date the introduction of the horse to south-central Utah, the dates do not invalidate Morss's favorable comparisons to Navajo/Apache pictograph shields.

Archeologist Carling Malouf (1944) suggested that the shields were modern in origin, although he did not offer an opinion regarding who made them. Archeologist Marie Wormington (1955) found the Capitol Reef shields to resemble shield and shield-bearer pictographs attributed to the Fremont Culture. Shield pictographs attributed to the Fremont Culture exist near the area in which the Capitol Reef shields were discovered. However, subsequent radiocarbon dating shows the shields to significantly post-date the commonly accepted, archeologically derived Fremont Culture termination date of A.D. 1300.

Archeologist C. Melvin Aikens (1966), in an article postulating a Plains origin for Fremont Culture, described Plains-style cultural attributes of the Capitol Reef shields. His later abandonment of the Plains/Fremont construct does not invalidate his observations regarding the Plains-like attributes of the shields.

In 1967, Campbell Grant obtained a standard radiocarbon age from a sample of CARE-12. Reported as UCLA sample 1221, the age had a tree-ring calibrated radiocarbon age of (1) modern, or (2) A.D. 1650, or (3) A.D. 1750 (Berger and Libby 1968). Based on the radiocarbon dates, archeologist and rock art scholar Polly Schaafsma (1971) concluded that the shields were made in recent times and therefore were not associated with Fremont Culture.

In a 1976 study of Puebloan shields, researcher Barton Wright attributed the shields to Pueblo warriors. He noted the smaller size of historic Navajo shields when compared to Pueblo shields as an important consideration. Researcher Stuart Baldwin (1997) suggested that the shields are Ute, based on the 1967 radiocarbon dates.

Loendorf and Conner (1993) reported three accelerator mass spectrometry radiocarbon ages for a small piece of strap from CARE-11. Based on recently developed tree ring calibrations and weighted averages, the likely date of construction for the shields is between A.D. 1420 and A.D. 1640 (Loendorf 2001).

Capitol Reef National Park contracted with three experts to help determine the cultural affiliation of the three shields. Lawrence Loendorf is a research professor at the Department of Anthropology, New Mexico State University. Benson Lanford is a researcher, appraiser, and lecturer on American Indian arts and material culture. Barton A. Wright is a retired research anthropologist and archeologist specializing in the study of Southwestern cultures, and author of the book "Pueblo Shields From the Fred Harvey Collection" (1976). These scholars examined a wide body of archeological and ethnographic evidence, including comparative artistic motifs; construction techniques; tribal oral traditions; and known origins, historic distributions, and inter-tribal affiliations of ethnographic groups of the Plains and Southwest. Each observed that assigning these shields, the oldest dated shields known in North America, to a specific historic or modern tribe by anthropological and scientific methods is problematic. These researchers did not nor were they asked to offer advice or opinions regarding the potential repatriation of the shields to a claimant tribe. Rather, they independently and objectively traced the various lines of evidence relating to possible cultural affiliation(s) of the shields.

Regarding CARE-11, Dr. Loendorf attributes the shield to Athabaskan speakers based on similarities between its design elements and the so-called Castle Garden rock art style found in Wyoming and Montana and also believed to have been made by Athabaskans. He also documents similar design elements on historic Apache shields. Based on the radiocarbon dates for this shield and CARE-12, and taking into account various related factors, Dr. Loendorf suggests that the three Capitol Reef shields were likely constructed at different times between A.D. 1420 and A.D. 1640, and likely were made toward the recent end of that range. Mr. Lanford traces the vertical orientation and grid-like patterning on CARE-11 to similar elements that are common in the Great Basin, Plains, and Montane regions, but rare in the Southwest region. He finds very little similarity between the design elements of this shield and motifs common to Southwestern rock art, historic Puebloan shields, or other Puebloan painted iconographic objects. Mr. Wright observes design similarities between CARE-11 and shields produced at Jemez, particularly in the use of rays or fans of feathers as decorative motifs.

Regarding CARE-12, Dr. Loendorf attributes the shield to Athabaskan speakers based on similarities between the dot design elements and the Castle Garden rock art style, shield warrior petroglyphs in the Dinetah region of New Mexico, and other Athabaskan petroglyph and pictograph shields. Mr. Lanford observes that the pattern of vertically aligned dots in CARE-12 is in keeping with the radical asymmetry and freedom of expression typical of Apache painted motifs. He draws parallels between the design on this shield and rock art shields found in the La Sal Mountains of Utah and in Weatherman Draw in Montana. He also observes that the vertical orientation and grid-like patterning on CARE-12 is similar to elements common in the Great Basin, Plains, and Montane regions, but rare in the Southwest region. He finds very little similarity between the design elements of this shield and motifs common to Southwestern rock art, historic Puebloan shields, or other Puebloan painted iconographic objects. Mr. Wright noted the use of bands with dots on them in Jemez shields.

Regarding CARE-191, Dr. Loendorf indicated the difficulty of assigning a cultural affiliation to this shield, but he tentatively suggests that it may be

Puebloan in origin, and possibly from the Pueblo of Jemez. His conclusion is based on the shield's design, which is replicated on a Pueblo rock art shield that dates to about the same period when the CARE shields were made. He also noted that Jemez had allied with the Navajo in fights with the Spanish as early as A.D. 1640. Mr. Lanford notes similarities between the black-dash lines and related artistic design elements and Apache parfleche painting and beadwork designs.

Regarding the three shields collectively, Mr. Lanford identifies the clear glaze on each as a type of sizing or varnish, applied to seal and protect the painted surface, which is typical of painted rawhide objects originating outside of the Southwest culture area. Mr. Wright notes that most documented Navajo shields were creased across the middle so that they could be folded for storage. The Capitol Reef shields are not creased across the middle. Mr. Wright also notes that the three shields are not similar to documented 19th century Hopi shields.

To date, no archeological sites directly attributable to Navajo occupation have been identified within Capitol Reef National Park. However, Navajo oral tradition places Navajo ancestors in the park area prior to Euro-American settlement. Archeologists continue to debate the evidence for Southern Athabaskan and Navajo/Apache cultural origins, linguistics, chronology, and territorial expansion. They generally concur, however, that modern Navajo and Apache tribes are related, all having descended from an ancestral Southern Athabaskan culture. Cultural anthropologists document that Apacheans (including Navajos) share mythological accounts of origins, culture heroes, and events; principles of kinship and social organization; marriage customs and division of labor; religion; and other aspects of cultural tradition. Linguists have identified seven separate Southern Athabaskan or Apachean-speaking groups, which include the Navajo. Navajo and many Apache languages are mutually intelligible. Glottochronological data suggest that the Apachean languages began diverging, as a result of geographic separation, as recently as A.D. 1300. Material culture traits probably began diverging at approximately the same time. However, whether or not Navajo artifacts can be reliably differentiated from Apache artifacts between A.D. 1420 and A.D. 1650 is a matter of professional opinion. Making such a determination for the Capitol Reef shields, which were discovered outside of any identifiable cultural context, is particularly difficult.

Consultation with representatives of the Navajo Nation indicates that the three shields were made by Many Goat White Hair and four other men and used in a battle with the Spanish. After the battle, Many Goat White Hair hid the three shields in the rock crevice and prayed that they would be found in the future, as they have been. Many Goat White Hair's clan affiliation was not identified. However, nearly half of the Navajo clans trace their ancestry to other Native American groups, including the Ma'iideeshgiizhinii, or Coyote Pass People, who are descendant of people from Jemez Pueblo.

According to Kluckhohn, Hill, and Kluckhohn (1971), Navajo shields were made by warriors under strict ritual conditions. Only men who knew one of the war chants could make shields. The war leader held a special Blessing Way over the shields while they were being painted. The designs on a shield represent the chantway in which the man went to war.

According to representatives of the Navajo Nation, the Naayéé (Protection Way) ceremony deals with the armor and shields of Navajo deities and Navajo people. People who have possession of such shields must be knowledgeable in the proper songs, prayers, and oral history of the Naayéé ceremony. Jon Holiday, a recognized Naayéé chanter, has identified the designs and colors on the three shields as representing earth, sky, sun rays, day and night, stars, and the male and female mountains, as described in Navajo oral history. Mr. Holiday has indicated that he intends to use the three shields in the Naayéé ceremony. The Naayéé ceremony provides individuals with a protective barrier behind which they may regain strength, harmony, and balance after a physical or mental illness.

On June 11, 2001, a representative of the Navajo Nation requested repatriation of the three shields. The Navajo Nation claim identified the three shields as sacred objects, indicating that they are needed by Navajo traditional religious leaders for the practice of the Naayéé (Protection Way) ceremony by present-day adherents. The Navajo claim also identified the three shields as objects of cultural patrimony, but did not provide documentation as to whether they were considered inalienable by the Navajo in the 1600s.

Based on the above-mentioned information, the superintendent of Capitol Reef National Park determined that, pursuant to 43 CFR 10.2 (d), the three shields are related to a tribe, people, or culture that is indigenous to the United States. The superintendent of Capitol Reef National Park also determined that, pursuant to 43 CFR 10.2 (d)(3), the three shields are specific ceremonial objects needed by traditional Native American religious leaders for the practice of traditional Native American religions by their present-day adherents. Lastly, the superintendent of Capitol Reef National Park determined that, pursuant to 43 CFR 10.2 (c), there is a relationship of shared group identity that can be reasonably traced between the three shields and the Navajo Nation, Arizona, New Mexico, and Utah.

This notice has been sent to officials of the Apache Tribe of Oklahoma; Confederated Tribes of the Goshute Reservation, Nevada and Utah; Fort McDowell Mohave-Apache Indian Community of the Fort McDowell Indian Reservation, Arizona; Fort Sill Apache Tribe of Oklahoma; Hopi Tribe of Arizona; Jicarilla Apache Tribe of the Jicarilla Apache Indian Reservation, New Mexico; Kaibab Band of Paiute Indians of the Kaibab Indian Reservation, Arizona; Las Vegas Tribe of Paiute Indians of the Las Vegas Indian Colony, Nevada; Mescalero Apache Tribe of the Mescalero Reservation, New Mexico; Navajo Nation, Arizona, New Mexico and Utah; Paiute Tribe of Utah (Cedar City, Indian Peak, Kanosh, Koosharem, Shivwits Bands); Pueblo of Acoma, New Mexico; Pueblo of Cochiti, New Mexico; Pueblo of Isleta, New Mexico; Pueblo of Jemez, New Mexico; Pueblo of Laguna, New Mexico; Pueblo of Nambe, New Mexico; Pueblo of Picuris, New Mexico; Pueblo of Pojoaque, New Mexico; Pueblo of San Ildefonso, New Mexico; Pueblo of San Juan, New Mexico; Pueblo of Sandia, New Mexico; Pueblo of Santa Ana, New Mexico; Pueblo of Santa Clara, New Mexico; Pueblo of Santo Domingo, New Mexico; Pueblo of Taos, New Mexico; Pueblo of Tesuque, New Mexico; Pueblo of Zia, New Mexico; San Carlos Apache Tribe of the San Carlos Reservation, Arizona; San Juan Southern Paiute Tribe of Arizona; Southern Ute Indian Tribe of the Southern Ute Reservation, Colorado; Tonto Apache Tribe of Arizona; Ute Indian Tribe of the Uintah and Ouray Reservation, Utah; Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico and Utah; White Mountain Apache Tribe of the Fort Apache Reservation, Arizona; Yavapai-Apache Nation of the Camp Verde Indian Reservation, Arizona; and Zuni Reservation, New Mexico.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with these cultural items

should contact Albert J. Hendricks, Superintendent, Capitol Reef National Park, HC 70 Box 15, Torrey, UT 84775, telephone (435) 425-3791, extension 101, before January 7, 2002. Repatriation of the cultural items to the Navajo Nation may begin after that date if no additional claimants come forward.

Dated: October 19, 2001.

John Robbins,

Assistant Director, Cultural Resources Stewardship and Partnerships.

BILLING CODE 4310–70–S

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Intent to Repatriate Cultural Items in the Possession of the U.S. Department of Agriculture, U.S. Forest Service, Chugach National Forest, Anchorage, AK

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act, 43 CFR 10.10 (a)(3), of the intent to repatriate cultural items in the possession of the U.S. Department of Agriculture, U.S. Forest Service, Chugach National Forest, Anchorage, AK, that meet the definition of "unassociated funerary objects" under Section 2 of the Act.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 43, CFR 10.2 (c). The determinations within this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the cultural items. The National Park Service is not responsible for the determinations within this notice.

The 16 objects are 1 bone harpoon point, 1 bone-toggling harpoon point, 1 stone end blade, 1 whetstone, 2 sea mammal bones, 9 glass beads, and 1 small piece of red ochre.

In 1981, U.S. Department of the Interior, Bureau of Indian Affairs and U.S. Department of the Interior, National Park Service, Cooperative Park Studies Unit archeologists conducted a survey of the Esther Bay site, a 14(h)(1) selection on the southern side of Esther Island, Prince William Sound, AK. Cultural items, along with human remains, were collected from two burial sites. The human remains from these sites were were reinterred at the original burial location in the spring of 1990. The cultural items are one bone harpoon point, one bone-toggling harpoon point, one stone end blade, one whetstone, and two sea mammal bones. Based on archeological evidence, the Esther Bay site is identified as a prehistoric Chugach Eskimo burial cave. Chugach National Forest is not in possession or control of the human remains from these burial sites.

In 1933, Frederica de Laguna investigated the Campbell Bay site, located on the northwestern shore of Glacier Island, Prince William Sound, AK, and collected two sets of human remains from burials there. The human remains were curated at the National Museum of Denmark, Copenhagen, and were previously repatriated to the Chugach Alaska Corporation.

In 1981, U.S. Department of the Interior, Bureau of Indian Affairs and U.S. Department of the Interior, National Park Service, Cooperative Park Studies Unit archaeologists conducted a survey of the same site, a 14(h)(1) selection, and located the area from which de Laguna had removed the human remains. No human remains were located during the 1981 survey, but 10 cultural items were recovered from the burial site: 7 blue and 2 white glass beads, along with 1 small piece of red ochre. Based on archeological evidence, the Campbell Bay site is identified as a postcontact, late 18th-century Chugach Eskimo burial cave. Chugach National Forest is not in possession or control of human remains from these burial sites.

Based on the above-mentioned information, officials of Chugach National Forest have determined that, pursuant to 43 CFR 10.2 (d)(2)(ii), these 16 cultural items are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony and are believed, by a preponderance of the evidence, to have been removed from specific burial sites of Native American individuals. Officials of Chugach National Forest also have determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity that can reasonably be traced between these unassociated funerary objects and the Native Village of Chenega and Native Village of Tatitlek, which are represented by Chugach Alaska Corporation.

This notice has been sent to officials of the Chugach Alaska Corporation, Chenega Corporation, Native Village of Chenega, Tatitlek Corporation, Native Village of Tatitlek, English Bay Corporation, Native Villages of Nanwalek, Port Graham Corporation, Native Village of Port Graham, Eyak Corporation, and Native Village of Eyak. Representatives of any other Indian tribe that believes itself to be culturally affiliated with these unassociated funerary objects should contact Linda Finn Yarborough, Forest Archaeologist, Chugach National Forest, 3301 C Street, Suite 300, Anchorage, AK 99503, telephone (907) 271-2511, facsimile (907) 271-2725, before January 7, 2002. Repatriation of these unassociated funerary objects to the Chugach Alaska Corporation may begin after that date if no additional claimants come forward.

Dated: November 5, 2001.

John Robbins,

Assistant Director, Cultural Resources Stewardship and Partnerships.

BILLING CODE 4310–70–S

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion for Native American Human Remains and Associated Funerary Objects in the Possession of the Michael C. Carlos Museum, Emory University, Atlanta, GA

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act (NAGPRA), 43 CFR 10.9, of the completion of an inventory of human remains and associated funerary objects in the possession of the Michael C. Carlos Museum, Emory University, Atlanta, GA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 43 CFR 10.2 (c). The determinations within this notice are the sole responsibility of the museum, institution, or Federal agency that has control of these Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations within this notice.

A detailed assessment of the human remains was made by Michael C. Carlos Museum professional staff in consultation with representatives of the Alabama-Quassarte Tribal Town, Oklahoma; Cherokee Nation, Oklahoma; Eastern Band of Cherokee Indians of North Carolina; Kialegee Tribal Town, Oklahoma; Muscogee (Creek) Nation, Oklahoma; Poarch Band of Creek Indians of Alabama; Thlopthlocco Tribal Town, Oklahoma; and United

Keetoowah Band of Cherokee Indians of Oklahoma.

Between 1925 and 1928, human remains representing two individuals were excavated from Mound C, Etowah site, Bartow County, GA, by an unknown person under the direction Warren K. Moorehead, of Phillips Academy, Andover, MA. Prior to 1932 the remains and associated funerary objects were donated to the Michael C. Carlos Museum by Phillips Academy. No known individuals were identified. The 21 associated funerary objects are 2 shell vessels, 1 grinding stone (pestle?), 1 projectile point, 1 whelk columella pendant (?), 1 lot of freshwater pearl beads, and 15 lots of shell beads.

The Etowah site is located on the north bank of the Etowah River, near present-day Cartersville in northeastern Georgia. Archeological evidence documents that the site was inhabited from A.D. 800-1550, spanning the entirety of the Mississippian culture, through its Early, Middle, and Late periods. The site is believed to have housed several thousand inhabitants at its peak, circa A.D. 1300, making it one of the largest Middle Mississippian period settlements in the southeastern United States.

The burials were excavated from Mound C at the Etowah site. Mound C is the third largest of seven mounds at the site and the only burial mound. Radiocarbon 14 dating has dated burials associated with the mound to A.D. 800-1400. There is no absolute archeological proof that links the site with any modern day tribe. However, consultations and studies with the federally recognized Cherokee and Muscogeean (Creek) tribes have indicated that there is a reasonable link to a shared group identity with the Muscogeean-speaking tribes of today based on historical documents, early maps, certain common lifeway traits, and linguistic evidence.

Based on the above-mentioned information, officials of the Michael C. Carlos Museum have determined that, pursuant to 43 CFR 10.2 (d)(1), the human remains listed above represent the physical remains of two individuals of Native American ancestry. Officials of the Michael C. Carlos Museum also have determined that, pursuant to 43 CFR 10.2 (d)(2), the 21 objects listed above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Michael C. Carlos Museum have determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity that can be reasonably traced between these Native American human remains and associated funerary objects and the Alabama-Quassarte Tribal Town, Oklahoma; Kialegee Tribal Town, Oklahoma; Miccosukee Tribe of Indians of Florida; Muscogee (Creek) Nation, Oklahoma; Poarch Band of Creek Indians of Alabama; Seminole Nation of Oklahoma; Seminole Tribe of Florida, Dania, Big Cypress, Brighton, Hollywood & Tampa Reservations; and Thlopthlocco Tribal Town, Oklahoma.

This notice has been sent to officials of the Alabama-Quassarte Tribal Town, Oklahoma; Cherokee Nation, Oklahoma; Eastern Band of Cherokee Indians of North Carolina; Kialegee Tribal Town, Oklahoma; Miccosukee Tribe of Indians of Florida; Muscogee (Creek) Nation, Oklahoma; Poarch Band of Creek Indians of Alabama; Seminole Nation of Oklahoma; Seminole Tribe of Florida, Dania, Big Cypress, Brighton, Hollywood & Tampa Reservations; Thlopthlocco Tribal Town, Oklahoma; and United Keetoowah Band of Cherokee Indians of Oklahoma. Representatives of any other Indian tribe that believes itself to be culturally affiliated with these human remains and associated funerary objects should contact Todd Lamkin, Registrar, Michael C. Carlos Museum, Emory University, Atlanta, GA 30322, telephone (404) 727-4456, before January 7, 2002. Repatriation of the human remains and associated funerary objects to the Alabama-Quassarte Tribal Town, Oklahoma; Kialegee Tribal Town, Oklahoma; Miccosukee Tribe of Indians of Florida; Muscogee (Creek) Nation, Oklahoma; Poarch Band of Creek Indians of Alabama; Seminole Nation of Oklahoma; Seminole Tribe of Florida, Dania, Big Cypress, Brighton, Hollywood & Tampa Reservations; and Thlopthlocco Tribal Town, Oklahoma may begin after that date if no additional claimants come forward.

Dated: November 5, 2001.

Robert D. Stearns,

Manager, National NAGPRA Program.

BILLING CODE 4310–70–S

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–429]

Certain Bar Clamps, Bar Clamp Pads, and Related Packaging, Display and Other Materials; Notice of Commission Decision To Grant-In-Part a Joint Motion for Termination of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has decided to grant-in-part a joint motion for termination of the above-captioned investigation based on a settlement agreement.

FOR FURTHER INFORMATION CONTACT: David I. Wilson, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–708–2310. General information concerning the Commission also may be obtained by accessing its Internet server (*http://www.usitc.gov*). Hearing-impaired individuals can obtain information concerning this matter by contacting the Commission's TDD terminal at 202–205–1810. The public record for this investigation may be viewed on the Commission's electronic docket (EDIS–ON–LINE) at *http://dockets.usitc.gov/eol/public.*

SUPPLEMENTARY INFORMATION: The Commission instituted the investigation to determine whether there is a violation of section 337 of the Tariff Act of 1930 in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain bar clamps, bar clamp pads, and related packaging, display, and other materials. The complainants were American Tool Companies, Inc., and its subsidiary, Peterson Manufacturing Co., Inc. The respondents were Wolfcraft GmbH and Wolfcraft, Inc. The complainants alleged that the respondents' imported merchandise infringes claims of a U.S. patent owned by complainants, infringes complainants' registered trademark, and misappropriated complainants' trade dress. *See* 65 FR 13307 (Mar. 13, 2001).

The patent-based portion of the complaint was deemed withdrawn and that portion of the investigation was terminated when the Commission granted complainants' motion to amend the complaint and notice of investigation (Motion No. 429–4) (Sept. 6, 2000). *See* Commission Order (Jan. 4, 2001) and Commission Opinion (Jan. 4, 2001).

On March 13, 2001, the ALJ issued his final ID, pursuant to 19 CFR 210.42(a)(1), holding that there is no violation of section 337 in the importation and sale of the respondents' merchandise.

On July 3, 2001, complainants and respondents filed a joint motion (Motion No. 429–10C) in which they sought (a) vacatur of the final ID, (2) termination of the investigation with prejudice and (3) withdrawal of respondents' sanctions motion.

The Commission denied the requests in the joint motion that the investigation be terminated with prejudice, and granted the requests that the ID be vacated and that respondents' motion for sanctions be withdrawn.

The authorities for this action are section 337(c) of the Tariff Act of 1930, 19 U.S.C. 1337(c), and Commission rules 210.46(a) and 210.42(h)(2) and (i), 19 CFR 210.46(a), and 210.42(h)(2) and (i).

All nonconfidential documents filed in the investigation are or will be available for public inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Commission's Office of the Secretary, Dockets Branch, 500 E Street, SW., Room 112, Washington, DC 20436, telephone 202–205–1802.

By Order of the Commission.

Issued: December 3, 2001.

Donna R. Koehnke,

Secretary.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Inv. No. 337–TA–465]

Certain Semiconductor Timing Signal Generator Devices, Components Thereof, and Products Containing Same; Notice of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on November 5, 2001, under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, on behalf of Integrated Circuit Systems, Inc. of Valley Forge, Pennsylvania. Supplements to the complaint were filed on November 14 and 26, 2001. The complaint, as supplemented, alleges violations of section 337 in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain semiconductor timing signal generator devices, components thereof, and products containing same, by reason of infringement of claim 9 of U.S. Letters Patent 5,036,216 and claim 6 of U.S. Letters Patent 5,703,537. The complaint further alleges that an industry in the United States exists as required by subsection (a)(2) of section 337.

The complainant requests that the Commission institute an investigation and, after the investigation, issue a permanent exclusion order and permanent cease and desist order.

ADDRESSES: The complaint and supplements, except for any confidential information contained therein, are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Room 112, Washington, DC 20436, telephone 202–205–2000. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's ADD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its Internet server at *http://www.usitc.gov*. The public record for this investigation may be viewed on the Commission's electronic docket (EDIS–ON–LINE) at *http://dockets.usitc.gov/eol/public*.

FOR FURTHER INFORMATION CONTACT: Jeffrey R. Whieldon, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone 202–205–2580.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2001).

Scope of Investigation

Having considered the complaint, the U.S. International Trade Commission, on December 3, 2001, *Ordered That*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain semiconductor timing signal generator devices, components thereof, and products containing same, by reason of infringement of claim 9 of U.S. Letters Patent 5,036,216 or claim 6 of U.S. Letters Patent 5,703,537, and whether an industry in the United States exists as required by subsection (a)(2) of section 337.

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is: Integrated Circuit Systems, Inc., 2435 Boulevard of the Generals, Valley Forge, Pennsylvania 19428.

(b) The respondent is the following company alleged to be in violation of section 337, and is the party upon which the complaint is to be served: Cypress Semiconductor Corp., 3901 North First Street, San Jose, California 95134.

(c) Jeffrey R. Whieldon, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E Street, SW., Room 401, Washington, DC 20436, who shall be the Commission investigative attorney, party to this investigation;

(3) For the investigation so instituted, the Honorable Paul J. Luckern is designated as the presiding administrative law judge; and

(4) The Commission has determined to assign this investigation to Judge Luckern, who is the presiding administrative law judge in Certain Power Saving Integrated Circuits and Products Containing Same, Inv. No. 337–TA–463, in view of the overlapping subject matter in the two investigations. The presiding administrative law judge is authorized to consolidate Inv. No. 337–TA–463 and this investigation if he deems it appropriate.

Responses to the complaint and the notice of investigation must be submitted by the named respondent in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(d) and 210.13(a), such responses will be considered by the Commission if received no later than 20 days after the date of service by the Commission of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and to authorize the administrative law judge and the Commission, without further notice to that respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings, and may result in the issuance of a limited exclusion order or a cease and desist order or both directed against that respondent.

By order of the Commission.

Issued: December 3, 2001.

Donna R. Koehnke,

Secretary.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

Agency Information Collection Activities: Proposed Collection; Comment Request

ACTION: Notice of information collection under review: Passenger list, crew list.

The Department of Justice, Immigration and Naturalization Service (INS) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection was previously published in the **Federal Register** on August 16, 2001 at 66 FR 43031, allowing for a 60-day public comment period. No public comment was received on this information collection.

The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until January 7, 2002. This process is conducted in accordance with 5 CFR 1320.10.

Written comments and/or suggestions regarding the items contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Department of Justice Desk Officer, 725—17th Street, NW., Room 10235, Washington, DC 20530.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this information collection:

(1) *Type of Information Collection:* Extension of a currently approved information collection.

(2) *Title of the Form/Collection:* Passenger List, Crew List.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form I–418, Inspection Division, Immigration and Naturalization Service.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or Households. This form is prescribed by the Attorney General for the INS for use by masters, owners or agents of vessels in complying with sections 231 and 251 of the Immigration and Nationality Act.

(5) *As estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 95,000 responses at 1 hour per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 95,000 annual burden hours.

If you have additional comments, suggestions, or need a copy of the proposed information collection instrument with instructions, or additional information, please contact Richard A. Sloan 202–514–3291, Director, Policy Directives and Instructions Branch, Immigration and Naturalization Service, U.S. Department of Justice, Room 4034, 425 I Street, NW., Washington, DC 20536. Additionally, comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time may also be directed to Mr. Richard A. Sloan.

If additional information is required contact: Mr. Robert B. Briggs, Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Patrick Henry Building, 601 D Street, NW., Ste. 1600, Washington, DC 20530.

Dated: November 29, 2001.

Richard A. Sloan,

Department Clearance Officer, United States Department of Justice, Immigration and Naturalization Service.

BILLING CODE 4410–10–M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

Agency Information Collection Activities: Proposed Collection; Comment Request

ACTION: Notice of information collection under Review: Application for certificate of citizenship on behalf of an adopted child.

The Department of Justice, Immigration and Naturalization Service (INS) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and clearance in

accordance with the Paperwork Reduction Act of 1995. The information collection was previously published in the **Federal Register** on October 15, 2001, at 66 FR 52456, allowing for a 60-day public comment period. No comments were received by the INS on this proposed information collection.

The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until January 7, 2002. This process is conducted in accordance with 5 CFR 1320.10.

Written comments and/or suggestions regarding the items contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Department of Justice Desk Officer, 725 17th Street, NW., Room 10235, Washington, DC 20530; 202–395–7316.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this information collection:

(1) *Type of Information Collection:* Extention of currently approved collection.

(2) *Title of the Form/Collection:* Application for Certification of Citizenship in Behalf of an Adopted Child.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form N–643, Adjudications Division, Immigration and Naturalization Service.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or Households. This information collection allows United States citizen parents to apply for a certificate of citizenship on behalf of their adopted alien children.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 11,159 responses at 1 hour per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 11,159 annual burden hours.

If you have additional comments, suggestions, or need a copy of the proposed information collection instrument with instructions, or additional information, please contact Richard A. Sloan 202–514–3291, Director, Policy Directives and Instructions Branch, Immigration and Naturalization Service, U.S. Department of Justice, Room 4034, 425 I Street, NW., Washington, DC 20536. Additionally, comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time may also be directed to Mr. Richard A. Sloan.

If additional information is required contact: Mr. Robert B. Briggs, Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Suite 850, Washington Center, 1001 G Street, NW., Washington, DC 20530.

Dated: November 30, 2001.

Richard A. Sloan,

Department Clearance Officer, United States Department of Justice, Immigration and Naturalization Service.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

Agency Information Collection Activities: Proposed Collection; Comment Request

ACTION: Notice of information collection under review: Aircraft/vessel report.

The Department of Justice, Immigration and Naturalization Service (INS) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection was previously published in the **Federal Register** on August 8, 2001 at 66 FR 41806, allowing for a 60-day public comment period. No public comment was received on this information collection.

The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until January 7, 2002. This process is conducted in accordance with 5 CFR 1320.10.

Written comments and/or suggestions regarding the items contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Department of Justice Desk Officer, 725—17th Street, NW., Room 10235, Washington, DC 20530.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this information collection:

(1) *Type of Information Collection:* Extension of a currently approved information collection.

(2) *Title of the Form/Collection:* Aircraft/Vessel Report.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form I–92, Inspections Division, Immigration and Naturalization Service.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary Individuals or Households. This form is part of the manifest requirements of Section 231 and 251 of the Immigration and Nationality Act and is used by the

Immigration and Naturalization Service and other agencies for data collection and statistical analysis.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 720,000 responses at 11 minutes (.183 hours) per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 129,600 annual burden hours.

If you have additional comments, suggestions, or need a copy of the proposed information collection instrument with instructions, or additional information, please contact Richard A. Sloan 202–514–3291, Director, Policy Directives and Instructions Branch, Immigration and Naturalization Service, U.S. Department of Justice, Room 4034, 425 I Street, NW., Washington, DC 20536. BILLING CODE 4410–10–M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

Agency Information Collection Activities: Proposed Collection; Comment Request

ACTION: Notice of information collection under review: Application for transmission of citizenship through a grandparent.

The Department of Justice, Immigration and Naturalization Service (INS) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection was previously published in the **Federal Register** on October 15, 2001 at 66 FR 52456, allowing for a 60-

day public comment period. No public comment was received on this information collection.

The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until January 7, 2002. This process is conducted in accordance with 5 CFR 1320.10.

Written comments and/or suggestions regarding the items contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Department of Justice Desk Officer, 725—17th Street, NW., Room 10235, Washington, DC 20530.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this information collection:

(1) *Type of Information Collection:* Extension of a currently approved information collection.

(2) *Title of the Form/Collection:* Application for Transmission of Citizenship Through a Grandparent.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form N–600/N–643, Adjudications Division, Immigration and Naturalization Service.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or Households. Section 322 of the Immigration and Nationality Act Technical Corrections Act of 1994 enables a U.S. citizen parent, who is unable to transmit citizenship of his or her children, to use a citizen grandparent's residence for transmission. This form is required so that information on a grandparent's residence may be collected to establish a child's eligibility for naturalization.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 9,641 responses at 30 minutes (.50 hours) per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 4,820 annual burden hours.

If you have additional comments, suggestions, or need a copy of the proposed information collection instrument with instructions, or additional information, please contact Richard A. Sloan 202–514–3291, Director, Policy Directives and Instructions Branch, Immigration and Naturalization Service, U.S. Department of Justice, 425 I Street, NW., Room 4034, Washington, DC 20536. Additionally, comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time may also be directed to Mr. Richard A. Sloan.

If additional information is required contact: Mr. Robert B. Briggs, Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Patrick Henry Building, 601 D Street, NW., Suite 1600, Washington, DC 20530.

Dated: November 30, 2001.

Richard A. Sloan,

Department Clearance Officer, United States Department of Justice, Immigration and Naturalization Service.

BILLING CODE 4410–10–M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

Agency Information Collection Activities: Proposed Collection; Comment Request

ACTION: Notice of information collection under review: Petition to remove conditions on residence.

The Department of Justice, Immigration and Naturalization Service (INS) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection was previously published in the **Federal Register** on September 28, 2001 at 66 FR 49697, allowing for a 60-day public comment period. No public comments were received on this information collection.

The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until January 7, 2002. This process is conducted in accordance with 5 CFR 1320.10.

Written comments and/or suggestions regarding the items contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Department of Justice Desk Officer, 725—17th Street, NW., Room 10235, Washington, DC 20530.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this information collection:

(1) *Type of Information Collection*: Extension of a currently approved collection.

(2) *Title of the Form/Collection*: Petition to Remove Conditions on Residence.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection*: Form I–751, Adjudications, Division, Immigration and Naturalization Service.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract*: Primary: Individuals or Households. Persons granted conditional residence through marriage to a United States citizen or permanent

resident use this form to petition for the removal of those conditions.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond*: 118,008 responses at 80 minutes (1.33 hours) per response.

(6) *An estimate of the total public burden (in hours) associated with the collection*: 156,951 annual burden hours.

If you have additional comments, suggestions, or need a copy of the proposed information collection instrument with instructions, or additional information, please contact Richard A. Sloan 202–514–3291, Director, Policy Directives and Instructions Branch, Immigration and Naturalization Service, U.S. Department of Justice, Room 4034, 425 I Street, NW., Washington, DC 20536. Additionally, comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time may also be directed to Mr. Richard A. Sloan.

If additional information is required contact: Mr. Robert B. Briggs, Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Patrick Henry Building, 601 D Street, NW., Ste. 1600, Washington, DC 20530.

Dated: November 29, 2001.

BILLING CODE 4410–10–M

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decision, and modifications and supersedes decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contracts for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S–3014, Washington, DC 20210.

Modification to General Wage Determination Decisions

The number of the decisions listed to the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and related Acts" being modified are listed by Volume and State. Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under the Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country.

General wage determinations issued under the Davis-Bacon and related Acts are available electronically at no cost on the Government Printing Office site at *www.access.gpo.gov/davisbacon*.

They are also available electronically by subscription to the Davis-Bacon Online Service (*http://davisbacon.fedworld.gov*) of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at 1–800–363–2068. This subscription offers value-added features such as electronic delivery of modified wage decisions directly to the user's desktop, the ability to access prior wage decisions issued during the year, extensive Help Desk Support, etc.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 512–1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the six separate Volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 29th day of November, 2001.

Terry Sullivan,

Acting Chief, Branch of Construction Wage Determinations.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–410]

Rochester Gas and Electric Corporation; Nine Mile Point Nuclear Station, Unit No. 2; Notice of Withdrawal of Application for Approval of Indirect Transfer of Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) was considering the issuance of an order under 10 CFR 50.80 approving the indirect transfer of Facility Operating License No. NPF–69 for Nine Mile Nuclear Station, Unit No. 2 (NMP–2), to the extent held by Rochester Gas and Electric Corporation (RG&E). The indirect transfer would have resulted from the planned acquisition of RG&E's parent company, RGS Energy Group, Inc. (RGS), by Energy East Corporation (Energy East).

On November 7, 2001, the NMP–2 license, as held by RG&E and others, was transferred to Nine Mile Point Nuclear Station, LLC, as authorized by an NRC Order dated June 22, 2001, as modified by a Supplemental Order dated October 30, 2001. By letter dated November 14, 2001, RG&E withdrew its request for NRC approval of the indirect transfer of the NMP–2 license since RG&E no longer holds the NMP–2 license. The NRC has permitted the withdrawal.

The Commission previously published a Notice of Consideration of Approval of Application Regarding Proposed Merger and Opportunity for a Hearing (66 FR 42687, dated August 14, 2001). No hearing requests or written comments were filed.

For further details with respect to this withdrawal, see RG&E's letter dated June 22, and November 14, 2001, available for public inspection at the Commission's Public Document Room (PDR), at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site (*http://www.nrc.gov/ADAMS/index.htm*). If you do not have access to ADAMS or if there are problems accessing the documents located in ADAMS, contact the NRC PDR reference staff at 1–800–397–4209, 301–415–4737 or by e-mail to *pdr@nrc.gov*.

Dated at Rockville, Maryland, this 30th day of November 2001.

For the Nuclear Regulatory Commission.

Peter S. Tam,

Senior Project Manager, Section 1, Project Directorate I, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

[FR Doc. 01–30343 Filed 12–6–01; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–271]

Vermont Yankee Nuclear Power Corporation; Vermont Yankee Nuclear Power Station; Notice of Consideration of Approval of Transfer of Facility Operating License and Conforming Amendment, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering the issuance of an order under 10 CFR 50.80 approving the transfer of Facility Operating License No. DPR–28 currently held by Vermont Yankee Nuclear Power Corporation (VYNPC), as owner and licensed operator of Vermont Yankee Nuclear Power Station (VYNPS). The transfer would be to Entergy Nuclear Vermont Yankee, LLC (Entergy Nuclear VY), the proposed owner of VYNPS, and to Entergy Nuclear Operations, Inc. (ENO), the proposed entity to operate VYNPS. The Commission is also considering amending the license for administrative purposes to reflect the proposed transfer.

According to an application for approval filed by VYNPC, Entergy Nuclear VY, and ENO, Entergy Nuclear VY would assume title to the facility following approval of the proposed license transfer, and ENO would operate and maintain VYNPS. VYNPC will transfer all decommissioning trust funds to a decommissioning trust established by Entergy Nuclear VY. No physical changes to the facility or operational changes are being proposed in the application.

The proposed amendment would replace references to VYNPC in the license with references to Entergy Nuclear VY and/or ENO, as appropriate, and make other necessary administrative changes to reflect the proposed transfer.

Entergy Nuclear VY, a Delaware limited liability company, is an indirect wholly owned subsidiary of Entergy Corporation, and an indirect wholly owned subsidiary of Entergy Nuclear Holding Company #3.

ENO, a Delaware corporation, is an indirect wholly owned subsidiary of Entergy Corporation, and a direct wholly owned subsidiary of Entergy Nuclear Holdings Company #2.

Pursuant to 10 CFR 50.80, no license, or any right thereunder, shall be transferred, directly or indirectly, through transfer of control of the license, unless the Commission shall give its consent in writing. The Commission will approve an application for the transfer of a license, if the Commission determines that the proposed transferee is qualified to hold the license, and that the transfer is otherwise consistent with applicable provisions of law, regulations, and orders issued by the Commission pursuant thereto.

Before issuance of the proposed conforming license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

As provided in 10 CFR 2.1315, unless otherwise determined by the Commission with regard to a specific application, the Commission has determined that any amendment to the license of a utilization facility which does no more than conform the license to reflect the transfer action involves no significant hazards consideration. No contrary determination has been made with respect to this specific license amendment application. In light of the generic determination reflected in 10 CFR 2.1315, no public comments with respect to significant hazards considerations are being solicited, notwithstanding the general comment procedures contained in 10 CFR 50.91.

The filing of requests for hearing and petitions for leave to intervene, and written comments with regard to the license transfer application, are discussed below.

By December 27, 2001, any person whose interest may be affected by the Commission's action on the application may request a hearing and, if not the applicant, may petition for leave to intervene in a hearing proceeding on the Commission's action. Requests for a hearing and petitions for leave to intervene should be filed in accordance with the Commission's rules of practice set forth in Subpart M, "Public Notification, Availability of Documents and Records, Hearing Requests and Procedures for Hearings on License Transfer Applications," of 10 CFR Part 2. In particular, such requests and petitions must comply with the requirements set forth in 10 CFR 2.1306, and should address the considerations contained in 10 CFR 2.1308(a). Untimely requests and petitions may be denied, as provided in 10 CFR 2.1308(b), unless good cause for failure to file on time is established. In addition, an untimely request or petition should address the factors that the Commission will also consider, in reviewing untimely requests or petitions, set forth in 10 CFR 2.1308(b)(1)–(2).

Requests for a hearing and petitions for leave to intervene should be served upon David R. Lewis, Esq., Shaw, Pittman, LLP, 2300 N Street, NW., Washington, DC 20037–1128, Phone: (202) 663–8474, Fax: (202) 663–8007, e-mail: *david.lewis@shawpittman.com;* and Douglas Levanway, Esq., Wise Carter Child & Caraway, 600 Heritage Building, 401 East Capitol Street, P.O. Box 651, Jackson, MS 39201–5519, Phone: (601) 968–5524, Fax: (601) 968–5519, e-mail: *del@wisecarter.com;* the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555 (e-mail address for filings regarding license transfer cases only: *ogclt@nrc.gov*); and the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, in accordance with 10 CFR 2.1313.

The Commission will issue a notice or order granting or denying a hearing request or intervention petition, designating the issues for any hearing that will be held and designating the Presiding Officer. A notice granting a hearing will be published in the **Federal Register** and served on the parties to the hearing.

As an alternative to requests for hearing and petitions to intervene, by January 7, 2002, persons may submit written comments regarding the license transfer application, as provided for in 10 CFR 2.1305. The Commission will consider and, if appropriate, respond to these comments, but such comments will not otherwise constitute part of the decisional record. Comments should be submitted to the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, and should cite the publication date and page number of this **Federal Register** notice.

Further details with respect to this action, see the initial application dated October 5, 2001, and supplements dated November 7 and November 8, 2001, available for public inspection at the Commission's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the internet

at the NRC Web site, *http://www.nrc.gov/ADAMS/index.html*. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC Public Document Room (PDR) Reference staff by telephone at 1–800–397–4209, 301–415–4737 or by e-mail to *pdr@nrc.gov*.

Dated at Rockville, Maryland this 3rd day of December 2001.

For the Nuclear Regulatory Commission.

Robert M. Pulsifer,

Project Manager, Section 2, Project Directorate I, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

[FR Doc. 01–30342 Filed 12–6–01; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–155]

Consumers Energy Company; Big Rock Point Plant; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering approval of a request to dispose of demolition debris in accordance with Title 10 of the Code of Federal Regulations (10 CFR) section 20.2002 for Facility Operating License No. DPR–6, issued to Consumers Energy Company, (the licensee), for the possession of the Big Rock Point (BRP) Plant, located in Charlevoix County, Michigan. Therefore, as required by 10 CFR 51.21, the NRC is issuing this environmental assessment and finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would approve the disposal of BRP Plant demolition debris that could contain trace quantities of licensed materials in a State of Michigan landfill. The debris would consist of flooring materials, concrete, rebar, roofing materials, structural steel, soils associated with digging up foundations, and concrete and/or asphalt pavement or other similar solid materials originating from decommissioning activities. A radiological survey process would be used to determine if the debris is acceptable for landfill disposal. The request for approval is submitted pursuant to 10 CFR 20.2002 due to the potential presence of licensed material in the debris.

The proposed action is in accordance with the licensee's application requesting approval dated March 14, 2001, as supplemented by letters dated May 18 and June 20, 2001.

The Need for the Proposed Action

The proposed action is needed to dispose of demolition debris that may contain trace quantities of licensed material in a State of Michigan landfill prior to license termination as opposed to (1) terminating the license with the material remaining onsite (either with structures intact or demolished) in accordance with 10 CFR 20, subpart E, or (2) handling the debris as low level radioactive waste and shipping it to a low level waste facility. As stated in the proposal, the licensee does not intend to make this submittal for intentional disposal of radioactive waste, but recognizes that a potential exists for trace quantities of licensed material to be present at levels below instrument detection capabilities. Disposal of the demolition debris in the manner proposed is protective of public health and safety, is consistent with as low as reasonably achievable, and is the most cost-effective alternative.

Environmental Impacts of the Proposed

The NRC has completed its evaluation of the proposed action and concludes that the environmental impacts of processing the total waste projected for BRP (635,100 cubic feet), which includes the 563,000 cubic feet of demolition debris proposed to be sent to a State of Michigan landfill, are bounded by the NUREG–0586, "Final Generic Environmental Impact Statement on Decommissioning of Nuclear Facilities," (GEIS) evaluation of 18,975 cubic meters (670,096 cubic feet) of waste disposal for a generic boiling water reactor. Adherence to the radiological survey process would ensure that the potential radiological dose posed by the demolition debris to a transport worker, a landfill worker, or a member of the public is conservatively estimated at a maximum of 1.0 millirem/year.

The proposed action will not significantly increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released off site, and there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not involve any historic sites. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (i.e., the "no-action" alternative). Denial of the application would result in (1) terminating the license for unrestricted use in accordance with 10 CFR part 20, subpart E, with the demolition debris remaining onsite (either with structures intact or demolished), or (2) handling the debris as low level radioactive waste and shipping it to a low level waste facility. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in BRP's Environmental Report for Decommissioning, dated February 27, 1995, or in the GEIS.

Agencies and Persons Consulted

On May 22, 2001, the staff consulted with the Michigan State official, Mr. David W. Minnaar of the Michigan Department of Environmental Quality, Drinking Water and Radiological Protection Division, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated March 14, 2001, as supplemented by letters dated May 18 and June 20, 2001. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System's (ADAMS) Public

Library component on the NRC Web site, *http://www.nrc.gov* (the Public Electronic Reading Room). Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1–800–397–4209, or 301–415–4737, or by e-mail at *pdr@nrc.gov*.

For the Nuclear Regulatory Commission.

Dated at Rockville, Maryland, this 3rd day of December, 2001.

David J. Wrona,

Project Manager, Section 1, Project Directorate IV, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

[FR Doc. 01–30344 Filed 12–6–01; 8:45 am]

BILLING CODE 7590–01–P

PENSION BENEFIT GUARANTY CORPORATION

Submission of Information Collection for OMB Review; Comment Request; Payment of Premiums

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of request for extension of OMB approval.

SUMMARY: The Pension Benefit Guaranty Corporation ("PBGC") is requesting that the Office of Management and Budget ("OMB") extend approval, under the Paperwork Reduction Act, of the collection of information under its regulation on Payment of Premiums (29 CFR part 4007), including Form 1–ES, Form 1–EZ, Form 1, and Schedule A to Form 1, and related instructions (OMB control number 1212–0009). The collection of information also includes a certification (on Form 1–EZ and on Schedule A) of compliance with requirements to provide certain notices to participants under the PBGC's regulation on Disclosure to Participants (29 CFR part 4011). This notice informs the public of the request for OMB approval and solicits public comment on the collection of information.

DATES: Comments should be submitted by January 7, 2002.

ADDRESSES: Comments should be mailed to the Office of Information and Regulatory Affairs of the Office of Management and Budget, Attention: Desk Officer for Pension Benefit Guaranty Corporation, Washington, DC 20503. The request for extension (including the collection of information) will be available for public inspection at the Communications and Public Affairs Department of the Pension Benefit Guaranty Corporation, suite 240, 1200 K Street, NW., Washington, DC 20005–4026, between 9 a.m. and 4 p.m. on business days.

Copies of the request for extension (including the collection of information) may be obtained without charge by writing to the PBGC's Communications and Public Affairs Department at the address given above or calling 202–326–4040. (For TTY and TDD, call 800–877–8339 and request connection to 202–326–4040.) The premium payment regulation can be accessed on the PBGC's Web site at *www.pbgc.gov*.

FOR FURTHER INFORMATION CONTACT: Harold J. Ashner, Assistant General Counsel, or Deborah C. Murphy, Staff Attorney, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street, NW., Washington, DC 20005–4026, 202–326–4024. (For TTY and TDD, call 800–877–8339 and request connection to 202–326–4024.)

SUPPLEMENTARY INFORMATION: Section 4007 of Title IV of the Employee Retirement Income Security Act of 1974 ("ERISA") requires the Pension Benefit Guaranty Corporation ("PBGC") to collect premiums from pension plans covered under Title IV pension insurance programs. Pursuant to ERISA section 4007, the PBGC has issued its regulation on Payment of Premiums (29 CFR part 4007). Section 4007.3 of the premium payment regulation requires plans, in connection with the payment of premiums, to file certain forms prescribed by the PBGC, and section 4007.10 requires plans to retain and make available to the PBGC records supporting or validating the computation of premiums paid.

The forms prescribed are PBGC Form 1–ES, Form 1–EZ, and Form 1 and (for single-employer plans only) Schedule A to Form 1. Form 1–ES is issued, with instructions, in the PBGC's Estimated Premium Payment Package. Form 1–EZ, Form 1 and Schedule A are issued, with instructions, in the PBGC's Annual Premium Payment Package.

The premium forms are needed to determine the amount and record the payment of PBGC premiums, and the submission of forms and retention and submission of records are needed to enable the PBGC to perform premium audits. The plan administrator of each pension plan covered by Title IV of ERISA is required to file one or more of the premium payment forms each year. The PBGC uses the information on the premium payment forms to identify the plans paying premiums and to verify whether plans are paying the correct amounts. That information and the retained records are used for audit purposes.

In addition, section 4011 of ERISA and the PBGC's regulation on Disclosure to Participants (29 CFR part 4011) require plan administrators of certain underfunded single-employer pension plans to provide an annual notice to plan participants and beneficiaries of the plans' funding status and the limits on the Pension Benefit Guaranty Corporation's guarantee of plan benefits. The participant notice requirement only applies (subject to certain exemptions) to plans that must pay a variable rate premium. In order to monitor compliance with Part 4011, plan administrators must indicate on Form 1–EZ or Schedule A to Form 1 that the participant notice requirements have been complied with.

The collection of information under the regulation on Payment of Premiums, including Form 1–ES, Form 1–EZ, Form 1, and Schedule A to Form 1, and related instructions has been approved by OMB under control number 1212–0009. This collection of information also includes the certification of compliance with the participant notice requirements (but not the participant notices themselves). The PBGC is revising the forms and instructions to clarify them and make them easier to use. The PBGC is requesting that OMB extend its approval of this collection of information, as revised, for three years from the date of approval. (The participant notices constitute a different collection of information that has been separately approved by OMB.) An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The PBGC estimates that it receives responses annually from about 37,700 plan administrators and that the total annual burden of the collection of information is about 2,540 hours and $9,657,780.

Issued in Washington, DC, this 4th day of December, 2001.

Stuart A. Sirkin,

Director, Corporate Policy and Research Department, Pension Benefit Guaranty Corporation.

BILLING CODE 7708–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 35–27471]

Filings Under the Public Utility Holding Company Act of 1935, as amended ("Act")

November 30, 2001.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated under the Act. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) is/are available for public inspection through the Commission's Branch of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by December 26, 2001, to the Secretary, Securities and Exchange Commission, Washington, DC 20549–0609, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for hearing should identify specifically the issues of facts or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After December 26, 2001, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Allegheny Energy, Inc., et al. (70–9897)

Allegheny Energy, Inc. ("Allegheny"), a registered holding company; Allegheny Ventures, Inc. ("Ventures"), a direct wholly owned nonutility subsidiary company of Allegheny, both located at 10435 Downsville Pike, Hagerstown, Maryland 21740; Allegheny Energy Supply Company, L.L.C. ("AE Supply"), 4350 Northern Pike, Monroeville, Pennsylvania 15146–2841, a direct wholly owned generating subsidiary company of Allegheny; and Allegheny Energy Global Markets, L.L.C. ("AE Global"), 10435 Downsville Pike, Hagerstown, Maryland 21740, a direct wholly owned subsidiary of AE Supply that will cease to exist upon completion of the requested transactions, ("Applicants"), have filed an application-declaration ("Application") under sections 3(a)(2), 6(a), 7, 9(a), 10, 12(b), 12(c), 12(d), 32 and 33 of the Act, and rules 43, 44, 45, 46, 53, 54, 90 and 91 under the Act.

I. Background

A. Summary

Applicants request financing authority and request authority to increase its investment in exempt wholesale generators ("EWGs") and foreign utility companies ("FUCOs"). In addition, Applicants seek authority to restructure AE Supply, which includes among other things: reincorporating AE Supply in Maryland; merging AE Global,[1] an energy trading subsidiary formed under rule 58, into the restructured AE Supply ("New AE Supply"); and transferring some of Allegheny's membership interests in generation to New AE Supply. New AE Supply also seeks a section 3(a)(2) exemption from registration.

B. The Allegheny System

Allegheny is a diversified energy company. The Allegheny companies consist of three regulated electric public utility companies, West Penn Power Company ("West Penn"), Monongahela Power Company ("Monongahela Power") and The Potomac Edison Company ("Potomac Edison"), and a regulated public utility natural gas company, Mountaineer Gas Company, which is a wholly owned subsidiary of Monongahela Power (collectively, "Operating Companies and d/b/a, "Allegheny Power"). The subsidiaries of Allegheny, other than the Operating Companies and AE Supply are referred to as ("Other Subsidiaries").

AE Supply is an electric generating company for the Allegheny system. AE Supply is a public utility company within the meaning of the Act. AE Supply is not a utility for purposes of state regulation nor is it subject to regulation as an electric public utility in any of the states in which it operates. It also manages and operates electric generation owned by the regulated utilities d/b/a Allegheny Power. AE Supply owns, operates, and markets competitive retail and wholesale electric generation.

Allegheny Ventures, a nonutility subsidiary of Allegheny, actively invests in and develops energy-related projects through its wholly owned subsidiary Allegheny Energy Solutions. Allegheny Ventures also invests in and develops telecommunications projects through Allegheny Communications Connect, Inc., an exempt telecommunications company ("ETC") under section 34 of the Act.

C. Existing Financing Authority

Under a series of orders ("Money Pool and Financing Orders"),[2] the Allegheny system companies were authorized to engage in certain financing transactions and to establish and participate in a money pool, among other things. Also, by order dated April 20, 2001, HCAR No. 27383, the Commission authorized Allegheny and/or AE Supply to issue to unaffiliated third parties guarantees, short-term debt, and long-term debt through July 31, 2005, up to an aggregate amount of $430 million.

II. Requested Financing Authority

A. Summary

Applicants state that increased financing authority is needed to build new electric generation facilities and to purchase existing generation facilities. Allegheny states that its plans to acquire and/or build additional generating facilities, if consummated, would bring Allegheny's aggregate investment in EWGs and FUCOs in excess of 50% of its consolidated retained earnings.

Through July 31, 2005 ("Authorization Period"), Applicants seek authority for: Allegheny to issue up to $1 billion in equity securities; Allegheny and AE Supply to issue short-term debt and long-term debt in an aggregate amount up to $4 billion; and Allegheny and/or its subsidiaries to issue up to $3 billion in guarantees. The total debt and equity authorization requested is $4 billion with the option to utilize up to $1 billion for equity issuance. Also, Applicants request authorization to form capital investment subsidiaries ("Capital Corps"), and for Applicants to engage in intrasystem financings with each other, with the Other Subsidiaries, and between the Other Subsidiaries in an aggregate amount not to exceed $4 billion outstanding during the Authorization Period ("Intrasystem Financing Limit"). The aggregate amount of financing obtained by Allegheny during the Authorization Period from issuance and sale of preferred securities, when combined with the amount of common stock, short-term debt, long-term debt, and guarantees, issued and then outstanding, shall not exceed $7 billion ("Aggregate Financing Limit").

[1] AE Supply formed AE Global to acquire Global Energy markets from Merrill Lynch in S.E.C. File No. 70–9833.

[2] HCAR No. 25462 (January 29, 1992); HCAR No. 25481 (February 28, 1992); HCAR No. 25581 (July 14, 1992); HCAR No. 25919 (November 5, 1993); HCAR No. 26418 (November 28, 1995); HCAR No. 26506 (April 16, 1996); HCAR No. 26804 (December 23, 1997); HCAR No. 27030 (May 19, 1999); HCAR No. 27084 (October 8, 1999); and HCAR No. 27199 (July 14, 2001).

The proceeds will be used for general corporate purposes, including: (1) Payments, redemptions, acquisitions and refinancing of outstanding securities issued by Applicants; (2) acquisitions of and investments in EWGs and FUCOs, provided that Allegheny's aggregate investment in these projects does not exceed the requested limit;[3] (3) loans to, and investments in, other system companies; and (4) other lawful corporate purposes permitted under the Act. Proceeds may also be used to invest in, or acquire interests under rule 58 to the extent permitted by rule 58 ("Rule 58 Companies").

B. Financing Parameters

Financings by the Applicants will be subject to the following conditions ("Financing Conditions"): (1) During the Authorization Period, the common stock equity of Allegheny, on a consolidated basis, and of each of the Operating Companies, individually, will not fall below 30% of its total capitalization; (2) Allegheny will maintain its senior unsecured long-term debt rating at investment grade level, as established by a nationally recognized statistical rating organization; (3) the effective cost of money on long-term debt borrowings will not exceed the greater of (a) 400 basis points over comparable term U.S. Treasury securities and (b) the gross spread over U.S. Treasuries that is consistent with similar securities of comparable credit quality and maturities issued by other companies; (4) the effective cost of money on short-term debt borrowings will not exceed the greater of (a) 300 basis points over the comparable term London Interbank Offered Rate ("LIBOR") and (b) a gross spread over LIBOR that is consistent with similar securities of comparable credit quality and maturities issued by other companies; (5) the dividend rate on any series of preferred securities will not exceed the greater of (a) 500 basis points over the yield to maturity of a comparable term U.S. Treasury security and (b) a rate that is consistent with similar securities of comparable credit quality and maturities issued by other companies; (6) the underwriting fees, commissions, and other similar remuneration paid in connection with the non-competitive issue, sale or distribution of a security will not exceed 5% of the principal or total amount of the security being issued; (7) the maturity of long-term debt will be not less than one year and not exceed thirty years; and (8) short-term debt will have a maturity of not less than one day and not more than 364 days.

C. Short-Term and Long-Term Debt

Allegheny and AE Supply request authorization, through the Authorization Period, to issue and sell an aggregate of up to $4 billion of short-term debt and/or long-term debt at any time outstanding to non-associate banks and/or other parties. Debt of AE Supply may be nonrecourse to Allegheny. Also, through the Authorization Period, Allegheny seeks authorization to transfer some or all of the debt proceeds into AE Supply in the form of contributions or interest-bearing loan(s).

D. Common and Preferred Stock

Allegheny proposes to issue, through the Authorization Period, up to $1 billion at any time outstanding of equity securities. Allegheny may issue common stock or options, warrants or other stock purchase rights exercisable for common stock in public or privately negotiated transactions for cash or as consideration for the equity securities or assets of other companies, provided that the acquisition of any such equity securities or assets has been authorized in this proceeding or in a separate proceeding or is exempt under the Act or the rules under the Act. Allegheny common stock issued in connection with acquisitions of companies shall be valued, for purposes of determining compliance with the Aggregate Financing Limit, at its market value as of the date of issuance (or if appropriate at the date of a binding contract providing for the issuance).

Allegheny seeks to have the flexibility to issue its authorized preferred stock or other types of preferred securities (including, without limitation, trust preferred securities or monthly income preferred securities) directly or indirectly through one or more special-purpose financing subsidiaries organized by Allegheny. Preferred stock or other types of preferred securities may be issued in one or more series with such rights, preferences, and priorities as may be designated in the instrument creating each series, as determined by Allegheny's board of directors. Dividends or distributions on preferred securities will be made periodically and to the extent funds are legally available for this purpose, but may be made subject to terms which allow the issuer to defer dividend payments for specified periods. Preferred securities may be convertible or exchangeable into shares of Allegheny common stock or unsecured indebtedness.

Stock financings may be affected in accordance with underwriting agreements of a type generally standard in the industry. Public distributions may be made through private negotiation with underwriters, dealers or agents or effected through competitive bidding among underwriters. In addition, sales may be made through private placements or other non-public offerings to one or more persons. All stock sales will be at rates or prices and under conditions negotiated or based upon, or otherwise determined by, competitive capital markets.

E. Guarantees

Allegheny proposes to enter into Guarantees from time to time with respect to the obligations of the Operating Companies, AE Supply and the Other Subsidiaries of Allegheny ("Allegheny Guarantees") during the Authorization Period in an aggregate principal amount, together with the Subsidiary Guarantees (as defined below), not to exceed $3 billion ("Aggregate Guarantee Limitation"), based on the amount at risk, outstanding at any one time, exclusive of (1) any guarantees or credit support arrangements authorized by the Commission in separate proceedings and (2) any guarantees exempt under rule 45(b). Allegheny seeks to provide credit support in connection with AE Supply's purchase and operation of generation assets and in connection with the trading by AE Global in the ordinary course of AE Global's energy marketing and trading activities and for other purposes.

In addition, the Applicants request authorization for AE Supply and the Other Subsidiaries to enter into Guarantees from time to time, with respect to the obligations of any of the Other Subsidiaries, as may be appropriate, to enable AE Supply and/or the Other Subsidiaries to carry on their respective businesses ("Subsidiary Guarantees") in an aggregate principal amount, together with the Allegheny Guarantees, not to exceed the Aggregate Guarantee Limitation, based on the amount at risk, outstanding at any one time. The Aggregate Guarantee Limitation excludes: (1) Any such guarantees or credit support arrangements authorized by the Commission in separate proceedings and (2) any such guarantees exempt under rule 45(b).

[3] Allegheny seeks authority to apply the proceeds of equity issuances, short-term debt, long-term debt and guarantees to increase its "aggregate investment" in EWGs and FUCOs up to $2.0 billion, or 207% of its consolidated retained earnings. Applicants state that Allegheny's aggregate investment in EWGs and FUCOs as of March 31, 2001 was approximately $462 million, or 49% of its consolidated retained earnings.

Allegheny, AE Supply, or the Other Subsidiaries which issues a guarantee may charge a fee for each guarantee it provides, which fee will not exceed the cost of obtaining the liquidity necessary to perform the guarantee.

F. Capital Corporations

Applicants seek authorization to form one or more Capital Corps as direct or indirect subsidiaries. Capital Corps will be limited liability companies, corporations, trusts, partnerships or other entities formed to engage in tax efficient and financially efficient transactions with Applicants or any of their respective subsidiaries for the acquisition of EWGs and FUCOs, Rule 58 Companies, and other general corporate purposes permitted under the Act.

Applicants seek authorization through the Authorization Period to: (1) Make capital contributions to the Capital Corps in exchange for equity ownership; (2) have Capital Corps make interest-bearing loan(s) of up to $4 billion to AE Supply evidenced by note(s); and (3) permit Capital Corps, as the loan(s) are repaid, to make additional borrowings available to AE Supply and its subsidiaries from the interest and principal payments it receives. Any intrasystem loans will count against the Intrasystem Financing Limit. These borrowings will be used for authorized acquisitions, EWGs and FUCOs, Rule 58 Companies, or other corporate purposes. The Applicants state that the loans will not affect Applicants' debt-equity ratio and will provide for a tax efficient capital structure.

Applicants also request authorization for Capital Corps to serve as financing entities and to issue debt and equity securities, including trust preferred securities, to third parties in the event the issuances are not exempt under rule 52. Specifically, Applicants request authorization to: (1) Issue debentures or other evidences of indebtedness to financing entities in return for the proceeds of the financing; (2) acquire voting interests or equity securities issued by the financing entities to establish ownership of the financing entities; and (3) guarantee financing entities' obligations.

Applicants and the Other Subsidiaries may enter into expense agreements with their respective financing entity, and they would agree to pay all expenses of the financing entity.

Any amounts issued by the financing entities to third parties under these authorizations will count against the Aggregate Financing Limit. However, the underlying intrasystem mirror debt and guarantee will not count against any applicable Intrasystem Financing Limit or the separate guarantee limits applicable to Allegheny or the subsidiary.

G. Intrasystem Financings

Applicants request authorization to engage in intrasystem financings with each other, with the Other Subsidiaries, and between the Other Subsidiaries in an aggregate amount not to exceed $4 billion outstanding during the Authorization Period. Financings will be in the form of cash capital contributions, open account advances and/or loans. The interest rate on intrasystem loans payable by a borrowing company will parallel the cost of capital of the lending company. This request excludes: (1) Financings that are exempt under rules 45(b) and 52, as applicable; and (2) amounts outstanding from time to time under the Money Pool and Financing Orders. Loans made by the Capital Corps to AE Supply and its subsidiaries will count against this Intrasystem Financing Limit to the extent described.

H. Interest Rate and Currency Risk Management

Applicants request authority to enter into, perform, purchase and sell financial instruments intended to manage the volatility of interest rates and currency exchange rates, including but not limited to interest rate and currency swaps, caps, floors, collars and forward agreements or any other similar agreements ("Instruments") in connection with the issuance and sale of the short-term debt and long-term debt described. Applicants will employ Instruments as a means of prudently managing the interest rate and currency risks associated with any of their outstanding debt issued under this Application or an applicable exemption by, in effect, synthetically (1) Converting variable rate debt to fixed rate debt, (2) converting fixed rate debt to variable rate debt, (3) limiting the impact of changes in interest rates resulting from variable rate debt; and (4) hedging currency exposures of foreign currency denominated debt. In addition, Applicants may utilize Instruments for planned issuances of debt securities in order to lock-in current interest rates and or to manage interest rate and currency risks in future periods. The notional amount of any Instruments will not exceed that of the underlying debt instrument. Applicants will not engage in "speculative" transactions, and agree to only enter into Instruments with counterparties which have, or whose obligations are guaranteed by a party with, senior debt ratings, as published by Standard & Poor's, that are greater than or equal to "BBB+," or an equivalent rating from Moody's Investors Service, Inc. or Fitch IBCA, Inc. Applicants represent that the Instruments to be entered into will qualify for hedge accounting treatment under GAAP. Allegheny will comply with the financial disclosure requirements of the Financial Accounting Standards Board.

I. Payment of Dividends

Applicants request authorization for AE Supply and the Other Subsidiaries to pay dividends, from time to time through the Authorization Period, out of capital and unearned surplus (including revaluation reserve), to the extent permitted under applicable corporate law. Applicants anticipate that there will be situations in which one or more of their respective direct or indirect subsidiaries will have unrestricted cash available for distribution in excess of any such company's current and retained earnings. In such situations, the declaration and payment of a dividend would have to be charged, in whole or in part, to capital or unearned surplus.

III. Request To Reorganize AE Supply

Applicants seek authority to restructure AE Supply ("Restructuring"). First, AE Supply will be reincorporated in Maryland by forming a new corporation in Maryland ("New AE Supply") and then merging AE Supply with and into New AE Supply. New AE Supply is the surviving entity.

In addition, the proposed Restructuring, will include: (a) The transfer from Allegheny to New AE Supply of, and the reorganization of, Allegheny Energy Supply Hunlock Creek, LLC ("Hunlock Creek")[4] and Green Valley Hydro, LLC ("Green Valley");[5] (b) the reorganization of Allegheny Energy Supply Conemaugh, LLC ("Conemaugh")[6] and Allegheny

[4] The transfer of Hunlock Creek will be made as a capital contribution in the amount of the book value of approximately $21 million. New AE Supply will form a new single-member Delaware limited liability company to be referred to as Hunlock Creek II. New AE Supply proposes to merge Hunlock Creek with and into Hunlock Creek II, with Hunlock Creek II as the surviving entity.

[5] The transfer of Green Valley will be made as a capital contribution in the amount of the book value of approximately $2 million. New AE Supply will form a new single-member Virginia limited liability company to be referred to as Green Valley II. New AE Supply proposes to merge Green Valley with and into Green Valley II, with Green Valley II as the surviving entity.

[6] New AE Supply will form a single-member Delaware limited liability company, to be referred to as Conemaugh II. New AE Supply proposes to

Continued

Generating Company ("AGC");[7] and (c) the merger of AE Global with and into New AE Supply.

New AE Supply seeks a section 3(a)(2) exemption from registration under the Act. As a Maryland corporation, New AE Supply will be predominantly a public utility company whose operations do not extend beyond the state of organization and states contiguous thereto. New AE Supply will operate in Maryland, its state of incorporation, and in Virginia, West Virginia, and Pennsylvania, which are all contiguous to Maryland.

New AE Supply will be a holding company solely through its ownership of the following public utility companies: (a) Conemaugh; (b) Green Valley; and (c) AGC. Each of these entities was formed under the laws of Delaware and is exclusively engaged in selling power at wholesale.[8]

As part of the restructuring, Allegheny Energy Service Corporation ("AESC") proposes to expand the scope of services to be provided to New AE Supply to include energy trading activities. AESC will engage in the trading activities solely as agent on behalf of New AE Supply. All trades will be booked at New AE Supply, and will not affect the financial condition or operations of AESC or the Operating Companies. AESC and New AE Supply, as successor to AE Supply, request authority to revise the service agreement to provide for AESC to effect trading transactions for and on behalf of New AE Supply involving electricity and other types of energy commodities, and hedging and/or financial transactions, including derivatives, future contracts, options and swaps, including, without limitation, electric power, oil, natural and manufactured gas, emission allowances, coal, refined petroleum products and natural gas liquids and to provide incidental related services, such as fuel management, storage and procurement services. All services will be provided by AESC at cost computed in accordance with rules 90 and 91 under the Act.

merge Conemaugh with and into Conemaugh II, with Conemaugh II as the surviving entity.

[7] New AE Supply will form a single-member Virginia limited liability company, to be referred to as AGC, LLC. New AE Supply proposes to merge AGC with and into AGC, LLC, with AGC, LLC as the surviving entity. The purpose of the reorganization of AGC is to effect a "liquidation" of AGC for tax purposes, which may enhance the tax treatment to Allegheny in the future, while maintaining AGC, LLC as a separate legal entity.

[8] At an appropriate time, AE Supply will seek to certify each entity as an EWG under section 32 of the Act. In the interim, they will remain public utility companies under the Act.

Alabama Power Company (70–9955)

Alabama Power Company ("Alabama Power"), 600 North 18th Street, Birmingham, Alabama 35291, a wholly owned public utility subsidiary of The Southern Company, a registered holding company, has filed a declaration under section 12(d) of the Act, and rules 44 and 54 under the Act.

Alabama Power proposes to sell, from time to time prior to December 31, 2006, distribution line poles located in Alabama to non-affiliated telephone and other non-electric utility companies ("Purchasers"). Alabama Power would convey the poles to the Purchasers by a bill of sale for a negotiated cash sale price that would exceed Alabama Power's average book value for the number of distribution poles of each class being sold, and the aggregate price of the sales would not exceed $30 million. The conveyance would include a release of the poles from Alabama's first mortgage indenture lien. The $30 million authority requested is in addition to any exceptions otherwise provided by rules under the Act relating to sales of utility securities or assets.

Alabama Power and each Purchaser have or will have entered into a joint use agreement under which each party may attach facilities to poles belonging to the other party, with each party obligated to the other for rental of space on poles owned by the other party. The proposed sale of poles is for the purpose of equalizing the rental payments under those joint use agreements, and it is anticipated that there will be no substantial change in the use of the poles.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 01–30324 Filed 12–6–01; 8:45 am]

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC–25305; File No. 812–12544]

Touchstone Variable Series Trust, *et al.*

December 3, 2001.

AGENCY: Securities and Exchange Commission (the "Commission").

ACTION: Notice of an application for an order of exemption pursuant to Section 6(c) of the Investment Company Act of 1940 (the "1940 Act") granting relief from Sections 9(a), 13(a), 15(a) and 15(b) of the 1940 Act and Rules 6e–2 and 6e–3(T) thereunder.

Applicants: Touchstone Variable Series Trust and Touchstone Advisors, Inc. (collectively, "Applicants").

Summary of Application: Applicants seek an order of exemption from the provisions of Sections 9(a), 13(a), 15(a) and 15(b) of the 1940 Act and Rules 6e–2(b)(15) and 6e–3(T)(b)(15) thereunder to the extent necessary to permit shares of any current or future series of Touchstone Variable Series Trust ("TVST") and shares of any other investment company that is offered as a funding medium for insurance products and for which Touchstone Advisors, Inc. ("Touchstone Advisors" or the "Manager") or any affiliates thereof may now or in the future serve as manager, investment adviser, sub-adviser, administrator, principal underwriter or sponsor (TVST and such future investment companies are collectively referred to herein as the "Trusts" and individually as a "Trust"; the current and future series of the Trusts are collectively referred to herein as the "Funds" and individually as a "Fund") to be sold and held by: (1) Variable annuity and variable life insurance separate accounts ("Participating Separate Accounts") of both affiliated and unaffiliated life insurance companies ("Participating Insurance Companies"); (2) qualified pension and retirement plans ("Participating Plans") outside the separate account context; and (3) the Manager and any other affiliated and unaffiliated registered investment advisor (each, a "Subadvisor") retained by the Manager to manager the portfolio securities of a Touchstone Fund, and any affiliate of the Manager and affiliates of the Subadvisors (collectively, the "Participating Investors").

Filing Date: The original application was filed on June 5, 2001. An amended and restated application was filed on November 28, 2001.

Hearing or Notification of Hearing: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on December 28, 2001, and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a

hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549. Applicants, c/o Frost Brown Todd LLC, 2200 PNC Center, 201 East Fifth Street, Cincinnati, Ohio 45202, Attention: Karen M. McLaughlin, Esq. or Kevin L. Cooney, Esq.

FOR FURTHER INFORMATION CONTACT: Alison Toledo, Senior Counsel, or Lorna Macleod, Branch Chief, Office of Insurance Products, Division of Investment Management at (202) 942–0670.

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application is available for a fee from the Commission's Public Reference Branch, 450 Fifth Street, NW, Washington, DC, 20549–0102 (202–942–8090).

Applicants' Representations

1. TVST is a Massachusetts business trust that is registered under the 1940 Act as an open-end diversified management investment company. TVST currently consists of, and offers shares of beneficial interests in, separate portfolios (each a "Touchstone Fund" and collectively the "Touchstone Funds"), each of which has its own investment objectives and policies. TVST may in the future issue shares of additional portfolios.

2. Touchstone Advisors is registered as an investment adviser under the Investment Advisers Act of 1940, as amended, and is the investment adviser for each Touchstone Fund. Touchstone Advisors in turn has retained Subadvisors to manage the portfolio securities of each Touchstone Fund.

3. Shares of the Funds will be offered to Participating Separate Accounts of Participating Insurance Companies to serve as investment vehicles for various types of insurance products, which may include variable annuity contracts, single premium variable life insurance contracts, scheduled premium variable life insurance contracts, modified single premium variable life insurance policies and flexible premium variable life insurance contracts.

4. Each Participating Insurance Company will have the legal obligation to satisfy all requirements applicable to it under both state and federal securities laws in connection with any variable contract issued by such company. Each Participating Insurance Company will enter into a fund participation agreement with the applicable Trust on behalf of the Fund in which the Participating Insurance Company invests. With respect to the Participating Insurance Companies, the role of the funds, insofar as the federal securities laws are applicable, will be limited to offering shares to Participating Separate Accounts and fulfilling any conditions the Commission may impose upon granting the order requested by this Application.

5. Shares of the Funds will also be offered to Participating Plans. It is anticipated that Participating Plans may choose a Fund (or any one or more series thereof) as the sole investment under the Participating Plan or as one of several investments. Participating Plan participants may or may not be given an investment choice among investment alternatives, depending on the plan itself. Shares of the Funds sold to Participating Plans would be held by the trustee(s) of these plans as mandated by Section 403(a) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). With respect to the Participating Plans, insofar as federal securities laws are applicable, the role of the Funds will be limited to offering shares to Participating Plans and fulfilling any conditions the Commission may impose upon granting the order requested by this Application.

6. Shares of each Fund also may be offered to the Participating Investors. When the Participating Investors invest in the Funds, they will have the legal obligation of satisfying all applicable requirements under the federal securities laws and other applicable laws. With respect to the Participating Investors, insofar as the federal securities laws are applicable, the role of the Funds will be limited to offering shares to the Participating Investors and fulfilling any conditions the Commission may impose upon granting the order requested by this Application.

Applicants' Legal Analysis

1. Applicants request an order of the Commission pursuant to Section 6(c) of the 1940 Act exempting the Participating Separate Accounts of Participating Insurance Companies (and, to the extent necessary, any investment adviser, sub-adviser, principal underwriter, manager, administrator or sponsor of a Fund) from Sections 9(a), 13(a), 15(a), and 15(b) of the 1940 Act, and Rules 6e–2(b)(15) and 6e–3(T)(b)(15) thereunder (and any permanent rule comparable to Rule 6e–3(T)), to the extent necessary to permit shares of the Funds to be offered and sold to, and held by: (a) Variable annuity separate accounts and variable life insurance separate accounts (including both scheduled and flexible premium variable life insurance separate accounts) of the same life insurance company or of affiliated life insurance companies; (b) separate accounts of unaffiliated life insurance companies (including both variable annuity separate accounts and variable life insurance separate accounts); (c) trustees of qualified pension or retirement plans; and (d) the Participating Investors.

2. Section 6(c) of the Act authorizes the Commission to exempt any person, security or transaction from the provisions of the 1940 Act and rules promulgated thereunder, if and to the extent that, such exemption is necessary or appropriate in the public interest or for the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

3. In connection with the funding of scheduled premium variable life insurance contracts issued through a separate account registered under the 1940 Act as a unit investment trust, Rule 6e–2(b)(15) under the 1940 Act provides partial exemptions from Sections 9(a), 13(a), 15(a), and 15(b) of the 1940 Act. Section 9(a) of the 1940 Act provides that it is unlawful for any company to serve as an investment adviser or principal underwriter of any registered open-end investment company if an affiliated person of that company is subject to disqualification enumerated in Section 9(a)(1) or (2) of the 1940 Act. Rules 6e–2(b)(15)(i) and (ii) provide partial exemptions from Section 9(a). Rule 6e–2(b)(15)(iii) provides a partial exemption from Sections 13(a), 15(a) and 15(b) of the 1940 Act to the extent those sections have been deemed by the Commission to require "pass-through" voting with respect to an underlying fund's shares.

4. The exemptions granted by Rule 6e–2(b)(15) are available only where all of the assets of the separate account consist of the shares of one or more registered management investment companies that offer their shares "exclusively to variable life insurance separate accounts of the life insurer, or of any affiliated life insurance company * * *." Therefore the relief granted by Rule 6e–2(b)(15) is not available if the scheduled premium variable life insurance separate account owns shares of a management company that also offers its shares to a flexible premium variable life insurance or variable annuity separate account of the same insurance company or any other insurance company. The use of a common management investment company as the underlying investment medium for both variable annuity and variable life insurance separate accounts of the same life insurance company or

of any affiliated life insurance company is referred to as "mixed funding."

5. In addition, applicants assert that the relief granted by Rule 6e–2(b)(15) is not available if the scheduled premium variable life insurance separate account owns shares of an underlying management company that also offers its shares to separate accounts funding variable contracts of one or more unaffiliated life insurance companies. The use of a common management company as the underlying investment medium for variable annuity and/or variable life insurance separate accounts of one insurance company and separate accounts funding variable contracts of one or more unaffiliated life insurance companies is referred to as "shared funding."

6. Moreover, although the relief granted by Rule 6e–2(b)(15) is not affected by the purchase of shares of the Funds by Participating Plans and the Participating Investors, because the relief granted by Rule 6e–2(b)(15) is available only where shares are offered exclusively to variable life insurance separate accounts, additional exemptive relief may be necessary if the shares of the Funds are also sold to Participating Plans or to the Participating Investors.

7. In connection with the funding of flexible premium variable life insurance contracts issued through a separate account registered under the 1940 Act as a unit investment trust, Rule 6e–3(T)(b)(15) under the 1940 Act provides partial exemptions from Sections 13(a), 15(a), and 15(b) of the 1940 Act to the extent that those sections have been deemed by the Commission to require "pass-through" voting with respect to an underlying fund's shares. In addition, Rule 6e–3(T)(b)(15) provides a partial exemption from Section 9(a) to the extent that such section would render a company ineligible to serve as an investment adviser or principal underwriter of any registered open-end management investment company, where an officer, director, employee or affiliated person of such company is subject to a disqualification enumerated in Section 9(a), but the individual subject to such disqualification does not participate directly in the management or administration of the underlying management investment company.

8. The exemptions granted to a separate account by Rule 6e–3(T)(b)(15) are available only where all of the assets of the separate account consist of the shares of one or more registered management investment companies which offer their shares "exclusively to separate accounts of the life insurer, or of any affiliated life insurance company offering either scheduled premium variable life insurance contracts or flexible premium variable life insurance contracts, or both; or which also offer their shares to variable annuity separate accounts of the life insurer or of an affiliated life insurance company." Therefore, Rule 6e–3(T)(b)(15) grants the exemptions if the underlying fund engages in mixed funding for a flexible premium variable life insurance separate account, subject to certain conditions, but does not permit shared funding.

9. Applicants asset that the relief provided by Rule 6e–3(T) is not relevant to the purchase of shares of the Funds by Participating Plans or by the Participating Investors. However, because the relief granted by Rule 6e–3(T)(b)(15) is available only where shares of the underlying fund are offered exclusively to separate accounts, or to life insurers in connection with the operation of a separate account, additional relief may be necessary if shares of the Funds are also sold to Participating Plans or to the Participating Investors.

10. Applicants assert that if the Funds were to sell their shares only to Participating Plans or to the Participating Investors, no exemptive relief would be necessary. None of the relief provided for in Rules 6e–2(b)(15) and 6e–3(T)(b)(15) relates to qualified pension and retirement plans or to a registered investment company's ability to sell its shares to such plans or to the Participating Investors. Exemptive relief in connection with the sale of shares of the Funds to Participating Plans or the Participating Investors is requested only because Applicants are seeking relief under Rules 6e–2 and 6e–3(T) and do not wish to be denied such relief if the Funds sell shares to Participating Plans or to the Participating Investors.

11. Applicants state that the current tax law permits the Funds to sell their shares to the Participating Plans and to the Participating Investors. Section 817(h) of the Internal Revenue Code (the "Code") imposes certain diversification requirements on the underlying assets of variable contracts. The Code provides that variable contracts shall not be treated as an annuity contract or life insurance contract for any period (and any subsequent period) in which the underlying assets are not adequately diversified as prescribed by the U.S. Department of the Treasury (the "Treasury Department"). The Treasury Department has issued regulations (Treas. Reg. 1.817–5) (the "Treasury Regulations") which establish diversification requirements for investment portfolios underlying variable contracts. To meet these diversification requirements, all of the beneficial interests in the investment company must be held by the segregated asset accounts of one or more insurance companies. The regulations, however, do contain certain exceptions to this requirement, one of which allows shares in an investment company to be held by the trustees of a pension or retirement plan as well as segregated asset accounts of insurance companies in connection with their variable contracts. (*See* Treas. Reg. § 1.817–5(f)(3)(iii)). Applicants assert that another exception allows shares in an investment company to be held by the investment manager of the investment company and certain companies related to the investment manager as well as the segregated asset accounts of insurance companies (Treas. Reg. § 1.817–5(f)(3)(ii)).

12. Applicants state that the promulgation of Rules 6e–2 and 6e–3(T) preceded the issuance of these Treasury Regulations, and that it is possible for shares of an investment company to be held by the trustee of a qualified pension or retirement plan or the investment company's investment manager and certain related companies without adversely affecting the ability of shares in the same investment company to be held by the separate accounts of insurance companies in connection with their variable contracts. Given the then-current tax law, the sale of shares of the same investment company to separate accounts of insurance companies, trustees of qualified plans or the investment company's investment manager and companies related to the investment manager could not have been envisioned at the time of the adoption of Rules 6e–2(b)(15) and 6e–3(T)(b)(15).

13. In general, Section 9(a) of the 1940 Act disqualifies any person convicted of certain offenses, and any company affiliated with that person, from acting or serving in various capacities with respect to a registered investment company. Section 9(a) provides that it is unlawful for any company to serve as investment adviser to, or principal underwriter for, any registered open-end investment company if an affiliated person of that company is subject to a disqualification enumerated in Sections 9(a)(1) or (2). Rules 6e–2(b)(15)(i) and (ii) and Rules 6e–3(T)(b)(15)(i) and (ii) provide partial exemptions from Section 9(a) under certain circumstances, subject to limitations on mixed and shared funding imposed by the 1940 Act and the rules thereunder. These exemptions limit the application of the eligibility restrictions to affiliated individuals or companies that directly

participate in the management of the underlying management company.

14. Applicants state that the relief provided by Rules 6e–2(b)(15)(i) and 6e–3(T)(b)(15)(i) under the 1940 act permits a person disqualified under Section 9(a) to serve as an officer, director, or employee of the life insurer, or any of its affiliates, so long as that person does not participate directly in the management or administration of the underlying fund.

15. Applicants assert that the relief provided by Rules 6e–2(b)(15)(ii) and 6e–3(T)(b)(15)(ii) under the 1940 Act permits a life insurer to serve as the underlying fund's investment adviser or principal underwriter, provided that none of the insurer's personnel who are ineligible pursuant to Section 9(a) are participating in the management or administration of the underlying fund.

16. Applicants state that the partial relief granted in Rules 6e–2(b)(15) and 6e–3(T)(b)(15) from the requirements of Section 9 of the 1940 Act, in effect, limits the amount of monitoring necessary to ensure compliance with Section 9 to that which is appropriate in light of the policy and purposes of Section 9. The rules recognize that it is not necessary for the protection of investors or the purposes fairly intended by the policy and provisions of the 1940 Act to apply the provisions of Section 9(a) to many individuals in a typical insurance company complex, most of whom typically will have no involvement in matters pertaining to investment companies in that organization. Applicants assert that it is also unnecessary to apply Section 9(a) to the many individuals employed by Participating Insurance Companies (or affiliated companies of Participating Insurance Companies) who do not participate in the administration or management of the Funds.

17. The Applicants state that there is no regulatory purpose in extending the monitoring requirements to embrace a full application of Section 9(a)'s eligibility restrictions because of mixed and shared funding or sales to Participating Plans. Participating Insurance Companies and Participating Plans are not expected to play any role in the management or administration of the Funds. It is expected that those individuals who participate in the management or administration of the Funds will remain the same regardless of which separate accounts, insurance companies or qualified plans use the Funds. Therefore, applying the monitoring requirements of Section 9(a) because of investments by Participating Insurance Companies or Participating Plans would not serve any regulatory purpose. Furthermore, the increased monitoring costs would reduce the net rates of return realized by contract owners and plan participants.

18. Moreover, Applicants assert that the relief requested should not be affected by the sale of shares of the Funds to the Participating Investors. The eligibility restrictions of Section 9(a) will still apply to any officers, directors or employees of the Participating Investors who participate directly in the management or administration of the Funds.

19. Rules 6e–2(b)(15)(iii) and 6e–3(T)(b)(15)(iii) assume the existence of a pass-through voting requirement with respect to management investment company shares held by a separate account. Participating Insurance Companies will provide pass-through voting privileges to variable contract owners so long as the Commission interprets the 1940 Act to require pass-through voting privileges for variable contract owners. However, if the limitations on mixed funding and shared funding are observed, Rules 6e–2(b)(15)(iii) and 6e–3(T)(b)(15)(iii) provide exemptions from the pass-through voting requirements with respect to several significant matters.

20. Rules 6e–2(b)(15)(iii)(A) and 6e–3(T)(b)(15)(iii)(A)(*1*) provide that an insurance company may disregard the voting instructions of its contract owners with respect to the investments of an underlying fund, or any contract between a fund and its investment adviser, when required to do so by an insurance regulatory authority (subject to the provisions of paragraphs (b)(5)(i) and (b)(*7*)(ii)(A) of such Rules).

21. Rules 6e–2(b)(15)(iii)(B) and 6e–3(T)(b)(15)(iii)(A)(*2*) provide that, with respect to registered management investment companies whose shares are held by a separate account of an insurance company, the insurance company may disregard contract owners' voting instructions if the contract owners initiate any change in such company's investment objectives or any principal underwriter or investment adviser (provided that disregarding such voting instructions is reasonable and subject to the other provisions of paragraphs (b)(5)(ii) and (b)(7)(ii)(B) and (C) of Rules 6e–2 and 6e–3(T)).

22. Applicants state that in the case of a proposed change in the underlying fund's investment policies, the insurance company, in order to disregard contact owner voting instructions, must make a good faith determination that such a change either would: (a) Violate state law; or (b) result in investments that either (i) would not be consistent with the investment objectives of the separate account or (ii) would vary from the general quality and nature of investments and investments techniques used by other separate accounts of the company or of an affiliated life insurance company with similar investment objectives.

23. Applicants state that in the case of a change in an investment adviser or principal underwriter, the insurance company, in order to disregard contract owners' voting instructions, must make a good faith determination that either: (a) The proposed advisory fees would exceed the maximum rate that may be charged against the separate account's assets; or (b) the proposed adviser may be expected (i) to employ investment techniques that would vary from the general techniques used by the current adviser, or (ii) to manage the investments in a manner that either would be inconsistent with the investment objectives of the separate account or would result in investments that vary from certain standards.

24. Applicants state that Rule 6e–2 recognizes that a variable life insurance contract has important elements unique to insurance contracts and is subject to extensive state regulation of insurance. In adopting Rule 6e–2(b)(15)(iii), the Commission expressly recognized that state insurance regulators have authority, pursuant to state insurance laws or regulations, to disapprove or require changes in investment policies, investment advisers, or principal underwriters. The Commission also expressly recognized that state insurance regulators have authority to require an insurer to draw from its general account to cover costs imposed upon the insurer by a change approved by contract owners over the insurer's objection. The Commission, therefore, deemed exemptions from the pass-through voting requirements necessary "to assure the solvency of the life insurer and performance of its contractual obligations by enabling an insurance regulatory authority or the life insurer to act when certain proposals reasonably could be expected to increase the risks undertaken by the life insurer." In this respect, flexible premium variable life insurance contracts are identical to scheduled premium variable life insurance contracts. Therefore, the corresponding provisions of Rule 6e–3(T), which apply to flexible premium insurance contracts and permit mixed funding, were adopted in recognition of the same considerations as the Commission applied in adopting Rule 6e–2.

25. Applicants assert that the considerations that prompted the

Commission to include exemptions from pass-through voting requirements in both Rules 6e–2 and 6e–3(T) are no less important and necessary when an insurance company funds its separate accounts with underlying funds engaged in mixed funding and shared funding. Such funding does not compromise the goals of the insurance regulatory authorities or the Commission. In connection with mixed funding, the Commission may have wished to reserve wide latitude with respect to the once unfamiliar variable annuity product, but that product is now familiar, and there appears to be no reason for the maintenance of prohibitions against mixed funding arrangements.

26. Applicants note that when the Commission amended Rule 6e–3(T) in 1985, it considered the appropriateness of extending the partial exemptions from the pass-through voting requirements to separate accounts that invest in underlying funds offering their shares to variable contract separate accounts of both affiliated and unaffiliated life insurance companies (*i.e.*, shared funding). At that time, the Commission stated that shared funding was a new and somewhat complicated area from a regulatory perspective and reiterated its concerns about voting arrangements and irreconcilable conflicts in the area of mixed and shared funding. The Applicants believe that the Commission's concerns about voting arrangements and material irreconcilable conflicts are not warranted in the context of shared funding because offering shares of an underlying fund to separate accounts of unaffiliated life insurance companies does not increase the risk of material irreconcilable conflicts among shareholders of the Funds. Furthermore, the Commission's application experience over the past 15 years in crafting appropriate safeguards to deal with potential conflicts of interest arising from shared funding arrangements is reflected in the conditions proposed by the Applicants.

27. Applicants further assert that the offer and sale of shares of the Funds to Participating Plans or to the Participating Investors will not have any impact on the relief requested with respect to pass-through voting. Shares of the Funds sold to Participating Plans will be held by the trustees or custodians of the Participating Plans as required by Section 403(a) of ERISA or applicable provisions of the Code. The exercise of voting rights by Participating Plans, whether by the trustees, by participants, by beneficiaries, or by investment managers engaged by the Participating Plans, does not present the type of issues with respect to voting rights that are presented by variable life separate accounts. ERISA does not require pass-through voting to participants in qualified pension or retirement plans that are not registered as investment companies under the 1940 Act.

28. Applicants submit that Section 403(a) of ERISA provides that the trustee(s) must have exclusive authority and discretion to manage and control the investments of the Participating Plans with two exceptions: (a) When a Participating Plan expressly provides that the trustee(s) is (are) subject to the direction of a named fiduciary who is not a trustee, in which case the trustee(s) is (are) subject to proper directions made in accordance with the terms of the plan and not contrary to ERISA; and (b) when the authority to manage, acquire or dispose of assets of the plan is delegated to one or more investment managers pursuant to Section 402(c)(3) of ERISA. Unless one of the two exceptions stated in Section 403(a) applies, plan trustees have the exclusive authority and responsibility for voting proxies. When a named fiduciary appoints an investment manager, the investment manager has the responsibility to vote the shares held unless the right to vote such shares is reserved to the trustees or the named fiduciary. Accordingly, unlike the case with insurance company separate accounts, issues related to pass-through voting rights and potential material irreconcilable differences are not present with respect to Participating Plans that do not provide pass-through voting privileges to their participants.

29. Applicants note that some plans may provide participants with the right to give voting instructions. However, there is no reason to believe that participants in plans generally, or those in a particular plan, either as a single group or in combination with other plans, would vote in a manner that would disadvantage variable contract owners. Therefore, the purchase of shares of the Funds by Participating Plans that provide voting rights to participants does not present any complications not otherwise occasioned by mixed funding and shared funding.

30. Applicants further assert that certain complications are not present with respect to these Participating Plans because insurance regulations would not be applicable to the plans and the insurance company could not disregard votes cast by a plan trustee, even if the votes were based on plan participant instructions. Moreover, the conditions proposed by the Applicants, which are based on those imposed by the Commission in numerous exemptive orders related to sales to qualified retirement and pension plans, will provide the appropriate safeguards for dealing with such conflicts of interest.

31. Moreover, Applicants assert that the Participating Investors are not subject to any pass-through voting requirements. Accordingly, the issue of the resolution of material irreconcilable conflicts with respect to voting is not present with respect to the Participating Investors.

32. Applicants assert that the Commission's primary concern with respect to mixed and shared funding issues is that of potential conflicts of interest. Therefore the prohibitions on mixed and shared funding might reflect some concern with possible divergent interests among different classes of investors. When Rule 6e–2 was adopted, variable annuity separate accounts could (and some did) invest in mutual funds whose shares were also offered to the general public. Therefore, at the time of the adoption of Rule 6e–2, the Commission staff contemplated underlying funds with public shareholders and with variable life insurance separate account shareholders. The Commission staff may have been concerned with the potentially different investment motivations of public shareholders and variable life insurance contract owners. There also may have been some concern with a state insurance regulatory authority having the authority to affect the operations of a publicly available mutual fund, and hence, affect the investment decisions of public shareholders.

33. Applicants note that, for reasons unrelated to the 1940 Act, Internal Revenue Service Ruling 81–225 (Sept. 25, 1981) effectively deprived variable annuities funded by publicly available mutual funds of their tax-benefited status. Applicants state that the Tax Reform Act of 1984 codified the prohibition against the use of publicly available mutual funds as an investment medium for variable contracts (including variable life contracts). Applicants further state that Section 817(h) of the Code, in effect, requires that the investments made by variable annuity and variable life insurance separate accounts be "adequately diversified." If a separate account is registered as a unit investment trust that invests in a single fund or series, Applicants maintain that Section 817(h) and the Treasury Regulations provide, in effect, that the diversification test will be applied at the underlying fund level rather than at the separate account

level, but only if "all of the beneficial interests" in the underlying fund "are held by one or more insurance companies (or affiliated companies) in their general account or in segregated asset accounts * * *" Applicants state that, accordingly, a unit investment trust separate account that invests solely in a publicly available mutual fund would not be adequately diversified. In addition, Applicants state that any underlying fund, including any fund that sells its shares to separate accounts, in effect, would be precluded from selling its shares to the public. Consequently, there will be no public shareholders of the Funds.

34. Moreover, Applicants assert that the National Association of Insurance Commissioners Variable Insurance Model Regulation (the "NAIC Model Regulation") reflects the Commission's apparent confidence that mixed and shared funding is appropriate and that state insurance regulators can adequately protect the interests of all contract owners. The NAIC Model Regulation suggests that it is unlikely that insurance regulators would find an investment policy, principal underwriter or investment adviser inappropriate for one insurance product, but not for another insurance product. Applicants note that the NAIC Model Regulation, at Article VI, Section 1.9, as amended, removes a previous requirement that variable life insurance separate accounts not be used for variable annuity contracts. The NAIC Model Regulation has long permitted the use of a single underlying fund for different separate accounts. The NAIC Model Regulation, at Article VI, Section 3, as amended, eliminates a previous prohibition on one separate account investing in a separate account of another insurance company. As between scheduled premium and flexible premium variable life insurance policies, Applicants note that the NAIC Model Regulation draws no distinction.

35. Applicants assert that shared funding by unaffiliated insurance companies does not present any issues that do not already exist where a single insurance company is licensed to do business in several or all states. If insurers are domiciled in different states, it is possible that the particular state insurance regulatory body in a state in which one insurance company is domiciled could require action that is inconsistent with the requirements of insurance regulators of other states in which other insurance companies are domiciled. The fact that different Participating Insurance Companies are domiciled in different states does not create a significantly different or enlarged problem.

36. Applicants assert that shared funding by unaffiliated insurers does not present any issues that do not already exist where the same investment company serves as the funding vehicle for affiliated insurers, which Rules 6e–2(b)(15) and 6e–3(T)(b)(15) permit. Affiliated insurers may be domiciled in different states and be subject to differing state law requirements. Applicants submit that affiliation does not reduce the potential, if any exists, for differences in state regulatory requirements. In any event, the conditions proposed below, which are adopted from the conditions included in Rule 6e–3(T)(b)(15) and which are virtually identical to the conditions imposed in other mixed and shared funding orders granted by the Commission, are designed to safeguard against, and provide procedures for, resolving any adverse effects that differences among state regulatory requirements may produce. For example, if a particular state insurance regulatory decision conflicts with the majority of other states regulators, then the affected Participating Insurance Company will be required to withdraw its separate account's investment in the Fund. This requirement will be included in agreements that will be entered into by Participating Insurance Companies with respect to their participation in the Funds.

37. Shared funding does not present any issues that do not already exist when a life insurer disregards contract owner voting instructions. Under Rules 6e–2(b)(15) and 6e–3(T)(b)(15), an insurer may disregard contract owner voting instructions only with respect to certain specified items. Affiliation does not eliminate the potential, if any exists, for divergent judgments as to the advisability or legality of a change in investment policies, principal underwriter, or investment adviser initiated by contract owners. The potential for disagreement is limited by the requirements in Rules 6e–2 and 6e–3(T) that the insurance company's disregard of voting instructions be reasonable and based on specific good faith determinations.

Nevertheless, a particular insurer's disregard of voting instructions could conflict with the voting instructions of a majority of contract owners. One insurer might determine to disregard voting instructions when all or some of the other insurers (including affiliated insurers) determine to follow the voting instructions of contract owners. If the insurer's judgment represents a minority position or would preclude a majority vote, the insurer may be required, at the relevant Fund's election, to withdraw its separate account's investment in the Fund. No charge or penalty will be imposed as a result of such withdrawal. The participation agreements executed by the Participating Insurance Companies will contain these provisions.

38. Applicants submit that investment by the Participating Plans and the Participating Investors in any of the Funds will similarly present no additional conflict. The likelihood that voting instructions of variable contract owners will ever be disregarded or the possible withdrawal referred to immediately above is extremely remote and this possibility will be known, through prospectus disclosure, to any plans choosing to invest in a Fund. Moreover, Applicants state that even if a material irreconcilable conflict involving a Participating Plan or the Participating Investors arises, the Participating Plan or the Participating Investors may simply redeem its Fund shares and make alternative investments.

39. Applicants state that there is no reason why the investment policies of a Fund when it engages in sales to Participating Plans would or should be materially different from the investment policies of the Fund when it supports only variable annuity separate accounts or variable life insurance separate accounts, whether flexible premium or scheduled premium contracts. Each type of insurance product is designed as a long-term investment program. The investment objective of a qualified pension or retirement plan should coincide with a long-term investment program and should not increase the potential for conflicts.

40. Each Fund will be managed to attempt to achieve the investment objective or objectives of the Fund, and not to favor or disfavor any particular Participating Insurance Company or Participating Plan, the Participating Investors or any particular type of insurance product or plan. There is no reason to believe that the different features of various types of contracts, including the "minimum death benefit" guarantee under certain variable life insurance and variable annuity contracts, will lead to different investment policies for different types of variable contracts. First, minimum death benefit guarantees generally are specifically provided for by particular charges, and always are supported by general account reserves as required by state insurance law. Second, certain variable annuity contracts also have minimum death benefit guarantees. To

the extent that the degree of risk may differ as between variable annuity contracts and variable life insurance policies, the differing insurance charges imposed, in effect, adjust any such differences and equalize the insurer's exposure in either case. Third, the sale, persistency and ultimate success of all variable insurance products depend, at least in part, on satisfactory investment performance, which provides an incentive for the insurer to optimize investment performance. Fourth, under existing statutes and regulations, an insurance company and its affiliates can offer a variety of variable annuity and life insurance contracts, some with death benefit guarantees of different types and significance (and different degrees of risk for the insurer), some without death benefit guarantees, all funded by a single mutual fund.

41. Applicants note that no one investment strategy can be identified as appropriate to a particular insurance product or to a particular pension or retirement plan. Each pool of variable annuity and variable life insurance contract owners is composed of individuals of diverse financial status, age, insurance needs, and investment goals. Likewise participants in a particular pension or retirement plan differ in financial status, age and investment goals. A Fund supporting even one type of insurance product or one type of pension or retirement plan must accommodate these diverse factors in order to attract and retain purchasers. Applicants submit that permitting sales to Participating Plans will provide economic support for the continuation of the Funds. In addition, the broader base of contract owners and participants can be expected to provide economic support for the creation of additional Funds with a greater variety of investment objectives and policies.

42. In connection with the proposed sale of shares of the Funds to Participating Plans or to the Participating Investors, Applicants submit that either there are no conflicts of interest or there exists the ability by the affected parties to resolve any such conflicts without harm to the contract owners in the Participating Separate Accounts or to participants under the Participating Plans. Section 817(h) of the Code imposes certain diversification standards on the underlying assets of variable contracts held in the portfolios of management investment companies. Treasury Regulation 1.817–5(f)(3)(iii), which established diversification requirements for such portfolios, specifically permits, among other things, "qualified pension or retirement plans" and insurance company separate accounts to share the same underlying investment company. In addition, Treasury Reg. 1.817–5(f)(3)(ii) permits the Participating Investors to invest in the same underlying investment company. Applicants assert, therefore, that neither the Code, nor the Treasury Regulations, nor the revenue rulings thereunder recognize any inherent conflicts of interests if Participating Plans, Participating Separate Accounts and the Participating Investors all invest in the same management investment company.

43. Although there may be differences in the manner in which distributions from variable annuity contracts, variable life insurance contracts and qualified pension and retirement plans are taxed, Applicants state that the tax consequences do not raise any conflicts of interest with respect to use of the Funds. When distributions are to be made, and a Participating Separate Account or a Participating Plan cannot net purchase payments to make the distributions, the Participating Separate Account or the Participating Plan will redeem shares of the Fund at their net asset value. The Participating Plan will then make distributions in accordance with the terms of the plan, and the Participating Insurance Company will make distributions in accordance with the terms of the variable contract.

44. Applicants state that it is possible to provide an equitable means of giving voting rights to separate account contract owners and to Participating Plans and the Participating Investors. Applicants represent that each Fund will inform each shareholder, including each Participating Separate Account, each Participating Plan and the Participating Investors, of its respective share of ownership in the Funds. Each Participating Insurance Company then will solicit voting instructions in accordance with the applicable "pass-through" voting requirement.

45. Applicants submit that the ability of a Fund to sell its shares directly to Participating Plans or the Participating Investors does not create a "senior security" with respect to any variable contract owner as opposed to a participant in a Participating Plan or the Participating Investors. The term "senior security" is defined under Section 18(g) of the 1940 Act to include "any stock of a class having priority over any other class as to distribution of assets or payment of dividends." Regardless of the rights and benefits of participants under the Participating Plans, or contract owners under variable contracts, Participating Plans, Participating Separate Accounts and the Participating Investors have rights only with respect to their respective shares of a Fund. They can only redeem such shares at their net asset value. No shareholder of any of the Funds will have any preference over any other shareholder with respect to distribution of assets or payment of dividends.

46. Applicants assert that there are no conflicts between the variable contract owners of the Participating Separate Accounts and the participants under the Participating Plans or the Participating Investor with respect to the state insurance commissioners' veto powers (direct with respect to variable life and indirect with respect to variable annuities) over investment objectives. The basic premise of shareholder voting is not all shareholders may agree with a particular proposal. This does not mean that there are any inherent conflicts of interest between shareholders. The state insurance commissioners have been given the veto power in recognition of the fact that insurance companies cannot simply redeem their separate accounts out of one investment company and invest in another. Generally, time-consuming, complex transactions must be undertaken to accomplish such redemptions and transfers. On the other hand, trustees of qualified plans can redeem their shares from an investment company and reinvest in another funding vehicle without the same regulatory impediments or, as is the case with most plans, even hold cash pending suitable investment. Based on the foregoing, Applicants have concluded that even if issues arise where the interests of variable contract owners and the interests of Participating Plans are in conflict, the issues can be almost immediately resolved because the trustees of the Plans, on their own, can redeem their shares from an investment company and reinvest in another funding vehicle at any time.

47. The Applicants assert that permitting the sale of a Fund's shares to the Participating Investor in compliance with Treasury Reg. 1.817–5 will enhance Fund management without raising significant concerns regarding material irreconcilable conflicts. Section 14(a) of the 1940 Act generally requires that an investment company have a net worth of $100,000 upon making a public offering of its shares. Initial capital is also required in connection with the creation of new series and the voting of initial shares of such series on matters requiring the approval of shareholders. A potential source of initial capital for a new Trust or a new Fund is the Manager or its affiliates or a Participating Insurance Company. Any of these parties may have an interest in

making the capital expenditure, and in participating with the new Trust or the new Fund in its organization. However, provision of seed capital or the purchase of Fund shares by the Participating Investor or by a Participating Insurance Company may be deemed to violate the exclusivity requirement of Rule 6e–2(b)(15) and/or Rule 6e–3(T)(b)(1) under the 1940 Act.

48. Applicants anticipate that such investment by the Participating Investor or by a Participating Insurance Company will be made in compliance with Treasury Reg. 1.817–5(f)(3). Given the conditions of Treasury Reg. 1.817–5(f)(3) under the Code and the harmony of interest between a Fund, on the one hand, and the Participating Investors or a Participating Insurance Company, on the other, the Applicants assert that little incentive for overreaching exists. Furthermore, such investment should not implicate the concerns discussed above regarding the creation of material irreconcilable conflicts. Instead, permitting investments by the Participating Investor or a Participating Insurance Company will permit the orderly and efficient creation and operation of the Funds.

49. Applicants state that various factors have limited the number of insurance companies offering variable annuity and variable life insurance contracts. Applicants state that these factors include the costs of organizing and operating a funding medium, the lack of expertise with respect to investment management (principally with respect to stock and money market investments) and the lack of name recognition by the public of certain insurers as investment professionals. In particular, some small life insurance companies may not find it economically feasible, or within their investment or administrative expertise, to enter the variable contract business on their own.

50. Applicants argue that use of the Funds as common investment mediums for variable contracts, as well as for qualified plans, could ameliorate these concerns for insurance companies that decide to participate in the Funds. Applicants also submit that mixed and shared funding should provide a benefit to variable contract owners by eliminating a significant portion of the costs of establishing and administering separate funds. Participating Insurance Companies should also benefit from the investment and administrative expertise of Touchstone Advisors and Western-Southern, or any other investment adviser or sub-adviser to a fund, and the cost efficiencies and investment flexibility afforded by a larger pool of assets. Therefore, making the Funds available for shared funding should encourage more insurance companies to offer variable contracts and result in increased competition with respect to both variable contract design and pricing, which can be expected to result in more product variation and lower charges.

51. The Applicants further assert that sale of shares of the Funds to Participating Plans should further increase the amount of assets available for investment by the Funds. This larger asset base should benefit variable contract owners and plan participants by promoting economies of scale, by permitting greater diversification, and by making the addition of new Funds more feasible. In connection with the proposed sale of shares of the Funds to Participating Plans, Applicants further submit that the intended use of the Funds with Participating Plans is not dissimilar from the intended use of the Funds with variable contracts in that Participating Plans, like variable contracts, are generally long-term retirement vehicles. The Applicants further submit that the sale of shares of the Funds to Participating Plans does not increase the risk of material irreconcilable conflicts to such Funds or to the Participating Separate Accounts.

52. Applicants assert that there is no significant legal impediment to permitting mixed and shared funding. Applicants also note that the Commission has granted numerous applications for orders permitting mixed and shared funding with respect to both scheduled and flexible premiums, including where sales are made to qualified pension and retirement plans. Applicants further note there is ample precedent for extending exemptive relief to members of a class or classes of persons, not currently identified, that may be similarly situated in the future. Such relief has been granted in various contexts and from a wide variety of the 1940 Act's provisions, including class exemption in the context of mixed and shared funding. Applicants assert that the requested exemption is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

Applicants' Conditions

Applicants have consented to the following conditions if the order requested in its application is granted:

1. A majority of the Board of Trustees of each Fund (a "Board") will consist of persons who are not "interested persons" of that Trust, as defined by Section 2(a)(19) of the 1940 Act, and the rules thereunder, and as modified by any applicable orders of the Commission. However, if this condition is not met by reason of the death, disqualification, or bona fide resignation of any trustee or trustees, then the operation of this condition will be suspended: (a) For a period of 90 days if the vacancy or vacancies may be filled by the remaining trustees;

(b) for a period of 150 days if a vote of shareholders is required to fill the vacancy or vacancies; or (c) for such longer period as the Commission may prescribe by order upon application.

2. Each Board will monitor its respective Funds for the existence of any material irreconcilable conflict among the interests of the variable contract owners of the Participating Separate Accounts, participants under the Participating Plans and the Participating Investor investing in the Fund, and the Board will determine what action, if any, should be taken in response to such conflicts. A material irreconcilable conflict may arise for a variety of reasons, including: (a) An action by any state insurance regulatory authority; (b) a change in applicable federal or state insurance, tax, or securities laws or regulations, or a public ruling, private letter ruling, no-action or interpretative letter, or any similar action by insurance, tax, or securities regulatory authorities; (c) an administrative or judicial decision in any relevant proceeding; (d) the manner in which the investments of any Fund are being managed; (e) a difference in voting instructions given by variable annuity contract owners, variable life insurance contract owners, plan trustees or plan participants; (f) a decision by an insurer to disregard the voting instructions of variable contract owners; or (g) if applicable, a decision by a Participating Plan to disregard voting instructions of its participants.

3. Any Participating Plan that executes a fund participation agreement upon becoming an owner of 10 percent or more of the issued and outstanding shares of the Fund (a "Reporting Plan"), Participating Insurance Companies, and the Participating Investor investing in a Fund (collectively, the "Reporting Entities") will report any potential or existing conflicts to the relevant Board and will be responsible for assisting the Board in carrying out its responsibilities under these conditions by providing the Board with all information reasonably necessary for the Board to consider any issues raised. These responsibilities include, but are not limited to, (a) an obligation by each Participating Insurance Company to inform the Board whenever it has determined to disregard voting instructions of variable contract

owners, and (b) if pass-through voting is applicable, an obligation by each Reporting Plan to inform the relevant Board whenever it has determined to disregard its participants' voting instructions. The responsibility to report such information and conflicts and to assist the relevant Board will be contractual obligations of all Participating Insurance Companies and Reporting Plans under their agreements governing participation in the Funds, and such agreements will provide that these responsibilities will be carried out with a view only to the interests of the variable contract owners and plan participants, as applicable.

4. If it is determined by a majority of the Board of a Trust, or by a majority of its disinterested trustees, as appropriate, that a material irreconcilable conflict exists with respect to a Fund, the relevant Participating Insurance Companies and Relevant Participating Plans, at their own expense (or at the discretion of a Manager of the Fund, at that Manager's expense), will take whatever steps are necessary to remedy or eliminate the material irreconcilable conflict to the extent reasonably practicable (as determined by a majority of the disinterested trustees). These steps could include: (a) Withdrawing the assets allocable to some or all of the separate accounts of the Participating Insurance Companies from the Fund and reinvesting such assets in a different investment medium, including another Fund, (b) submitting the question as to whether such segregation should be implemented to a vote of all affected variable contract owners and, as appropriate, segregating the assets of any appropriate group that votes in favor of such segregation, (c) offering to the affected variable contract owners the option of making such a change; (d) withdrawing the assets allocable to some or all of the Participating Plans from the Fund and reinvesting such assets in a different investment medium; or (e) establishing a new registered management investment company or managed separate account. If a material irreconcilable conflict arises because of a decision by a Participating Insurance Company to disregard contract owner voting instructions, or, if applicable, a decision by a trustee of a Participating Plan to disregard participant voting instructions, and that decision represents a minority position or would preclude a majority vote, then that insurer or plan, as applicable, may be required, at the Fund's election, to withdraw its investment in the Fund, and no charge or penalty will be imposed as a result of such withdrawal. To the extent permitted by applicable law, the responsibility to take remedial action in the event of a Board determination of a material irreconcilable conflict and to bear the cost of such remedial action will be a contractual obligation of all Participating Insurance Companies and Reporting Plans under their agreements governing participation in the Funds, and these responsibilities will be carried out with a view only to the interests of variable contract owners and plan participants, as applicable.

5. For purposes of Condition 4, a majority of the disinterested trustees of the relevant Board will determine whether or not any proposed action adequately remedies any material irreconcilable conflict, but in no event will the Trust or the Participating Investor be required to establish a new funding medium for any variable contract or qualified plan. No Participating Insurance Company will be required by Condition 4 to establish a new funding medium for any variable contract if a majority of the variable contract owners materially and adversely affected by the material irreconcilable conflict vote to decline such offer. Furthermore, no Participating Plan will be required by Condition 4 to establish a new funding medium for such plan if (a) A majority of plan participants materially and adversely affected by the irreconcilable material conflict vote to decline such offer, or (b) pursuant to governing documents and applicable law, the Participating Plan makes such decision without plan participant vote.

6. The affected Reporting Entities will be informed promptly in writing of a Board's determination of the existence of a material irreconcilable conflict and its implications.

7. Participating Insurance Companies will provide pass-through voting privileges to all variable contract owners so long as the Commission continues to interpret the 1940 Act as requiring pass-through voting privileges for variable contract owners. Accordingly, each Participating Insurance Company will vote shares of a Fund held in its Participating Separate Accounts in a manner consistent with voting instructions timely received from variable contract owners. Each Participating Insurance Company also will vote shares of the Fund held in its Participating Separate Accounts for which it has not received timely voting instructions from contract owners, as well as shares of the Fund that the Participating Insurance Company itself owns, in the same proportion as those shares of the Fund for which voting instructions from contract owners are timely received. Each Participating Insurance Company will be responsible for assuring that each of its Participating Separate Accounts investing in a Fund calculates voting privileges in a manner consistent with other Participating Insurance Companies investing in the Fund. The obligation to vote the Fund shares and to calculate voting privileges in a manner consistent with all other Participating Separate Accounts investing in a Fund will be a contractual obligation of all Participating Insurance Companies under the agreements governing their participation in that Fund. Each Participating Plan will vote as required by applicable law and governing plan documents.

8. All reports of potential or existing conflicts received by the Board, and all Board actions with regard to determining the existence of a conflict, notifying affected Reporting Entities of a conflict, and determining whether any proposed action adequately remedies a conflict, will be properly recorded in the minutes of the meetings of the Board or other appropriate records, and such minutes or other records will be made available to the Commission upon request.

9. Each Fund will notify all Participating Insurance Companies and all Participating Plans that disclosure regarding potential risks of mixed and shared funding may be appropriate in separate account prospectuses or plan documents. Each Fund will disclose in its prospectus that: (a) The Fund is intended to be a funding vehicle for all types of variable annuity and variable life insurance contracts offered by various insurance companies and for qualified pension and retirement plans; (b) due to differences of tax treatment and other considerations, the interests of various variable contract owners participating in the Fund and the interests of Participating Plans investing in the Fund may conflict, and (c) the relevant Board will monitor events in order to identify the existence of any material irreconcilable conflicts and to determine what action, if any, should be taken in response to any such conflict.

10. Each Trust will comply with all provisions of the 1940 Act requiring voting by shareholders (which, for these purposes, will be the persons having a voting interest in the shares of the Fund). In particular, each Trust will either provide for annual shareholder meetings (except to the extent that the Commission may interpret Section 16 of the 1940 Act not to require such meetings) or comply with Section 16(c) of the 1940 Act (although the Trusts are not the type of trust described in

Section 16(c) of the 1940 Act), as well as with Section 16(a) of the 1940 Act and, if and when applicable, Section 16(b) of the 1940 Act. Further, each Trust will act in accordance with the Commission's interpretation of the requirements of Section 16(a) with respect to periodic elections of directors and with whatever rules the Commission may promulgate with respect thereto.

11. So long as the Commission continues to interpret the 1940 Act as requiring pass-through voting privileges for variable contract owners, the Participating Investor will vote their shares in the same proportion as all contract owners having voting rights with respect to the relevant Funds; provided, however, that the Participating Investor shall vote their shares in such other manner as may be required by the Commission or its staff.

12. If and to the extent that Rules 6e–2 and Rule 6e–3(T) under the 1940 Act are amended, or Rule 6e–3 under the 1940 Act is adopted, to provide exemptive relief from any provision of the 1940 Act, or the rules promulgated thereunder, with respect to mixed funding or shared funding, on terms and conditions materially different from any exemptions granted in the order requested in this Application, then the Trusts and/or Participating Insurance Companies, as appropriate, will take such steps as may be necessary to comply with Rules 6e–2 and 6e–3(T), as amended, or Rule 6e–3, as adopted, to the extent that such rules are applicable.

13. The Reporting Entities, at least annually, will submit to the relevant Board such reports, materials, or data as the Board may reasonably request so that the Board may fully carry out the obligations imposed upon it by the conditions contained in this Application. Such reports, materials, and data will be submitted more frequently if deemed appropriate by the Board. The obligations of the Participating Insurance Companies and the Reporting Plans to provide these reports, materials, and data to the Board will be a contractual obligation under their agreements governing participation in the Funds.

14. If a Participating Plan should ever become a holder of ten percent or more of the issued and outstanding shares of a Fund, such plan will execute a participation agreement with the Fund, which will include the conditions set forth herein to the extent applicable. A Participating Plan will execute a document containing an acknowledgement of this condition upon such plan's initial purchase of the shares of any Fund.

15. Any shares of a Fund purchased by the Manager or its affiliates will be automatically redeemed if and when the Manager's investment management agreement terminates, and to the extent required by the applicable Treasury Regulations. No Participating Investor will sell such shares of the Funds to the public.

Conclusion

For the reasons summarized above, Applicants assert that the requested exemptions are appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45118; File No. SR–NYSE–2001–34]

Self-Regulatory Organizations; Order Approving Proposed Rule Change by the New York Stock Exchange, Inc. Amending NYSE Rule 103A To Delete an Unused Measure of Specialist Performance

November 29, 2001.

On August 29, 2001, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend NYSE Rule 103A (Specialist Stock Reallocation and Member Education and Performance) to delete an unused measure of specialist performance.

Currently, NYSE Rule 103A provides authority for the Market Performance Committee ("MPC") to establish and administer measures of specialist performance, conduct performance improvement actions where a specialist unit does not meet the performance standards in the Rule, and reallocate stocks if a unit does not achieve its specified goals when subject to a performance improvement action. The performance standards in the Rule include the Specialist Performance Evaluation Questionnaire, timeliness of stock openings, SuperDot order turnaround, administrative message responses and market share. This latter provision refers to a significant decline in market share, as measured by share volume, in two consecutive quarters where the decline is determined to be attributable to factors within the control of the specialist unit.

At the time the Exchange adopted the market share measure, it was intended that the Exchange would develop criteria as to what constitutes "significant decline" before the market share performance standard could be enforced. However, criteria were never developed, and the MPC has never used the market share standard as a performance measure.

The proposed rule change was published for comment in the **Federal Register** on October 26, 2001.[3] The Commission received no comments on the proposal.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange[4] and, in particular, the requirements of section 6 of the Act.[5] The Commission finds that the proposed rule change is consistent with section 6(b)(5) of the Act,[6] which requires, among other things, that the rules of an exchange promote just and equitable principles of trade and in general to protect investors and the public interest. The Commission believes that the remaining measurements of specialist performance set forth in NYSE Rule 103A should be sufficient to assist the Exchange in ensuring a certain level of market quality and performance in Exchange listed securities is maintained. The Exchange should continue to review its standards for measuring specialist performance and ensure that there are adequate, objective measures to assess such performance.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[7] that the proposed rule change (SR–NYSE–2001–34) be, and it hereby is, approved.

SMALL BUSINESS ADMINISTRATION

Reporting and Recordkeeping Requirements Under OMB Review

AGENCY: Small Business Administration.

ACTION: Notice of reporting requirements submitted for OMB review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made such a submission.

DATES: Submit comments on or before January 7, 2002. If you intend to comment but cannot prepare comments promptly, please advise the OMB Reviewer and the Agency Clearance Officer before the deadline.

Copies: Request for clearance (OMB 83–1), supporting statement, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer.

ADDRESSES: Address all comments concerning this notice to: Agency Clearance Officer, Jacqueline White, Small Business Administration, 409 3rd Street, SW., 5th Floor, Washington, DC 20416; and OMB Reviewer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Jacqueline White, Agency Clearance Officer, (202) 205–7044.

SUPPLEMENTARY INFORMATION:

Title: Lender Transcript of Account.

No.: SBA Form 1149.

Frequency: On Occasion.

Description of Respondents: Lenders requesting SBA to provide the Agency with breakdown of payments.

Annual Responses: 5,000.

Annual Burden: 5,000.

Jacqueline White,

Chief, Administrative Information Branch.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

RTCA Special Committee 187: Mode Select Beacon and Data Link System

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of RTCA Special Committee 187 meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of RTCA Special Committee 187: Mode Select Beacon and Data Link System.

DATES: The meeting will be held December 18, 2001, from 9 a.m. to 5 p.m.

ADDRESSES: The meeting will be held at RTCA, 1828 L Street, NW., Suite 805, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: RTCA Secretariat, 1828 L Street, NW., Washington, DC 20036; telephone (202) 833–9339; fax (202) 833–9434; Web site *http://www.rtca.org.*

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C., Appendix 2), notice is hereby given for a Special Committee 187 meeting. The agenda will include:

- December 18:
  - Opening Session (Chairman's Introductory Remarks, Review and Approve Agenda)
  - Review and Approve Proposed Change 1 to RTCA DO–181C, RTCA Paper No. 368–01/SC187–042, *Addition of Hijack Mode Operations*
  - Closing Session (Other Business, Date and Time of Next Meeting, Adjourn)

Attendance is open to the interested public but limited to space availability. With the approval of the chairmen, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Members of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on November 27, 2001.

Janice L. Peters,

FAA Special Assistant, RTCA Advisory Committee.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration and Federal Railroad Administration

Environmental Impacts Statement: New York/New Jersey

AGENCY: Federal Highway Administration (FHWA), Federal Railroad Administration (FRA).

ACTION: Notice of meeting.

SUMMARY: Notice of Public Scoping Meetings in Preparation of a Draft Environmental Impact Statement for the Cross Harbor Freight Movement Project.

The New York City Economic Development Corporation (NYCEDC), as project sponsor, in coordination with the Federal Highway Administration (FHWA) and the Federal Railroad Admininstration (FRA) as joint lead agencies, is preparing an Environmental Impact Statement (EIS) for the Cross Harbor Freight Movement Project. As part of the Cross Harbor Freight Movement Project, strategies for enhancing freight mobility within the New York City/northern New Jersey region are being evaluated. A Major Investment Study (MIS), completed in 2000, identified several strategies that satisfied established project goals and objectives. The purpose of the EIS is to examine the ability of the selected strategies to improve mobility of goods traffic, improve environmental quality, enhance the region's competitive position and provide flexibility to respond to possible service disruptions to the region's vital Hudson River Crossings.

NYCEDC will conduct seven (7) public scoping meetings to discuss the proposed draft scope of work for the Draft Environmental Impact Statement (DEIS), and will accept comments from the public. The draft scope of work is available for viewing on-line at *www.crossharborstudy.org.* One copy of the draft scope of work will also be available at the following libraries. Manhattan, New York Public Library at 188 Madison Ave.; Queens, Queens Borough Public Library at 89–11 Merrick Blvd.; Bronx, Bronx Borough Library at 2556 Bainbridge Ave.; Staten Island, SI Borough Library at 5 Central Avenue; Brooklyn, Brooklyn Public Library Sunset Park at 5108 4th Ave. (at 51st St.); Jersey City, Jersity City Public Library at 472 Jersey Ave.; Elizabeth, Elizabeth Public Library at 11 South Broad St.

DATES: The seven (7) meetings will be held at the following locations within the New York/New Jersey metropolitan area:

Tuesday, January 15, 2002, 11 am–3 pm NYCEDC, 110 William Street, 4th Floor, NY, NY 10038
Thursday, January 17, 2002, 5 pm–8 pm Snug Harbor Manor, Lower Great Hall Room, 1000 Richmond Terrace, Staten Island, NY 10301
Tuesday, January 22, 2002, 5 pm–8 pm Hostos College, Savoy Multi-Purpose Room, East 149th Street/ Walton Avenue, Bronx, NY 10451
Wednesday, January 23, 2002, 5 pm–8 pm PS 1, 309 47th Street, (b/w 3rd–4th Aves.), Brooklyn, NY 11220
Tuesday, January 29, 2002, 5 pm–8 pm LaGuardia College, 31–10 Thomson Avenue, L.I.C., NY 11101
Wednesday, January 30, 2002, 11 am–3 pm Jersey City City Hall, Council Chambers, 280 Grove Street, Jersey City, NJ 07302
Wednesday, January 30, 2002, 5 pm–8 pm Elizabeth High School, 600 Pearl Street, Elizabeth, New Jersey 07202

FOR FURTHER INFORMATION CONTACT:

Ms. Alice Cheng, Director, Intermodal Planning, a New Economic Development Corporation, 110 William Street, 6th floor, New York, NY 10038, telephone (212) 619–5000, e-mail "acheng@nyedc.com"
or
Richard E. Backlund, Intermodal Transporation Coordinator, Federal Highway Administration, New York Division, One Bowling Green, Room 428, New York, NY 1004–1415, telephone (212) 668–2205, e-mail "richard.backlund@fhwa.dot.gov"
or
Michael Saunders, Northeast Corridor Program Manager, Federal Railroad Administration, 628–2 Hebron Avenue, Suite 303, Glastonbury, Connecticut 06033–5007, telephone (860) 659–6714, e-mail "michael.saunders@fhwa.dot.gov"

SUPPLEMENTARY INFORMATION:

Registration to speak will begin at the meeting start time and end one half-hour before the meeting end time. All registered speakers will be heard. The public will be able to present oral comments and can register one the day of the meeting or in advance by calling the project information line at 1–877–XHAR EIS (942–7347), or e-mailing the project at *crossharbor@astvinc.com*. Written comments can be presented at the meeteings, e-mailed to *crossharbor@stvinc.com* or mailed to Cross Harbor Freight Movement Project, 225 Park Avenue South, NY, NY 10003. the deadline for submitting comments is February 28, 2002. Due to heightened security, a photo ID is required to enter the above-mentioned locations. Please allow additional travel time to sign-in at the security desk.

Authority: 23 U.S.C. 315; 23 CFR 771.123.

Dated: November 28, 2001.

Richard E. Backlund,

Intermodal Transportation Coordiantor.

BILLING CODE 4910-22-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Desha, Chicot, Ashley, Drew, Union, Bradley, Calhoun, Ouachita, and Columbia Counties, AR

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in the Arkansas Counties of Desha, Chicot, Ashley, Drew, Union, Bradley, Calhoun, Ouachita, and Columbia.

FOR FURTHER INFORMATION CONTACT: Randal Looney, Environmental Specialist, Federal Highway Administration, Room 3130 Federal Building, Little Rock, Arkansas 72201–3298, telephone: (501) 324–6430; or Dale Loe, Consultant Coordinator, Assistant Chief Engineer, Arkansas State Highway and Transportation Department, P.O. Box 2261, Little Rock, Arkansas 72203, telephone: (501) 569–2301.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Arkansas State Highway and Transportation Department (AHTD), will prepare an Environmental Impact Statement (EIS) for a segment of the proposed Interstate 69 corridor in Arkansas.

This approximately 85-mile segment of I–69 will connect the Mississippi River crossing of I–69 to U.S. 167 near El Dorado and will improve regional travel, safety, intermodal connectivity and will enhance the economic vitality of the project area. This segment will accommodate the overall purpose of the national I–69 Corridor, a much larger transcontinental project identified as a "high priority corridor" on the National Highway System that would provide a North American Free Trade Agreement (NAFTA) transportation corridor of national significance from Canada to Mexico. I–69 is also a transportation recommendation of the Delta Initiative aimed at the revitalization and economic development of the Lower Mississippi Delta.

I–69 is proposed to be a fully controlled access facility located on a new alignment. Several alternatives and locations will be considered, including the "no-action" alternative. The western terminus of the project will connect to U.S. 167 near El Dorado, Arkansas and the eastern terminus will connect to U.S. 65 near McGehee, Arkansas.

The FHWA and AHTD are seeking input as part of the scoping process to assist in determining and clarifying important issues relative to this project. Letters describing the proposed action and soliciting comments have been sent to appropriate Federal, state, and local agencies, Native American Tribes, and to private organizations and citizens who have previously expressed or are known to have an interest in this project. Formal scoping meetings with Federal, state, and local agencies, NativeAmerican Tribes, and other interested parties will be held in the near future. A series of public meetings will also be held in the study area beginning in early 2002, with on-going public involvement activities. The draft Environmental Impact Statement (EIS) will be available for public and agency review and comment prior to a formal public hearing. Public notice will be given of the time and place for all meetings and hearings.

To ensure that the full range of issues related to this project are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this proposed action.)

Issued on: December 3, 2001.

Derrell Turner,

Assistant Division Administrator, FHWA, Little Rock, Arkansas.

BILLING CODE 4910-33-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2001–8842; Notice 2]

General Motors Corporation; Denial of Application for Decision of Inconsequential Noncompliance

General Motors Corporation (GM) of Warren, Michigan, has determined that child restraint lower anchorages in approximately 33,916 of its model year 2001 vehicles [1] fail to comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 225, "Child Restraint Anchorage Systems," and has filed an appropriate report pursuant to 49 CFR part 573, "Defect and Noncompliance Reports." GM has also petitioned to be exempted from the notification and remedy requirements of 49 U.S.C. Chapter 301, "Motor Vehicle Safety," on the basis that the noncompliance is inconsequential to motor vehicle safety.

On February 20, 2001, NHTSA published a notice of receipt of the application in the **Federal Register** (66 FR 10948, Docket No. NHTSA–2001–8842; Notice 1) and requested comments by March 22, 2001.

Paragraphs S9.1.1 and S15.1.2.1 of FMVSS No. 225 specify that, for each child restraint anchorage system, the lower anchorages shall consist of two bars that are 6 mm ± 0.1 mm in diameter. The lower anchorages are designed to secure the child restraint system onto the vehicle rather than using the vehicle's belt system. Child restraints will have components that attach to the bars. NHTSA established the diameter specification of the anchorages to ensure compatibility between the child seat and the anchorages so that the components on child restraints can latch securely onto the bars and will remain attached in a crash.

On November 3, 2000, GM submitted a Part 573 Noncompliance Report advising NHTSA that 75,816 model year (MY) 2001 vehicles may not comply with FMVSS No. 225. Based on measurements taken from a sample of 32 seats in GMT250 (Azteks) and 52 seats in GM200 (U Vans) vehicles, GM believes that approximately 33,916 of these vehicles actually have anchors with diameters outside the range allowed by the standard. From the sampling data, the range of the diameter of the anchorages were estimated as 5.99 mm to 6.30 mm for the first group and 5.59 mm to 6.32 mm for the second group of vehicles. The compliance range allowed by FMVSS No. 225 is 5.9 mm to 6.1 mm. The 33,916 affected vehicles include 30% of 27,901 Chevrolet Ventures (8,370), 30% of 9,845 Oldsmobile Silhouettes (2,954), 30% of 17,383 Pontiac Montanas (5,215), and 84% of 20,687 Pontiac Azteks (17,377).

On November 29, 2000, GM submitted a petition for an exemption from the recall requirements of 49 U.S.C. Chapter 301 on the basis that the noncompliance is inconsequential to motor vehicle safety.

GM explained how the noncompliance happened. "In the case of the Aztek, this condition was caused by the inadvertent release of component drawings that allowed the lower anchorage bar material to be supplied out of compliance. For the U vans and Azteks, it was not originally known that the coating process for the lower anchorage bar was not capable of holding the required tolerance. As a result, some of the lower anchorages of the subject vehicles do not meet the diameter specification."

In summary, GM supported its petition for a determination of inconsequential noncompliance with the following:

1. "Child restraint manufacturers currently offer to U.S. customers two child seats with LATCH attachment mechanisms: The Fisher Price Safe Embrace [2] and the Cosco Triad. Both of these child seats use a hook mechanism to attach to the lower anchorage bars * * * [T]he integrity and performance of the [hook] attachment will not be materially affected by the small deviations from the specification for the diameter of the lower anchor * * * GM is not aware of any proposed U.S. child seat latch mechanism that would not be compatible with the anchors on the subject vehicles."

2. "[A]ll the child seats, in addition to the requirements for a latch mechanism, must also be designed to work with the vehicle seat belt system. Therefore, each child seat, whether LATCH compatible or not, will be able to be safely secured to each of these vehicles."

3. GM said they "do not foresee any problem with future designs and the anchors that are below 5.9 mm."

4. In the future, it is possible that a slotted attachment could be designed and that the slot might be too small to accept some of these anchors that exceed 6.1 mm. To address this situation, GM plans to send a letter to owners to advise them how to handle such a situation." (Use the vehicle belt system to attach the child seats.)

Based on the above arguments, GM stated that the noncompliance with FMVSS No. 225 is inconsequential to motor vehicle safety and requested that NHTSA grant the inconsequentiality petition.

The agency received two comments responding to NHTSA's February 2001 notice. They were from Britax Child Safety, Inc. (8842–2, dated March 21, 2001), and Advocates for Highway and Auto Safety (8842–3, dated March 22, 2001).

Britax (8842–2) stated that its "designed LATCH compatible connectors will *not* fit onto lower anchorage bars having a diameter greater than the tolerances specified in Standard 225." Britax contacted GM about the potential problem but could not arrive at a mutually agreeable solution to the problem with GM. Britax worries that it may be wrongly and unfairly blamed if consumers encounter the potential incompatibility problem between its child restraints and the GM lower anchorages. Britax also worries that a partially engaged seat connector and oversized anchorage bar could fail in a crash, and that Britax could be blamed for a faulty seat design.

Advocates (8842–3) believes that the agency should deny GM's application based on various safety concerns, and that the denial would be consistent with the agency's previous ruling on denying a petition submitted by Suzuki for inconsequential noncompliance (65 FR 57649, September 25, 2000).

On May 7, 2001, GM submitted supplemental information (8842–4) "to document the additional information discussed and GM's position." GM further estimated that among the 33,916 noncompliant vehicles, 19,610 vehicles (58%) may have an anchorage diameter over 6.1 mm. Therefore, the other 14,306 vehicles (42%) may have an anchorage diameter less than 5.9 mm. GM stated that the noncompliance problem was first discovered during an ISO Working Group meeting in Canada. A demonstration of a Britax prototype child seat with a LATCH "hard connector" design failed to fit onto the lower anchorages in a 2001 Pontiac Aztek vehicle. The diameters of the anchorages were measured as 6.18 mm to 6.23 mm in the middle, and 6.22 mm to 6.25 mm on the sides of the anchorage bars.

Although GM acknowledged the noncompliance of the anchorage bars in

[1] Noncompliant GM vehicles include approximately 17,377 Pontiac Azteks, 5,215 Pontiac Montanas, 8,370 Chevrolet Ventures, and 2,954 Oldsmobile Silhouettes (U-vans). These vehicles were built with lower anchorage bars that are either above or below the 6.0 ± 0.1 mm diameter requirement.

[2] Fisher Price has recently announced that it will cease the production of child restraints, including the Safe Embrace. [*Footnote added by NHTSA.*]

the Aztek vehicle, GM also complained that the opening of Britax's "hard connector" deviated too much from the 6.5 mm diameter designation for the Static Force Application Device 2 (SFAD 2), a test fixture used to test compliance with one aspect of FMVSS No. 225. The SFAD 2 is referenced in S9.4 and S15.3 of FMVSS No. 225 and is illustrated in Figures 17 and 18 of the standard.

GM had already orally presented these comments during a GM-requested meeting with NHTSA on April 25, 2001. A meeting record has been entered into the docket.

NHTSA has thoroughly evaluated the data GM provided, carefully considered its subsequent explanations about the data, and also considered the comments submitted by Britax and Advocates. We disagree with GM's position. We consider the incompatibility problem to be very much safety related. When a child seat fails to latch onto the lower anchorages, the entire latch system will not work, regardless of how well the components are designed.

GM has acknowledged that the lower anchorages do not comply with FMVSS No. 225, but also blamed the deviation of the opening of the "hard connectors" on the Britax child seat. However, GM has not shown, and cannot show, that the Britax seat has an improper connector design or dimensions, since the dimensions for the SFAD do not apply to child restraint systems.

Moreover, we disagree with each of the four "reasons" asserted by GM in support of the petition. First, we disagree with GM's assertion that there is no "proposed U.S. child seat latch mechanism that would not be compatible with the anchors on the subject vehicles." As GM stated in its May 7, 2001 supplemental petition, the incompatibility problem was discovered when a demonstration of a Britax child seat with a LATCH "hard connector" failed to fit onto the lower anchorages in a 2001 Pontiac Aztek vehicle. Based on the Britax comments, it is certainly possible, if not likely, that such a mechanism would be used on child restraint systems sold in the U.S. In any case, such a mechanism is clearly legal, and the current market decisions of all child restraint manufacturers do not preclude future restraints with "hard connectors."

GM's argument that since every child restraint is designed to work with the vehicle belt system in addition to the latch system, the child restraint will be able to be safely secured to the vehicle regardless of whether the latch mechanism works or not misses the point. The primary basis for the adoption of the LATCH requirements is to enhance safety beyond the level provided by the vehicle belt systems. The May 7, 2001 GM supplement noted that "[n]ational studies reflect an approximately 80% incorrect use rate. Many local checkups report misuse rate over 90%." (Attachment B, H.2., page C–5). Because of this high rate of misuse of the vehicle belt system, NHTSA adopted FMVSS No. 225 to make it easier to properly attach a child seat to the vehicle by means of the lower bar system. The requirement in FMVSS No. 213 that a child seat must be designed to be restrained by means of the vehicle belt system is not an alternative, equivalent means for restraining a child. This provision was kept in the standard to ensure that new child restraint systems equipped with a latch system can also be used in older motor vehicles that are not equipped with a latch system and in aircraft.

As to GM's statement that they "do not foresee any problem with future designs and the anchors that are below 5.9 mm," neither we nor GM can predict future child restraint system designs. There may be a system that cannot properly attach to bars that are less than 5.9 mm in diameter, and remain engaged during a crash. The fact that a problem has not occurred does not mean that the problem will not occur in the future.

GM acknowledged in its petition that in the future, "it is possible that a slotted attachment could be designed and that the slot might be too small to accept some of these anchors that exceed 6.1 mm." However, GM's proposal "to address this situation" by sending a letter to vehicle owners to advise them to "use the vehicle belt system to attach the child seats" would be inadequate for several reasons. First, for the reasons noted above, this would not provide an equivalent level of safety. Second, a consumer might fail to heed the warning against using the lower bars. Third, a consumer forced to use the vehicle belts might attach the seat incorrectly. And finally, such a letter would not warn subsequent owners of the vehicle.

For the reasons stated above, NHTSA has decided that GM has not met its burden of persuasion that the noncompliance described herein is inconsequential to motor vehicle safety, and the application is denied. Therefore, GM is required to provide notification of, and a remedy for, the noncompliance as required by 49 U.S.C. 30118–30120.

BILLING CODE 4910–59–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[IA–41–93]

Proposed Collection; Comment Request for Regulation Project

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning an existing final regulation, IA–41–93, (TD 8703), Automatic Extension of Time to File Partnership return of Income, Trust Income Tax Return, and U.S. Real Estate Mortgage Investment Conduit Income Tax Return (§ 1.6081–4).

DATES: Written comments should be received on or before February 5, 2002, to be assured of consideration.

ADDRESSES: Direct all written comments to George Freeland, Internal Revenue Service, room 5575, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this regulation should be directed to Allan Hopkins, (202) 622–6665, Internal Revenue Service, room 5244, 1111 Constitution Avenue NW., Washington, DC 20224.

SUPPLEMENTARY INFORMATION:

Title: Automatic Extension of Time for Filing Individual Income Tax Returns; Automatic Extension of Time To File Partnership Return of Income, Trust Income Tax Return, and U.S. Real Estate Mortgage Investment Conduit Income Tax Return.

OMB Number: 1545–1479.

Regulation Project Number: IA–41–93.

Abstract: Internal Revenue Code section 6081(a) provides that the Secretary may grant a reasonable extension of time for filing any return.

Under regulation section 1.6081–4, an individual required to file an income tax return is allowed an automatic 4-month extension of time to file if (a) an application is prepared on Form 4868, Application Extension of Time to File U.S. Individual Income Tax Return, or in such other manner as may be prescribed by the Internal Revenue Service, (b) the application is filed on or before the date the return is due, and (c) the application shows the full amount properly estimated as tax.

Current Actions: There is no change to this existing regulation.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households.

The burden for the collection of information is reflected in the burden of Form 4868, Application for Automatic Extension of Time to File U.S. Individual Tax Return.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: November 28, 2001.

George Freeland,

IRS Reports Clearance Officer.

Open Meeting of the New York Metro Citizen Advocacy Panel

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice.

SUMMARY: An open meeting of the New York Metro Citizen Advocacy Panel will be held in Brooklyn, New York.

DATES: The meeting will be held Thursday, January 17, 2002.

FOR FURTHER INFORMATION CONTACT: Eileen Cain at 1–888–912–1227 or 718–488–3555.

SUPPLEMENTARY INFORMATION: Notice is hereby given pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1988) that an operational meeting of the Citizen Advocacy Panel will be held Thursday, January 17, 2002, 6 p.m. to 9:20 p.m. at the Internal Revenue Service, 625 Fulton Street, Brooklyn, NY 11201.

For more information or to confirm attendance, notification of intent to attend the meeting must be made with Eileen Cain. Mrs. Cain can be reached at 1–888–912–1227 or 718–488–3555.

The public is invited to make oral comments from 9 p.m. to 9:20 p.m. on Thursday, January 17, 2002.

Individual comments will be limited to 5 minutes. If you would like to have the CAP consider a written statement, please call 1–888–912–1227 or 718–488–3555, or write Eileen Cain, CAP Office, P.O. Box R, Brooklyn, NY, 11201. The Agenda will include the following: Various IRS issues. Note: Last minute changes to the agenda are possible and could prevent effective advance notice.

Dated: November 20, 2001.

John J. Mannion,

Director, Program Planning & Quality.

[Docket No. 98–074–2]

RIN 0579–AB06

Commercial Transportation of Equines to Slaughter

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are establishing regulations pertaining to the commercial transportation of equines to slaughtering facilities. These regulations fulfill our responsibility under the 1996 Farm Bill to regulate the commercial transportation of equines for slaughter by persons regularly engaged in that activity within the United States. The purpose of the regulations is to establish minimum standards to ensure the humane movement of equines to slaughtering facilities via commercial transportation. As directed by Congress, the regulations cover, among other things, the food, water, and rest provided to such equines. The regulations also require the owner/shipper of the equines to take certain actions in loading and transporting the equines and require that the owner/shipper of the equines certify that the commercial transportation meets certain requirements. In addition, the regulations prohibit the commercial transportation to slaughtering facilities of equines considered to be unfit for travel, the use of electric prods on equines in commercial transportation to slaughter, and, after 5 years, the use of double-deck trailers for commercial transportation of equines to slaughtering facilities.

EFFECTIVE DATE: February 5, 2002.

FOR FURTHER INFORMATION CONTACT: Dr. Timothy Cordes, Senior Staff Veterinarian, National Animal Health Programs, VS, APHIS, 4700 River Road Unit 43, Riverdale, MD 20737–1231; (301) 734–3279.

SUPPLEMENTARY INFORMATION:

Background

We are establishing regulations pertaining to the commercial transportation of equines to slaughtering facilities. We are taking this action to fulfill a responsibility given by Congress to the Secretary of Agriculture in the Federal Agriculture Improvement and Reform Act of 1996 (commonly referred to as "the 1996 Farm Bill"). Congress added language to the 1996 Farm Bill concerning the commercial transportation of equines to slaughtering facilities after having determined that equines being transported to slaughter have unique and special needs.

Sections 901–905 of the 1996 Farm Bill (7 U.S.C. 1901 note, referred to below as "the statute") authorize the Secretary of Agriculture, subject to the availability of appropriations, to issue guidelines for the regulation of the commercial transportation of equines for slaughter by persons regularly engaged in that activity within the United States. The Secretary is authorized to regulate the food, water, and rest provided to such equines in transit, to require the segregation of stallions from other equines during transit, and to review other related issues the Secretary considers appropriate. The Secretary is further authorized to require any person to maintain such records and reports as the Secretary considers necessary. The Secretary is also authorized to conduct such investigations and inspections as the Secretary considers necessary and to establish and enforce appropriate and effective civil penalties. In a final rule published in the **Federal Register** on December 30, 1996 (61 FR 68541–68542, Docket No. 96–058–1), the authority to carry out the statute was delegated from the Secretary of Agriculture to the Assistant Secretary for Marketing and Regulatory Programs (now the Under Secretary for Marketing and Regulatory Programs), and from that official to the Administrator of the Animal and Plant Health Inspection Service (APHIS), and from the APHIS Administrator to the Deputy Administrator for Veterinary Services.

To clarify its intentions, Congress set forth definitions in the statute. For purposes of interpreting the statute, "commercial transportation" is defined as "the regular operation for profit of a transport business that uses trucks, tractors, trailers, or semitrailers, or any combination thereof, propelled or drawn by mechanical power on any highway or public road." "Equine for slaughter" means "any member of the *Equidae* family being transferred to a slaughter facility, including an assembly point, feedlot, or stockyard." "Person" means "any individual, partnership, corporation, or cooperative association that regularly engages in the commercial transportation of equine for slaughter" but does not include any individual or other entity who "occasionally transports equine for slaughter incidental to the principal activity of the individual or other entity in production agriculture."

Congress further clarified its intentions with regard to the statute through a conference report. The conference report states that the object of any prospective regulation would be the individuals and companies that regularly engage in the commercial transport of equines to slaughter and not the individuals or others who periodically transport equines to slaughter outside of their regular activity. The conference report also states that the Secretary has not been given the authority to regulate the routine or regular transportation of equines to other than a slaughtering facility or to regulate the transportation of any other livestock, including poultry, to any destination. In addition, the conference report states that, to the extent possible, the Secretary is to employ performance-based standards rather than engineering-based standards when establishing regulations to carry out the statute and that the Secretary is not to inhibit the commercially viable transport of equines to slaughtering facilities.

On May 19, 1999, we published in the **Federal Register** (64 FR 27210–27221, Docket No. 98–074–1) a proposal to establish regulations pertaining to the commercial transportation of equines to slaughtering facilities in a new part of title 9 of the Code of Federal Regulations (CFR). The new regulations would be found at 9 CFR part 88. We proposed to divide part 88 into six sections: § 88.1—Definitions, § 88.2—General information, § 88.3—Standards for conveyances, § 88.4–Requirements for transport, § 88.5—Requirements at a slaughtering facility, and § 88.6—Violations and penalties. The proposed regulations pertained only to the actual transport of a shipment of equines from the point of being loaded on the conveyance to arrival at the slaughtering facility.

We solicited comments concerning our proposal for 60 days ending July 19, 1999. During the comment period, we received 276 comments. They were from animal humane associations, academia, slaughter plants, horse industry organizations, veterinary practitioners, a State government and a foreign government, the U.S. Congress, livestock industry organizations, livestock transporters, an organization representing veterinarians, and private citizens, among others.

The commenters expressed a variety of concerns that are discussed below by topic. Many commenters referred to "horses" rather than "equines"; for consistency with the rule portion of this document, we will use the term

"equines," as appropriate, in discussing those comments.

Summary of Changes Made in Response to Comments

We are making the following changes in response to the comments we received.

1. *Definitions.* We have removed the separate definitions of *owner* and *shipper* and applied the definition of *shipper* to *owner/shipper.* As a result, all references to "owner" and "shipper" have been changed to "owner/shipper."

2. *General information.* Proposed § 88.2(b) provided that, to determine whether an individual or other entity transporting equines to a slaughtering facility is subject to the regulations, a USDA representative may request "from any individual or other entity" information regarding the business of the individual or other entity who transported the equines. We have amended that language in this final rule to clarify that a USDA representative may request that information "from the individual or other entity who transported the equines." Also, proposed § 88.2(b) stated that, when such information is requested, the individual or other entity who transported the equines "will" provide the information within 30 days and in the format specified by the USDA representative. We have amended this provision to clarify that the individual or other entity "must" provide the information within 30 days and in the format specified.

3. *Requirements for transport.* Proposed § 88.4(a)(1) specified that, for a period of not less than 6 hours prior to the equines being loaded onto the conveyance, the owner or shipper must provide each equine appropriate food, potable water, and the opportunity to rest. This final rule clarifies that the 6 hours must be *immediately* prior to the equines being loaded. Proposed § 88.4(a)(3) listed information that must be included on the owner-shipper certificate for each equine being transported. This final rule adds the following information to that list: (1) The owner/shipper's telephone number; (2) the receiver's (destination) name, address, and telephone number; (3) if applicable, the name of the auction/market where the equine is loaded; (4) the breed of the equine; and (5) a description of any tattoos on the equine. This final rule also requires at § 88.4(a)(3) that information provided on the owner-shipper certificate be typed or legibly completed in ink. Proposed § 88.4(a)(3) required the owner-shipper certificate to contain a statement of the equine's fitness to travel. This final rule clarifies that we mean fitness to travel at the time of loading. Proposed § 88.4(a)(3) required a statement on the owner-shipper certificate about any unusual physical conditions and any special handling needs. We have reworded this provision to clarify that we mean any unusual physical conditions that may cause the equine to have special handling needs. Proposed § 88.4(b)(2) stated that "veterinary assistance must be provided as soon as possible for any equines in obvious physical distress." This final rule adds that veterinary assistance must be provided by an equine veterinarian. In addition, § 88.4(b)(2) of this final rule adds that if an equine becomes nonambulatory en route, an owner/shipper must have the equine euthanized by an equine veterinarian. Further, § 88.4(b)(2) of this final rule specifies that, if an equine dies en route, the owner/shipper must contact the nearest APHIS office as soon as possible to allow an APHIS veterinarian to examine the equine, and if an APHIS veterinarian is not available, the owner/shipper must contact an equine veterinarian. Proposed § 88.4(e) required the shipper to secure the services of a veterinary professional to treat an equine, including performing euthanasia, if deemed necessary by the USDA representative. This final rule will require the veterinary professional to be an equine veterinarian.

4. *Requirements at a slaughtering facility.* Proposed § 88.5(b) stated that the shipper who transported the equines to the slaughtering facility must not leave the premises of the slaughtering facility until the equines have been examined by a USDA representative. Under this final rule, if an owner/shipper arrives at a slaughtering facility outside of the facility's normal business hours, the owner/shipper may leave the premises but must return to the premises of the slaughtering facility to meet the USDA representative upon his or her arrival.

Section 88.1—Definitions

Shipper and Owner

A number of commenters expressed concerns about the proposed definitions of *shipper* and *owner.*

We proposed to define *shipper* as "Any individual, partnership, corporation, or cooperative association that engages in the commercial transportation of equines to slaughtering facilities more often than once a year, except any individual or other entity that transports equines to slaughtering facilities incidental to the principal activity of production agriculture." We proposed to define *owner* as "Any individual, partnership, corporation, or cooperative association that purchases equines for the purpose of sale to a slaughtering facility." We stated that both owners and shippers would be subject to the regulations.

One commenter stated that exempting only those who ship equines once a year is too limiting and suggested allowing three shipments per year, which the commenter believed would allow the occasional transport of equines to slaughtering facilities by equine owners. One commenter stated that the definition of *shipper* should reflect both the frequency and number of equines transported. One commenter stated that an entity should have to adhere to the regulations if he or she transported more than 24 equines to slaughter per year.

Based on these comments and our experience with the equine industry, we have decided to apply the regulations to any individual, partnership, corporation, or cooperative association that engages in the commercial transportation of more than 20 equines per year to slaughtering facilities, except any individual or other entity who transports equines to slaughtering facilities incidental to his or her principal activity of production agriculture. We believe that those entities who transport more than 20 equines per year to slaughtering facilities, except those entities who transport equines to slaughtering facilities incidental to their principal activity of production agriculture, should be considered as regularly engaged in the commercial transportation of equines to slaughter.

Many commenters stated that replacing the term "person" in the statute with the terms "owner" and "shipper" exempts from the regulations horse owners who do not fit the definition of *owner*; and horse transporters who do not fit the definition of *shipper* and distorts Congress' intent. These commenters stated that Congress included in the definition of "person" any individual or entity that regularly engages in the transportation of equines for slaughter, exempting only those who occasionally transport equines to slaughter incidental to the principal activity of the same individual or other entity in production agriculture; however, the proposed definition of *owner* includes only an individual or entity that purchases equines for the purpose of sale to a slaughtering facility.

We agree that the definition of *owner* may be confusing and could be interpreted to mean that certain entities that did not purchase equines for the

purpose of sale to a slaughtering facility could be excluded from the requirements. Therefore, in this rule, we have removed the definition of *owner*. Instead, we will use the term *owner/shipper*, which we have defined as "Any individual, partnership, corporation, or cooperative association that engages in the commercial transportation of more than 20 equines per year to slaughtering facilities, except any individual or other entity who transports equines to slaughtering facilities incidental to his or her principal activity of production agriculture." We believe that the definition of *owner/shipper* meets the intent of the definition of *person* in the statute.

Many commenters objected that our proposed definitions for *shipper* and *owner* narrowed the scope of the statute and would provide more exemptions from the regulations than intended by Congress. The issue that was mentioned most frequently was that our proposal would exclude persons in the premarin mare urine (PMU) industry. They said these persons would not be "shippers" because their principal activity would be considered production agriculture. Others stated that the premarin farmer would not be an "owner" because the farmer did not purchase the foals or any other equines for the purpose of sale to a slaughtering facility. For the purposes of these regulations, we consider "production agriculture" to mean food or fiber production. The principal activity of the PMU industry is the collection of urine from pregnant mares for use by the pharmaceutical industry, which is not production agriculture. Therefore, individuals or other entities in the PMU industry who transport equines to slaughter incidental to this business would be covered by our regulations unless they ship 20 or fewer equines per year. To clarify that we consider production agriculture to mean food or fiber production, the definition of *owner/shipper* in this final rule specifies that production agriculture means production of food or fiber.

In addition, we believe that the new definition of *owner/shipper*, as previously explained, provides clarification as to the entities that must comply with the regulations.

Some commenters appeared to believe that the term "production agriculture" includes professional horse breeders, those who sell riding or work horses, and persons who have riding stables or board horses. They expressed concern that these individuals or other entities would be exempt from the regulations if they transported unwanted foals or other equines to slaughter. Some commenters assumed that trucking companies would be exempt from the regulations if they moved equines to slaughter for a farmer whose principal activity was production agriculture. As explained above, we consider production agriculture to mean food or fiber production. None of the entities listed above are engaged in food or fiber production. Therefore, they would not be exempt from the regulations unless they ship 20 or fewer equines per year.

Some commenters objected to our exempting entities who transport equines to slaughtering facilities incidental to their principal activity of production agriculture. One commenter suggested that the definition of *shipper* exempt only those who transport fewer than 10 equines per year, and another commenter stated that we should exempt those who transport 50 or fewer equines per year instead of providing an exemption for those entities involved in production agriculture. One commenter objected that the proposed definition of *shipper* would allow a farmer or other entity that engages in production agriculture to ship any number of equines a year to slaughtering facilities without complying with the regulations. Another commenter stated that there is no legitimate reason for persons or entities who derive income from production agriculture to be excluded from the regulations, and that anyone who engages in commercial transportation should have to comply with the regulations.

As stated previously, this final rule uses the term *owner/shipper* and exempts only those entities who transport 20 or fewer equines to slaughtering facilities per year and entities who transport equines to slaughtering facilities incidental to their principal activity of production agriculture (food or fiber production). As noted earlier, Congress clarified its intentions concerning who should be covered by the regulations in its conference report. The conference report states, among other things, that the object of any prospective regulation would be the individuals and companies that regularly engage in the commercial transport of equines to slaughter and not the individuals or others who periodically transport equines for slaughter outside of their regular activity. In the definition of *person* in the statute, Congress specifically exempted any individual or entity that occasionally transports equines for slaughter incidental to the principal activity of the individual or other entity in production agriculture.

One commenter stated that the definitions of *owner* and *shipper* should be amended to exclude slaughtering facilities. We disagree. If a slaughtering facility possesses equines that will be transported to a slaughtering facility, including its own, from its own feedlot or other premises and the facility transports more than 20 equines a year, that slaughtering facility is an owner/shipper and must comply with the regulations.

Slaughtering Facility

We proposed to define *slaughtering facility* as "A commercial establishment that slaughters equines for any purpose."

Many commenters objected that the definition of *slaughtering facility* excludes facilities that were specifically intended by Congress to be covered by the regulations (i.e., assembly points, feedlots, and stockyards). Several commenters stated that auctions and sales should be added to the definition of *slaughtering facility*. One commenter stated that tracing a stolen equine would be easier if all locations intended by Congress were regulated by APHIS.

The statute gives the Secretary authority to regulate the commercial transportation of equines to slaughtering facilities, which the statute indicates include assembly points, feedlots, or stockyards. The Secretary may use his or her discretion within this authority. At this time, we are defining slaughtering facility to mean only those establishments where equines are slaughtered because (1) we believe that equines moved to these facilities are most at risk of being transported under inhumane conditions, and (2) USDA representatives are available at these facilities to help enforce the regulations. Equines moved to assembly points and stockyards are more likely to be taken better care of because the purpose of the movement is for sale. Also, equines may not be moved from these points to slaughter. Equines sent to feedlots are going there for the express purpose of gaining weight. Plus, we have no way currently to monitor movements from all points to these intermediate destinations.

Regarding lost or stolen equines, we believe that the use of the owner-shipper certificate will help ensure that there is documented identification for each equine that is transported to a slaughtering facility. To improve its usefulness for tracebacks, the owner-shipper certificate will provide for the identification of any auction/market where an equine is loaded. In addition, we plan to develop a database of the information provided on the owner-shipper certificates.

One commenter stated that the definition of *slaughtering facility* should exclude assembly points, feedlots, and stockyards to which the equines are transported for feeding or holding if the time at such a location is intended to exceed 14 days.

The definition of slaughtering facility in this rule excludes assembly points, feedlots, and stockyards regardless of the amount of time an equine spends there. However, equines moved *from* an assembly point, feedlot, or stockyard to a slaughtering facility must be transported in accordance with the regulations.

Commercial Transportation

We defined *commercial transportation* as "The movement for profit via conveyance on any highway or public road."

One commenter stated that the definition of *commercial transportation* should exempt transport by conveyances that are owned or leased by slaughtering facilities that deliver equines to their own slaughtering facilities.

As stated previously, if a slaughtering facility transports equines to a slaughtering facility, including its own, the equines must be transported in accordance with the regulations.

Euthanasia

We proposed to define *euthanasia* as "The humane destruction of an animal by the use of an anesthetic agent or other means that causes painless loss of consciousness and subsequent death."

One commenter stated that we should provide a list of acceptable anesthetic agents, such as pentobarbital, choral hydrate, pentobarbital combinations, and gunshot, and require them to be administered by a trained person. This commenter added that succinylcholine curariform drugs or other paralytic agents, cyanide, strychnine, ether, and carbon monoxide should be prohibited.

We do not believe that listing anesthetic agents (pharmaceuticals that provide a loss of sensation with or without loss of consciousness) or requiring them to be administered by a trained person is necessary. As explained later in this document, § 88.4(b)(2) of this final rule requires veterinary assistance to be provided by an equine veterinarian. In addition, as explained later in this document, § 88.4(b)(2) of this final rule provides that, if an equine becomes nonambulatory en route, the equine must be euthanized by an equine veterinarian. Also, § 88.4(e) of this final rule provides that, if deemed necessary at any time during transportation to a slaughtering facility, a USDA representative may direct an owner/shipper to take actions to alleviate the suffering of an equine and this could include obtaining the services of an equine veterinarian to treat an equine, including performing euthanasia if necessary. An equine veterinarian will be aware of and will use appropriate and humane anesthetic agents for equines.

As mentioned in the proposed rule, we will allocate funds for public information efforts and are developing educational materials about the humane transport of equines.[1] These materials will include a list of equine veterinarians within the United States and their telephone numbers.

Section 88.2 General information

Federal Preemption

Proposed § 88.2(a) stated that State governments may enact and enforce regulations that are consistent with or that are more stringent than the regulations.

Many commenters expressed concerns that the regulations could preempt State laws that may be more stringent. Some pointed out that in the preamble, under the heading "Executive Order 12988," we stated that the regulations would preempt all State and local laws and regulations that are in conflict with the rule. Many commenters stated that the Federal regulations should not preempt State regulations unless compliance with the State regulations would make compliance with the Federal regulations impossible. In particular, many commenters expressed concern that the regulations would preempt existing State bans on transporting equines in double-deck trailers.

States may promulgate and enforce similar or even more stringent regulations to ensure the humane transport of equines to slaughtering facilities. State or local laws that are more stringent than the regulations will not necessarily conflict with the regulations. For example, the regulations would not preempt existing States' bans on transporting equines in double-deck trailers because double-deck trailers are not required by our regulations. The drivers of conveyances will be responsible for complying with any State laws that prohibit the use in a State of double-deck trailers for the transportation of equines to slaughter. State and local laws and regulations would be "in conflict" with the regulations established by this rule only if they made compliance with this rule impossible, just as some commenters suggested.

Collection of Information

Proposed § 88.2(b) stated that a USDA representative may request of any individual or other entity information regarding the business of the individual or other entity that transported the equines to determine whether that individual or other entity is subject to the regulations. The proposal further stated that the individual or other entity will provide the information within 30 days and in a format as specified by the USDA representative.

Several commenters stated that we should say "must" request information regarding the business of the individual or other entity that transported the equines and that we should state that the individual or other entity "must provide" in place of "will provide."

We believe that "may" is more appropriate in the first instance because the USDA representative may not need to request information at all times to make a determination of whether an individual or other entity that is transporting the equines to a slaughtering facility is subject to the regulations. However, as to using "must provide," we agree with the commenters and have amended the rule accordingly.

One commenter stated that we should clarify in § 88.2(b) that a USDA representative may request information from the entity that actually transported the load of equines.

We agree. We have amended § 88.2(b) to read as follows: "To determine whether an individual or other entity found to transport equines to a slaughtering facility is subject to the regulations in this part, a USDA representative may request from that individual or other entity information regarding the business of that individual or other entity. When such information is requested, the individual or other entity who transported the equines must provide the information within 30 days and in a format as may be specified by the USDA representative."

Section 88.3 Standards for Conveyances

Cargo Space

Proposed § 88.3(a)(1) stated that the animal cargo space of conveyances used for the commercial transportation of equines to slaughtering facilities must be designed, constructed, and maintained in a manner that at all times protects the health and well-being of the equines being transported (e.g., provides

[1] To obtain information about these educational materials, contact the person listed under FOR FURTHER INFORMATION CONTACT.

adequate ventilation, contains no sharp protrusions, etc.).

Many commenters stated that we should explain adequate ventilation, and some of these commenters stated that adequate ventilation cannot be provided in certain conveyances. Several commenters stated that the requirements should address protection from the elements and extremes of weather. One commenter suggested that trailers be modified to use air scoops to control air flow and stated that trailers that cannot be appropriately modified for operation in extreme weather conditions should not be used when adverse conditions are likely to exist. This commenter stated that a rating system could be used to rate trailers for their suitability for summer or winter conditions and could encourage transporters to invest in better-designed trailers.

As stated previously, the regulations are performance-based standards. If a conveyance does not provide adequate ventilation or other measures to protect the health and well-being of the equines in transit, it must not be used.

The educational materials we are developing about humane transport of equines will include information on ventilation and transport under various weather conditions.

Several commenters stated that our proposal did not address proper flooring in conveyances. Many commenters stated that the rule should require flooring within a conveyance to be of such material (rubber, neoprene, etc.) as to afford the animal secure footing at all times under all conditions. One commenter stated that welding 3/8-inch rods at 12-inch intervals to the deck could prevent slipping. Many commenters stated that ramps should also have nonslip (nonmetal, nonskid) flooring. Several commenters stated that wood shavings, sawdust, or sand could be used to provide secure footing.

There are many ways of providing secure footing and otherwise protecting the health and well-being of equines in transit. We do not believe it is necessary to specify how this must be done. Many of the shippers or owners who transport equines safely and correctly already use flooring that provides equines with secure footing. In addition, the regulations will require the use of an owner-shipper certificate that must describe any preexisting injury the equine has at loading. If an equine arrives at a slaughter facility with an injury that was not identified on the certificate, such as an injury from a fall due to insecure footing, the owner/shipper may be found in violation of the regulations and could be fined in accordance with § 88.6. Also, the educational program previously mentioned in this document will provide owners, shippers, and other stakeholders in the equine slaughtering industry with information regarding the safe transport of equines, including information on flooring.

One commenter objected that our proposal did not require conveyances to be cleaned of manure and urine. This commenter also stated that § 88.3(a)(1) should prohibit use of ropes, wires, or chains in animal cargo space because an equine could become entangled in or injured by them. This commenter further added that a conveyance that transports equines should not have openings in the walls or sides of the vehicle lower than 2 feet from the floor of the conveyance.

Under § 88.3(a)(1), the conveyance used for the commercial transportation of equines to slaughtering facilities must be maintained in a manner that at all times protects the health and well-being of the equines being transported. Maintenance of the conveyance would include the removal of manure and urine, when appropriate. Similarly, owners/shippers must ensure that the cargo space is free of any articles that may injure the equines. If a conveyance has openings in the walls or sides that cause harm to the equines, the conveyance must either be altered or not used for the transport of equines to slaughter. We do not believe that a comprehensive list of all articles or configurations that could injure an equine is necessary or appropriate.

Segregation of Aggressive Equines

Proposed § 88.3(a)(2) stated that the animal cargo space of conveyances used for the commercial transportation of equines to slaughtering facilities must include means of completely segregating each stallion and each aggressive equine on the conveyance so that no stallion or aggressive equine can come into contact with any of the other equines on the conveyance.

Many commenters stated that partitions or individual stalls should be required to segregate stallions and other aggressive equines, and one of these commenters stated that the partitions should be at least 6 feet high. Several commenters stated that partitions should be required for "high strung" equines. Several commenters stated that equines should be transported in trailers with separate individual compartments or haltered, and several commenters stated that equines could be tied to prevent injuries due to fighting if not partitioned. One commenter stated that tying equines will prevent rearing. One commenter stated that stallions can be muzzled and tied.

Under § 88.4(a)(4)(ii), stallions and aggressive equines are required to be completely segregated from other equines during transit. We do not believe that it is necessary to require owner/shippers to separate equines into individual compartments. However, because this is a performance-based standard, an owner/shipper could use a partition to separate aggressive equines from other equines. As to tying equines, we agree that tying an equine, in some cases, could prevent it from rearing; however, the equines could still kick. Also, haltering and tying an equine could pose a danger to the equine if it attempted to rear and lost its balance and fell. The equine could be stepped on by other equines or injure itself. As to the comment regarding muzzling the equines, we assume that this commenter recommended muzzling and tying stallions instead of segregating them. Tying up or muzzling an equine is not practical for all equines going to slaughter because some are not halter-broken. We believe the owner/shipper should have some discretion in determining how to achieve segregation of stallions and aggressive equines.

Interior Height

Proposed § 88.3(a)(3) stated that the animal cargo space of conveyances used for the commercial transportation of equines to slaughtering facilities must have sufficient interior height to allow each equine on the conveyance to stand with its head extended to the fullest normal postural height.

Several commenters stated that the performance specifications were too vague and could be subject to interpretation. One commenter suggested that § 88.3(a)(3) state, "Have sufficient height to allow each equine on the conveyance to stand in a normal relaxed posture with its feet on the floor, without its head or any part of its body contacting the ceiling of the conveyance. There must be sufficient clearance to prevent injury or abrasions to the withers and the top of the rump. Horses which arrive at their destination with reddened abrasions or fresh injuries on the withers or the top of the rump would be in violation." One commenter suggested "* * * extended up to the highest normal postural height so that its withers and top of its rump will not come into contact with the ceiling, but in any case the ceiling must be no less than 7 feet from the floor." Many commenters stated that the hauling area of vehicles used to transport equines should be a minimum of 7 feet high from the highest point

used by the animals for footing, to the lowest point in the ceiling, not having a strut or brace, and no less than 6 feet 6 inches from the highest point used by the animals for footing to the lowest point having a strut or brace. Some commenters provided ranges of 6 feet 6 inches to 7 feet for the minimum heights in the hauling area of conveyances, and several commenters stated that the height should be adequate for equines to stand upright and provide for safe loading and unloading. Many commenters stated that the intent of the statute was to require a conveyance to have a ceiling height of no less than 6 feet 6 inches. One commenter stated that § 88.4(a)(3) should state that, if equines arrive at their destination with injuries indicative of transport, the owner/shipper could be found in violation of the regulations.

We believe that the performance-based standards in this rule fulfill the intent of Congress under the statute to help ensure the humane movement of equines in commercial transit to slaughtering facilities. We have left the owner/shipper with the responsibility of ensuring that the design, construction, and maintenance of the conveyance used are adequate to ensure that the conveyance can safely and humanely transport equines. If an equine arrives at its destination with an injury, and the injury was caused by a violation of the regulations, the owner/shipper may be assessed civil penalties of up to $5,000 per violation for each equine injured. Accountability for injuries that occur during transport due to violations is the reason the owner-shipper certificate requires the documentation of any preexisting injuries that are present prior to loading.

Doors and Ramps

Proposed § 88.3(a)(4) stated that the animal cargo space of conveyances used for the commercial transportation of equines to slaughtering facilities must be equipped with doors and ramps of sufficient size and location to provide for safe loading and unloading.

Many commenters stated that we should provide engineering-based standards for doors and ramps. One commenter stated that ramps should have sides, and another commenter stated that rails should be required. One commenter stated that we could require commercial semi-trailers to travel with their own external ramps. One commenter stated that conveyances should be equipped with doorways and ramps of sufficient height and width and location to provide for safe loading and unloading, including in an emergency. One commenter suggested that conveyances be equipped with ramps and floors which provide nonslip footing and doors of sufficient width and height so that a horse that is walking off the conveyance will not sustain visible external injuries such as abrasions and lacerations. Another commenter stated that we should require ramps, rails, and flooring to be maintained in a good state of repair; fittings to be designed for quick and easy operation and maintained in good working order; ramps and floors to be covered with a nonmetal, nonskid surface; and flooring to be free of rust and rot and designed to allow for appropriate drainage. This commenter further stated that vehicles should be fitted with a ramp not to exceed 25 degrees in slope and be of sufficient width and equipped with solid sides of sufficient strength and height to prevent equines from falling off, and that all portable or adjustable ramps should be equipped with anchoring devices. This commenter also stated that vehicles must be equipped with an additional exit ramp suitable for use in emergencies and that conveyances should be equipped to provide for the safest and least stressful loading and unloading. One commenter stated that equines should be loaded in as quiet a situation as possible and that the area surrounding the ramp should also be nonslip.

We believe the performance-based standards in this rule provide clear guidance on what we mean by humane transport. Owner/shippers will have to ensure the safe loading and offloading of equines because, if equines sustain injuries while loading, in transit, or while offloading, due to violations of the regulations, the owner/shipper may be assessed civil penalties as set forth in § 88.6.

Double-Deck Trailers

Proposed § 88.3(b) stated that equines in commercial transportation to slaughtering facilities must not be transported in any conveyance that has the animal cargo space divided into two or more stacked levels, except that conveyances lacking the capability to convert from two or more stacked levels to one level may be used until a date 5 years from the date of publication of the final rule. The proposal also stated that conveyances with collapsible floors (also known as "floating decks") must be configured to transport equines on one level only.

Many commenters opposed the continued use of double-deck trailers. Many of them stated that the original intent of the statute was to ban the use of double-deck trailers for the transport of equines.

The statute does not prohibit the use of double-deck trailers or any other conveyance; however, it requires the commercial transport of equines to slaughter by humane methods.

Many commenters stated that continued use of double-deck trailers is inconsistent with providing for the safe and humane transport of equines to slaughter. Many commenters stated that our rule is inconsistent with the State of New York's ban on the use of double-deck trailers for the transport of horses. Several commenters stated that APHIS should provide a shorter grace period for the use of double-deck trailers, and some of these commenters suggested grace periods ranging from 30 days to 2 years. One commenter suggested that, rather than allow an across-the-board 5-year "grandfather clause," APHIS should require entities to show that they cannot practicably comply with an immediate ban. This commenter stated that this requirement would require the shipper to demonstrate how soon he or she could switch to a single-deck trailer. Many commenters expressed concern that, with the 5-year exception, a shipper could begin to use a new double-deck trailer or a double-deck trailer previously used to transport nonequine livestock at any time during the 5-year period. Several commenters stated that vehicles designed for horses should be required.

We believe that the grace period of 5 years is fair and reasonable. As stated in the proposal, we arrived at a time period of 5 years after discussions with interested parties, including representatives of the trucking and equine industries, at two meetings hosted by humane organizations. We believe that many of the double-deck trailers currently used to transport equines will need to be replaced in approximately 5 to 7 years.

We acknowledge that some double-deck trailers are likely to cause injuries and trauma to equines; however, we are allowing their continued use for the next 5 years in order to minimize economic losses to those dependent on the use of double-deck trailers. Nevertheless, we will hold owners and shippers responsible for any injuries that occur during transport. If equines are injured during transport to slaughtering facilities, even if that transport is in double-deck trailers still allowed under the regulations, the owner/shipper could be in violation of the regulations for each equine that is injured and be assessed civil penalties as set forth in § 88.6. Furthermore, although our rule may not mirror

regulations that were promulgated by certain States, this rule will not preempt State regulations that have bans on the use of double-deck trailers.

One commenter stated that the regulations are not clear as to whether the 5-year grace period means that no violations can be written for transporting tall equines in a double-deck trailer for 5 years. As stated above, we will hold owners and shippers responsible for any injuries that occur during transport if the injuries are due to violations of the regulations.

One commenter stated that the use of double-deck trailers will lead to a violation of § 88.4 regarding the observation of equines every 6 hours and offloading every 28 hours because shippers will have little incentive to comply with unloading requirements given the intrinsic hazards to handlers and equines.

In the proposal, we stated that equines frequently sustain injuries from being forced up or down the steep inclines of double-deck loading ramps. However, if an owner/shipper continues to use a double-deck trailer, he or she must take proper precautions to protect equines from injury during loading and offloading while using ramps. In addition, the owner/shipper must adhere to the prescribed observation period and offloading times provided in § 88.4(b)(2) and 88.4(b)(3), respectively. The grace period for double-deck trailers is strictly a phase-out period for the use of double-deck trailers and does not provide protection from the regulations for owners or shippers for injuries incurred by equines due to their transport in double-deck trailers. Therefore, if equines are injured during transport to slaughtering facilities, the owner/shipper may be found in violation of the regulations for each equine that is injured and may be assessed civil penalties as set forth in § 88.6 even if the transport was performed using a double-deck trailer.

One commenter stated that the regulations are not clear as to whether double-deck trailers will be banned as of the date of the final rule.

As of the effective date of this rule, conveyances with collapsible floors (also known as "floating decks") must be configured to transport equines on one level only and will not be prohibited. In addition, if a conveyance is converted from two or more stacked levels to one level, the conveyance will not be prohibited. Conveyances that lack the capability to convert from two or more stacked levels to one level may be used until 5 years from the date of publication of this rule.

Many commenters stated that double-deck trailers can jeopardize public safety and, therefore, should not be allowed.

We agree that if drivers operate double-deck trailers in an unsafe manner, the trailers can pose a danger to humans, just as any vehicle that is operated in an unsafe manner. In § 88.4, paragraph (b) states that during transit to the slaughtering facility, the owner/shipper must drive in a manner to avoid causing injury to the equines. This is a performance-based standard that is meant to protect the equines from injury caused by poor driving habits and should help ensure that double-deck trailers are driven in a safe manner. Our educational program regarding the humane transport of equines will include safe driving procedures.

Several commenters stated double-deck trailers should not be prohibited after 5 years if they can be altered to accommodate equines or converted to single level.

Double-deck trailers do not provide adequate headroom for equines, with the possible exception of foals and yearlings. We do not believe that trailers that have two or more permanent levels that are not collapsible can be adequately altered to accommodate adult equines, especially tall equines. A tall equine can be 8 feet tall to the top of its head when standing on all four legs and close to 12 feet tall when rearing. As stated in the proposal, the overpasses on most U.S. interstate highways are between 14- and 16-feet high. We are not prohibiting, either immediately or after 5 years, the use of double-deck trailers that can be converted to a single level.

Several commenters said that if equines are sorted by size, double-deck trailers could continue to be used. Other commenters stated that we should require only that ceilings be of adequate height, which one commenter maintained would prohibit only unusually tall equines from the double-deck portion of the trailers. One commenter stated that § 88.3(b) should require only that conveyances be of sufficient interior height to allow each equine to stand with its head extended to the fullest normal postural height.

Again, we do not believe that double-deck trailers provide sufficient headroom for horses other than foals and yearlings.

Two commenters stated that research has shown that stress levels and physiological factors are improved on double-deck trailers versus single-deck trailers.

Upon completion of the USDA research, we determined that rubber padding used in the single-deck trailers may have caused physiological differences between horses transported in double-deck trailers and horses transported in single-deck trailers. The rubber padding lined the interior walls of the single-deck trailer and limited the ventilation capacity within the conveyance. However, this discovery may support the use of rubber padding to decrease the exposure of equines to extremely low temperatures during their transport in the winter.

Several commenters opposed the prohibition on double-deck trailers because single deck, or "straight-floor," trailers do not hold as many horses. Several commenters stated that they now use the double-deck trailers for horses and other livestock and that going to a single deck, or "straight-floor," trailer would not be economical for them because they hold fewer animals. Thus, our rule would cause them economic hardship. One commenter stated that, since it will still be legal to transport livestock other than equines in double-deck trailers, and to transport equines to destinations other than slaughtering facilities in double-deck trailers, shippers will have no economic incentive to trade in double-deck trailers for single-deck trailers. The commenter maintained that the rule will, therefore, impede the transport of equines to slaughter by reducing the number of vehicles available for this transport and increasing the costs of transporting equines to slaughter.

We acknowledge that double-deck trailers can carry more equines and other livestock than single-deck trailers. We are allowing the continued use of double-deck trailers for the next 5 years in order to minimize economic losses to those dependent on the use of double-deck trailers. We do not believe that equines can be safely and humanely transported on a conveyance that has an animal cargo space divided into two or more stacked levels. As stated in the proposal, double-deck trailers can continue to be used to transport other commodities, including produce and livestock other than equines. Also, owners can sell their serviceable trailers at fair market value to transporters of commodities other than equines.

Section 88.4 Requirements for Transport

Food and Water Prior to Transport

Proposed § 88.4(a)(1) stated that, prior to the commercial transportation of equines to a slaughtering facility, the shipper or owner must, for a period of not less than 6 consecutive hours prior to the equines being loaded on the

conveyance, provide each equine appropriate food (*i.e.*, hay, grass, or other food that would allow an equine in transit to maintain well-being), potable water, and the opportunity to rest.

Several commenters expressed concern that the proposed rule would not require the 6-hour period of feed, water, and rest to occur immediately preceding loading for transport. One commenter suggested saying "not more than 6 consecutive hours prior to the equines being loaded." One commenter suggested inserting the words "for a period of at least 6 consecutive hours immediately. * * *"

It was our intent in § 88.4(a)(1) to require a 6-hour time period immediately preceding the loading of the equines. To make that clearer, we have added the word "immediately" before the word "prior" in the rule portion of this document.

Several commenters stated that the proposed provisions for access to food and water were too vague. One commenter objected to the lack of specific information regarding the quality or quantity of food and water to be provided. Two commenters stated that equines should be grouped appropriately to ensure that all of them have uninhibited access to food and water, and that water should be *ad libitum*, and one other commenter stated that the equines should have unimpeded access. One commenter suggested that we require "free access to potable water *ad libitum*."

The rule requires that each equine be provided appropriate food and potable water. This means that each equine must have access to the food and water. Also, the rule requires "appropriate" food. We do not believe that it is necessary to prescribe the quality or quantity of food that must be provided or to require grouping of animals. We believe that the owner/shipper can determine the quality and quantity of food and water that should be provided to equines and the best methods to ensure that all equines have access to food and water.

One commenter stated that requiring owners or shippers to provide equines with access to feed within 6 hours of transport could be a potential problem due to the possibility of impaction. This commenter stated that there are anecdotal accounts linking impaction to feed and dehydration and that requiring feed may need more study.

We are aware that impaction can occur under certain circumstances; however, impaction has been associated with inadequate intake of water. (Impaction is the blockage of a portion of the digestive system formed by digested material.) However, we believe that allowing equines access to appropriate food and potable water for 6 hours immediately prior to loading is unlikely to result in impaction and is essential to ensure that the equines do not undergo serious physiological distress during transit.

One commenter stated that the minimum rest period prior to loading should be 16 hours with unlimited access to water, good quality hay, and shelter, and another commenter stated that water should be provided within 12 hours of transport.

Based on one of the USDA-commissioned research studies, we found that equines that were provided water for 6 hours immediately before transport did better than those that were provided water for more than 6 hours.

One commenter stated that feedlots practice dry lotting, which means that equines are not fed immediately prior to slaughter, and the regulations are not clear as to whether the practice will be prohibited when the rule is finalized. One commenter stated that providing food and water is not necessary if equines are going directly to processing from the truck.

The regulations at § 88.4(a)(1) require that equines be provided food and water prior to loading for transport to slaughter, and § 88.5 requires that equines be given access to food and water after being unloaded at the slaughtering facility. As a consequence, dry lotting will be prohibited.

One commenter stated that equines purchased at sale barns may have already been deprived of water for quite some time. This commenter stated that the regulations are not clear as to how USDA representatives will verify that each equine has received the required 6-hour access to food and water and whether USDA representatives will examine equines for evidence that they received preloading services upon arrival at the slaughtering facility. One commenter stated that we should not trust the owner-shipper statement that claims an equine was provided access to appropriate food, potable water, and rest prior to loading.

Owners/shippers are responsible for ensuring that equines have access to food, water, and rest for 6 hours immediately prior to loading on a conveyance for transport to a slaughtering facility. In accordance with § 88.4(a)(3), the owner/shipper must certify on the owner-shipper certificate for each equine being transported that the equine had access to food, water, and rest for the 6 hours immediately prior to loading into the conveyance. In addition, in accordance with § 88.5(a)(3), a USDA representative must be given access to the equines upon arrival at the slaughtering facility. If the USDA representative suspects that the equines are suffering from the effects of a lack of food, water, or rest, he or she can question the owner/shipper regarding the care the equines received prior to and during transport. If we determine that an owner/shipper did not comply with any requirement, the owner/shipper may be subject to civil penalties of up to $5,000 per violation per equine as set forth in § 88.6. In addition, if we determine that the owner/shipper falsified the form, the owner/shipper could be subject to a fine of not more than $10,000 or imprisonment for not more than 5 years or both. (The penalty for falsification of the owner-shipper certificate is stated on the owner-shipper certificate (18 U.S.C. 1001).)

USDA Backtag

Proposed § 88.4(a)(2) stated that, prior to the commercial transportation of equines to a slaughtering facility, the shipper or owner must apply a USDA backtag to each equine in the shipment.

One commenter stated that we should remove the requirement for a backtag and require each equine to be marked in a manner that provides a unique identification of the animal.

Backtags provide a unique identification for each animal. They are easy to apply and easy to read. We believe that requiring their use will facilitate identification of equines during loading, unloading, and in spaces where they are congregated. If an equine has a unique identifying mark such as a brand or tattoo, the owner-shipper must record the identifying mark on the owner-shipper certificate along with the USDA backtag number.

One commenter stated that an identification tag should be attached to each equine and that the tag should provide the identification of the owner/shipper and the license plate number of the conveyance.

A USDA backtag will be applied to each equine and the number will be recorded on the owner-shipper certificate for each equine. The owner-shipper certificate will contain the name, address, and telephone number of the owner/shipper. In addition, the vehicle license number or registration number of the conveyance will be recorded on the owner-shipper certificate. Because the USDA backtag provides a unique identification for each animal, the backtag will allow us to determine the identification of the

owner/shipper should that become necessary.

Owner-Shipper Certificate

Proposed § 88.4(a)(3) stated that, prior to the commercial transportation of equines to a slaughtering facility, the shipper or owner must complete and sign an owner-shipper certificate for each equine being transported. The proposal also stated that the owner-shipper certificate for each equine must accompany the equine throughout transit to the slaughtering facility and must include specified information, including, under § 88.4(a)(3)(v) (redesignated as § 88.4(a)(3)(vii) in this final rule), a statement of the equine's fitness to travel (a statement that the equine is able to bear weight on all four limbs, is able to walk unassisted, is not blind in both eyes, is older than 6 months of age, and is not likely to give birth during the trip).

One commenter maintained that an owner-shipper certificate is unnecessary paperwork, because, upon arrival at the slaughtering facility, the USDA representative can check the equines and conveyance and address any problems noted with the owner of the equines.

As explained in our proposal, we have several reasons for requiring the owner-shipper certificate. They make the owner/shipper responsible for ensuring that the equines are fit to travel and have had adequate food, water, and rest prior to transport; provide a way for the USDA representative at slaughtering facilities to determine whether an injury occurred en route; assist in the prosecution of persons found to be in violation of the regulations; and facilitate the traceback of any stolen equines.

Owner-Shipper Certificate; Who Signs

Many commenters expressed concern about an owner or shipper preparing the certificate for movement. In particular, with respect to the statement of fitness for travel, they stated that the owner or shipper may have an economic incentive to certify the equines fit to travel. Many commenters stated that a professional should certify an equine's fitness to travel prior to the transport to ensure the equine is in a reasonable state of health at the beginning of the trip. (Some of these commenters listed people such as a licensed veterinarian, accredited veterinarian, USDA representative, or licensed veterinary technician. One commenter added certified humane officers and brand inspectors.) Many commenters stated that the fitness to travel should be certified by a veterinarian because an owner/shipper could ship a lame equine without identifying the injury on the certificate and state that injury occurred en route if lameness is noted as the equine is unloaded at the slaughtering facility. Several commenters stated that a lack of veterinary certification could mean that the USDA representative at the slaughtering facility would be unable to determine whether the injuries were preexisting or a result of transportation. One commenter stated that without medical or veterinary knowledge or training, there may be mistakes or inaccurate entries on the owner-shipper certificate. One commenter stated that the owner-shipper certificate requires subjective determinations that cannot be made by nonveterinary personnel. Many commenters stated that the original intent of the statute was to ban the shipment of sick and injured horses by having a veterinarian inspect the horses, rather than the owner, who stands to lose money if the horse is not shipped.

We considered requiring a veterinarian to certify each equine's fitness to travel. However, in most cases, because of the lack of a client-patient relationship, the veterinarian would not have liability coverage. We also determined that use of accredited veterinarians would be inappropriate because, as provided in 9 CFR part 161, they perform functions required by cooperative State-Federal disease control and eradication programs. We also decided, however, that a veterinarian was not needed to provide the information we require on the owner-shipper certificate. This information could be provided by any person who makes careful observation of an equine. However, if an owner/shipper wishes to have a veterinarian examine an equine prior to loading the equine for slaughter, the owner/shipper may make those arrangements.

If an equine arrives at a slaughtering facility with an injury that should have prevented the equine from being transported (e.g., if the equine cannot walk unassisted), the owner/shipper may be found in violation of the regulations and could be subject to civil penalties as set forth in § 88.6. In addition, if an equine arrives at a slaughtering facility with an injury that was not identified on the owner-shipper certificate, the USDA representative, who in most cases will be a veterinarian, will make a professional judgment as to the length of time an equine suffered the lameness or the age of a wound and its possible cause. If the USDA representative determines that the injury occurred en route or was present prior to loading the equine on the conveyance, the owner/shipper may be found in violation of the regulations and subject to civil penalties as set forth in § 88.6. Any owner/shipper found to have falsified a certificate could also be subject to a fine of not more than $10,000 or imprisonment for not more than 5 years or both, in accordance with 18 U.S.C. 1001.

A few commenters stated that allowing owners or shippers to complete the owner-shipper certificate is inconsistent with other regulations that require an accredited veterinarian to sign a certificate or that require a health certificate for the interstate movement of equines.

Other Federal regulations regarding the interstate movement of equines, for example, those for equine infectious anemia (9 CFR part 75), are intended to prevent the interstate spread of communicable diseases of equines. This rule does not pertain to a disease control or eradication program, and veterinary medical training is not required to complete the owner-shipper certificate.

One commenter asked if there would be a penalty for the owner or shipper if he or she is mistaken about an equine's fitness to travel. One commenter stated that an owner or shipper should not be found in violation of the regulations if he or she makes a mistake on the owner-shipper certificate or neglects to mark a box, such as the sex of the equine.

If an owner/shipper is unsure about an equine's fitness to travel, he or she should seek the proper guidance from a veterinarian or other qualified individual. If an owner/shipper makes a mistake on the owner-shipper certificate or fails to accurately complete the certificate, APHIS will attempt to determine whether the mistake or failure to accurately complete the certificate was inadvertent or an attempt to circumvent the regulations. We understand that, at times, someone who fills out a certificate may make a minor error, and we do not intend to bring a case against someone solely because he or she made a minor clerical error. However, falsification of the owner-shipper certificate is a criminal offense that may result in a fine of not more than $10,000 or imprisonment for not more than 5 years or both because the owner-shipper certificate is a Federal document.

In the proposal, § 88.4(a)(3)(iii) (redesignated as § 88.4(a)(3)(v) in this final rule) required that the owner-shipper certificate provide a description of the equine's physical characteristics, including such information as sex, coloring, distinguishing markings, permanent brands, and electronic means of identification.

Several commenters stated that, at the point of loading, a USDA representative should inspect the equines to verify the description of the equine on each owner-shipper certificate.

Shippers and owners are responsible for the accuracy of the information on the owner-shipper certificate for each equine being transported. We believe that shippers and owners are capable of providing an accurate description of an equine's physical characteristics. If we find that an owner/shipper has provided false information on an owner-shipper certificate, the owner/shipper may be found in violation of the regulations and be assessed civil penalties for each equine as provided in § 88.6. In addition, if an owner/shipper provides false information, the owner/shipper could be subject to criminal charges that may result in a fine of not more than $10,000 or imprisonment for not more than 5 years or both, under 18 U.S.C. 1001.

Owner-Shipper Certificate; When Signed

One commenter stated that fitness to travel should not be determined more than 48 hours prior to loading.

We agree that if an equine's fitness to travel is assessed too far in advance, there is a chance that an equine that becomes ill or injured would not be noted. The fitness to travel should be determined during the period prior to the loading of equines into the conveyance. Ideally, this determination should be made when equines are provided appropriate food, potable water, and rest in accordance with § 88.4(a)(1). In this final rule, we have reworded the provision concerning an equine's "fitness to travel" to clarify that we mean at the time of loading (see § 88.4(a)(3)(vii)).

Owner-Shipper Certificate; Identification of Owner, Shipper, Consignee, Vehicle

Under proposed § 88.4(a)(3), the shipper's name and address, and, if the shipper is not the owner of the equines, the owner's name and address, and a description of the conveyance, including the license plate number, must be included on the owner-shipper certificate.

One commenter stated that we should require the owner-shipper certificate to state the ultimate destination (city, State, and name of business) as well as any anticipated intermediate stopping points to allow USDA and law enforcement personnel to intercept a conveyance en route to a slaughtering facility. This commenter also suggested that the expected driving route should be filed with a copy of the owner-shipper certificate at the point of sale and departure.

We agree that the destination of each equine should be required on the owner-shipper certificate and our certificate includes fields for that information. We have added a requirement to § 88.4(a)(3) that the owner-shipper certificate provide the name, address (street address, city, and State), and telephone number of the receiver (destination). We do not believe that listing intermediate stopping points on the owner-shipper certificate is necessary, however. There are only a few slaughtering establishments for equines. Most drivers follow a set route to the slaughtering facility to which they transport equines and, as a result, USDA representatives or other law enforcement officials will be able to locate the conveyance.

Several commenters stated that it is unnecessary to require a separate owner-shipper certificate for each equine in a shipment or to require a new owner-shipper certificate for each segment of the trip. They stated that, in the case of equines that are unloaded en route, information about the equines' fitness to travel and other required information could be added to the original certificate if the certificate was designed to accommodate more than one trip segment.

We do not believe that there would be circumstances that an owner/shipper certificate would unload equines except in an emergency or as required in § 88.4(b)(3) for equines that have been on a conveyance for 28 hours. Under these circumstances, we would want the owner/shipper to reassess each equine's fitness to travel prior to reloading onto the conveyance.

We require an owner-shipper certificate for each equine on the conveyance because the certificate provides a description of the equine. These descriptions can help us trace lost or stolen equines.

One commenter stated that the owner-shipper certificate should include the telephone number of the consignor (shipper) and consignee's (receiver/destination) businesses.

We agree. There is a field for this information on the certificate, and we have added that requirement to § 88.4(a)(3).

Owner-Shipper Certificate; Description of the Equine

As noted earlier, proposed § 88.4(a)(3)(ii) required the owner-shipper certificate to include a description of the equine's physical characteristics, including such information as sex, coloring, distinguishing markings, permanent brands, and electronic devices that could be used to identify the equines.

One commenter stated that the owner-shipper certificate should include additional identifying information, including the breed or type of equine, color combinations, and the location and relative size of any markings, brands, tattoos, or scars, as well as the approximate age of the equine. The commenter stated that this information could assist individuals who are tracing missing or stolen animals. One commenter stated that a description of any physical preconditions should be included on the owner-shipper certificate. One commenter stated that we should require tattoos, especially lip tattoos, to be identified on the certificate.

The owner-shipper certificate contains fields for the owner/shipper to indicate the breed and color of the equine. If a specific breed or color is not indicated on the certificate, there is a field marked "Other" that should be completed. Also, on the owner-shipper certificate, the field for identifying marks specifies "brands, tattoos, and scars." In this final rule, § 88.4(a)(3) specifies that the owner-shipper certificate should include the breed of the equine and any tattoos that are present. We believe that most people who are familiar with handling equines will also add any facial or leg markings, as appropriate; however, we have added "facial or leg markings" to the field for "Identifying Marks" on the owner-shipper certificate. The certificate also provides space for recording any preconditions. We are not requiring an age to be indicated because an owner/shipper may have to guess the age of the equine. People use the teeth of an equine to determine its age, but, in most cases, there are many variables such as teeth grinding and diet that can affect the accuracy of the assessment.

Who Determines Fitness To Travel

One commenter stated that studies have shown that the majority of injuries to equines do not occur during transport or marketing but occur at the point of origin, prior to transport, due to either neglect or abuse. Several commenters provided examples of injuries that equines exhibited upon their arrival at a slaughtering facility that were determined to have occurred at the point of origin. These examples included equines that were emaciated, had severe founder, broken legs, deformities, etc. Several commenters provided examples of injuries, such as illness and broken limbs, that equines

exhibited at sales or auctions and that were caused by owners. The commenters stated that the equines were shipped even though they were unfit to travel. One commenter provided examples of people who have a history of transporting injured equines, transporting equines without water, or transporting equines in conveyances that are unsafe. A number of commenters suggested that APHIS should regulate the care of equines prior to loading.

This rule prohibits the commercial transport to slaughter of equines that are not found fit to travel under § 88.4(a)(3)(vii). This rule also requires that the equines be provided food, water, and rest for the 6 hours immediately prior to transport under § 88.4(a)(1). We believe that these regulations will prevent most animals with point-of-origin injuries from being moved to slaughtering facilities via commercial transportation.

Criteria for Fitness To Travel

As noted above, we proposed to require a statement of the equine's fitness to travel on the owner-shipper certificate for each equine. Proposed § 88.4(a)(3)(v) (redesignated as paragraph (a)(3)(vii) in this final rule) stated that equines must be able to bear weight on all four limbs, be able to walk unassisted, have sight in at least one eye, be older than 6 months of age, and not be likely to give birth during the trip.

One commenter suggested that we remove the reference to a "statement of fitness to travel" because that language implies that we are requiring untrained people to make a subjective determination.

We agree that, by itself, that phrase is subjective. However, the criteria for making that determination are objective. The phrase simply states the purpose of the criteria that the owner/shipper must consider prior to loading equines on a conveyance.

Several commenters objected to, or suggested changes to, the criteria. Some stated that the proposed regulations would allow the shipment of blind animals that are unable to defend themselves, board a conveyance, or travel without injury, as well as allow the transport of equines that are extremely ill, diseased, injured, incapacitated, or not physically fit. One commenter stated that equines that exhibit obvious disease, injuries, or similar indications of ill health should not be transported unless they are being removed from a facility for humane destruction due to the disease or injury as determined by a certified veterinarian. One commenter stated that we should prohibit the transport of any equine with a known physical problem likely to cause collapse and that animals that are in immediate and severe distress and determined unfit to travel by an accredited veterinarian should be immediately and humanely euthanized. One commenter stated that, at minimum, the regulations should require that an equine bear weight evenly on all four limbs as determined by a veterinarian.

In § 88.4, paragraph (a)(3)(vii) prohibits the transport of equines that are blind in both eyes. However, equines that are blind in one eye can be transported safely and humanely when correctly loaded and placed on the conveyance. In addition, paragraph (a)(3)(vii) requires that equines be able to bear weight on all four limbs, be able to walk unassisted, be older than 6 months of age, and not be likely to give birth during the trip. These requirements will, in most cases, prohibit the transport of equines that are extremely ill or diseased, injured, or incapacitated.

Two commenters stated that, to ensure that equines are fit for travel, the owner-shipper certificate should be modified to state, "Horse is able to walk unassisted without physical prodding or marked difficulty." The commenters stated that equines are often forced to walk onto vehicles through the use of whips, hard slaps, kicks, or other devices and that "unassisted" is not defined and could be interpreted to allow the use of whips, hard slaps, etc. One commenter stated that an equine that cannot enter a conveyance under its own power should not be loaded.

In § 88.4, paragraph (a)(3)(vii) states that the equine must be able to bear weight on all four limbs and be able to walk unassisted. Unassisted means that the equine must be capable of climbing a ramp or entering a conveyance with ease and under its own power. In addition, § 88.4(c) states that the equines must be handled in a manner that does not cause unnecessary discomfort, stress, physical harm, or trauma.

One commenter stated that the owner-shipper certificate should use language similar to performance-based standards, i.e., require that the equine arrive in a condition that meets the requirements of animal cruelty laws.

We believe that a reference to animal cruelty laws would not specifically address the needs of equines being transported to slaughter. We believe that our requirements are clear.

Many commenters stated that pregnant mares, late-term pregnant mares, foals of varying ages (up to 1 year), and foals less than 600 pounds should not be transported to slaughtering facilities.

Equines that are likely to give birth during transport can develop serious complications if they foal during transport. In addition, the mare's and the foal's well-being could be in danger. Among other things, § 88.4(a)(3)(vii) states that an equine cannot be transported if it is likely to give birth during the trip. If an owner/shipper thinks it's possible that a mare is close to delivering, the owner/shipper should not put the mare on the conveyance. If an owner/shipper transports a late-term pregnant mare that gives birth during transport, the owner/shipper may be found in violation of the regulations. In addition, the owner/shipper could be found to have falsified the owner-shipper certificate. We believe that, as long as the mare is not likely to give birth during transport, it can be safely transported.

As to the transport of foals to slaughtering facilities, § 88.4(a)(3)(vii) prohibits, among other things, the transport of equines less than 6 months of age to a slaughter facility. We believe that foals older than 6 months of age, including those that weigh less than 600 pounds, can be transported safely and humanely if the foals are loaded in a proper manner.

One commenter stated that mares should not be taken from their foals and shipped to slaughter if their foals are under 4 months of age.

We do not believe that it is necessary to prohibit the shipment of mares that will leave 4-month-old foals on the premises of origin. Foals are weaned from 1 to 9 months of age, depending on the standard practice of the premises of operation. Weaning is extremely traumatic at any age and could be in direct proportion to the time the mare and foal spend together. From this standpoint, separating a mare from its foal at 4 months may be less stressful for the mare and the foal than when the foal is older.

Several commenters expressed concern that shoed equines, especially equines with shoes on their hind feet, could injure other equines and said they should not be transported.

We are aware that equines can be injured when kicked by other equines that are wearing shoes. In addition, shoes can be slippery in a conveyance if the proper flooring is not provided. As stated previously, these regulations are performance-based standards. We believe that shoed equines may be transported safely if the owner/shipper takes proper precautions and, therefore,

will not prohibit the transport of shoed equines. However, the owner/shipper must ensure that equines are not injured during transport. Any injuries that an equine incurs during transport may result in the owner/shipper being found in violation of the regulations and subject to civil penalties as provided in § 88.6.

One commenter stated that the regulations will require owners to keep lame and debilitated equines or pay for euthanasia rather than sell the equines to slaughter to salvage some value.

The regulations pertain to those individuals who meet the definition of *owner/shipper*. An individual or entity is exempt from these regulations if the individual or entity transports 20 or fewer equines to slaughtering facilities or transports equines to slaughtering facilities incidental to his or her principal activity of production agriculture.

Owner-Shipper Certificate; Identification of Special Handling Needs

Proposed § 88.4(a)(3)(vi) (redesignated as § 88.4(a)(3)(viii) in this final rule) stated that the owner-shipper certificate should include a description of anything unusual with regard to the physical condition of the equine, such as a wound or blindness in one eye, and any special handling needs.

One commenter stated that special handling needs means taping and wiring horses mouths for the entire journey, which are practices that should be prohibited. Many commenters stated that taping shut the mouths and/or eyes of aggressive horses is inhumane and should be prohibited. One added that taping the nostrils of equines should be banned. One commenter stated that the meaning of special handling is not clear and that we should remove those words from § 88.4(a)(3)(vi). This commenter questioned whether a determination by APHIS that an equine required special handling would override a different opinion expressed on an owner-shipper certificate.

By special handling needs, we meant that an owner/shipper should provide any information that should be taken into account to ensure the safe and humane transport of the equine. For example, an owner/shipper could use this space to indicate that an equine is blind in one eye, which would alert those handling the equine to be cautious when handling the horse. We have slightly reworded the provision concerning special handling needs in this final rule to clarify what we mean. Special handling needs should in no way be interpreted to mean instructions for taping or wiring the mouths or taping the eyes or nostrils of equines. We do not condone such practices. In fact, § 88.4(c) of the regulations requires the handling of equines in a manner that does not cause unnecessary discomfort, stress, physical harm, or trauma to the equines. The educational program that we are developing will explain appropriate techniques for the humane transport of equines to slaughtering facilities.

Owner-Shipper Certificate; Date, Time, and Place of Loading

Proposed § 88.4(a)(3)(vii) (redesignated as § 88.4(a)(3)(ix) in this final rule) stated that the shipper or owner must indicate on the certificate the date, time, and place the equines were loaded.

Two commenters stated that the departure time should be noted and one commenter stated that a third party should verify the exact time and location of loading.

We believe that the time each equine was loaded onto the conveyance is more essential than the time of departure because, based on § 88.4 (b)(2), any equine that has been on the conveyance for 28 consecutive hours, whether the conveyance was in motion or not, must be offloaded and provided appropriate food, potable water, and the opportunity to rest for 6 consecutive hours.

We do not believe that a third party should be required to verify the time and location of loading. If an owner/shipper falsifies the owner-shipper certificate, the falsification may be a criminal offense that could result in a fine of not more than $10,000 or imprisonment for not more than 5 years or both.

Owner-Shipper Certificate; Other Comments

One commenter stated that APHIS should require the owner-shipper certificate to be legibly filled out in ink or typed and should prohibit script writing other than for the signature. One commenter stated that the departure time should be written in ink.

We agree that the owner-shipper certificate must be legibly completed. We are amending § 88.4(a)(3) to require the owner/shipper to type or legibly provide in ink the information required on the owner-shipper certificate. If the owner-shipper certificate is not legibly completed, the owner/shipper may be assessed a civil penalty.

One commenter wanted the certificate to state that the equine was loaded under the supervision of the owner/shipper. The commenter also requested that the certificate include a statement that the horse's condition, gender, and size were taken into account in positioning it in the vehicle.

We do not believe it is necessary to require a statement that the equine was loaded under the supervision of the owner/shipper. The owner/shipper must complete and sign the owner-shipper certificate, so he or she must be present. We do not believe that adding a qualifying statement that the equine's condition, gender, and size were taken into account when loading is necessary. However, our educational program will include instruction on the proper loading and offloading of equines, as well as how to position animals so that smaller or thin equines or ponies are not harmed by larger equines.

Another commenter also stated that the owner-shipper certificate should include the name and address of the shipper and the owner if the owner is not the shipper.

We do not believe that the owner has to be identified on the certificate if he or she is not the shipper. In most cases where the owner is not the shipper, the shipper will have purchased the equines from an auction/market. The records maintained at most auction/markets include the identification and address of the owner of the equines should it become necessary to trace the owner.

One commenter stated that funds should be set aside for a pamphlet with clear instructions on the proper handling of equines and completion of the owner-shipper certificate.

The educational program we are developing in conjunction with this rule will provide guidelines for the humane transport of equines to slaughtering facilities, including instructions for completion of an owner-shipper certificate.

Segregation of Stallions and Aggressive Equines

Proposed § 88.4(a)(4)(ii) required that each stallion and any aggressive equines be segregated on the conveyance to prevent them from having contact with any other equine on the conveyance.

Many commenters expressed concern that our requirement for the segregation of stallions would encourage point-of-sale castration. They recommended that our rule be amended in some way to discourage point-of-sale castration. One commenter stated that the regulations should not allow a stallion to be gelded within 2 weeks preceding transport unless it is segregated and accompanied by a signed and dated veterinary certificate.

We do not believe that the regulations need to address point-of-sale castration. A recovery period of 21 days or more is

necessary for the site of castration to heal. If an equine arrives at slaughter with a fresh and open wound, the equine's value will decline, and the owner/shipper will lose money. The healthier an equine is upon arrival at the slaughtering facility, the more that equine is worth. In addition, stallions retain their aggressive behavior for a period of at least 30 days after castration. Therefore, an owner/shipper could not circumvent the requirement for segregating a stallion by performing a point-of-sale castration because the equine would still be aggressive, and aggressive equines must be segregated from other equines in the conveyance.

Many commenters stated that equines should be segregated by size and/or sex, several commenters added age, and one commenter added height and weight. One commenter stated that all equines 14.2 hands or less should be shipped on separate conveyances from larger equines. One commenter stated that thin, weak, and old horses should be separated.

As stated previously, we designed performance-based standards to ensure that equines have sufficient space and are protected from injury during transport. We do not believe it is necessary to spell out in the regulations exactly how this must be accomplished. However, the educational program we are developing will show appropriate ways to transport equines and will address loading by size. It is worth noting that, if an equine is extremely thin, weak, or old, the equine may not be fit to travel as required by § 88.4(a)(3)(vii).

Some commenters stated that we should not require segregation of aggressive equines. One commenter stated that we may have gone beyond our authority under the statute to require the segregation of aggressive equines, along with stallions. Several comments stated that it was unclear what we meant by "aggressive" or how aggressiveness would be determined. One commenter stated that it was not clear who would be responsible for determining whether an equine is aggressive. Two commenters expressed concern that an equine may not be aggressive during observation prior to transport but may become aggressive during transport. One commenter suggested that we require segregation of any equine "that has been observed to display aggressiveness toward other horses," to give the shipper some direction and protection if an equine that did not show aggressive behavior becomes aggressive when transport begins.

The statute directs the Secretary to review, among other things, the segregation of stallions from other equines and such other issues as the Secretary considers appropriate. The main purpose for separating stallions (uncastrated male equines that are 1 year of age or older) is that stallions are known to be aggressive animals that are easily provoked into attacking other equines. In line with protecting equines from aggressive behavior by stallions, we believe that any aggressive equine should be separated from the other equines as set forth in § 88.3(a)(2). In fact, one of the USDA-commissioned studies observed that the segregation of stallions did not solve the entire aggression problem. The study determined that aggressive geldings and mares had to be separated in the same manner as stallions.

The use of "aggressive" in the regulations is in accordance with the definition of the term "aggressive" found in various dictionaries. If an equine attacks another equine for no apparent reason or kicks or bites another equine without provocation, for example, we believe that equine should be considered aggressive. The educational program we are developing will provide guidance concerning aggressive equines. However, USDA representatives will be aware that some equines that have not exhibited aggressive behavior on previous occasions may do so under certain conditions, and they will take into consideration that the owner/shipper may not have had prior knowledge of the equines' aggressive tendencies.

Some commenters stated that mares with foals should be segregated from other equines during transport. We believe that mares with foals may be transported safely with other equines if the owner/shipper takes proper precautions and, therefore, we will not require the segregation of mares with foal. The educational program that we are developing will show owners, shippers, and other stakeholders in the equine slaughtering industry appropriate loading procedures and placement of equines in the conveyance.

Several commenters stated that equines with shoes on their hind feet should be segregated.

As stated previously, these regulations are performance-based standards. We believe that shoed equines may be transported safely with other equines if the owner/shipper takes proper precautions and, therefore, we will not require the segregation of shoed equines. However, the owner/shipper must ensure that equines are not injured during transport. Any injuries that an equine incurs during transport may result in the owner/shipper being found in violation of the regulations and subject to civil penalties as provided in § 88.6.

Floor Space

Proposed § 88.4(a)(4)(i) stated that equines on the conveyance must be loaded so that each equine has enough floor space to ensure that no equine is crowded in a way likely to cause injury or discomfort.

Several commenters stated that this requirement is vague and that specifications for floor space should be included in the regulations. One commenter stated that the number of equines carried should be equal to the length of the compartment in feet divided by 4. One commenter suggested a standard of 1.75m²/equine or approximately 18 square feet per equine. Some commenters provided further suggestions based on transit time, and/or the number, ages, and size of the equines. One commenter stated that a numerical density specification should be provided and should be based on scientific studies and practical experience. One commenter stated that we should determine an average numerical figure that is safe and acceptable for each vehicle type based on research and require each vehicle to have a permanent tag affixed that specifies the range or the number of equines/ponies that are acceptable to be transported in the vehicle at one time. One commenter stated that we should determine the appropriate density of equines for each vehicle-type, based on studies conducted by Texas A&M and Colorado State University. Several commenters stated that horse industry standard for trailers is 8 to 15 horses and not the 40 to 45 that would be permitted for slaughter transport. One commenter suggested a system in which equines may be transported at higher densities during shorter trips, but at lower densities for longer trips. This commenter stated that his studies and experience indicate that slaughter-type horses that are transported for 28 hours should be transported at a much lower density than the industry average (13 to 14 square feet per horse).

We were directed by Congress to draft performance-based regulations wherever possible. Owner/shippers will have to load equines in a manner that will avoid injury to the equines. Overcrowding in a conveyance can cause animals to bruise and sustain other injuries. This could result in the owner/shipper being found in violation of the regulations and being assessed a civil penalty. Owner/shippers also have some market-based

incentive to prevent injury to equines during transport because bruised carcasses command lower market values. Our educational program will help owner/shippers comply with the performance-based standards. The educational program will address many issues, including loading density and floor space. The educational program will be directed towards owners, shippers, and other stakeholders in the equine slaughtering industry.

Observation of Equines During Transport

Proposed § 88.4(b)(2) stated that, during transit to the slaughtering facility, the shipper must observe the equines as frequently as circumstances allow, but not less than once every 6 hours, to check the physical condition of the equines and ensure that the regulations are being followed. Proposed § 88.4(b)(2) also stated that veterinary assistance must be provided as soon as possible for any equines in obvious physical distress.

Many commenters stated that observation of the equines every 6 hours is insufficient. Some of these commenters provided observation ranges of every 2, 3, and 4 hours. One commenter stated that equines should be observed the first hour and every 6 hours after. One commenter stated that equines should be observed each time the conveyance stops for a break or refueling, but not less than once every 6 hours, and that the equines must be allowed to rest for no less than 30 minutes while the vehicle remains stopped. One commenter stated that the phrase "not less than once every 6 hours" is misleading and that we should replace it with the phrase "at least once every 6 hours."

We believe that the requirement conveys the meaning that the equines are to be observed once every 6 hours or more often. We provided a maximum time of every 6 hours because we believe that this is the maximum amount of time that equines should go without observation to ensure that none have fallen or have become otherwise physically distressed en route. However, § 88.4(b)(2) requires shippers or owners to observe the equines as frequently as circumstances allow during transport, which would include during breaks from driving and refueling.

One commenter stated that we should clarify whether adequate observation includes stopping the truck and climbing on the trailer in any weather and lighting conditions to examine the equines.

Observation of the equines by the owner/shipper means that the owner/shipper must stop the conveyance and observe each equine at least once every 6 hours. The owner/shipper has the responsibility of locating an area where observation of the equines can be performed safely and completely.

One commenter stated that § 88.4(b)(2) should require veterinary assistance as soon as "reasonably" possible.

We believe that § 88.4(b)(2), as worded, conveys an appropriate sense of urgency and does not require an owner/shipper to do anything unreasonable. Veterinary assistance must be provided as soon as possible to ensure the safe and humane transport of equines in the conveyance. Also, in this final rule, § 88.4(b)(2) requires owner/shippers to obtain the services of an *equine veterinarian* for veterinary assistance. We believe that an equine veterinarian will be better equipped than most other veterinarians to handle equines. The educational program we are developing in conjunction with this regulation will provide participants with a list of equine veterinarians within the United States and their telephone numbers.

One commenter stated that the regulations should specify how equines that die in transit should be handled.

Our regulations are intended to ensure that equines transported to slaughtering facilities are fit to travel and, therefore, not likely to die in transit. However, in this final rule, § 88.4(b)(2) states that if an equine dies in transit, the driver of the conveyance must contact the nearest APHIS office as soon as possible and allow an APHIS veterinarian to examine the equine, and, if an APHIS veterinarian is not available, the owner/shipper must contact an equine veterinarian.

Offloading of Equines After 28 Hours

Proposed § 88.4(b)(3) stated that during transit to the slaughtering facility, the shipper must offload from the conveyance any equine that has been on the conveyance for 28 consecutive hours and provide the equine appropriate food, potable water, and the opportunity to rest for at least 6 consecutive hours. In addition, proposed § 88.4(b)(3) stated that, if such offloading is required en route to the slaughtering facility, the shipper must prepare another owner-shipper certificate and record the date, time, and location where the offloading occurred. Both owner-shipper certificates would then need to accompany the equine to the slaughtering facility. In this final rule, the requirement for completing a new certificate if equines are unloaded is at § 88.4(a)(4).

Many commenters opposed allowing 28 hours without water, and many opposed allowing the transport of horses for 28 hours without food, water, or rest. Most of these commenters stated that equines must be provided water, food, and/or rest, and unloaded at times ranging from every 4 to 24 hours or reasonable intervals, and some added that the time for water, food, and rest should be whether the vehicle is in transit or stationary. Many commenters stated that equines should not be without water, and some added food, for time periods ranging 3 to 12 hours, and some added that water could be provided during the observation period. Several commenters stated that studies have shown that equines suffer serious and traumatic health problems from travel for periods under 28 hours, and several commenters referenced 24 hours. One commenter stated that the amount of time that equines are deprived of water, food, and rest should be reviewed by a qualified veterinarian to establish that fewer hours should be specified. Several commenters stated that the standard of 28 hours was determined primarily using young, healthy horses, and that equines going to slaughter are not young or healthy. Several commenters stated that the USDA-commissioned studies did not take into account such variables as the age and condition of the equines, the density of equines on the truck, and temperature or other conditions. Some commenters, apparently thinking the 6-hour period of food, water, and rest prior to loading could occur at *any* time prior to loading, expressed concern that equines could be without water for more than 28 hours if transport took 28 hours. Several commenters stated that we should recommend a rest period of 8 hours that is not included in the transit length.

In accordance with § 88.4(a)(1), an owner/shipper must provide equines appropriate food, potable water, and an opportunity to rest for a period of not less than 6 consecutive hours immediately prior to the equines being loaded on the conveyance. Therefore, 28 hours would be the longest an equine could go without being offered food and water during transport to a slaughtering facility in the United States.

We based the requirements in § 88.4(b)(3) on the conclusions of the USDA-commissioned research, which was performed by veterinarians. In addition, various times that horses could be without water were reviewed by a panel of qualified veterinarians who established that the research was valid. At least half of the USDA-commissioned research involved

slaughter horses for comparison. In fact, one of the studies involved 306 horses that ranged from 1 to 30 years of age, and 33 percent of the horses were 16 years of age or older.

Further, some of the research simulated transport to slaughter under varying situations. For instance, straight-deck trucks were divided into compartments with four levels of density, and the equines were transported during the hottest part of the day during the summer. The research also showed that frequent loading and unloading caused more distress to equines than allowing the equines to remain on the conveyance.

One commenter stated that the USDA-commissioned research performed in 1998 by Drs. Carolyn Stull, Ted Friend, and Temple Grandin was developed to deny that water, food, and rest are basic needs. Several commenters stated that the research was biased and flawed and that some of the researchers contradicted their findings in previously published studies and findings. One commenter cited a study by Dr. Stull that recommended water every 6 to 8 hours, if possible. Many commenters stated that the USDA-commissioned study performed by Dr. Stull concluded that trips longer than 27 hours showed effects in equines that were considered to be reliable stress indices and that injuries increased with travel times over 27 hours. These commenters added that Dr. Stull performed a study that concluded that transportation in hot, humid conditions should attempt to minimize thermal stress by frequently offering (every 4 to 6 hours) water to horses and limiting the duration of the trip. These commenters and several others stated that Dr. Friend performed a study that concluded that tame horses in good condition could be transported for up to 24 hours before dehydration and fatigue became severe; however, they stated that the study was terminated after 24 hours because 3 of the 30 horses were deemed unable to continue and concluded that if horses must be transported more than 24 hours, the truck must be equipped with a watering device. One commenter stated that the study performed by Dr. Stull was biased because she used horses in the study that were identified by cooperating brokers and transport drivers who had an interest in the outcome of the study. Another commenter also stated that people associated with the auction facility and slaughtering facility used for Dr. Grandin's study were made aware of the study ahead of time.

We commissioned the performance of research to identify appropriate timeframes in which food, water, and rest should be provided to ensure that the last trip for equines being transported to slaughter was a tolerable one. The research was performed to address the transport of equines to slaughtering facilities. Our results were based on the most recent research, which may have shown different results than previous research by the same researchers. We based the requirements for food, water, and rest on the conclusions of the research. The study performed by Dr. Stull that was cited by the commenters regarding the transportation of equines in hot and humid conditions was performed to determine the optimal conditions for the transport of performance horses.

It is true that Dr. Stull's USDA-commissioned research study concluded that trips longer than 27 hours could cause distress to equines; however, as stated in the proposal, we believe that 28 hours will allow for realistic travel times from most points of the United States to equine slaughtering facilities without the equines undergoing serious physiological distress. In most cases, we believe equines will be transported from the point of loading to the slaughtering facility within 24 hours.

It is true that the equines used in Dr. Stull's study were identified by cooperating brokers and transport drivers. Dr. Stull's study required a large number of equines that were destined for transport to slaughtering facilities. We believe that the identification of equines by brokers and drivers did not have a significant impact on the results of the study.

The nature of the research performed by Dr. Grandin required her to have access to the equines for examination. The premises were privately-owned and, as a consequence, there had to be a certain level of cooperation with the owners or management of the premises. However, we do not believe that the level of cooperation affected the results of the study.

Several commenters suggested that providing water to equines en route, via an onboard watering system, might be preferable to unloading equines after 28 hours because unloading and loading equines from a conveyance causes stress. One commenter suggested that loading equines at a reduced density and watering enroute should be an alternative to unloading. One commenter stated that each conveyance should contain at least 10 gallons of water for every 20 equines for emergencies, in addition to the equine's regular water supply.

We believe that unloading after 28 hours to provided food, water, and rest is appropriate based on the findings of the USDA-commissioned research.

Several commenters stated that APHIS is not following the findings of the USDA-commissioned research because APHIS indicated that equines do not experience serious physiological distress for 30 hours without water if they have had access to water during the 6-hour period prior to deprivation.

It is true that we stated in the proposed rule that the USDA-commissioned studies showed that equines that had access to water in the 6-hour period before deprivation occurred did not experience serious physiological distress for up to 30 hours without further access to water. However, we believe that a 28-hour maximum allowable timeframe for deprivation of food, water, and rest during transport to slaughter will allow for realistic travel times from most points of the United States to the equine slaughtering facilities and ensure that the equines will not undergo serious physiological distress.

One commenter stated that adequate water, ventilation, and feed must be provided because equines are often sold by the pound, and loss of weight during transport reduces revenue for the seller.

In accordance with § 88.4(b)(3), the owner/shipper must offload from the conveyance any equine that has been on the conveyance for 28 consecutive hours and provide the equine appropriate food, potable water, and the opportunity to rest for at least 6 consecutive hours. However, the owner/shipper may provide appropriate food, potable water, and rest to equines at any point during transit that it is safe to do so.

One commenter stated that we should recommend the offloading of equines every 10 hours when drivers are required to stop and rest because drivers are not allowed to drive for 28 hours straight. One commenter stated that equines should be provided water, food, and rest at each rest stop.

It is not clear whether the commenter was referring to each rest area long the interstate or each time the driver stops for a rest. In some areas, rest stops can be with 30 to 60 minutes of each other, which could be an unnecessary burden on the owner/shipper. Further, we do not believe that it is necessary to require the owner/shipper to provide the equines with food, potable water, and rest at every rest stop for the driver. Drivers must stop periodically for personal and safety reasons. The timing of these stops has nothing to do with the well-being of the equines.

One commenter stated that equines should be offloaded at weigh and check stations when crossing a State or Federal boundary so that the equines can be inspected for injuries because visibility is better compared to observing the equines while they are in the conveyance.

Offloading equines at weigh and check stations could be a safety hazard for the equines due to the presence of other commercial vehicles that are not involved with the transport of equines. In addition, weigh and check stations would have to be equipped with facilities that could provide food, water, and containment of equines.

One commenter stated that the regulations are not clear whether the 28-hour rule includes the amount of time an APHIS official may spend examining the equines. One commenter stated that § 88.4(b)(3) should exempt time required for inspection by USDA, State or Federal law enforcement officials, or any other delay in the direct transport of the equines due to governmental or law enforcement interference with movement of the conveyance.

Section 88.4, paragraph (b)(3), requires any equine that has been on a conveyance for 28 consecutive hours to be offloaded and provided appropriate food, potable water, and the opportunity to rest for at least 6 consecutive hours. We do not believe that amending § 88.4(b)(3) to address delays due to law enforcement officials is appropriate. Equines that have been on a conveyance for 28 hours need to be offloaded and provided food, rest, and, most importantly, potable water, regardless of the reason that they were on the conveyance for 28 hours.

Handling of Equines

Proposed § 88.4(c) required the handling of all equines in commercial transportation to a slaughtering facility to be done as expeditiously and carefully as possible in a manner that does not cause unnecessary discomfort, stress, physical harm, or trauma. Proposed § 88.4(c) also prohibited use of electric prods on equines in commercial transportation to a slaughtering facility for any purpose, including loading or offloading on the conveyance, except when human safety is threatened.

Many commenters stated that any use of electric prods should be banned or prohibited, and some of these commenters stated that other equipment is readily available if human safety is threatened. One commenter stated that we should provide clarification as to who determines when human safety is threatened. One commenter stated that use of an electric prod can elicit unpredictable movement in horses. One commenter stated that the loading of equines should be monitored to ensure that prods are not used.

One of the purposes of the regulations is to ensure that equines are transported without unnecessary discomfort, stress, physical harm, or trauma. Therefore, the regulations prohibit the use of electric prods, except in cases when human safety is threatened. We limited the use of electric prods to situations in which human safety is threatened to decrease the potential that prods could be used in abusive situations. We agree that there may be other equipment that can be used; however, they may not elicit a response quickly enough in a life or death situation. The owner/shipper is the entity who must make the determination of whether human safety is threatened. A USDA representative cannot be present in all areas that equines may be loaded for transport to slaughtering facilities; however, if an owner/shipper uses an electric prod when human safety is not threatened and evidence of that abuse is found, that person may be found in violation of the regulations.

Many commenters stated that metal pipes and sharp or pointed objects capable of piercing the skin should be banned. Many commenters stated that no implement, device, contrivance, mechanism, apparatus, appliance, contraption, instrument, tool, or utensil should be allowed to be used, including for the control or restraint of the equines, that was not expressly and specifically designed for use on equines and generally recognized as such. In addition, several commenters stated that only restraints considered humane should be used. Two commenters stated that, in addition to electric prods, whips or any other object that could cause injury or pain should be prohibited except when human safety is directly threatened by an equine.

We cannot provide a list of all implements that have been or could be used on equines because of the number of possibilities; however, the use of any implement that does not provide equines with the care described in § 88.4(c) should not be used and could be a violation of the regulations.

Examination of Equines at Any Point

Proposed § 88.4(d) stated that at any point during the commercial transportation of equines to a slaughtering facility, a USDA representative may examine the equines, inspect the conveyance, or review the owner-shipper certificates required by § 88.4(a)(3).

Several commenters stated that § 88.4(d) should state "must" rather than "may."

We use "may" in § 88.4(d) because a USDA representative may not be able to examine all equines, inspect all conveyances, or review all of the owner-shipper certificates. However, USDA representatives are authorized by § 88.4(d) to inspect the equines and conveyances as the need arises, and USDA representatives will collect all of the owner-shipper certificates at slaughtering facilities.

One commenter stated that § 88.4(d) should require a USDA representative, his or her designee, a weigh station or agricultural check point employee, or other law enforcement personnel to enforce the requirements of the regulations during transit as well as upon arrival at the slaughter facility. One commenter stated that we should clarify whether law enforcement officials can perform duties such as inspect vehicles, conduct investigations, examine the animals and seize and impound the animals, if necessary. Some commenters stated that there should be a provision that allows law enforcement officials, State or Federal employees, or inspectors to ensure an owner or shipper's compliance with the regulations.

In a State that has its own regulations regarding the transport of equines to slaughter, that State's police or law enforcement personnel can enforce the State's regulations. The statute does not provide for Federal enforcement actions by State and local law enforcement personnel in State and local courts.

One commenter stated that equines should be shipped directly and expeditiously from the point of loading to the slaughtering facility without stopping between the points for USDA representatives to conduct examinations, which the commenter stated could be potentially harmful and cause stress to the animals. This commenter stated that the manner at which the equines arrive at the slaughtering facility should be sufficient.

We believe that we need to be able to check conveyances, equines, and paperwork if we have any concerns that equines may be being transported in violation of the regulations. Every transport will not be subject to such an examination; however, if an examination has to be conducted, the USDA representative will consider the welfare of the equines in the conveyance and will not take more time than necessary to perform his or her duties.

Direction to the Owner/Shipper To Take Action

Proposed § 88.4(e) stated that, at any time during the commercial transportation of equines to a slaughtering facility, a USDA representative may direct the shipper to take appropriate actions to alleviate the suffering of any equine. Proposed § 88.4(e) also stated that, if deemed necessary by the USDA representative, such actions could include securing the services of a veterinary professional to treat an equine, including performing euthanasia if necessary.

Several commenters stated that § 88.4(e) should state that a USDA representative "must," "shall," or "should" direct the shipper to take appropriate actions, and that such actions "must" include securing the services of a veterinary professional.

We use "may" in § 88.4(e) because this provision authorizes a USDA representative to direct the owner/shipper to take appropriate actions to alleviate the suffering of any equine based on the representative's assessment of the equine's condition. "Must" would imply that such direction will be necessary in all cases. Similarly, we say that such action "could" include securing the services of a veterinary professional because those services will not always be necessary.

One commenter stated that § 88.4(e) should state that the services of a veterinary professional will be secured if "reasonably" available.

We believe that if a USDA representative directs the owner/shipper, as provided in § 88.4(e), to secure the services of a veterinary professional to treat an equine, the veterinary professional should be secured as soon as possible.

One commenter stated that § 88.4(e) should refer to a USDA representative "or his or her designee." In addition, this commenter stated that the veterinary professional should be an equine veterinary professional.

We do not believe that § 88.4(e) needs to indicate "his or her designee" because we define *USDA representative* as any USDA employee authorized by the Deputy Administrator, Veterinary Services, APHIS, to enforce the regulations. However, we agree with the commenter that § 88.4(e) should specify that the veterinary professional must be an equine veterinarian. We have amended § 88.4(e) to require the veterinary professional to be an equine veterinarian.

Retention of the Owner-Shipper Certificate for 1 Year

Proposed § 88.4(f) stated that the individual or other entity who signs the owner-shipper certificate must maintain a copy of the owner-shipper certificate for 1 year following the date of signature.

Several commenters stated that the owner or shipper should retain a copy of the owner-shipper certificate for a minimum of 2 years, and some of these commenters stated that we should retain a copy so that information is readily accessible to those who are attempting to trace lost or stolen equines. One commenter stated that there should be provisions for law enforcement and State agencies to have access to the owner-shipper certificates for identifying and locating stolen or missing horses.

We believe that requiring a 1-year retention of the owner-shipper certificates is adequate. If someone is attempting to trace a lost or stolen equine, the investigation will more than likely take place within a few months of the disappearance of the equine. However, to improve the capability of tracing lost or stolen equines, APHIS plans to develop a database of the information provided on the owner-shipper certificates. If necessary, information from the database could be supplied to law enforcement or State agencies, when requested.

Section 88.5 Requirements at a Slaughtering Facility

Access to Food and Water After Unloading

Proposed § 88.5(a)(1) stated that, upon arrival at a slaughtering facility, the shipper must ensure that each equine has access to appropriate food and potable water after being offloaded.

Two commenters stated that the shipper should not be responsible for providing food and water to equines at the slaughtering facility. Both commenters stated that the slaughtering facility should be the responsible party. One of these commenters stated that the shipper would not know the conditions at destination and, in most cases, would not be the owner of the equines.

We believe that the requirement in § 88.5(a)(1) will ensure that the owner/shipper notifies the proper officials of his or her arrival at the slaughtering facility, and that the equines are offloaded into an area where the slaughtering facility can provide food and potable water.

One commenter stated that § 88.5(a)(1) should state that the management of the slaughtering facility must provide consent to the shipper to provide each equine access to appropriate potable water after being offloaded, but not food.

We believe that equines should be allowed access to both food and potable water to maintain their well-being after being transported without access to food and water, sometimes over great distances. The requirement in § 88.5(a)(1) is to ensure that the owner/shipper notifies the proper officials of his or her arrival at the slaughtering facility. We believe that most shippers and owners will appropriately communicate with the proper personnel at the slaughtering facility without the inclusion of the word "consent" in the regulation.

One commenter stated that equines should be provided water every 4–6 hours where they are housed before slaughter.

The statute only allows us to regulate the transport of equines to a slaughtering facility. Once the equines arrive at the slaughtering facility and are provided food, potable water after being offloaded in accordance with § 88.5(a)(1), the equines are subject to the facility's feed and water schedule.

One commenter stated that § 88.5(a) should require the arrival of a conveyance during regular business hours of the slaughtering facility and to require the shipper to "immediately" abide by the requirements set forth in § 88.5(a).

We do not believe that requiring shipments of equines to arrive at slaughtering facilities during normal business hours would always be in the best interests of the equines. It could, for instance, result in the equines being kept on the conveyance for a longer time than might otherwise be necessary.

We do not believe that adding "immediately" is necessary because, in most cases, the owner/shipper will offload the equines and discharge his or her responsibilities as soon as possible after arrival.

Access to the Equines

Proposed § 88.5(a)(3) stated that, upon arrival at a slaughtering facility, the shipper must allow a USDA representative access to the equines for the purpose of examination.

Several commenters pointed out that USDA representatives are not available at slaughtering facilities on all days of the week or at all hours. One commenter stated that § 88.5(a)(3) should state that management of the slaughtering facility must provide consent to a USDA representative to have access to the equines for the purpose of examination. The commenter also stated that

§ 88.5(a)(3) should state that the absence or delay in arrival of the USDA representative will not prohibit the slaughtering facility from proceeding with the slaughter of the equines during its normal course of business. One commenter stated that if a USDA representative is not available prior to slaughter, an examination of carcasses for bruising or abrasions during inspection could be used to assess injuries incurred during transport to the slaughtering facility. One commenter asked who a USDA representative is. One commenter asked if full-time veterinarians would be assigned to the slaughtering facilities to enforce the regulations.

A USDA representative will be available during normal business hours of the slaughtering facility to examine the equines. This requirement, therefore, should not cause any significant delays in slaughter operations. Also, most equines are delivered during the hours of operation of the slaughtering facility. Regardless of when the equines arrive, we believe a USDA representative must be given access to the equines prior to slaughter for the purpose of examination.

A USDA representative may be any employee of the USDA who is authorized by the Deputy Administrator, Veterinary Services, APHIS, to enforce the regulations. The employee could be an APHIS veterinarian, a Food Safety and Inspection Service (FSIS) employee, or any other USDA employee so authorized.

One commenter stated that § 88.5(a)(3) should require equines to be inspected when they reach their destination.

In accordance with § 88.5(a)(3), a USDA representative must be given access to the equines for the purpose of examination; however, the USDA representative will use his or her discretion in determining which equines to inspect and the extent of any examination.

Access to the Animal Cargo Area

Proposed § 88.5(a)(4) stated that, upon arrival at a slaughtering facility, the shipper must allow a USDA representative access to the animal cargo area of the conveyance for the purpose of inspection.

One commenter stated that § 88.5(a)(4) should require inspection of the animal cargo area.

Inspection of the animal cargo area may not be necessary in all cases. This requirement in § 88.5(a)(4) alerts owner/shippers that the animal cargo area of their conveyances may be inspected by a USDA representative.

Owner/Shipper Remaining on Premises

Proposed § 88.5(b) stated that the shipper must not leave the premises of a slaughtering facility until the equines have been examined by a USDA representative.

One commenter stated that equine slaughtering facilities should not have their slaughter schedules dictated by APHIS. This commenter stated that § 88.5(b) should allow the shipper to leave the premises of the slaughtering facility if a USDA representative does not appear to examine the equines within 3 hours after they are offloaded from the conveyance. One commenter stated that drivers should not have to wait for the USDA representative and should be allowed to leave the premises if an employee of the slaughtering facility is there to allow the USDA representative access to the equines.

A USDA representative will be available for the examination of the equines and conveyances during normal business hours, and we believe it is important for the owner/shipper to be present during these activities. However, we agree that a driver who arrives at a slaughtering facility outside of normal business hours should be able to leave the premises to eat or rest. Therefore, § 88.5(b) of this final rule states that the owner/shipper must not leave the premises of a slaughtering facility until the equines have been examined by a USDA representative if the owner/shipper arrives during normal business hours; however, if the owner/shipper arrives outside of normal business hours, the owner/shipper may leave the premises but must return to the premises of the slaughtering facility to meet the USDA representative upon his or her arrival.

One commenter stated that § 88.5(a) should provide that all equines that are nonambulatory upon arrival should be euthanized on the vehicle after all other equines have been unloaded and that euthanasia should be performed by a licensed and accredited veterinarian in an approved manner. The commenter stated further that if arrival of a veterinarian would cause time delays and suffering to the equine, the regulations should provide that euthanasia could be performed by a trained individual using approved methods. In addition, the commenter maintained that the regulations should provide that seriously injured or downed animals may not be dragged, hoisted, thrown, or left alone without medical intervention.

Any equine that is seriously injured or nonambulatory upon arrival must be provided veterinary assistance and may not be mistreated or left unattended. A USDA representative will be available to examine the equines upon their arrival at the slaughtering facility during normal business hours. In most cases, the USDA representative will be a veterinarian; therefore, the USDA representative will be able to perform euthanasia, if necessary. If an equine is nonambulatory, is seriously injured, or is otherwise in obvious physical distress upon arrival and a USDA representative is not available (i.e., because of arrival of the equines at the slaughtering facility outside of normal business hours), § 88.4(b)(2) requires the owner/shipper to obtain veterinary assistance as soon as possible. We agree that equines that become nonambulatory should be euthanized. In this final rule, § 88.4(b)(2) provides that equines that become nonambulatory en route to a slaughtering facility must be euthanized by an equine veterinarian. Since we are requiring that euthanasia be performed by an equine veterinarian, we do not believe that it is necessary to add that euthanasia be performed in an approved manner.

Transport of Equines Outside the United States

Proposed § 88.5(c) stated that any shipper transporting equines to slaughtering facilities outside the United States must present the owner-shipper certificate to USDA representatives at the border.

One commenter stated that § 88.5(c) does not state that a USDA inspector will inspect the equines to determine whether they are fit to travel or whether the description on the owner-shipper certificate matches the equines in the conveyance.

A USDA representative at the border will inspect conveyances carrying equines destined for slaughter outside the United States when he or she deems it necessary.

Section 88.6 Violations and Penalties

Proposed § 88.6(a) stated that the Secretary is authorized to assess civil penalties of up to $5,000 per violation of any of the regulations in part 88, and proposed § 88.6(b) stated that each equine transported in violation of the regulations would be considered a separate violation.

Many commenters stated that penalties for violation of the regulations should be criminal instead of civil; otherwise, law enforcement personnel will not be able to enforce them. Some commenters stated that laws must be

enforced at auctions and feedlots, prior to loading. One commenter stated that § 88.6 should provide that a person who knowingly violates the regulations shall, upon conviction, be subject to imprisonment for not more than 1 year or a fine of $5,000, or both, and on conviction of a second or subsequent offense, the person shall be subject to imprisonment for not more than 3 years or to a fine of $8,000, or both.

The statute does not allow the Secretary to establish criminal penalties for violations of the regulations. The statute allows the Secretary to establish and enforce appropriate and effective civil penalties only. As previously explained, the regulations pertain to equines transported to slaughter from any point of loading, including auctions/markets and feedlots.

One commenter stated that shippers should be subject to penalties as prescribed by county, State, or Federal statutes or regulations.

The regulations do not prohibit counties or States from applying penalties in accordance with their regulations if an owner/shipper violates their regulations even if the amount of the penalty is more than that provided in § 88.6(a).

One commenter stated that civil penalties of up to $10,000 rather than $5,000 should be assessed. One commenter stated that if a conveyance carrying a load of equines is found to have a sharp protrusion, a fine of $5,000 per equine in the conveyance seems excessive, especially if an equine that is being transported caused the protrusion by kicking the walls of the conveyance. This commenter stated that a sliding scale should be used that increases the amount of the fine proportional to the seriousness of the violation. This commenter further stated that a sliding scale would help the shipper know exactly what is expected of him/her, ensure that USDA representatives levy the same fines for the same offense, and provide credibility to the USDA during any appeals process. One commenter stated that § 88.6 should provide that civil penalties will be progressive, with the first offense receiving a written warning; the second offense a fine up to $500 per violation; the third offense a fine up to $2,500 per violation; and the fourth or subsequent offense a fine up to the jurisdictional limit. One commenter suggested that we provide for a minimum fine of $500. One commenter suggested that each day a violation occurs should be considered a separate violation.

In § 88.6(a), we state that the Secretary is authorized to assess civil penalties of up to $5,000 per violation. We proposed assessing civil penalties of up to $5,000 per violation based on the legislative history of the statute and our experience as a Federal regulatory agency. We believe that a civil penalty of up to $5,000 per violation is appropriate and will be effective in deterring noncompliance with the regulations. Among other things, this belief is based on our experience in enforcing the Animal Welfare Act as amended (7 U.S.C. 2131 *et seq.*) and the Horse Protection Act, as amended (15 U.S.C. 1821–1831), two other statutes whose purpose is ensuring the humane treatment of animals. The statement concerning each equine transported in violation of the regulations being a separate violation also derives from the statute's legislative history and our experience as a regulatory agency.

We do not believe that we need to include a sliding scale or a minimum fine. The amount of the civil penalty will be determined based on the severity of the violation and the history of the owner/shipper's compliance with the regulations. Procedures will be in place to ensure consistent application of civil penalties. We also do not believe that we need to consider each day that a violation occurs as a separate violation. We believe that considering each equine transported in violation of the regulations as a separate violation is sufficient.

One commenter stated that § 88.6 should provide that a person who assaults, resists, opposes, impedes, intimidates, or interferes with any USDA representative or his/her agent in performing an official duty pursuant to the regulations should be assessed a fine of no less than $1,000 and up to $5,000.

There is a statute that provides protection to all Federal employees (18 U.S.C. 111). The statute prohibits the assault on any Federal employee.

One commenter stated that APHIS should provide that, for any person who fails to pay a civil penalty, the Secretary shall request the Attorney General to institute a civil action in a district court of the United States or other court of the United States for any district in which the person is found, resides, or transacts business, to collect the penalty, and to provide that the court shall have jurisdiction to hear and decide the actions.

If an owner/shipper is unable to pay a civil penalty, we can pursue payment through a payment plan or adjustment of the amount. However, if the case is not settled, a formal complaint may be filed. If a complaint is issued, the case may go to a hearing. If a hearing is held, the matter will be heard and decided by an administrative law judge.

One commenter stated that, to a certain extent, injuries during transport are unavoidable and assessing civil penalties to commercial transporters may not be appropriate. This commenter stated that civil penalties should be designed to ensure compliance with the regulations and not punish an industry for occurrences that are beyond its control.

We understand that some injuries may not be avoidable; however, the purpose of the regulations is to ensure the humane transport of equines to slaughtering facilities. If shippers and owners adhere to this rule, we believe that many of the injuries that equines have suffered in the past will be avoided.

One commenter stated that the regulations do not allow truck drivers to provide grounds for their defense as to how the equines were injured.

USDA will consider a trucker's explanation in determining whether a violation has occurred. However, as stated in the proposal, if adjudication is necessary, it will be conducted pursuant to the USDA's "Uniform Rules of Practice Governing Formal Adjudicatory Proceedings Instituted by the Secretary Under Various Statutes," found at 7 CFR part 1, subpart H(7 CFR 1.130–1.151), and the Supplemental Rules of Practice found at 9 CFR, part 70, subpart B (9 CFR 70.10). The Rules of Practice establish, among other things, the procedures for filing a complaint and a response, settling a case, and holding a hearing. Based on this information, any one who is cited for violating the regulations will be provided an opportunity to present his or her case.

Many commenters stated that enforcement of the regulations may be difficult because we use performance-based standards rather than engineering-based standards. Some of these commenters stated that Congress directed the Secretary of Agriculture to employ "to the extent possible" performance-based standards. One of these commenters stated that USDA tried performance-based standards with § 3.81 of the Animal Welfare regulations regarding primate psychological well-being, which led to confusion among entities that were affected by the regulations.

The conference report states that, to the extent possible, the Secretary is to employ performance-based standards rather than engineering-based standards when establishing regulations to carry out the intent of the statute and that the Secretary is not to inhibit the commercially viable transport of equines to slaughtering facilities. We used performance-based standards

rather than engineering-based standard because they are the least intrusive method of regulating entities and are potentially less burdensome on regulated entities. We will review and evaluate these standards once they are in place. If we determine that changes are necessary, we will publish another document in the **Federal Register** for public comment.

One commenter stated that we will not be able to adequately enforce the regulations because we do not require persons transporting equines to slaughter to register with or apply for a USDA license. This commenter stated that individuals who are not in compliance could be threatened with suspension of their licenses rather than assessment of fines, which could be viewed as the cost of doing business.

We do not believe that registration with or a license issued by APHIS is necessary. We believe that the civil penalties set forth in § 88.6 are sufficient to ensure compliance with the regulations.

One commenter stated that the regulations should provide for suspension of a hauler's carrier certificate, the operator's commercial driver's license (CDL), and the registration of the vehicle involved for not less than 90 calendar days from the date of adjudication upon violations of the regulations. This commenter further stated that the hauler and consignor should be jointly responsible for the maintenance of the animals that were in the vehicle at the time of the seizure at the seizing authority's choice until a proper vehicle is provided for their continued shipment. The commenter also maintained that failure to post a satisfactory bond or to pay the costs involved should result in forfeiture of the vehicle and load to the seizing authority as partial payment for costs incurred by the seizing authority, which should retain all other remedies including civil suits and criminal prosecutions. The commenter also stated that a second violation of the regulations or violation of any other jurisdiction's animal transportation regulations should result in penalties applied per animal in the vehicle, without limit, and that a third violation should result in a minimum 1-year suspension of certificates and CDL per animal in the vehicle.

The statute does not provide the Secretary with the authority to suspend a hauler's carrier certificate, the operator's commercial driver's license, or registration of the vehicle if the operator violates these regulations. In addition, the statute does not give the Secretary authority to seize vehicles. The statute provides the Secretary with the authority to assess only civil penalties for violation of the regulations.

One commenter stated that the regulations do not address how we will determine, other than by checking for a signed, properly timed and dated owner-shipper certificate, that the intentions of the regulations are being met and a violation of the regulations has not occurred. One commenter stated that the proposed regulations were unclear as to what APHIS would do when an owner-shipper certificate appears to be in order but the equines arrive in poor condition or with injuries. Several commenters stated that the regulations should state that any equine arriving in a condition that is noncompliant with the regulations will be considered a violation, regardless of the information on the owner-shipper certificate.

The USDA representative at the slaughtering facility will have access to both the equines and the paperwork accompanying them. If an equine arrives at a slaughtering facility with an injury that was not recorded on the owner-shipper certificate or in a condition that is evidence that the equine was not fit to travel, the owner/shipper may be found in violation of the regulations and may be assessed civil penalties as set forth in § 88.6.

Paperwork Burden

One commenter stated that electronic transmission of the owner-shipper certificate may not decrease the burden because the format must be standardized, and a "hard-copy" must be made to accompany each equine. The commenter stated that the owner-shipper certificate could be in book form that is bound and supplied with a duplicate-style copy so the owner/shipper would have a copy of the certificate that was given to APHIS.

The owner-shipper certificate will consist of a multipart set that will eliminate the need for the owner/shipper to make copies of the form.

One commenter stated that completion of the owner-shipper certificate would take 2 to 3 minutes. Several commenters stated that completion of the owner-shipper certificate will take more than 5 minutes per equine. One of these commenters stated that each equine must be examined thoroughly, in addition to completing the certificate.

The estimated burden was based on discussions with owners and shippers of slaughter horses and the owner/operators of slaughtering facilities. The estimated burden of 5 minutes was only an estimate. We are aware that some individuals may take a little less or a little more time than others to inspect each equine and complete the owner-shipper certificate.

Miscellaneous

One commenter stated that the proposal does not cover equines that belong to slaughtering facilities and that are transferred from a feeding facility owned by the facility to the plant grounds. This commenter stated that the regulations are not clear as to whether owner-shipper certificates are required to ship equines to a feedlot when the equines will be eventually transported for slaughter, and they are not clear as to whether a slaughtering facility has to complete owner-shipper certificates for equines owned by the facility to transport them from its own facilities or ranches to the slaughtering facility.

The regulations pertain to any individual or other entity that fits the definition of the term *owner/shipper*. Therefore, a slaughtering facility would have to complete an owner-shipper certificate and otherwise adhere to the regulations if it moves equines from its own premises, such as a ranch or feedlot, to the slaughtering facility. However, if equines arrive at a slaughtering facility (defined as a commercial establishment that slaughters equines for any purpose) and the facility moves all or some of the equines to its own feedlot or other premises, the slaughtering facility will not have to complete an owner-shipper certificate or otherwise comply with the regulations for that movement. The slaughtering facility must, however, complete an owner-shipper certificate and otherwise comply with the regulations when it transports the equines back to the slaughtering facility.

One commenter stated that mileage calculations that we provided under the "Executive Order 12866 and Regulatory Flexibility Analysis" section of the proposal were based on the assumption that shippers deliver to the closest available plant, which is not always the case. This commenter stated that shippers deliver to the plant where they have their contract or to the plant that is paying the most money. This commenter also stated that the proposal contended that shippers would have to share driving responsibilities with another driver to meet the requirements, but the regulations do not require it.

We believe that barring unusual circumstances, the overwhelming majority of equines arrive at slaughtering facilities in 28 hours or less. As to the use of two different drivers, we stated that drivers of equines that originate at east or west coast

locations could reduce the time equines spent on conveyances considerably by using two different drivers on long trips. However, this scenario was only an example for those drivers who can share driving responsibilities with another driver. If the driver of a conveyance will require more than 28 hours to reach his or her destination, whether alone or with a partner, he or she must abide by § 88.4(b)(3) and offload the equines from the conveyance to provide them with appropriate food, potable water, and the opportunity to rest for at least 6 consecutive hours before reloading them.

One commenter stated that we should require drivers to be certified by APHIS as knowledgeable in equine handling and humane treatment.

We do not believe this is necessary. We believe that the regulations will help ensure the humane movement of equines that are transported to slaughtering facilities. If the equines are not handled or transported as required by the regulations, or if the equines are injured during transport, the owner/shipper may be found in violation of the regulations and assessed a civil penalty. To assist drivers and others in meeting the requirements of the regulations, we are preparing an educational program.

One commenter stated that the regulations should extend to agents of owners and shippers. This commenter suggested, "The act, omission, or failure of an individual acting for or employed by the owner or shipper, within the scope of employment, shall be considered the act, omission, or failure of the owner or shipper as well as that of the individual."

We do not believe that we need to address agents. We believe that we have defined owner/shipper broadly enough to cover anyone transporting equines to slaughtering facilities (except as specifically exempted by the regulations).

One commenter stated that the regulations will result in increased transit time and more frequent loading and unloading of equines, which will increase the possibility of exacerbating existing injuries or creating new ones.

We do not believe that the regulations will result in an increase in transit time or loading and unloading in most cases. As stated in the discussion under "Executive Order 12866 and Regulatory Flexibility Act," officials at two of the U.S. equine slaughtering facilities, including the largest facility, indicated that, barring unusual circumstances, the overwhelming majority of equines already arrive at the slaughtering facilities in 28 hours or less. In cases where transport would take more than 28 hours, we believe the benefits of unloading the equines for rest, food, and water outweigh the disadvantages of unloading and reloading. Also, owners or shippers could locate, in advance, appropriate facilities close to their routes for unloading the equines. In addition, the educational program that we are developing will provide owners and shippers with information on the proper methods for loading and unloading equines from a conveyance to help ensure that injuries to equines do not occur.

One commenter stated that the regulations should apply as minimum standards for all commercial haulers, regardless of the origin or destination of the load. One commenter stated that the regulations seem to state that if an equine is transported to a slaughtering facility, the transportation is given protection by Federal regulations; however, if the animal is transported to some other destination, the transportation can be performed without protection of these regulations.

We are unable to expand the scope of these regulations to include the transportation of equines to any destination other than a slaughtering facility. Congress authorized the Secretary to issue guidelines for the regulation of the commercial transportation of equines for slaughter by persons regularly engaged in that activity. In addition, Congress clarified its intentions with regard to the statute through a conference report. The conference report states, among other things, that the Secretary has not been given the authority to regulate the routine or regular transportation of equines to other than a slaughtering facility.

One commenter stated that conveyances that enter the United States from Canada are sealed by authorities in Canada, and that to meet the requirement that equines must be fed, watered, and offloaded every 28 hours, the seals would have to be broken during transport in the United States to comply with the regulations.

Few equines are transported from Canada into the United States for slaughter purposes. However, if equines are transported from Canada into the United States and must be offloaded in the United States to meet the requirements of part 88, the seals may only be broken by a USDA representative at an approved site for offloading the equines. The owner/shipper must make arrangements with the APHIS office that is nearest to the location where the equines must be offloaded. After the equines have had the prescribed rest, food, and water, the truck will be sealed by the USDA representative and allowed to resume transport to the slaughtering facility.

One commenter stated that we should obtain written agreements from Canada and Mexico to ensure compliance with the regulations for equines moving into those countries for slaughter. One commenter stated that the regulations would allow travel time of 28 hours within the United States and additional travel time after entering Canada. This commenter stated that the regulations should include travel time to the final destination in Canada because the locations of plants in Canada are established.

For equines transported by conveyance from a point inside the United States to a slaughtering facility outside the United States, the regulations end at the border, where the owner/shipper must present the owner-shipper certificates. We do not have jurisdiction over movement of equines outside the United States. Although, we currently do not have an arrangement with Mexico, we have revised the owner-shipper certificate to include a field for a stamp to be administered by Canadian officials at slaughtering facilities in Canada. The stamp will include the time and date of arrival and slaughtering facility. We can use this information to verify the amount of time that equines have been on a conveyance prior to leaving the United States.

One commenter stated that we must provide the public with the findings from USDA-commissioned research so the public can offer comment. Another commenter stated that she could not obtain copies of the research.

Copies of the USDA-commissioned research were and are available from the person listed under **FOR FURTHER INFORMATION CONTACT.**

One commenter stated that an equine first aid kit that includes, among other things, fly spray, rubbing alcohol, and a hoof pick should be on the conveyance. In addition, this commenter stated that at least one fire extinguisher should be on the conveyance and that the driver's ability to use the fire extinguisher should be established by an APHIS inspector.

We do not believe that it is necessary to require an equine first aid kit. If an equine is in physical distress, the owner/shipper is required, in accordance with § 88.4(b)(2), to have an equine veterinarian provide veterinary assistance as soon as possible. Until such assistance is available, the owner/shipper may be the only person in a conveyance, and attempts by the owner/shipper to apply first aid, without assistance, to an injured equine could be

dangerous for the person and the equine. As to a fire extinguisher, the Federal Motor Carrier Safety Administration within the Department of Transportation requires commercial motor vehicles used on a highway in interstate commerce to be equipped with a fire extinguisher when, in short, the gross vehicle has a weight rating or gross combination weight rating, or gross vehicle weight, or gross combination weight, of 4,537 kg (10,001 lb) or more; whichever is greater. We believe that most conveyances used for the commercial transportation of equines to slaughtering facilities meet this weight threshold.

Several commenters stated that a $400 disposal fee should be levied against an owner or shipper for every equine that arrives dead or in an unusable condition to discourage owners from sending downed or dying horses to slaughter. One of these commenters stated that the disposal fee could be used to subsidize long distance shipments of equines that are made at reduced loading density. Two commenters stated that the regulations should establish a per equine fee of $5 to be levied upon an owner who sells an equine to slaughter. One commenter stated that the $5 per equine fee could be used to cover the costs of administering and enforcing the regulations, and another commenter stated that the fee could be used to provide rewards for information leading to documentation of violations of the regulations.

We believe that the regulations will help ensure that equines that are shipped to slaughtering facilities are fit to travel. However, we do not have authority to assess a disposal fee and/or a $5 fee per equine.

One commenter stated that we should not allow dogs to be used to herd equines for breeding.

If someone wishes to use dogs to herd equines into a conveyance, the equines must be handled in a manner that does not violate the regulations, including those in § 88.4(c). In § 88.4, paragraph (c) states that handling of all equines in commercial transportation to a slaughtering facility shall be done in a manner that does not cause unnecessary discomfort, stress, physical harm, or trauma.

One commenter stated that all conveyances that contain live animals should be so labeled and that a toll-free USDA/APHIS telephone number should be displayed for the public to call if a vehicle is operating in an unsafe manner or a dangerous or inhumane treatment is witnessed.

We do not believe that we should require a conveyance to be labeled as containing live equines or to display a toll free USDA/APHIS telephone number. Many conveyances transport equines for purposes other than to slaughtering facilities, and the Secretary has not been given the authority to regulate the routine or regular transportation of equines to other than a slaughtering facility. However, if someone witnesses inhumane treatment, we encourage the person to contact the nearest APHIS office or the proper local authorities. In addition, if a vehicle is operating in an unsafe manner, especially if human safety is threatened, the proper local law enforcement authorities should be contacted.

One commenter stated that individuals who transport equines to veterinary facilities for treatment should be exempt from the regulations that pertain to the health of the equines that are hauled.

The regulations do not pertain to the transport of equines to veterinary facilities, only to the transport of equines to slaughtering facilities.

One commenter stated that USDA does not have a program to identify stolen equines that arrive at slaughtering facilities.

APHIS will require an owner-shipper certificate for each equine that is transported to a slaughtering facility. The USDA representative at the slaughtering facility will collect the certificates. In addition, the owner/shipper must maintain a copy of the certificate for 1 year. We will maintain information from the completed certificates in a database that can help us trace lost or stolen equines.

One commenter stated that proficiency testing (written and skills) for those engaged in the commercial transport of equines should be required because it is impossible to determine whether the persons targeted (e.g., drivers of the conveyances) are reading and understanding the educational materials. One commenter stated that an educational component should be included in the regulations to ensure that all affected parties are informed of the new regulations. One commenter stated that APHIS must put effort toward educating inspectors at feedlots, assembly points, or stockyards because shippers and owners already know how to properly transport equines.

We do not think that a proficiency test is necessary. We are developing an educational program that will include a video, guidebook, and workshops. The program will be directed towards owners, shippers, and others in the equine slaughtering industry. We will also provide opportunities for individuals who work at feedlots, assembly points, and stockyards to participate in the educational program.

Several commenters expressed concern that burdensome regulations in the United States may lead to an increase in the shipment of livestock to countries where animal welfare is not a consideration. One of these commenters and others stated that the regulations are not necessary and that effective enforcement of existing laws is necessary. One of these commenters stated that safeguards already exist for the humane treatment of equines prior to slaughter. One commenter stated that imposing additional humane shipping conditions on the industry will decrease profits by increasing transportation costs.

Until this final rule becomes effective, no specific standards exist that address the needs of equines transported to slaughtering facilities. We believe that the regulations are the minimum standards to ensure the humane movement of equines to slaughtering facilities via commercial transportation. If equines are transported by conveyance from a point inside the United States to a slaughtering facility outside the United States, the owner/shipper will be required to meet the requirements of the regulations until the conveyance reaches the U.S. border. In addition, this rule allows us to assess civil penalties for those individuals who are not in compliance.

Under the heading, "Executive Order 12866 and Regulatory Flexibility Act," we estimate that this rule will increase operating costs for owners and commercial shippers who transport equines to slaughtering facilities by an amount somewhere between $300 and several thousand dollars annually for an entity that transports 500 equines per year. However, we added that the data suggested that the economic consequences for most entities would fall somewhere near the minimum point on the impact scale because many entities are already in compliance with at least some of the rule's provisions.

One commenter stated that the USDA does nothing to prevent the shipment of diseased animals for human consumption.

FSIS has regulations that provide for the antemortem and postmortem examination of equines to ensure that equines with certain diseases are not slaughtered or used for the purposes of human consumption.

One commenter stated that all horses shipped for slaughter should have a negative Coggins test performed within 6 months of transport due to possible zoonosis and also because horses are transported near highways and pass

horses on private farms and could pose a disease risk. One commenter stated that Coggins tests are required for horses that enter or exit Pennsylvania.

A Coggins test is the common name for the agar gel immunodiffusion test used for the diagnosis of equine infectious anemia (EIA). The purpose of this rule is to provide for the humane transport of equines to slaughtering facilities. Other regulations are concerned with the potential transmission of disease, including 9 CFR part 75, which restricts the interstate movement of horses that are positive to a test for EIA. Also, all States require a Coggins test for equines entering the State. At this time, there is no evidence that EIA can be contracted by humans through the consumption of meat from an equine infected with EIA. However, equines infected with EIA are not allowed to be used for human consumption. The transmission of EIA infection from equines on a conveyance to equines on farms that are passed by the conveyance is a low risk and highly unlikely because a number of factors have to be present, such as presence of tabanidaes (horse flies) and high viremia in the infected equine.

Several commenters stated that all meetings regarding the statute were not open to all interested parties. One commenter stated that, contrary to the statements in the proposal, consensus was not reached on the proposed regulations, and certain humane organizations opposed the regulations.

We did not state in the proposed rule that the proposal was a consensus-based document. We stated that, prior to drafting the proposed rule, APHIS representatives established a working group that included participants from other parts of the USDA, including FSIS and the Agricultural Marketing Service. In addition, APHIS attended two meetings regarding the statute that were hosted by humane organizations and attended by representatives of the equine, auction, slaughter, and trucking industries and the research and veterinary communities. At these meetings, we had an opportunity to listen to diverse opinions. We have relied on the proposed rule and public comment period to obtain comments from all interested persons.

One commenter stated that APHIS should remove "minimum" in the summary in reference to the standards to ensure the humane movement of equines to slaughtering facilities. This commenter also added that the summary should be revised to state "humane movement and treatment of equines to slaughtering facilities via commercial transportation."

The summary only serves as a brief description of the document and is not intended to prove a point or argue a case.

Two commenters stated that proposed rules should be made available to everyone, and one commenter stated that APHIS should disclose them to the media, especially the press.

All proposed rules are published in the **Federal Register**, which satisfies the legal requirements to notify the public. In addition, APHIS makes all of its proposed rules available on the Internet at *http://www.aphis.usda.gov/ppd/rad/webrepor.html* and advises various media through distribution of press releases.

Two commenters stated that they must pay taxes on transactions that involve horses, but entities involved in the transportation of horses to slaughter, including slaughtering facilities, do not. Many commenters stated that they were opposed to the slaughter of equines. One commenter stated that, rather than slaughter horses, zoos should be established or States zoned to hold the horses. These comments are outside the scope of this rulemaking.

Therefore, for the reasons given in the proposed rule and in this document, we are adopting the proposed rule as a final rule, with the changes discussed in this document. In addition, we are making minor, nonsubstantive, editorial changes in the rule for clarity.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. The rule has been determined to be significant for the purposes of Executive Order 12866 and, therefore, has been reviewed by the Office of Management and Budget.

In accordance with 5 U.S.C. 604, we have performed a final regulatory flexibility analysis for this rule, which is set out below. Our discussion of the anticipated economic effects of this rule on small entities also serves as our cost-benefit analysis under Executive Order 12866.

This rule is intended to fulfill a responsibility given to the Secretary of Agriculture in the 1996 Farm Bill. Sections 901–905 of the 1996 Farm Bill (7 U.S.C. 1901 note) authorize the Secretary of Agriculture, subject to the availability of appropriations, to issue guidelines for the regulation of the commercial transportation of equines for slaughter by persons regularly engaged in that activity within the United States. In both fiscal years 1998 and 1999, $400,000 was made available to administer this law. The regulations, which appear as a new part in title 9 of the CFR, are designed to help ensure the humane transport of equines to slaughtering facilities. The regulations cover, among other things, food, water, and opportunity for rest; space on the conveyance; segregation of stallions and other aggressive equines; completion of an owner-shipper certificate; and prohibitions on the movement of certain types of equines as well as on the use of electric prods and conveyances with animal cargo spaces divided into more than one stacked level.

This rule pertains almost exclusively to the commercial transportation of slaughter horses because horses account for almost all equines slaughtered in the United States. Equines are generally slaughtered for their meat, which is sold for human consumption, primarily outside the United States. From 1995 through 1997, an average of 100,467 equines were slaughtered annually in federally inspected U.S. slaughtering facilities. At the current time, there are three slaughtering facilities that accept equines in the continental United States: Two are located in Texas (Ft. Worth and Kaufman), and one is in Illinois (DeKalb). In 1996, the United States exported 38 million pounds of horse, ass, and mule meat, with a value of $64 million. Of the total volume exported in 1996, 29 million pounds, or 76 percent, was exported to Belgium and France. Slaughter equines represent a variety of types, and they come from a variety of sources, including working ranches, thoroughbred racing farms, and pet owners. Equines are usually slaughtered when they are unfit or unsuitable for riding or other purposes.

Economic Effects of the Rule on Owners and Commercial Shippers

The "path" from source supplier (farmer, rancher, pet owner, etc.) to slaughtering facility can vary. However, the most common scenario and the one used for the purpose of this analysis is as follows: The source suppliers transport their equines to local auction markets, where the equines are sold to persons who purchase the equines for the specific purpose of selling them to a slaughtering facility. (Hereafter, for the purposes of this final regulatory flexibility analysis, we will refer to persons who sell equines for slaughter as "owners"; however, in some cases, the owners use agents to conduct some aspect of the business of purchasing the equines and transporting and selling them to slaughtering facilities. We will use the term "owners" to refer to either the actual owners or their agents.) The owners consider price lists published by the slaughtering facilities for equines (the price varies in relation to the

weight of the equine and the quality of the meat), transportation costs, and profit requirements to establish the maximum prices that they will pay for equines at local auctions. Because the owners cannot usually purchase enough slaughter-quality equines at any one auction to make it economically feasible to ship the equines directly from the auction site to the slaughtering facility, the owners transport the equines back to their own farms or feedlots, usually nearby, where the equines are stored until such time as the owners can accumulate more equines from other auctions. Double-deck livestock trailers, which are the types most often used for transporting equines to slaughtering facilities, can carry up to about 45 equines each; single-deck trailers can carry up to about 38 equines each.

When enough equines have been accumulated to comprise a shipment, the owners transport the equines to the slaughtering facility. Although owners who ship 2,000 or more equines to slaughter per year are not uncommon, most owners ship far fewer than that number. In an estimated 75 percent of the cases, owners hire commercial shippers to move the equines to the slaughtering facilities; in the remaining estimated 25 percent of the cases, owners transport the equines to slaughter in their own conveyances. Therefore, the regulations will apply both to owners of equines destined for slaughter and to commercial shippers who transport such equines to slaughtering facilities. We estimate that approximately 200 owners and commercial shippers will be affected by this rule. Based on the average number of equines slaughtered in the United States per year (approximately 100,000) and on the estimated number of potentially affected owners and commercial shippers (approximately 200), the average number of equines transported annually to slaughter per affected entity would be 500.

This rule will require that, for a period of not less than 6 consecutive hours immediately prior to the equines being loaded on the conveyance, each equine be provided access to food and water and the opportunity to rest. As indicated above, the owners generally have possession of the equines immediately prior to their being loaded onto conveyances for transport to slaughtering facilities. In those cases where the owners hire commercial shippers, the latter do not take possession of the equines until they are loaded onto the conveyance. Furthermore, when commercial shippers are hired, they are normally not in the presence of the equines for the full 6-hour period prior to loading. For these reasons, it can be assumed that the owners, not commercial shippers, would be responsible for fulfilling the preloading requirements of this rule. In addition, the owners are more likely than commercial shippers to have the facilities necessary to meet the preloading requirements.

This requirement is unlikely to impose a hardship on affected entities. While in the possession of the owners, equines are usually housed on farms or in feedlots, where they have access to food, water, and rest. Owners have an incentive to provide equines awaiting transport to a slaughtering facility with food, water, and rest because malnourished equines have a reduced slaughter value and dead equines have no slaughter value. Furthermore, most equines are stored on farms or in feedlots for 6 consecutive hours or more because it usually takes at least that long for owners to accumulate enough equines to fill a conveyance. At most, the rule would result in owners having to keep their equines in a farm or feedlot for an additional 6 hours to fulfill the preloading requirements for the last equines needed to fill a conveyance. This worst-case scenario assumes that the "last-in" equines have not had the required preloading services prior to their acquisition by the owners. If the last-in equines have had those services, then the owners would be able to load them onto the conveyance immediately. For example, owners might be able to stop at an auction en route to a slaughtering plant and pick up their last-in equines.

We cannot estimate the precise dollar effects of this requirement because no hard data is available on the prevalence of slaughter equines receiving the required food, water, and rest prior to loading. However, for the reasons stated above, the economic effects would be minimal. Storing equines in feedlots costs about $2 per day per animal. (This amount is the typical rental rate for a pen, which includes food and water.) If an owner had to store a truckload of equines (assume 38) for a full day, the cost would be $76. The cost for storing 500 equines (the estimated average number of equines shipped annually to slaughter per affected entity) would be $1,000.

This rule will require that owners or commercial shippers sign an owner-shipper certificate for each equine being transported to a slaughtering facility. Among other things, the owner-shipper certificate will include a statement that the equine has received the required preloading services. If, as a result of this requirement, commercial shippers load fewer equines per conveyance, the shippers should not be affected because they typically charge owners a flat rate to transport equines to slaughtering facilities regardless of the number of equines on the conveyance. For owners who use their own vehicles for transportation, fewer equines per conveyance translates into increased costs. As an example, assume that it costs an owner $1,850 ($1.85 per mile—a representative average rate for commercial shipment of slaughter equines—times 1,000 miles) to transport a truckload of equines in the person's own conveyance. Assume also that, as a result of this rule, the owner could ship only 35 equines in a particular shipment, 3 fewer than the 38 that would have been shipped had the rule not been in effect. Using that data, the owner's transportation costs on a per-equine basis for that particular shipment would increase by 8.6 percent, from $48.68 to $52.86. The owner would incur similar costs if the owner secured the services of a commercial shipper.

This rule will require that any equine that has been on the conveyance for 28 consecutive hours or more without food, water, and the opportunity to rest be offloaded and, for at least 6 consecutive hours, provided with food, water, and the opportunity to rest. This rule will also require that each equine be provided with enough space on the conveyance to ensure that no animal is crowded in a way likely to cause injury or discomfort. Finally, this rule will require that stallions and other aggressive equines be segregated from each other and all other equines on the conveyance.

Available data suggest that the "28-hour rule" should not pose a problem for the vast majority of slaughter equine transporters. Officials at two of the U.S. equine slaughtering facilities, including the largest facility, indicate that, barring unusual circumstances, the overwhelming majority of equines arrive at the slaughtering facilities in 28 hours or less. Indeed, there is reason to believe that few equines actually fit the "worst-case" scenario in terms of travel distance—equines transported from the east or west coasts to the slaughtering facilities, which are all located in the central part of the United States. Equines on the east coast, at least from the State of Maryland northward, as well as those on the west coast and in the States of Montana and Idaho, are usually transported to Canadian slaughtering facilities. (For example, the slaughtering plant at Massueville, Quebec, is about 100 miles from the port of entry at Champlain, NY. For transporters in the northeastern part of

the United States, the Massueville plant is closer than any of the U.S. plants.) Furthermore, even for equines that do originate at east and west coast locations, the time spent on conveyances is reduced considerably by the common transport practice of using two different drivers on long trips. This practice allows the equines to be transported virtually nonstop because one person can drive while the other rests, thereby avoiding federally mandated rest periods that apply in a single-driver situation. Assuming an average speed of 55 mph and two different drivers, and allowing 1½ hours for loading and 2 hours for refueling and meal stops, even a trip as long as 1,300 miles would take only about 27 hours.

If equines do have to be offloaded for feeding, rest, etc., while en route to a slaughtering facility, transporters would incur additional costs. As stated previously, pens can generally be rented at a rate of about $2 per day per equine. (The rent for a 6-hour period is unknown but, presumably, it would be less than the full-day fee.) In addition to the pen rental fee, transporters would have to spend time unloading the equines. Also, they may have to: (1) Adjust routes and schedules to find pens to accommodate the equines; (2) wait while they are being serviced; and (3) reload them after they have been serviced. These activities would add to the cost of servicing equines at intermediate points.

This rule will also require that, during transport, equines must be provided with enough space to ensure that they are not crowded in a way that is likely to cause injury or discomfort. One source of injury and discomfort, double-deck trailers, will be banned in 5 years. (See "Alternatives Considered," below, for a discussion of why we selected a 5-year phase-in period rather than a shorter time.) Overcrowding can also occur in single-deck (also called straight-deck) trailers, which are used to transport equines to a lesser extent than double-deck trailers. The requirement concerning adequate space could translate into fewer equines per conveyance. As stated previously, commercial shippers typically charge owners a flat rate to transport their equines, so the possibility of fewer equines per shipment should not result in less revenue for commercial shippers. For owners, however, fewer equines per conveyance translates into increased costs, regardless of whether the owners hire commercial shippers or use their own vehicles for transportation.

The requirement that aggressive equines be segregated during transport is not likely to have a significant impact. Available data suggests that such segregation is already common practice. Owners have an incentive to make sure that aggressive equines are segregated because equines that arrive at the slaughtering facilities injured as the result of biting and kicking en route command lower market values. The segregation of equines requires that transporters spend more time and effort during loading, but that added time and effort is considered to be relatively minor. Nor should most transporters have to buy special equipment, because livestock trailers usually come equipped with devices, such as swing gates, that permit animal segregation. As a final point in this regard, relatively few stallions are transported for slaughter. USDA personnel stationed at two of the slaughtering facilities estimate that no more than about 5 percent of the equines arriving for slaughter are stallions.

This rule will require that an owner-shipper certificate be completed for each equine prior to departing for the slaughtering facility. The certificate must describe, among other things, the equine's physical characteristics (color, sex, permanent brands, etc.), and it must show the number of the animal's USDA backtag. It must also certify the equine's fitness to travel and note any special care and handling needs during transit (e.g., segregation of stallions). An equine will be fit to travel if it: (1) Can bear weight on all four limbs; (2) can walk unassisted; (3) is not blind in both eyes; (4) is older than 6 months of age; and (5) is not likely to give birth in transit. Affected entities will not need the services of a veterinarian in order to make the fitness-to-travel determination. This rule will require that either the owners or the commercial shippers sign the certificate and that the owner-shipper certificate accompany the equine to the slaughtering facility.

This requirement for an owner-shipper certificate will create additional paperwork for both owners and commercial shippers. As with the other preloading services discussed above, it is reasonable to assume that the responsibility for providing the data on the certificate will generally rest with the owners, not the commercial shippers. The owners have possession of the equines prior to departing for the slaughtering facility and presumably are more qualified to provide the data required by the owner-shipper certificate. It is also reasonable to assume that the responsibility for obtaining and installing the USDA backtag will be theirs, not the commercial shippers. The owners will not incur a cost for obtaining the backtags, which are available free of charge from a variety of sources. The backtags are adhesive and are attached simply by sticking them on the equine's back, so owners will not incur installation costs.

The added administrative costs that owners will incur as a result of having to complete and sign the owner-shipper certificate is difficult to quantify. Assuming that it takes 5 minutes to complete each certificate, an owner who ships 500 equines to slaughter annually will have to spend about 42 hours per year complying with the rule. Assuming a labor rate of $7 per hour, the 42 hours translates into added costs of about $300 per year. For reasons explained earlier, the added administrative costs for commercial shippers will likely be less than those for owners.

This rule will allow the use of electric prods only in life-threatening situations and will prohibit the transport of equines to slaughter on conveyances divided into more than one level, such as double-deck trailers, 5 years after publication of this final rule. The restriction on the use of electric prods should not pose a burden because effective, low-cost substitutes are available for use in non-life-threatening situations. For example, fiberglass poles with flags attached, which cost only about $5 each, are considered to be an effective alternative to electric prods. Any current use of electric prods by transporters of slaughter equines probably derives from the traditional use of these devices to assist in moving other livestock, such as cattle and swine.

The retail cost of a new double-deck livestock trailer averages about $42,000; single-deck trailers retail for about $38,000 each. The cost varies depending largely on the model, type of construction, and optional features. The useful life of the trailers also varies, depending on such factors as the weight and type of animals hauled and the needed frequency of cleaning. It is not uncommon, however, for trailers of both types to provide 10 to 12 years' worth of useful service.

As discussed previously, double-deck trailers can carry more equines than single-deck trailers, and some owners and shippers will be negatively affected by the reduction in the numbers of equines that could be transported in a single conveyance. Upon publication of this rule, shippers using floating-deck trailers to transport equines to slaughtering facilities will need to collapse the decks so that they create only one level. Conveyances divided permanently into more than one stacked

level can be, and are, also used to transport commodities other than equines, including livestock and produce. In fact, it is estimated that double-deck trailers in general carry equines no more than about 10 percent of the time they are in use. Upon effect of the ban, commercial shippers who transport equines to slaughtering facilities could use their double-deck trailers to transport other livestock and produce. Owners who use their own double-deck trailers to transport equines to slaughtering facilities will have to find another use for the equipment or trade them for single-deck trailers. Owners should be able to sell their serviceable trailers at fair market value to transporters of commodities other than equines. Furthermore, some of the double-deck trailers now in use by owners will need to be taken out of service within the next 5 years anyway as the result of normal wear and tear and could be replaced by single-deck trailers.

In conclusion, we do not anticipate that any of the requirements will have undue onerous economic effects on any affected owners or commercial shippers. We believe that many transporters of slaughter equines may already be in compliance with many of the requirements. The requirement for an owner-shipper certificate will affect all transporters of slaughter equines, but we have designed the form to make its preparation as easy as possible. We do not believe that the completion and maintenance of these certificates will be unreasonably time-consuming or burdensome. As stated previously, the proposed "28-hour rule" should not pose a problem for the vast majority of slaughter equine transporters, and the ban on double-deck trailers should not have a significant economic effect on owners or commercial shippers because these trailers can be used for other purposes and will need to be replaced anyway within the next 5 years and could be replaced with a single-deck trailer.

At a minimum, the rule will require that affected owners and commercial shippers complete an owner-shipper certificate, an administrative task that they do not have to perform now. For an entity that transports 500 equines per year, the average for all potentially affected entities, the requirement regarding owner-shipper certificates will translate into added costs of about $300 annually. In a worst-case scenario, the rule can add several thousand dollars to the annual operating costs of an entity that transports 500 equines per year. This worst-case scenario assumes that, at the current time, affected owners and commercial shippers are engaging in little or no voluntary compliance with the requirements.

Economic Effects of the Rule on Horse Slaughtering Facilities

Up to this point, the discussion in this final regulatory flexibility analysis has centered entirely on owners and commercial shippers, who represent the bulk of the entities affected by this rule. However, the rule will also impact the three horse slaughtering facilities currently operating in the continental United States. While the deferral of the effective date for the prohibition on double-deck trailers will allow them time to respond to the expected decline in the number of transporters willing to haul horses to slaughter, these slaughtering facilities will nonetheless be affected because they will experience lost business as a result of that expected decline. Some transporters will choose to keep their double-deck trailers and carry other commodities (*i.e.*, other than equine) because in their locations it is more lucrative for them to do so. Other transporters will likely find that it is not cost effective to haul horses long-distance in conveyances that have a smaller capacity, i.e., straight-deck and goose-neck trailers.

The slaughtering facilities will also experience increased hauling costs over time, because transporters that continue to ship horses to slaughter will be forced to do so in smaller conveyances. The hauling cost that slaughtering facilities pay to acquire each horse will increase, because the number of horses per load (being hauled the same distance) will be reduced but the hauling cost per load will remain the same. Officials at one U.S. slaughtering facility indicate that commercial shippers currently charge a hauling fee of $1.65 per mile if they have a return load, and $2.25 per mile if they return empty, regardless of the type of conveyance used. For a trip of 1,000 miles at $1.65 per mile, the facility's hauling cost per horse is $36.67 with a double-deck trailer and $43.42 with a straight-deck trailer, an increase of $6.75 or 18 percent per horse.[2] For each lot of 1,000 horses delivered to the slaughtering facility, the per horse cost increase of $6.75 translates into increased costs of $6,750.

Economic Effects on Small Entities

The Regulatory Flexibility Act requires that agencies consider the economic effects of rules on small entities (i.e., businesses, organizations, and governmental jurisdictions). As discussed above, the entities that will be affected by this rule are owners and commercial shippers who transport equines to slaughtering facilities and the slaughtering facilities themselves.

As stated previously, we estimate that approximately 200 entities will be affected by this rule, most of whom are owners and commercial shippers. Although the sizes of these entities are unknown, it is reasonable to assume that most are small by U.S. Small Business Administration (SBA) standards. This assumption is based on composite data for providers of the same and similar services in the United States. In 1993, there were 30,046 U.S. firms in Standard Industrial Classification (SIC) 4213, a classification category comprising firms primarily engaged in "over-the-road" trucking services, including commercial shipping. The per-firm average gross receipts for all 30,046 firms that year was $2.6 million, well below the SBA's small-entity threshold of $18.5 million. Similarly, in 1993, there were 1,671 U.S. firms in SIC 5159, a classification category that includes horse dealers. Of the 1,671 firms, 97 percent had fewer than 100 employees, the SBA's small-entity threshold for those firms.

This rule will result in increased costs for affected entities, large and small. As indicated above, operating costs will increase somewhere between about $300 and several thousand dollars annually for an entity that transports 500 equines per year. However, the available data suggests that, for most entities, the economic consequences will fall somewhere near the minimum point on the impact scale because, as stated previously, many are already in compliance with at least some of the rule's provisions, such as stallion segregation. Because we did not have enough data to conclude that even a cost increase of as low as $300 annually will not be significant for most of the potentially affected entities, we requested public comment on the potential economic impact of the proposal on small entities.

We received several comments regarding the initial regulatory flexibility analysis.

One commenter stated that the effect of the rule is so minimal that the small entities are the "winners" at an impact of $300 per year or $25 per month. Another commenter stated that APHIS put more emphasis on not creating financial hardship for the entities involved than on what Congress mandated regarding the humane transport of equines to slaughter.

We believe that these regulations will help ensure the humane movement of

[2] This assumes 45 horses on a double-deck trailer and 38 horses on a single-deck trailer.

equines to slaughtering facilities via commercial transportation. However, we do not believe that small entities are not affected. In fact, in the discussion under the heading, "Executive Order 12866 and Regulatory Flexibility Act," we stated that the regulations would have a negative economic effect on affected entities, large and small. We determined that operating costs would increase somewhere between about $300 and several thousand dollars annually for an entity that transports 500 equines per year, which would be a negative impact on these entities. However, we stated that, for most entities, the economic consequences of the regulations would fall somewhere near the minimum point on the impact scale because many entities are already in compliance with at least some of the requirements in part 88.

One commenter stated that the number of affected entities was understated because certain entities were not counted. Commercial airlines; air and sea cargo carriers; vendors that supply packing plants; feed manufacturers; and suppliers of veterinary supplies and medications were among the entities the commenter cited.

We stated above that the entities that would be affected by this rule were owners and commercial shippers who transport equines to slaughtering facilities and the slaughtering facilities themselves. These are the primary entities that would be directly affected by this rule. It is possible that these regulations may indirectly affect other entities, including commercial airlines, vendors, and feed manufacturers; however, these entities are not directly affected by this rule, and this rule should not have a significant economic effect on them.

Alternatives Considered

The Regulatory Flexibility Act requires Federal agencies promulgating new regulations to consider alternatives that will lessen the economic effects of the regulations on affected small entities. In developing the proposed rule, we considered many alternatives, some of which are discussed below. In developing the proposed program to carry out the statute, we established a working group that included participants both from within the agency as well as from other parts of USDA, including FSIS and AMS. In addition, APHIS representatives attended two meetings about the statute hosted by humane organizations and attended by representatives of the equine, auction, slaughter, and trucking industries and the research and veterinary communities.

We considered requiring that owners and commercial shippers of equines destined for slaughter secure the services of a veterinarian to certify the equines' fitness for travel. However, this rule allows owners and commercial shippers to certify the equines' fitness to travel themselves. In addition, we considered various alternatives with regard to the types of equines that would be prohibited from shipment. After much consideration, we are prohibiting the shipment of equines that are unable to bear weight on all four limbs, unable to walk unassisted, blind in both eyes, less than 6 months of age, and likely to give birth during shipment. We believe that we must prohibit the shipment to slaughter of equines in these five categories to carry out congressional intent under the statute for ensuring the humane transport of equines for slaughter. In addition, we considered many allowable time frames for equines to be on conveyances without access to food and water; the proposed 28-hour period is based on available data and input from interested and potentially affected parties. Finally, in regard to the prohibition on the transport of slaughter equines in any type of conveyance divided into more than one stacked level, we determined that such a ban is necessary to ensure the humane transport of equines to slaughtering facilities. However, this rule would allow the use of double-deck trailers for a period of 5 years following publication of this rule to lessen the effect of the ban on affected entities.

The Regulatory Flexibility Act also requires that Federal agencies consider the use of performance-based rather than design-based standards. In keeping with this requirement and the direction provided in the conference report to employ performance-based rather than engineering-based standards to the extent possible, the requirements included in the proposed rule are primarily performance-based. As examples, the rule's requirements for design of the conveyance, space allotted per equine on the conveyance, and manner of driving the conveyance are all performance-based.

For this rule, we also considered establishing the effective date of the ban on double-deck trailers at various points of time in the future, ranging from 6 months to 10 years after the rule's publication. We chose a 5-year effective date because we believe it provides a strategy for steadily improving the welfare of equines transported to slaughter. For reasons discussed below, a shorter period could have an onerous impact on the slaughter horse industry and result in unintended consequences for equines.

As discussed above, hauling costs for slaughtering facilities will increase as a result of owners and commercial shippers using smaller conveyances, and to the extent that the transition to a new single-deck system results in more trips at the higher, empty backhaul rate. In this regard, slaughtering facility officials believe that transporters who decide to continue shipping horses in the new single-deck environment will need time to find markets or customers with alternative products to haul, thereby avoiding empty backhauls and saving the facilities money. As indicated above, transporters charge one slaughtering facility a hauling fee of $1.65 per mile if they have a return load and $2.25 per mile if they return empty. For one trip of 1,000 miles, the savings for that facility would be $600 if the transporter is able to secure a return load. For 100 trips, the savings would be $60,000.

Slaughtering facility officials believe that they also need a deferral of the effective date for the prohibition on double-deck trailers to allow them time to respond to the expected decline in the number of transporters willing to haul horses to slaughter. Specifically, they have stated that they need time to budget and to arrange for financing on equipment they may need to acquire if they must haul horses on their own because commercial shippers and owners will not. The largest facility currently owns two tractors and one straight-deck trailer and estimates that it would have to acquire about 10 additional tractor trailers in order to do all of its own hauling. One new tractor costs approximately $100,000, and one new single-deck trailer costs approximately $38,000.

Officials at one slaughtering facility believe that, because the profit margin for their operation is already very thin (due in part to the financial burden imposed by the new European Union Additional Residue Testing Program), the facility could not make the transition to single-deck trailers in 6 months.[3] However, the same officials believe that, with a gradual transition,

[3] The European Union established Maxxam Laboratory, Inc. (Maxxam) in Canada as the North American residue testing facility. Maxxam charged the horse slaughter facilities in the United States $130,000 start-up costs; as a direct result, one facility, Central Nebraska Packing in North Platte, NE., closed its operation. The three facilities in Canada in direct competition with the U.S. facilities are subsidized by the Canadian government for both start-up and future testing fees. This places the U.S. facilities at a financial disadvantage with their Canadian competitors.

over a 5-year period, they would be able to plan accordingly and the facility might survive. They point out that their facility, which generates export sales exclusively, may be forced to close regardless of the time frame imposed by this rule, but the facility's chances of remaining open would be substantially improved with a 5-year phase-in.

If the facility closes, we believe it likely that horses in the United States that are intended for slaughter will be trucked to feedlots in Canada or Mexico, ostensibly as saddle horses, then go to slaughter. If that happens, we will have no jurisdiction over those movements because our statutory authority to regulate is limited to the commercial transportation of horses to slaughter and to movements to slaughter within the United States. Thus, a critical factor in our decision to use a 5-year time frame for the ban on double-deck trailers is our belief that if the rule has too great an impact on horse slaughtering facilities in the United States, our rule will not provide equines transported to slaughter the protection that we intend.

The information collection and recordkeeping requirements contained in this rule were described in the proposed rule and have been approved by the Office of Management and Budget. See "Paperwork Reduction Act," below.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

Executive Order 12988

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are in conflict with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

In accordance with section 3507(d) of the Paperwork Reduction Act of 1995 (44 U.S.C. *et seq.*), the information collection or recordkeeping requirements included in this final rule have been approved by the Office of Management and Budget (OMB). The assigned OMB control number is 0579–0160.

List of Subjects

9 CFR Part 70

Administrative practice and procedure.

9 CFR Part 88

Animal welfare, Horses, Penalties Reporting and recordkeeping requirements, Transportation.

Accordingly, we are amending 9 CFR, chapter I, subchapter C, as follows:

PART 70—RULES OF PRACTICE GOVERNING PROCEEDINGS UNDER CERTAIN ACTS

1. The authority citation for part 70 is revised to read as follows:

Authority: 21 U.S.C. 111, 112, 114a, 114a–1, 115, 117, 120, 122, 123, 125–127, 134b, 134c, 134e, and 134f; 7 CFR 2.22, 2.80, 371.4.

2. In § 70.1, the list of statutory provisions is amended by adding at the end of the list the following:

§ 70.1 Scope and applicability of rules of practice.

* * * * *

Sections 901–905 of the Federal Agriculture Improvement and Reform Act of 1996 (7 U.S.C. 1901 note).

* * * * *

3. A new part 88 is added to read as follows:

PART 88—COMMERCIAL TRANSPORTATION OF EQUINES FOR SLAUGHTER

Sec.

88.1 Definitions.
88.2 General information.
88.3 Standards for conveyances.
88.4 Requirements for transport.
88.5 Requirements at a slaughtering facility.
88.6 Violations and penalties.

Authority: 7 U.S.C. 1901, 7 CFR 2.22, 2.80, 371.4.

§ 88.1 Definitions.

The following definitions apply to this part:

APHIS. The Animal and Plant Health Inspection Service of the U.S. Department of Agriculture.

Commercial transportation. Movement for profit via conveyance on any highway or public road.

Conveyance. Trucks, tractors, trailers, or semitrailers, or any combination of these, propelled or drawn by mechanical power.

Equine. Any member of the *Equidae* family, which includes horses, asses, mules, ponies, and zebras.

Euthanasia. The humane destruction of an animal by the use of an anesthetic agent or other means that causes painless loss of consciousness and subsequent death.

Owner/shipper. Any individual, partnership, corporation, or cooperative association that engages in the commercial transportation of more than 20 equines per year to slaughtering facilities, except any individual or other entity who transports equines to slaughtering facilities incidental to his or her principal activity of production agriculture (production of food or fiber).

Owner-shipper certificate. VS Form 10–13,[1] which requires the information specified by § 88.4(a)(3) of this part.

Secretary. The Secretary of Agriculture.

Slaughtering facility. A commercial establishment that slaughters equines for any purpose.

Stallion. Any uncastrated male equine that is 1 year of age or older.

USDA. The U.S. Department of Agriculture.

USDA backtag. A backtag issued by APHIS that conforms to the eight-character alpha-numeric National Backtagging System and that provides unique identification for each animal.

USDA representative. Any employee of the USDA who is authorized by the Deputy Administrator for Veterinary Services of APHIS, USDA, to enforce this part.

§ 88.2 General information.

(a) State governments may enact and enforce regulations that are consistent with or that are more stringent than the regulations in this part.

(b) To determine whether an individual or other entity found to transport equines to a slaughtering facility is subject to the regulations in this part, a USDA representative may request from any individual or other entity who transported the equines information regarding the business of that individual or other entity. When such information is requested, the individual or other entity who transported the equines must provide the information within 30 days and in a format as may be specified by the USDA representative.

§ 88.3 Standards for conveyances.

(a) The animal cargo space of conveyances used for the commercial transportation of equines to slaughtering facilities must:

(1) Be designed, constructed, and maintained in a manner that at all times protects the health and well-being of the equines being transported (e.g., provides

[1] Forms may be obtained from the National Animal Health Programs Staff, Veterinary Services, APHIS, 4700 River Road Unit 43, Riverdale, MD 20737–1231.

adequate ventilation, contains no sharp protrusions, etc.);

(2) Include means of completely segregating each stallion and each aggressive equine on the conveyance so that no stallion or aggressive equine can come into contact with any of the other equines on the conveyance;

(3) Have sufficient interior height to allow each equine on the conveyance to stand with its head extended to the fullest normal postural height; and

(4) Be equipped with doors and ramps of sufficient size and location to provide for safe loading and unloading.

(b) Equines in commercial transportation to slaughtering facilities must not be transported in any conveyance that has the animal cargo space divided into two or more stacked levels, except that conveyances lacking the capability to convert from two or more stacked levels to one level may be used until December 7, 2006. Conveyances with collapsible floors (also known as "floating decks") must be configured to transport equines on one level only.

§ 88.4 Requirements for transport.

(a) Prior to the commercial transportation of equines to a slaughtering facility, the owner/shipper must:

(1) For a period of not less than 6 consecutive hours immediately prior to the equines being loaded on the conveyance, provide each equine appropriate food (i.e., hay, grass, or other food that would allow an equine in transit to maintain well-being), potable water, and the opportunity to rest;

(2) Apply a USDA backtag [2] to each equine in the shipment;

(3) Complete and sign an owner-shipper certificate for each equine being transported. The owner-shipper certificate for each equine must accompany the equine throughout transit to the slaughtering facility and must include the following information, which must be typed or legibly completed in ink:

(i) The owner/shipper's name, address, and telephone number;

(ii) The receiver's (destination) name, address, and telephone number;

(iii) The name of the auction/market, if applicable;

(iv) A description of the conveyance, including the license plate number;

(v) A description of the equine's physical characteristics, including such information as sex, breed, coloring, distinguishing markings, permanent brands, tattoos, and electronic devices that could be used to identify the equine;

(vi) The number of the USDA backtag applied to the equine in accordance with paragraph (a)(2) of this section;

(vii) A statement of fitness to travel at the time of loading, which will indicate that the equine is able to bear weight on all four limbs, able to walk unassisted, not blind in both eyes, older than 6 months of age, and not likely to give birth during the trip;

(viii) A description of any preexisting injuries or other unusual condition of the equine, such as a wound or blindness in one eye, that may cause the equine to have special handling needs;

(ix) The date, time, and place the equine was loaded on the conveyance; and

(x) A statement that the equine was provided access to food, water, and rest prior to transport in accordance with paragraph (a)(1) of this section; and

(4) Load the equines on the conveyance so that:

(i) Each equine has enough floor space to ensure that no equine is crowded in a way likely to cause injury or discomfort; and

(ii) Each stallion and any aggressive equines are completely segregated so that no stallion or aggressive equine can come into contact with any other equine on the conveyance.

(b) During transit to the slaughtering facility, the owner/shipper must:

(1) Drive in a manner to avoid causing injury to the equines;

(2) Observe the equines as frequently as circumstances allow, but not less than once every 6 hours, to check the physical condition of the equines and ensure that all requirements of this part are being followed. The owner/shipper must obtain veterinary assistance as soon as possible from an equine veterinarian for any equines in obvious physical distress. Equines that become nonambulatory en route must be euthanized by an equine veterinarian. If an equine dies en route, the owner/shipper must contact the nearest APHIS office as soon as possible and allow an APHIS veterinarian to examine the equine. If an APHIS veterinarian is not available, the owner/shipper must contact an equine veterinarian;

(3) Offload from the conveyance any equine that has been on the conveyance for 28 consecutive hours and provide the equine appropriate food, potable water, and the opportunity to rest for at least 6 consecutive hours; and

(4) If offloading is required en route to the slaughtering facility, the owner/shipper must prepare another owner-shipper certificate as required by paragraph (a)(2) of this section and record the date, time, and location where the offloading occurred. In this situation, both owner-shipper certificates would need to accompany the equine to the slaughtering facility.

(c) Handling of all equines in commercial transportation to a slaughtering facility shall be done as expeditiously and carefully as possible in a manner that does not cause unnecessary discomfort, stress, physical harm, or trauma. Electric prods may not be used on equines in commercial transportation to a slaughtering facility for any purpose, including loading or offloading on the conveyance, except when human safety is threatened.

(d) At any point during the commercial transportation of equines to a slaughtering facility, a USDA representative may examine the equines, inspect the conveyance, or review the owner-shipper certificates required by paragraph (a)(3) of this section.

(e) At any time during the commercial transportation of equines to a slaughtering facility, a USDA representative may direct the owner/shipper to take appropriate actions to alleviate the suffering of any equine. If deemed necessary by the USDA representative, such actions could include securing the services of an equine veterinarian to treat an equine, including performing euthanasia if necessary.

(f) The individual or other entity who signs the owner-shipper certificate must maintain a copy of the owner-shipper certificate for 1 year following the date of signature.

§ 88.5 Requirements at a slaughtering facility.

(a) Upon arrival at a slaughtering facility, the owner/shipper must:

(1) Ensure that each equine has access to appropriate food and potable water after being offloaded;

(2) Present the owner-shipper certificates to a USDA representative;

(3) Allow a USDA representative access to the equines for the purpose of examination; and

(4) Allow a USDA representative access to the animal cargo area of the conveyance for the purpose of inspection.

(b) If the owner/shipper arrives during normal business hours, the owner/shipper must not leave the premises of

[2] USDA backtags are available at recognized slaughtering establishments and specifically approved stockyards and from State representatives and APHIS representatives. A list of recognized slaughtering establishments and specifically approved stockyards may be obtained as indicated in § 78.1 of this chapter. The terms "State representative" and "APHIS representative" are defined in § 78.1 of this chapter.

a slaughtering facility until the equines have been examined by a USDA representative. However, if the owner/shipper arrives outside of normal business hours, the owner/shipper may leave the premises but must return to the premises of the slaughtering facility to meet the USDA representative upon his or her arrival.

(c) Any owner/shipper transporting equines to slaughtering facilities outside of the United States must present the owner-shipper certificates to USDA representatives at the border.

§ 88.6 Violations and penalties.

(a) The Secretary is authorized to assess civil penalties of up to $5,000 per violation of any of the regulations in this part.

(b) Each equine transported in violation of the regulations of this part will be considered a separate violation.

(Approved by the Office of Management and Budget under control number 0579–0160.)

Done in Washington, DC, this 3rd day of December 2001.

Bill Hawks,

Under Secretary, Marketing and Regulatory Programs.

Part III

Department of State

Designation of 39 "Terrorist Organizations" Under the "PATRIOT USA ACT"; Notice

DEPARTMENT OF STATE

[Public Notice 3852]

Designation of 39 "Terrorist Organizations" Under the "PATRIOT USA Act"

AGENCY: Office of the Coordinator for Counterterrorism, Department of State.

ACTION: Designation.

Pursuant to Section 411(a)(1)(G) of the Uniting andStrengthening America by providing Appropriate ToolsRequired to Intercept and Obstruct Terrorism Act of 2001, Pub. L. No. 107–56, 115 Stat. 272 ("USA PATRIOT Act"), the Secretary of State, in consultation with the AttorneyGeneral, hereby designates each group listed in the Appendix to this notice as a "terrorist organization." This designation is effective upon publication.

Section 411(a)(1)(G) of the USA PATRIOT Act requires the Secretary of State to find that a group has engaged in terrorism-related activities before designating it as a "terrorist organization." This statutory requirement has been satisfied because classified and/or unclassified information available to the Secretary of State contains findings that the named groups have committed, or have provided material support to further, terrorist acts.

Dated: December 5, 2001.

Mark Wong,

Acting Coordinator for Counterterrorism, Department of State.

The United States Government Manual 2001/2002

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to contact about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix B, which lists the agencies and functions of the Federal Government abolished, transferred, or renamed subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

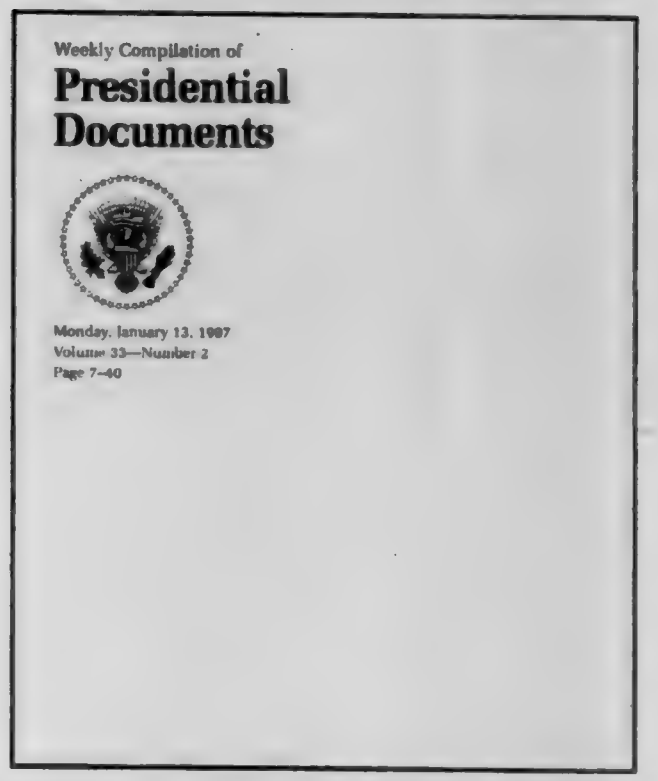
The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

Would you like to know. . .

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected. $35 per year.

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references. $30 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Public Laws

107th Congress, 1st Session, 2001

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 107th Congress, 1st Session, 2001.

Individual laws also may be purchased from the Superintendent of Documents, U.S. Government Printing Office. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws or access the online database at http://www.access.gpo.gov/nara005.html

Federal Register

12–10–01 Monday
Vol. 66 No. 237 Dec. 10, 2001
Pages 63621–63904

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512-1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $699, or $764 for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $264. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $10.00 for each issue, or $10.00 for each group of pages as actually bound; or $2.00 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 66 FR 12345.

Printed on recycled paper.

Rules and Regulations

Federal Register
Vol. 66, No. 237
Monday, December 10, 2001

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

14 CFR Part 39

[Docket No. 2001–SW–55–AD; Amendment 39–12552; AD 2001–22–51]

RIN 2120–AA64

Airworthiness Directives; Agusta S.p.A. Model A119 Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This document publishes in the **Federal Register** an amendment adopting Airworthiness Directive (AD) 2001–22–51, which was sent previously to all known U.S. owners and operators of Agusta S.p.A. (Agusta) Model A119 helicopters by individual letters. This AD requires removing a certain part-numbered tail rotor blade (blade) on or before accumulating 50 hours time-in-service (TIS). This AD also requires visually or dye penetrant inspecting each blade at specified time intervals and removing any cracked blade before further flight. This AD is prompted by the discovery of a fatigue crack on a blade during an inspection. The actions specified by this AD are intended to prevent failure of a blade and subsequent loss of control of the helicopter.

DATES: Effective December 26, 2001, to all persons except those persons to whom it was made immediately effective by Emergency AD 2001–22–51, issued on October 30, 2001, which contained the requirements of this amendment.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of December 26, 2001.

Comments for inclusion in the Rules Docket must be received on or before February 8, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Office of the Regional Counsel, Southwest Region, Attention: Rules Docket No. 2001–SW–55–AD, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137. You may also send comments electronically to the Rules Docket at the following address: 9-asw-adcomments@faa.gov.

The applicable service information may be obtained from Agusta, 21017 Cascina Costa di Samarate (VA) Italy, Via Giovanni Agusta 520, telephone 39 (0331) 229111, fax 39 (0331) 229605–222595. This information may be examined at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Richard Monschke, Aviation Safety Engineer, FAA, Rotorcraft Directorate, Rotorcraft Standards Staff, Fort Worth, Texas 76193–0110, telephone (817) 222–5116, fax (817) 222–5961.

SUPPLEMENTARY INFORMATION: On October 30, 2001, the FAA issued Emergency AD 2001–22–51 for Agusta Model A119 helicopters, which requires removing a certain part-numbered tail rotor blade on or before accumulating 50 hours TIS. That Emergency AD also requires visually or dye penetrant inspecting each blade at specified time intervals and removing any cracked blade before further flight. That action was prompted by the discovery of a fatigue crack on a blade during an inspection. This condition, if not corrected, could result in failure of a blade and subsequent loss of control of the helicopter.

The FAA has reviewed Agusta Bollettino Tecnico No. 119–1, Revision A, dated August 22, 2001 (ABT), which describes procedures for performing inspections of each blade, part number (P/N) 109–8132–01–107, for a crack and assigning a new retirement life. The Ente Nazionale per l'Aviazione Civile, which is the airworthiness authority for Italy, classified the ABT as mandatory and issued ADs 2001–124, dated March 30, 2001; 2001–348, dated August 20, 2001; and 2001–374, dated August 29, 2001, to ensure the continued airworthiness of these helicopters in Italy.

This helicopter model is manufactured in Italy and is typed certificated for operation in the United States under the provisions of 14 CFR 21.29 and the applicable bilateral agreement. Pursuant to this bilateral agreement, the ENAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the ENAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since the unsafe condition described is likely to exist or develop on other Agusta Model A119 helicopters of the same type designs, the FAA issued Emergency AD 2001–22–51 to prevent failure of a blade and subsequent loss of control of the helicopter. The AD requires the following for each blade, P/N 109–8132–01–107:

- Removing any blade on or before accumulating 50 hours TIS.
- Before each flight, visually checking both sides of each blade for a crack.
- Initially and at specified intervals or before the next flight after any abnormal tail rotor vibration, inspecting each blade for a crack using a 5-power or higher magnifying glass.
- Initially and repetitively, dye penetrant inspecting each blade for a crack.
- If a crack is found, removing the blade.

The AD revises the Limitations section of the maintenance manual by establishing a 50-hour life limit for blade, P/N 109–8132–01–107. The actions must be accomplished in accordance with the ABT described previously. An owner/operator (pilot) may perform the visual check required by paragraph (b) of the AD and must enter compliance in the helicopter maintenance records in accordance with 14 CFR 43.11 and 91.417(a)(2)(v)). The AD allows a pilot to perform this check because it involves only a visual check for a crack in the blade and can be performed equally well by a pilot or a mechanic.

The short compliance time involved is required because the previously described critical unsafe condition can adversely affect the structural integrity and controllability of the helicopter. Therefore, the actions stated previously

are required at the specified time intervals, and this AD must be issued immediately.

Since it was found that immediate corrective action was required, notice and opportunity for prior public comment thereon were impracticable and contrary to the public interest, and good cause existed to make the AD effective immediately by individual letters issued on October 30, 2001 to all known U.S. owners and operators of Agusta Model A119 helicopters. However, shortly after the issuance of the emergency AD, ENAC advised us that a replacement blade is being certificated. That replacement blade should have a longer life limit and should not require mandatory inspections. Therefore, a terminating action for the requirements of this AD may become available soon. In the meantime, the unsafe condition still exists, and the emergency AD is hereby published in the **Federal Register** as an amendment to 14 CFR 39.13 to make it effective to all persons. This published version of the AD is identical to the version issued on October 30, 2001 except that the citation in paragraph (b) for recording compliance with the pilot check is corrected to read 91.417(a)(2)(v) instead of the non-existent 91.147(a)(2)(v) cited in the October 30, 2001 version of this AD.

We estimate that 2 helicopters of U.S. registry will be affected by this AD, that it will take approximately 4 work hours per helicopter to accomplish the required actions, and the average labor rate is $60 per work hour. The manufacturer has indicated that the cost of any replacement blade will be given pro-rata warranty credit. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $480, assuming 100% warranty credit for any replacement blades.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES.** All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their mailed comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 2001–SW–55–AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive to read as follows:

2001–22–51 Agusta S.p.A: Amendment 39–12552. Docket No. 2001–SW–55–AD.

Applicability: Model A119 helicopters, with a tail rotor blade (blade), part number 109–8132–01–107, installed, certificated in any category.

Note 1: This AD applies to each helicopter identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For helicopters that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (g) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of a blade and subsequent loss of control of the helicopter, accomplish the following:

(a) Remove any blade on or before accumulating 50 hours time-in-service (TIS).

(b) Before each flight, visually check both sides of each blade for a crack. An owner/operator (pilot) holding at least a private pilot certificate may perform the visual check required by this paragraph, and must enter compliance into the helicopter maintenance records in accordance with 14 CFR 43.11 and 91.417(a)(2)(v).

(c) Within 10 hours TIS and thereafter at intervals not to exceed 10 hours TIS or before the next flight after any abnormal increase in the vibratory level of the helicopter, inspect each blade for a crack using a 5-power or higher magnifying glass in accordance with the Compliance Instructions, Part II, paragraphs 1 through 6, of Agusta Bollettino Tecnico No. 119–1, Revision A, dated August 22, 2001 (ABT).

(d) Within 25 hours TIS and thereafter at intervals not to exceed 25 hours TIS, dye penetrant inspect each blade for a crack in accordance with the Compliance Instructions, Part III, paragraphs 1 through 4.5, of the ABT.

(e) Before further flight, remove any blade in which a crack is found.

(f) This AD revises the Limitations section of the maintenance manual by establishing a 50-hour life limit for each blade, P/N 109–8132–01–107.

(g) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be

used if approved by the Manager, Regulations Group, FAA. Operators shall submit their requests through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Regulations Group.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Regulations Group.

(h) Special flight permits will not be issued.

(i) The inspections shall be done in accordance with the Compliance Instructions, Part II, paragraphs 1 through 6 and Part III, paragraphs 1 through 4.5, of Agusta Bollettino Tecnico No. 119–1, Revision A, dated August 22, 2001. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Agusta, 21017 Cascina Costa di Samarate (VA) Italy, Via Giovanni Agusta 520, telephone 39 (0331) 229111, fax 39 (0331) 229605–222595; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(j) This amendment becomes effective on December 26, 2001, to all persons except those persons to whom it was made immediately effective by Emergency AD 2001–22–51, issued October 30, 2001, which contained the requirements of this amendment.

Note 3: The subject of this AD is addressed in Ente Nazionale per l'Aviazione Civile (Italy) ADs 2001–124, dated March 30, 2001; 2001–348, dated August 20, 2001; and 2001–374, dated August 29, 2001.

Issued in Fort Worth, Texas, on November 27, 2001.

Eric Bries,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

[FR Doc. 01–30211 Filed 12–7–01; 8:45 am]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 2001–ASW–14]

Revision of Class E Airspace, Springhill, LA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Direct final rule; confirmation of effective date.

SUMMARY: This notice confirms the effective date of a direct final rule which revises the Class E Airspace, Springhill, LA.

EFFECTIVE DATE: The direct final rule published at 66 FR 45600 and is effective 0901 UTC, December 27, 2001.

FOR FURTHER INFORMATION CONTACT: Joseph R. Yadouga, Airspace Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, Fort Worth, TX 76193–0520, telephone: 817–222–5597.

SUPPLEMENTARY INFORMATION: The FAA published this direct final rule with a request for comments in the **Federal Register** on August 29, 2001, (66 FR 45600). The FAA uses the direct final rulemaking procedure for a noncontroversial rule where the FAA believes that there will be no adverse public comment. This direct final rule advised the public that no adverse comments were anticipated, and that unless a written adverse comment, or a written notice of intent to submit such an adverse comment, were received within the comment period, the regulation would become effective on December 27, 2001. No adverse comments were received, and, thus, this action confirms that this direct final rule will be effective on that date.

Issued in Fort Worth, TX, on December 3, 2001.

Robert N. Stevens,

Acting Manager, Air Traffic Division, Southwest Region.

[FR Doc. 01–30482 Filed 12–7–01; 8:45 am]

BILLING CODE 4910–13–M

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Part 211

RIN 1510–AA88

Delivery of Checks and Warrants to Addresses Outside the United States, Its Territories and Possessions

AGENCY: Financial Management Service, Fiscal Service, Treasury.

ACTION: Final rule; revision.

SUMMARY: This final rule amends the regulations governing the delivery of Treasury checks outside the United States by removing the reference to Democratic Kampuchea, now known as Cambodia, as an area to which checks may not be sent. With the resumption of diplomatic relations, there is reasonable assurance that payees residing in Cambodia will receive and be able to negotiate checks for full value.

EFFECTIVE DATE: December 10, 2001.

FOR FURTHER INFORMATION CONTACT: William S. Mehr, Manager, Administrative Services Branch, (202) 874–6932, or Tricia Long, Attorney, Office of the Chief Counsel, (202) 874–8615, Financial Management Service, Department of the Treasury, Washington, DC 20227.

SUPPLEMENTARY INFORMATION: Banking and postal facilities in Cambodia have improved since the resumption of diplomatic relations in 1993. With respect to postal facilities, the Department of State has available a system whereby Treasury checks can be sent to the American Embassy for distribution. This arrangement is feasible for both Treasury and State, because the number of payees residing in Cambodia is small.

Accordingly, there is reasonable assurance that payees living in Cambodia will receive checks or warrants drawn against funds of the United States, its agencies or instrumentalities, and will be able to negotiate the same for full value. For this reason, 31 CFR 211.1(a) is being revised to delete the reference to Cambodia.

Rulemaking Analysis

This regulation is not subject to the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because no notice of proposed rulemaking is required under 5 U.S.C. 553 or any other law.

Because this regulation involves a foreign affairs function of the United States, it is not subject to Executive Order 12866. Accordingly, a regulatory impact analysis is not required.

Notice and Comment

Because this rule removes a restriction on the delivery of checks and warrants to a foreign country, the Department of the Treasury has determined that notice of proposed rulemaking, public procedure and a delayed effective date are not required pursuant to 5 U.S.C. 553(a)(1), 5 U.S.C. 553(b)(B) and 5 U.S.C. 553(d)(1).

List of Subjects in 31 CFR Part 211

Foreign Banking, Checks.

For the reasons set forth in the preamble, 31 CFR Part 211 is amended as follows:

PART 211—DELIVERY OF CHECKS AND WARRANTS TO ADDRESSES OUTSIDE THE UNITED STATES, ITS TERRITORIES AND POSSESSIONS

1. The authority citation for part 211 continues to read as follows:

Authority: 5 U.S.C. 301; 31 U.S.C. 321 and 3329.

2. Section 211.1 is amended by revising paragraph (a) to read as follows:

§ 211.1 Withholding delivery of checks.

(a) It is hereby determined that postal, transportation or banking facilities in

general or local conditions in the Republic of Cuba and the Democratic People's Republic of Korea (North Korea) are such that there is not a reasonable assurance that a payee in those areas will actually receive checks or warrants drawn against funds of the United States, or agencies or instrumentalities thereof, and be able to negotiate the same for full value.

* * * * *

Dated: November 2, 2001.

Richard L. Gregg,

Commissioner.

[FR Doc. 01–30535 Filed 12–7–01; 8:45 am]

BILLING CODE 4810–35–P

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD07–01–120]

RIN 2115–AE46

Special Local Regulations: Cingular Wireless Winterfest Boat Parade, Broward County, Fort Lauderdale, FL

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: Temporary special local regulations are being established for the Cingular Wireless Winterfest Boat Parade. The event will be held on December 15, 2001, on the waters of the Port Everglades turning basin and the Intracoastal Waterway (ICW) from Dania Sound Light 35 to Pompano Beach Day Beacon 74. This rule creates 3 regulated areas around a staging area, parade route and viewing area. These regulations are needed to provide for the safety of life on navigable waters during the event.

DATES: These regulations are effective from 5 p.m. on December 15, 2001 until 11 p.m. on December 15, 2001.

ADDRESSES: Documents indicated in this preamble as being available in the docket, are part of docket CGD07–01–120 and are available for inspection or copying at Coast Guard Group Miami, 100 MacArthur Causeway, Miami Beach, Florida, 33139 between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: BMC Sorensen, Coast Guard Group Miami, Florida at (305) 535–4317.

SUPPLEMENTARY INFORMATION:

Regulatory Information

We did not publish a notice of proposed rulemaking (NPRM) for this regulation. Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a NPRM. Publishing a NPRM and delaying the effective date of this rule would be contrary to public safety interests since immediate action is needed to minimize potential danger to the public because there will be numerous spectator craft in the area. Publishing a NPRM is also unnecessary because the temporary rule will only be in effect for 6 hours and this is an annual event that has been well publicized to the local community.

For the same reasons, under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**.

Background and Purpose

The Cingular Wireless Winterfest Boat Parade is a nighttime parade of approximately 110 pleasure boats ranging in length from 20 feet to 200 feet decorated with holiday lights. Approximately 1500 spectator craft are anticipated to view the parade. The parade will form in the staging area at the Port Everglades turning basin and south in the ICW and the parade route will proceed north on the ICW to Lake Santa Barbara where the parade will disband. This regulation creates regulated areas for the staging area, viewing area, and parade route. The staging area encompasses the entire Port Everglades turning basin, south to Dania Sound Light 35 (LLNR 47575). The parade route encompasses the Intracoastal Waterway from Dania Sound Light 35 (LLNR 47575) to Pompano Beach day beacon 74 (LLNR 47230). The viewing area covers the west side of the ICW from the Sunrise Boulevard Bridge (26° 08.281′N, 080° 06.482′W) south to the New River Sound Light 3 (LLNR 47240).

Non-participant vessels are not allowed to enter or anchor in the staging area. Further, no vessel is allowed to anchor in the vicinity of the shore side viewing area that covers the west side of the ICW between the Sunrise Boulevard Bridge (26° 08.281′N, 080° 06.482′W and the New River Sound Light 3 (LLNR 47240). During the parade transit, these regulations prohibit non-participant vessels from approaching within 175 yards ahead of the lead vessel or 175 yards astern of the last participant vessel in the parade, and within 15 yards on either side of the outboard parade vessels, unless authorized by the Coast Guard Patrol Commander. The event sponsor will have approximately 20 watercraft to guide mariners around the regulated areas.

The staging area of this special local regulation will overlap the two existing temporary fixed security zones in Port Everglades [COTP MIAMI–01–116 and COTP MIAMI–01–122]. These temporary fixed security zones are activated when a high capacity passenger vessel or a vessel carrying cargoes of particular hazard as defined in Title 33, Code of Federal Regulations part 126, enter or moor within the respective zone. These temporary fixed security zones prohibit vessels from entering the security zones without the permission of the Captain of the Port of Miami.

The first temporary fixed security zone [COTP MIAMI–01–116] encompasses all waters west of an imaginary line starting with the northern most point 26° 05.98′N, 080° 07.15′W, near the west side of the 17th Street Bridge, to the southern most point at 26° 05.41′N, 080° 06.97′W on the tip of the pier near Burt and Jacks Restaurant. The Coast Guard anticipates a cruise ship being moored within this zone; thus this security zone will be activated and no vessels will be permitted to enter the zone without the permission of the Miami Captain of the Port or his designated representative.

The second temporary fixed security zone [COTP MIAMI–01–122] encompasses the waters of the ICW between a line connecting a point at 26° 05.41′N, 080° 06.97′W on the northern tip of Port Everglades berth 22 near Burt and Jacks Restaurant and a point directly east across the Intracoastal Waterway (ICW) at 26° 05.41′N, 080° 06.74′W; and a line drawn from the corner of Port Everglades berth 29 at point 26° 04.72′N, 080° 06.92′W, easterly across the ICW to John U. Lloyd Beach, State Recreational Area at point 26° 04.72′N, 080° 06.81′W. The Coast Guard anticipates that a cruise ship will be moored in this second temporary fixed security zone, so no person or vessel may enter the security zone without the permission of the Captain of the Port or his designated representative. This second zone overlaps the parade staging area but the Coast Guard anticipates allowing persons to transit the east side of the ICW enroute to the parade staging area (with the cruise ship moored on the west side near terminal 24), while this second temporary security zone is activated. The Coast Guard anticipates further that the cruise ship moored at berth 24 will depart the Port sometime during the parade formation and as a result this security zone will be deactivated after the cruise ship departs.

The regulated area created by this special local regulation will continue to

be enforced if either security zone above is deactivated. The security zones and special local regulation allow the Coast Guard and local law enforcement maximum flexibility to ensure the safety of the entire Port and those within the Port area. The Coast Guard anticipates no ship arrivals during the timeframe of this special local regulation. However, a ship may unexpectedly require transit into port, necessitating on-scene changes. All on-scene changes will be announced on VHF–FM Channels 13 and 16.

Discussion of Rule

The Coast Guard is establishing 3 regulated areas under this regulation, a staging area, a viewing area, and a parade route. The staging area encompasses all the waters within the Port Everglades turning basin and that portion of the Intracoastal Waterway (ICW) extending from Port Everglades turning basin to Dania Sound Light 35 (LLNR 47575). The viewing area covers the west side of the Intracoastal Waterway from the Sunrise Boulevard Bridge (26° 08.281′N, 080° 06.482′W) south to the New River Sound Light 3 (LLNR 47240). The parade route includes the Intracoastal Waterway from Dania Sound Light 35 (LLNR 47575) to Pompano Beach Daybeacon 74 (LLNR 47230).

All non-participant persons and vessels are prohibited from entering or anchoring in the staging area and all vessels are prohibited from anchoring in the viewing area, unless authorized by the Patrol Commander. During the parade transit along the parade route, non-participant vessels are prohibited from approaching within 175 yards ahead of the lead vessel or 175 yards astern of the last participant vessel in the parade, and within 15 yards on either side of the outboard parade vessels. The Coast Guard Patrol Commander may allow vessels to enter the staging area when the last participant vessel has cleared the staging area. The Coast Guard Patrol Commander will notify the public via Marine Safety Radio Broadcast on VHF Marine Band Radio, Channel 16 (157.1 MHz) if vessels are authorized to enter the staging area.

Regulatory Evaluation

This proposal is not a "significant regulatory action" under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not "significant" under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040, February 26, 1979) because the rule will only be in effect for 6 hours and vessels will still be allowed to transit the regulated areas with the permission of the Coast Guard Patrol Commander.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), the Coast Guard considered whether this rule would have a significant economic effect upon a substantial number of small entities. "Small entities" include small business, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

This rule may affect the following entities, some of which may be small entities: the owners or operators of vessels intending to transit or anchor in the Port Everglades turning basin and portions of the Intracoastal Waterway. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities because the rule will only be in effect for 6 hours and vessels will still be allowed to transit the regulated areas with the permission of the Coast Guard Patrol Commander.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we offer to assist small entities in understanding the rule so that they may better evaluate its effects on them and participate in the rulemaking process. Small entities may contact the person listed under **FOR FURTHER INFORMATION CONTACT** for assistance in understanding and participating in this rulemaking. We also have a point of contact for commenting on actions by employees of the Coast Guard. Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

Collection of Information

This rule calls for no new collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandate Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Environment

The Coast Guard has considered the environmental impact of this action and has determined pursuant to Figure 2–1, paragraph 34(h) of Commandant Instruction M16475.1D, that this action is categorically excluded from further environmental documentation.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233 to 1236; 49 CFR 1.46; 33 CFR 100.35.

2. A new temporary § 100.35T–07–120 is added to read as follows:

§ 100.35T–07–120 Cingular Wireless Winterfest Boat Parade, Broward County, Fort Lauderdale, FL.

(a) Definitions.

(1) *Staging area.* The staging area includes all waters within the Port Everglades turning basin, west of a line drawn from the 17th Street Causeway Bridge (26° 06.044′N, 080° 07.089′W) south along the northeast shore of the turning basin, east through Bar Cut to Light 6 (LLNR 10340), south across Bar Cut to Light 7 (LLNR 10345), then southwest along the southeast shore of the turning basin to Daybeacon 1 (LLNR 10375) at Coast Guard Station Fort Lauderdale. The staging area also includes that portion of the Intracoastal Waterway from Port Everglades Turning Basin south to Dania Sound Light 35 (LLNR 47575).

(2) *Parade route.* The parade route includes the Intracoastal Waterway (ICW) from Dania Sound Light 35 (LLNR 47575) to Pompano Beach Daybeacon 74 (LLNR 47230).

(3) *Viewing area.* The viewing area covers the west side of the Intracoastal Waterway from the Sunrise Boulevard Bridge (26° 08.281′N, 080° 06.482′W) south to the New River Sound Light 3 (LLNR 47240).

(4) *Coast Guard Patrol Commander.* The Coast Guard Patrol Commander is a commissioned, warrant, or petty officer of the Coast Guard who has been designated by the Commander, Coast Guard Group Miami, Florida and is also the designated representative of the Captain of the Port of Miami for purposes of enforcing security zones in Port Everglades during this event.

(b) Special Local Regulations.

(1) *Staging area.* Entry or anchoring in the staging area by nonparticipating vessels is prohibited, unless authorized by the Patrol Commander. The Coast Guard Patrol Commander may allow vessels to enter the staging area when the last participant vessel has departed the staging area. The Coast Guard Patrol Commander will notify the public via Marine Safety Radio Broadcast on VHF Marine Band Radio, Channel 16 (157.1 MHz) if vessels are allowed to enter the staging area.

(2) *Parade route.* During the parade transit, non-participant vessels are prohibited from approaching within 175 yards ahead of the lead vessel or 175 yards astern of the last participating vessel in the parade, and within 15 yards on either side of the outboard parade vessels, unless authorized by the Coast Guard Patrol Commander.

(3) *Viewing Area.* Vessels are prohibited from anchoring in the viewing area.

(4) *Miscellaneous.* A succession of not fewer that 5 short whistle or horn blasts from a patrol vessel will be the signal for any and all vessels to stop immediately. At the discretion of the Coast Guard Patrol Commander, all vessels may resume normal operations after the passage of the parade participants.

(c) Dates. This section becomes effective at 5 p.m. on December 15, 2001 and terminates at 11 p.m. on December 15, 2001.

Dated: December 1, 2001.

James S. Carmichael,

Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.

RIN 2115–AE47

Drawbridge Operation Regulation; Mississippi River, Iowa and Illinois

AGENCY: Coast Guard, DOT.

ACTION: Temporary deviation.

SUMMARY: The Commander, Eighth Coast Guard District has authorized a temporary deviation from the regulation governing the Burlington Northern Railroad Drawbridge, Mile 0.2, St. Croix River at Prescott, Wisconsin. This deviation allows the drawbridge to remain closed to navigation for 29 days November 16, until December 15, 2001. This action will facilitate maintenance work on the bridge.

DATES: This temporary deviation is effective from 12:01 a.m., November 16, 2001, until 12:01 a.m., December 15, 2001.

FOR FURTHER INFORMATION CONTACT: Roger K. Wiebusch, Bridge Administrator, Commander (obr), Eighth Coast Guard District, 1222 Spruce Street, St. Louis, MO 63103–2832, (314) 539–3900, extension 378.

SUPPLEMENTARY INFORMATION: The Burlington Northern Railroad Drawbridge provides a vertical clearance of 20.4 feet above normal pool in the closed to navigation position. Navigation on the waterway is a mixture of recreational boating and commercial tows. This deviation has been coordinated with waterway users. No objections were received.

This deviation allows the bridge to remain closed to navigation from 12:01 a.m., November 16, 2001 to 12:01 a.m., December 15, 2001. The bridge will open during this period of time upon receipt of 24 hours advance notice.

Dated: November 20, 2001.

Roy J. Casto,

Rear Admiral, U.S. Coast Guard, Commander, Eighth Coast Guard District.

BILLING CODE 4910–15–U

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD08–01–044]

Drawbridge Operating Regulation; Lake Pontchartrain, LA

AGENCY: Coast Guard, DOT.

ACTION: Notice of temporary deviation from regulations.

SUMMARY: The Commander, Eighth Coast Guard District has issued a temporary deviation from the regulation governing the operation of the bascule spans of the Greater New Orleans Expressway Commission Causeway across Lake Pontchartrain between Metairie, Jefferson Parish and Mandeville, St. Tammany Parish, Louisiana. This deviation allows the draws of the bridges to remain closed to navigation from 6 a.m. on Monday, December 17, 2001 until 6 a.m. on Wednesday, December 19, 2001. This temporary deviation allows for the connection of new submarine cables to operate the draw spans of the bridges.

DATES: This deviation is effective from 6 a.m. on Monday, December 17, 2001 until 6 a.m. on Wednesday, December 19, 2001.

ADDRESSES: Unless otherwise indicated, documents referred to in this notice are available for inspection or copying at the office of the Eighth Coast Guard District, Bridge Administration Branch, Commander (ob), 501 Magazine Street, New Orleans, Louisiana, 70130–3396 between 7 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The Bridge Administration Branch maintains the public docket for this temporary deviation.

FOR FURTHER INFORMATION CONTACT: David Frank, Bridge Administration Branch, telephone (504) 589–2965.

SUPPLEMENTARY INFORMATION: Presently, the draw is required to open on signal if at least three hours notice is given; except that, the draw need not be opened for the passage of vessels Monday through Friday except Federal holidays from 5:30 a.m. to 9:30 a.m. and from 3 p.m. until 7 p.m. The draw opens on signal for any vessel in distress or vessel waiting immediately following the closures listed above.

During the closure period, the bridges will not be able to open for vessels to transit through the bascule spans of the bridge. The bridges have a vertical clearance of 42 feet above mean high water in the closed-to-navigation position. Navigation on the waterway consists of small tugs with tows, fishing vessels, sailing vessels, and other recreational craft. In case of an emergency, the bridge owner will be able to hand crank the draws of the bridges to the open-to-navigation position. As an alternate route, the south channel fixed spans of the dual bridges provide a vertical clearance of 50 feet above mean high water.

The Greater New Orleans Expressway Commission requested a temporary deviation from the normal operation of the drawbridge in order to allow for the connection of new submarine cables to operate the draw spans of the bridges.

This deviation allows the draws of the bridges of the Greater New Orleans Expressway Commission Causeway across Lake Pontchartrain to remain closed to navigation from 6 a.m. on Monday, December 17, 2001 until 6 a.m. on Wednesday, December 19, 2001.

Dated: December 3, 2001.

J. R. Whitehead,

Captain, U.S. Coast Guard, Commander, 8th Coast Guard Dist., Acting.

[FR Doc. 01–30475 Filed 12–7–01; 8:45 am]

BILLING CODE 4910–15–U

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA–7773]

Suspension of Community Eligibility

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Final rule.

SUMMARY: This rule identifies communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If the Federal Emergency Management Agency (FEMA) receives documentation that the community has adopted the required floodplain management measures prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the **Federal Register**.

EFFECTIVE DATES: The effective date of each community's suspension is the third date ("Susp.") listed in the third column of the following tables.

ADDRESSES: If you wish to determine whether a particular community was suspended on the suspension date, contact the appropriate FEMA Regional Office or the NFIP servicing contractor.

FOR FURTHER INFORMATION CONTACT: Edward Pasterick, Division Director, Program Marketing and Partnership Division, Federal Insurance Administration and Mitigation Directorate, 500 C Street, S.W.; Room 411, Washington, D.C. 20472, (202) 646–3098.

SUPPLEMENTARY INFORMATION: The NFIP enables property owners to purchase flood insurance which is generally not otherwise available. In return, communities agree to adopt and administer local floodplain management aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4022, prohibits flood insurance coverage as authorized under the National Flood Insurance Program, 42 U.S.C. 4001 *et seq.*; unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed in this document no longer meet that statutory requirement for compliance with program regulations, 44 CFR part 59 *et seq.* Accordingly, the communities will be suspended on the effective date in the third column. As of that date, flood insurance will no longer be available in the community. However, some of these communities may adopt and submit the required documentation of legally enforceable floodplain management measures after this rule is published but prior to the actual suspension date. These communities will not be suspended and will continue their eligibility for the sale of insurance. A notice withdrawing the suspension of the communities will be published in the **Federal Register**.

In addition, the Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Insurance Rate Map (FIRM). The date of the FIRM if one has been published, is indicated in the fourth column of the table. No direct Federal financial assistance (except assistance pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood-prone areas (section 202(a) of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4106(a), as amended). This prohibition

against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column. The Associate Director finds that notice and public comment under 5 U.S.C. 553(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified.

Each community receives a 6-month, 90-day, and 30-day notification addressed to the Chief Executive Officer that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. Since these notifications have been made, this final rule may take effect within less than 30 days.

National Environmental Policy Act. This rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Considerations. No environmental impact assessment has been prepared.

Regulatory Flexibility Act. The Associate Director has determined that this rule is exempt from the requirements of the Regulatory Flexibility Act because the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4022, prohibits flood insurance coverage unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed no longer comply with the statutory requirements, and after the effective date, flood insurance will no longer be available in the communities unless they take remedial action.

Regulatory Classification. This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Paperwork Reduction Act. This rule does not involve any collection of information for purposes of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

Executive Order 12612, Federalism. This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, October 26, 1987, 3 CFR, 1987 Comp.; p. 252.

Executive Order 12778, Civil Justice Reform. This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778, October 25, 1991, 56 FR 55195, 3 CFR, 1991 Comp.; p. 309.

BILLING CODE 6718–05–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 01–2735; MM Docket No. 00–31; RM–9815; RM–10014; RM–10095]

Radio Broadcasting Services; Nogales,Vail and Patagonia, AZ

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In response to a proposal filed on behalf of Desert West Air Ranchers Corporation, licensee of Station KZNO(FM), Nogales, Arizona, the Commission substitutes Channel 253A for Channel 252A at Nogales, reallots Channel 253A to Vail, Arizona, as that community's first local aural transmission service, and modifies the license for Station KZNO(FM), as requested. *See* 65 FR 11540, March 3, 2000. Additionally, in response to a counterproposal filed on behalf of Desert West Air Ranchers Corporation, this document allots Channel 251A to Patagonia, Arizona, as that community's first local aural transmission service. And, in response to a counterproposal filed on behalf of Big Broadcasting of Arizona, LLC, this document allots Channel 283A to Vail, Arizona, as that community's second local FM service. Coordinates used for Channel 253A at Vail, Arizona to accommodate the reallotment are 31–55–39 NL and 110–37–57 WL; coordinates for Channel 283A at Vail for general application are 32–02–48 NL and 110–42–42 WL; coordinates used for Channel 251A at Patagonia are 31–33–05 NL and 110–44–45 WL. As Vail and Patagonia are located within 320 kilometers (199 miles) of the US-Mexico border, concurrence of the Mexican government has been requested for Channels 253A, and 283A at Vail, and for Channel 251A at Patagonia, but has not been received. Therefore, if construction permits are granted for the specified channels at Vail and Patagonia prior to receipt of final notification by the Mexican government, the authorizations will include the following condition: "Operation with the facilities specified herein is subject to modification, suspension or termination without right to a hearing if found by the Commission to be necessary in order to conform to the 1992 USA-Mexico FM Broadcast Agreement, or if specifically objected to by Mexico.

DATES: Effective January 7, 2002. Filing windows for Channel 283A at Vail, Arizona, and for Channel 251A at Patagonia, Arizona, will not be opened at this time. Instead, the issue of opening those allotments for auction will be addressed by the Commission in a subsequent Order.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 00–31, adopted November 14, 2001, and released November 23, 2001. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC's Reference Information Center (Room CY–A257), 445 12th Street, SW., Washington, DC 20554. The complete text of this decision may also be purchased from the Commission's copy contractor, Qualtex International, Portals II, 445 12th Street, SW., Room CY–B402, Washington, DC 20554, telephone (202) 863–2893.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Part 73 of title 47 of the Code of Federal Regulations is amended as follows:

PART 73—RADIO BROADCAST SERVICES

1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334, and 336.

§ 73.202 [Amended].

2. Section 73.202(b), the Table of FM Allotments under Arizona, is amended by removing Channel 252A at Nogales.

3. Section 73.202(b), the Table of FM Allotments under Arizona, is amended by adding Patagonia, Channel 251A; and Vail, Channel 253A and Channel 283A.

Federal Communications Commission.

John A. Karousos,

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 01–2681; MM Docket Nos. 01–118, 01–119, 01–122; RM–10106, RM–10127, RM–10130]

Radio Broadcasting Services; Grants, Milan, and Shiprock, New Mexico; Van Wert and Columbus Grove, Ohio; Lebanon and Hamilton, Ohio and Fort Thomas, KY

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Commission allots channels in three separate docketed proceedings which were proposed together in a multiple docket *Notice of Proposed Rule Making*. (1) At the request of KXXQ(FM) Radio Partners, Inc., Channel 264C0 is substituted for Channel 264A at Grants, New Mexico, Channel 264C0 is reallotted from Grants to Milan, New Mexico, and the license for Station KXXQ(FM) is modified to reflect the changes. In addition, Channel 299C1 is substituted for vacant Channel 265C1 at Shiprock, New Mexico to accommodate the changes. *See* 66 FR 33655 (June 25, 2001). Channel 264C0 is allotted at Milan with a site restriction of 21.2 kilometers (13.2 miles) north of the community. Channel 299C1 is allotted at Shiprock at the original allotment site. Coordinates for Channel 264C0 at Milan are 35–21–19 NL and 107–56–52 WL. Coordinates for Channel 299C1 at Shiprock are 36–46–12 NL and 108–42–49 WL. (2) At the request of Clear Channel Broadcasting Licenses, Inc., we substitute Channel 230B1 for Channel 230A at Van Wert, reallot the channel to Columbus Grove, Ohio, as the community's first local aural transmission service, and modify Clear Channel's construction permit for its unbuilt station to reflect the changes. *See* 66 FR 33656 (June 25, 2001). Channel 230B1 is allotted at Columbus Grove with a site restriction of 8.1 kilometers (5.0 miles) northwest of the community. Coordinates for Channel 230B1 at Columbus Grove are 40–57–33 NL and 84–08–14 WL. (3) At the joint request of Infinity Radio License Inc. and Caron Broadcasting, we reallot Channel 247A from Lebanon, Ohio to Fort Thomas, Kentucky, as the community's first local aural transmission service, and the modify Station WAQZ(FM)'s license to reflect the change. We also reallot Channel 243B from Hamilton, Ohio to Lebanon, as a replacement channel for the

community's first local aural transmission service and modify Station WYGY(FM)'s license to reflect the change. *See* 66 FR 33657 (June 25, 2001). Channel 247A can be reallotted from Lebanon to Fort Thomas at petitioner's requested site 14.7 kilometers (9.1 miles) north of Fort Thomas. Channel 243B can be reallotted from Hamilton to Lebanon at Station WYGY(FM)'s existing site 13.9 kilometers (8.6 miles) southwest of the community. Coordinates for Channel 247A at Fort Thomas, Kentucky, are 39–11–51 NL and 84–22–56 WL. Coordinates for Channel 243B at Lebanon, Ohio, are 39–21–11 NL and 84–19–30 WL.

DATES: Effective December 31, 2001.

FOR FURTHER INFORMATION CONTACT: Victoria M. McCauley, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket Nos. 01–118, 01–119, and 01–122, adopted November 7, 2001, and released November 16, 2001. The full text of this document is available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portals II, 445 12th Street, SW., Room CY–A257, Washington, DC, 20554. This document may also be purchased from the Commission's duplicating contractor, Qualex International, Portals II, 445 12th Street, SW, Room CY–B402, Washington, DC, 20554, telephone 202–863–2893, facsimile 202–863–2898, or via e-mail *qualexint@aol.com*.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Part 73 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 73—RADIO BROADCAST SERVICES

1. The authority citation for Part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334, and 336.

§ 73.202 [Amended].

2. Section 73.202(b), the Table of FM Allotments under Ohio, is amended by removing Channel 230A at Van Wert adding Columbus Grove, Channel 230B1, and by removing Channel 247A and adding Channel 243B at Lebanon.

3. Section 73.202(b), the Table of FM Allotments under New Mexico, is amended by removing Channel 264A at Grants, adding Milan, Channel 264C0, and removing Channel 265C1 and adding Channel 299C1 at Shiprock.

4. Section 73.202(b), the Table of FM Allotments under Kentucky, is amended by adding Fort Thomas, Channel 247A.

Federal Communications Commission.

BILLING CODE 6712–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 660

[Docket No. 010511123–1123–01; I.D. 042001D]

RIN 0648–AP24

Fisheries Off West Coast States and in the Western Pacific; Western Pacific Pelagic Fisheries; Hawaii-based Pelagic Longline Restrictions and Seasonal Area Closure, and Sea Turtle and Sea Bird Mitigation Measures

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Emergency interim rule and extension of expiration date.

SUMMARY: This action extends an emergency interim rule, now in effect, applicable to vessels registered for use under a Hawaii longline limited access permit (Hawaii longline vessels) and allows the use of basket-style longline gear as an alternative method for deep-set tuna longline fishing. This emergency interim rule: Prohibits the targeting of swordfish north of the equator by Hawaii longline vessels; prohibits longline fishing by Hawaii longline vessels in waters south of the Hawaiian Islands (from 15° N. lat. to the equator, and from 145° W. long. to 180° long.) during the months of April and May; allows re-registration of vessels to Hawaii longline limited access permits only in October; imposes additional sea turtle handling and resuscitation measures; and requires all Hawaii longline vessel operators to attend an annual protected species workshop. This emergency interim rule implements an order issued by the U.S. District Court for the District of Hawaii (Court) in March 2001 to reduce the number of sea turtles injured and killed incidental to longline fishing operations. Other parts of this emergency interim rule implement the terms and conditions contained in an amended November 2000 biological opinion issued by the U.S. Fish and Wildlife Service (FWS) on the effects of the Hawaii longline fleet on the endangered short-tailed albatross. In October 2001, FWS amended its biological opinion on the short-tailed albatross allowing Hawaii longline vessels to use basket-style longline gear as an alternative method for deep-set tuna longline fishing, which is implemented by this emergency interim rule.

DATES: 1. The expiration date of the emergency interim rule published on June 12, 2001 (66 FR 31564), is extended to June 8, 2002.

2. The amendments to §§ 660.12, 660.35 (a)(7), and (a)(10) in this emergency interim rule are effective from December 11, 2001, through June 8, 2002.

ADDRESSES: Copies of the environmental assessment and regulatory impact review prepared for this emergency interim rule may be obtained from Dr. Charles Karnella, Administrator, Pacific Islands Area Office (PIAO), National Marine Fisheries Service, 1601 Kapiolani Blvd., Suite 1110, Honolulu, HI, 96814–4700.

FOR FURTHER INFORMATION CONTACT: Alvin Katekaru, PIAO, at 808–973–2937.

SUPPLEMENTARY INFORMATION: On June 12, 2001, NMFS issued an emergency interim rule (66 FR 31561) implementing temporary measures for the Hawaii-based pelagic longline fishery (Hawaii longline fishery) to avoid the likelihood of jeopardy to sea turtles and to reduce adverse effects to the short-tailed albatross. These measures are consistent with NMFS' March 29, 2001, Biological Opinion on the Fishery Management Plan for Pelagic Fisheries of the Western Pacific Region and FWS' November 28, 2000, Biological Opinion on the Effects of the Hawaii-based Domestic Longline Fleet on the Short-tailed Albatross (*Phoebastria albatrus*) (short-tailed albatross BiOp). NMFS received no written comments on the June 12, 2001, emergency interim rule.

The action taken to protect and conserve sea turtles complies with a March 30, 2001, Order Modifying Injunction (Order) issued by the Court in *Center for Marine Conservation* v. *NMFS*, CV No. 99-00152. This emergency interim rule codifies that Order in 50 CFR part 660 under the authority of section 305 (c) of the Magnuson-Stevenson Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1855 (c). Background information on the Order was published in several previous

Federal Register documents (64 FR 72290, December 27, 1999; 65 FR 16346, March 28, 2000; 65 FR 37917, June 19, 2000; 65 FR 51992, August 25, 2000; 65 FR 66186, November 3, 2000; 66 FR 1110, February 22, 2001; and at 66 FR 15358, March 19, 2001; 66 FR 31561, June 12, 2001) and is not repeated here.

The turtle component of this emergency interim rule (a) prohibits Hawaii longline vessels from using longline gear to target swordfish north of the equator; (b) requires Hawaii longline vessels to deploy longline gear such that the "sag" (deepest point) between any two floats is at least 100 m (328.1 ft) beneath the sea surface and the float line suspending the main longline beneath a float is at least 20 m (65.6 ft) long, with a minimum of 15 branch lines deployed between any 2 floats; (c) prohibits a Hawaii longline vessel from possessing light sticks on board the vessel; (d) prohibits Hawaii longline vessels from fishing with longline gear during the months of May and April in the area bounded on the south by the equator, on the west by 180° long., on the east by 145° W. long., and on the north by 15° N. lat.; (e) allows the re-registration of a Hawaii longline vessel that has been de-registered from a Hawaii longline limited access permit after March 29, 2001, only during the month of October; (f) requires operators of Hawaii longline vessels to annually attend a protected species workshop conducted by NMFS; (g) requires Hawaii longline vessel operators to cease gear retrieval if a sea turtle is discovered hooked or entangled on a longline until the turtle has been removed from the gear or brought onto the vessel's deck; (h) requires that hooks be removed from sea turtles as quickly and carefully as possible; however, if a hook cannot be removed, that the line be cut as close to the hook as possible; (i) requires that wire or bolt cutters capable of cutting through a longline hook be on board the vessel to facilitate cutting of hooks imbedded in sea turtles; and (j) requires the operator of a Hawaii longline vessel to bring comatose sea turtles on board the vessel and to perform resuscitation on such turtles as prescribed in 50 CFR 223.206 (d)(1).

The seabird protection component of this emergency interim rule implements the terms and conditions of the short-tailed albatross BiOp, as amended. This biological opinion requires operators and crew of Hawaii longline vessels operating with longline gear north of 23° N. lat. to (1) use thawed blue-dyed bait in a manner specified by NMFS and discard offal strategically to distract sea birds during the setting and hauling of longline gear; and (2) employ a line-setting machine or basket-style longline gear (as discussed below) with weights (minimum weight = 45 g) attached to each branch line within 1 m of the hook when making tuna target sets (the only type of set allowed under this emergency interim rule north of the equator). Also, the crew of a Hawaii longline vessel is required to apply certain sea bird handling techniques to increase the likelihood of survival of any short-tailed albatross that is incidentally taken and brought on board the vessel alive. If a short-tailed albatross is brought aboard a Hawaii longline vessel, the vessel operator must determine if it exhibits the following traits: Head is held erect and the bird responds to noise and motion stimuli; bird breathes without noise; both wings can flap and retract to normal folded position on back; and the bird can stand on both feet with toes pointed forward. If a short-tailed albatross fails to exhibit even one of these traits, the vessel operator must contact NMFS immediately. In addition, any short-tailed albatross recovered dead must be frozen immediately and surrendered as soon as possible to NMFS.

This emergency interim rule implements an amendment to the short-tailed albatross BiOp issued by FWS on October 18, 2001, in response to NMFS' request of August 15, 2001, to allow basket-style longline gear to be deployed without a line-setting machine north of 23° N. lat. under the terms and conditions of that biological opinion. This gear type is regarded as a traditional rope or tarred longline fishing method in the Hawaii longline fishery. The FWS made this adjustment because this gear type, when it is deployed slack, sinks at approximately 9 m per minute through the first 50 m of the water column, which is comparable to the sink rate of a monofilament longline deployed by a line-setting machine. The FWS determined that the use of basket-style longline gear, like a line-setting machine, minimizes the incidental take of sea birds, including the short-tailed albatross. At present, there is one vessel in the Hawaii longline fishery that uses the basket-style longline gear. Both the Western Pacific Fishery Management Council (Council) and NMFS strongly support the use of basket-style longline gear in the fishery.

The short-tailed albatross BiOp also requires all Hawaii longline vessel operators to attend annually a protected species workshop. The BiOp also contains seabird take mitigation measures for longline fishing targeting swordfish north of 23° N. lat.; however, these measures become moot because, under this emergency interim rule, targeting swordfish north of the equator is prohibited under the sea turtle take mitigation measures.

Changes From the Original Emergency Interim Rule

This emergency interim rule contains adjustments to regulatory measures at § 660.12 by adding a definition for "basket-style longline gear," by suspending § 660.35 (a)(7), and by adding § 660.35 (a)(10) that allows the use of basket-style longline gear as an alternative to a line-setting machine or line-shooter (currently required for all Hawaii longline vessels fishing above 23° N. lat.).

Extension of this emergency interim rule is authorized under section 305 (c)(3)(B) of the Magnuson-Stevens Fishery Conservation and Management Act. Background information on other aspects of this emergency interim rule regarding longline sag depth and non-regulatory requirements of the Court Order are presented in the **Federal Register** announcing the emergency interim rule on June 12, 2001 (66 FR 3156). This information is not repeated here.

Recent, Unforeseen Events or Recently Discovered Circumstances

On October 18, 2001, FWS amended the terms and conditions of its November 2000 short-tailed albatross BiOp to allow the use of basket-style longline gear in the Hawaii longline fishery. This amendment is based on information provided by NMFS demonstrating that this method of deep-set longline fishing is an acceptable alternative to monofilament longline deployed with a line-setting machine in minimizing sea bird take. This gear, when deployed slack, has a sinking rate such that birds diving on the bait are unable to get the bait or become hooked or entangled in the gear. At present there is one Hawaii longline vessel that uses basket-style longline gear. While using this gear, this vessel has not observed or reported any sea turtle interactions. Both the Council and NMFS believe that this vessel should be allowed to continue using this method of fishing. Therefore, this emergency interim rule includes the basket-style longline gear as an alternative to line-setting machine or line shooter currently required of all Hawaii longline vessels targeting tuna north of 23° N. lat. around the Hawaiian Islands.

Classification

The Assistant Administrator for Fisheries, NOAA (AA) has determined

that extension of the emergency interim rule is necessary to comply with a U.S. District Court Order and the mandatory terms and conditions of a BiOp issued under section 7 of the Endangered Species Act.

This emergency interim rule has been determined to be not significant for the purposes of Executive Order 12866.

The AA finds for good cause that providing prior notice and opportunity for public comment is unnecessary because this action implements a Court Order and mandatory terms and conditions of a BiOp, authorized under the ESA, thus precluding implementation of any alternative. Similarly, the AA finds, for good cause, under 5 U.S.C. 553 (d)(3), that delaying the effectiveness of this rule for 30 days is impracticable given the explicit directive from the Court and the mandatory requirements of the FWS's BiOp. Further, the AA finds, under 5 U.S.C. 553 (d)(1), that this rule relieves a restriction by allowing the use of a longline gear type that was previously prohibited above 23° N. lat. Accordingly, the AA is making this emergency interim rule effective from December 11, 2001, through June 8, 2002.

List of Subjects in 50 CFR Part 660

Administrative practice and procedure, American Samoa, Fisheries, Fishing, Guam, Hawaiian Natives, Indians, Northern Mariana Islands, Reporting and recordkeeping requirements.

Dated: December 3, 2001.

Rebecca Lent,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 660 is amended as follows:

PART 660—FISHERIES OFF WEST COAST STATES AND IN THE WESTERN PACIFIC

1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. Effective from December 11, 2001, through June 8, 2002, in § 660.12, a definition for "Basket-style longline gear" is added in alphabetical order to read as follows:

§ 660.12 Definitions.

* * * * * *

Basket-style longline gear means a type of longline gear that is divided into units called "baskets" each consisting of a segment of main line to which 10 or more branch lines with hooks are spliced. The lines are made of multiple braided strands of cotton, nylon, or other synthetic fibers impregnated with tar or other heavy coatings that cause the lines to sink rapidly in seawater.

* * * * * *

3. Effective from December 11, 2001, through June 8, 2002, in § 660.35, paragraph (a)(7) is suspended and a new paragraph (a)(10) is added to read as follows:

§ 660.35 Seabird take mitigation measures.

(a) * * *

(10) Use a line-setting machine or line-shooter to set the main longline, or use basket-style longline gear such that the main longline is deployed slack to maximize its sinking rate;

* * * * * *

Proposed Rules

Federal Register
Vol. 66, No. 237
Monday, December 10, 2001

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 94

[Docket No. 01–026–1]

Change in Disease Status of Portugal Because of African Swine Fever

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to remove Portugal from the list of regions where African swine fever exists. We are proposing this action because Portugal is now free of African swine fever. This action would relieve restrictions due to African swine fever on the importation of pork and pork products into the United States from Portugal. However, because Portugal is on the list of regions where hog cholera exists and the list of regions that are subject to certain restrictions because of their proximity to or trading relationships with rinderpest- or foot-and-mouth disease-affected countries, Portugal would continue to be subject to certain restrictions regarding the importation into the United States of pork and pork products.

DATES: We invite you to comment on this docket. We will consider all comments we receive that are postmarked, delivered, or e-mailed by February 8, 2002.

ADDRESSES: You may submit comments by postal mail/commercial delivery or by e-mail. If you use postal mail/commercial delivery, please send four copies of your comment (an original and three copies) to: Docket No. 01–026–1, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. 01–026–1. If you use e-mail, address your comment to *regulations@aphis.usda.gov*. Your comment must be contained in the body of your message; do not send attached files. Please include your name and address in your message and "Docket No. 01–026–1" on the subject line.

You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

APHIS documents published in the **Federal Register**, and related information, including the names of organizations and individuals who have commented on APHIS dockets, are available on the Internet at *http://www.aphis.usda.gov/ppd/rad/webrepor.html*.

FOR FURTHER INFORMATION CONTACT: Dr. Gary Colgrove, Chief Staff Veterinarian, National Center for Import and Export, VS, APHIS, 4700 River Road Unit 38, Riverdale, MD 20737–1231; (301) 734–4356.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR part 94 (referred to below as the regulations) govern the importation of certain animals and animal products into the United States in order to prevent the introduction of various animal diseases, including rinderpest, foot-and-mouth disease (FMD), African swine fever (ASF), hog cholera, and swine vesicular disease. These are dangerous and destructive communicable diseases of ruminants and swine. Section 94.8 of the regulations lists regions of the world where ASF exists or is reasonably believed to exist. Section 94.8 also restricts the importation of pork and pork products into the United States from the listed regions.

On December 29, 1999, we published in the **Federal Register** an interim rule (64 FR 72912–72913, Docket No. 99–096–1) that added Portugal to the list in § 94.8 of regions where ASF exists because the presence of ASF was confirmed in that region on November 15, 1999. As a result of that action, the importation into the United States of any pork and pork products that left Portugal on or after November 5, 1999, the effective date of that interim rule, was restricted. We adopted the interim rule without change in a document published in the **Federal Register** on August 28, 2000 (65 FR 51997, Docket No. 99–096–2).

Portugal responded quickly to the presence of ASF, which was confined to four premises. Following depopulation of the affected herds, Portugal conducted extensive serological surveillance. This testing indicated that ASF had not spread beyond the affected premises. The Government of Portugal recently requested that APHIS recognize Portugal as a region considered free of ASF.

In response to that request, we reviewed the documentation submitted by the Government of Portugal in support of its request, and a team of APHIS officials performed a site visit to conduct an evaluation of Portugal's animal health program with regard to ASF. You may review the on-site evaluation on the Internet at *http://www.aphis.usda.gov/vs/reg-request.html*. The evaluation consisted of a review of Portugal's veterinary service infrastructure, laboratory and diagnostic procedures, vaccination practices, and administration of laws and regulations intended to prevent the introduction of communicable animal diseases into Portugal. After reviewing the documentation provided by Portugal and the data gathered during the site visit by APHIS officials, we have determined that Portugal qualifies to be recognized as free of ASF.

However, Portugal is still considered to be affected with hog cholera, also known as classical swine fever, so pork and pork products from Portugal offered for importation into the United States would remain subject to the restrictions in § 94.9 for hog cholera. Similarly, dry-cured pork products from Portugal would continue to be subject to the restrictions in § 94.17 due to hog cholera. Additionally, pork and pork products from Portugal would continue to be subject to the restrictions in § 94.11 because Portugal is one of the countries listed in § 94.11(a) that have been declared free of rinderpest and FMD, but from which the importation of meat and other animal products is restricted due to the nature of their trade with countries affected with rinderpest or FMD or because they have a land border with a country affected with rinderpest or FMD.

Executive Order 12866 and Regulatory Flexibility Act

This proposed rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review process required under Executive Order 12866.

We are proposing to remove Portugal from the list of regions where ASF exists. We are proposing this action because Portugal is now free of ASF. This action would relieve restrictions due to ASF on the importation of pork and pork products into the United States from Portugal. However, because Portugal is on the list of regions where hog cholera exists and the list of regions that are subject to certain restrictions because of their proximity to or trading relationships with rinderpest- or FMD-affected countries, Portugal would continue to be subject to certain restrictions regarding the importation into the United States of pork and pork products.

The following analysis addresses the economic effect of this rule on small entities, as required by the Regulatory Flexibility Act.

Entities in the United States likely to be affected by this proposed rule include those engaged in the production of swine and processed pork products. Since Portugal has never exported pork or pork products to the United States, we anticipate that this proposed rule would have no economic effect on U.S. swine importers, hog meat processors, hog producers, or any other entities, large or small. However, should Portugal commence the exportation of pork and pork products to the United States, restrictions on the importation of pork and pork products into the United States from Portugal would still be in place because Portugal is on the list of regions where hog cholera exists and the list of regions that are subject to certain restrictions because of their proximity to or trading relationships with rinderpest- or FMD-affected countries. Given those continuing restrictions, we believe any potential imports of processed pork and pork products from Portugal would be minimal. Likewise, because any potential increase in imports of processed pork and pork products from Portugal would be slight, the potential effect on U.S. swine producers and processors of pork is expected to be minimal.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. If this proposed rule is adopted: (1) All State and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings will not be required before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This proposed rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 9 CFR Part 94

Animal diseases, Imports, Livestock, Meat and meat products, Milk, Poultry and poultry products, Reporting and recordkeeping requirements.

Accordingly, we propose to amend 9 CFR part 94 as follows:

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), EXOTIC NEWCASTLE DISEASE, AFRICAN SWINE FEVER, HOG CHOLERA, AND BOVINE SPONGIFORM ENCEPHALOPATHY: PROHIBITED AND RESTRICTED IMPORTATIONS

1. The authority citation for part 94 would continue to read as follows:

Authority: 7 U.S.C. 450, 7711, 7712, 7713, 7714, 7751, and 7754; 19 U.S.C. 1306; 21 U.S.C. 111, 114a, 134a, 134b, 134c, 134f, 136, and 136a; 31 U.S.C. 9701; 42 U.S.C. 4331 and 4332; 7 CFR 2.22, 2.80, and 371.4.

§ 94.8 [Amended]

2. In § 94.8, the introductory text of the section would be amended by removing the word "Portugal,".

Done in Washington, DC, this 4th day of December, 2001.

W. Ron DeHaven,

Acting Administrator, Animal and Plant Health Inspection Service.

SOCIAL SECURITY ADMINISTRATION

20 CFR Part 404

[Regulations No. 4 and 16]

RIN 0960–AF29

Revised Medical Criteria for Evaluating Skin Disorders

AGENCY: Social Security Administration.

ACTION: Proposed rules.

SUMMARY: We propose to revise the criteria in the Listing of Impairments (the listings) that we use to evaluate claims involving skin disorders. We apply these criteria when you claim benefits based on disability under title II and title XVI of the Social Security Act (the Act). The proposed revisions will reflect advances in medical knowledge, treatment, and methods of evaluating skin disorders.

DATES: To be sure your comments are considered, we must receive them by February 8, 2002.

ADDRESSES: You may give us your comments by using: our Internet site facility (*i.e.*, Social Security Online) at: *http://www.ssa.gov/regulations/*, e-mail to *regulations@ssa.gov;* telefax to (410) 966–2830; or by letter to the Commissioner of Social Security, P.O. Box 17703, Baltimore, Maryland 21235–7703.

You may also deliver them to the Office of Process and Innovation Management, Social Security Administration, L2109 West Low Rise Building, 6401 Security Boulevard, Baltimore, Maryland 21235–6401, between 8:00 a.m. and 4:30 p.m. on regular business days. Comments are posted on our Internet site, or you may inspect them physically on regular business days by making arrangements with the contact person shown in this preamble.

Electronic Version: The electronic file of this document is available on the date of publication in the **Federal Register** at *http://www.access.gpo.gov/su docs/aces/aces140.html.* It is also available on the Internet site for SSA (i.e., Social Security Online): *http://www.ssa.gov/regulations/.*

FOR FURTHER INFORMATION CONTACT: Suzanne DiMarino, Social Insurance Specialist, Office of Process and Innovation Management, Social Security Administration, L2109 West Low Rise, 6401 Security Boulevard, Baltimore, Maryland 21235–6401, (410) 965–1769 or TTY (410) 966–5609. For information on eligibility or filing for benefits, call our national toll-free number 1–800–772–1213 or TTY 1–800–325–0778, or visit our Internet web site, Social Security Online, at *http://www.ssa.gov.*

SUPPLEMENTARY INFORMATION:

What Programs Would These Proposed Regulations Affect?

These proposed regulations would affect disability determinations and decisions we make for you under title II and title XVI of the Act. In addition, to the extent that Medicare and Medicaid eligibility are based on entitlement to benefits under title II and eligibility for

benefits under title XVI, these proposed regulations would also affect the Medicare and Medicaid programs.

Who Can Get Disability Benefits?

Under title II of the Act, we provide for the payment of disability benefits if you are disabled and belong to one of the following three groups:

- Workers insured under the Act,
- Children of insured workers, and
- Widows, widowers, and surviving divorced spouses (see 20 CFR § 404.336) of insured workers.

Under title XVI of the Act, we provide for Supplemental Security Income (SSI) payments on the basis of disability if you have limited income and resources.

How Do We Define Disability?

Under both the title II and title XVI programs, disability must be the result of any medically determinable physical or mental impairment or combination of impairments that can be expected to result in death or that has lasted or can be expected to last for a continuous period of at least 12 months. Our definitions of disability are shown in the following table:

If you file a claim under . . .	And you are . . .	Disability means you have a medically determinable impairment(s) that meets the statutory duration requirement and results in . . .
title II	an adult or child	the inability to do any substantial gainful activity (SGA).
title XVI	an adult	the inability to do any SGA.
title XVI	a child	marked and severe functional limitations.

What Are the Listings?

The listings contain examples of impairments that we consider severe enough to prevent you as an adult from doing any gainful activity. If you are a child seeking SSI benefits based on disability, the listings describe impairments that we consider severe enough to result in marked and severe functional limitations. Although the listings are contained only in appendix 1 to subpart P of part 404 of our rules, we incorporate them by reference in the SSI program in § 416.925 of our regulations, and apply them to claims under both title II and title XVI of the Act.

How Do We Use the Listings?

There are listings for adults (part A) and for children (part B). We apply the medical criteria in part A when we assess your claim if you are an adult, i.e., a person age 18 or over.

If you are a child, we first use the criteria in part B. If the B criteria do not apply, and the specific disease process(es) has a similar effect on adults and children, we then use the criteria in part A. (*See* §§ 404.1525, 404.1526, 416.925 and 416.926.)

We use the criteria in the listings only to make favorable findings of disability. We never deny a claim or find that disability has ceased because your impairment(s) does not meet or medically equal a listing.

Why Are We Proposing To Revise the Listings for Skin Impairments?

We are proposing these revisions to update the medical criteria and provide more information about how we evaluate skin impairments. We last published final rules containing comprehensive revisions to the skin listings in the **Federal Register** on March 27, 1979 (44 FR 18170). In subsequent rules published December 6, 1985 (50 FR 50068), we indicated that due to advances in medical treatment, technology, and program experience we would periodically review and update the listings. The current listings for the evaluation of skin impairments would no longer be effective on July 2, 2003 (66 FR 34361 (June 28, 2001)).

How Long Would These Proposed Rules Be Effective?

These proposed rules would remain in effect for 8 years from the date we publish them as final rules in the **Federal Register**, unless we extend them, or revise and issue them again.

We will continue to apply our current listings until we evaluate the public comments on these proposed rules and determine whether they should be issued as final rules. If we finalize these proposed rules, when any final rules become effective, we will apply them to new applications filed on or after the effective date of the final rules, and to cases that are pending in the administrative review process. In accordance with our usual practice, we would explain how we would apply any final rules in greater detail in the preamble to the final rules.

When we conduct reviews to determine whether your disability continues, we would not find that your disability has ended based only on any changes in the listings. Our regulations explain that we continue to use our prior listings when we review your case if you receive disability benefits or SSI payments based on our determination or decision that your impairment(s) met or equaled the listings. In these cases, we determine whether you have experienced medical improvement, and if so, whether the medical improvement is related to the ability to work. If your impairment(s) still meets or equals the same listing section that we used to make our most recent favorable determination or decision, we will find the medical improvement is not related to the ability to work. If your condition has medically improved so that you no longer meet or equal the prior listing, we evaluate your case further to determine whether you are currently disabled. We may find that you are currently disabled, depending on the full circumstances of your case. See 20 CFR 404.1594(c)(3)(i), 416.994(b)(2)(iv)(A). If you are a child who is eligible for SSI payments, we follow a similar rule when we decide whether you have experienced medical improvement in your condition. 20 CFR 416.994a(b)(2).

What Revisions Are We Proposing To Make?

To present the skin listing criteria in part A of Appendix 1 in a more logical order, and make the listings easier to use, we propose to:

- Revise the titles to put them in plain language;
- Revise the order and update the diagnostic groupings of skin impairments;
- Add a listing for photosensitivity disorders;
- Provide a more uniform and clearly defined statement of severity required for a listing-level skin impairment;
- Expand the guidance in the introductory text to the listing; and
- Make nonsubstantive editorial changes.

In addition, we propose to add a set of childhood skin listings in part B of Appendix 1.

How Are We Proposing To Change the Introductory Text to the Adult Skin Listings?

We propose to change the heading title from 8.00 Skin to 8.00 Skin Disorders.

We propose to expand and significantly reorganize the introductory

text to the skin impairments listings in current 8.00A and 8.00B in order to provide additional guidance in applying the skin listings. In doing so, we propose to:

- Expand and supplement the first sentence of current 8.00A and move it into proposed 8.00C;
- Expand and supplement the second sentence of current 8.00A and move it into proposed 8.00F;
- Expand the third sentence of current 8.00A and move it into proposed 8.00C(3); and
- Expand the material in 8.00B and move it into proposed 8.00D.

We also propose to add new material in all the proposed sections of the introductory text. A detailed description of the new and modified paragraphs follows.

Proposed 8.00A—What Skin Impairments Do We Evaluate With These Listings?

This new section provides a detailed description of the more common impairments that may be disabling covered by the skin listings.

Proposed 8.00B—What Documentation Do We Need?

We propose to add a new section that discusses the documentation we require in evaluating skin impairment(s) cases. The proposed section explains the information we expect to find in a complete dermatologic case record in order to make a reasonable assessment of severity. It also explains the importance of diagnostic procedures, which produce laboratory findings or other evidence from generally acceptable methods, in accurately diagnosing skin impairments.

Proposed 8.00C—How Do We Determine if Your Skin Impairment(s) Prevents You From Doing Any Gainful Activity?

This section, which is partially new and partially based on modification to the first sentence of current 8.00A, will explain the three factors we consider when evaluating the severity of skin impairments. The proposed section consists of three subsections:

- Proposed 8.00C1 defines "extensive lesions", a term in proposed listings 8.02 through 8.07. That definition explains that the term extensive not only refers to the amount of surface area affected, but also to the limitations resulting from the lesions. Hence, these listings require a qualitative, as well as a quantitative, evaluation of the effect of the skin lesions. This section also gives examples of extensive lesions. We will determine whether you can ambulate effectively or can perform fine and gross movements effectively based on the medical and other evidence in the case record, generally without developing additional evidence about your ability to perform the specific activities listed as examples.
- Proposed 8.00C2 explains how we evaluate symptoms (including pain) consistent with our rules in §§ 404.1525(f) and 416.925(f) and §§ 404.1529 and 416.929.
- Proposed 8.00C3 explains that while skin impairments often respond to treatment, there is a wide variation in how people respond, including side effects to drug therapy. Therefore, we will consider each case on an individual basis.

Proposed 8.00D—How Do We Assess Impairments That Involve More Than One Body System?

This section modifies current 8.00B. It clarifies that other impairments, in addition to systemic ones, can involve the skin and explains how we evaluate such impairments under the listings. It also broadens the list of examples of impairments that affect skin and other body systems.

Proposed 8.00E—How Do We Evaluate Burns?

We propose to include this new section on burns in the introductory text to the skin listings in response to many inquiries that we receive on how we evaluate these injuries. This new paragraph notes that burns frequently affect more than one body system. It then explains that we evaluate the specific impairment resulting from burns using the criteria of the affected body system.

Proposed 8.00F—How Do We Determine if an Impairment Will Continue at a Disabling Level of Severity in Order to Meet the Duration Requirement?

We propose to add this section to explain how we will determine if the duration requirement is or will be met. This section is partially new and partially based on the second sentence of current 8.00A.

We state that the extensive skin lesions must persist for at least 3 months despite continuing treatment as prescribed in order for us to infer that the duration requirement will be met. Currently, each listing requires that the skin lesions not respond to prescribed treatment, but there is no statement of how long the lesions must last despite prescribed treatment before we can evaluate the skin impairment(s) under the listing criteria. Since most skin impairments improve significantly within 3 months after treatment begins, we propose that skin lesions must have persisted for at least 3 months despite continuing treatment as prescribed. The proposed timeframe will allow us to predict, with a high degree of certainty, which impairments resulting in the inability to perform gainful activity will also satisfy the duration requirement of the Act. In addition, the proposed timeframe will help to ensure that we do not decide cases prematurely or unnecessarily delay making decisions.

Proposed 8.00G—How Do We Assess Impairments if There Is No Prescribed Treatment, or the Extensive Lesions Have Not Persisted for at Least 3 Months?

This section explains how we assess a skin impairment when there is no record of ongoing treatment, such treatment has lasted less than 3 months, or the extensive lesions have not yet persisted for at least 3 months. It describes how we continue through the sequential evaluation process if the listing(s) cannot be met due to insufficient longitudinal treatment records.

How Are We Proposing To Change the Criteria in the Listings for Evaluating Skin Impairments in Adults?

8.01 Category of Impairments, Skin

Most of the changes we propose to make to the skin listings are not significant. For instance, we propose to update the medical terminology and to broaden and reorganize the skin listings.

A significant change we do propose to make is to add a listing, 8.07, for photosensitivity disorders. Currently, such disorders may be found equivalent in severity to a listed skin impairment. We also propose to define "extensive lesions" and to add to each listing a requirement that the extensive lesions must persist, despite continuing treatment as prescribed, for a period of at least 3 months. This is explained in 8.00F of the introductory text.

The following is a detailed explanation of the proposed listing criteria.

Proposed Listing 8.02—Ichthyosis

We propose to revise the title of listing 8.02 to ichthyosis so that it covers the general group of disorders characterized by noninflammatory scaling of the skin. This prevents the need to also cite the inherited disorder ichthyosiform erythroderma, which we do not commonly see. We also propose to move exfoliative dermatitis to listing 8.05 with the other dermatitis disorders.

Proposed Listing 8.03—Bullous Disease (e.g., Pemphigus, Erythema Multiforme Bullosum, Epidermolysis Bullosa, Bullous Pemphigoid, Dermatitis Herpetiformis)

We propose to revise the title of listing 8.03 so that we can apply it to all types of bullous diseases. Then, through the use of examples, we propose to cite the four currently listed diseases and epidermolysis bullosa.

Proposed Listing 8.04—Chronic Infections of the Skin or Mucous Membranes

We propose to revise the title of listing 8.04 so that the listing will include infections other than deep mycotic (fungal) infections. In this listing we propose to use the words "fungating" (to grow exuberantly like a fungus or spongy growth) and "ulcerating" (a lesion through the skin or a mucous membrane resulting from loss of tissue, usually with inflammation) to modify the term "extensive lesions" because they are descriptive of the different types of lesions frequently associated with the more severe types of chronic infections. Listing-level severity is characterized by either fungating or ulcerating lesions.

Proposed Listing 8.05—Dermatitis (e.g., Psoriasis, Dyshidrosis, Atopic Dermatitis, Exfoliative Dermatitis, Allergic Contact Dermatitis)

We propose to revise the title of listing 8.05 so that we can use it to evaluate miscellaneous inflammatory conditions of the skin, rather than just the three conditions currently cited. The new title will allow us to use this listing to evaluate environmental skin conditions such as allergic contact dermatitis.

Proposed Listing 8.06—Hidradenitis Suppurativa

We propose to remove the reference to acne conglobrata from listing 8.06 because it is not usually disabling and frequently responds well to current treatment. Also, we propose different severity criteria for this listing. We are taking out the condition of "not amenable to surgical treatment" since most lesions associated with hidradenitis suppurativa involve local inflammation of the apocrine glands and occur in the axillae, inguinal areas, or perineum. Due to advances in medical treatments, these conditions do not usually require surgery; but if surgery is needed, continuing treatment as prescribed includes any necessary surgical procedures.

Proposed Listing 8.07—Photosensitivity Disorders (e.g., Xeroderma Pigmentosum)

We propose to add a listing for evaluating photosensitivity disorders, such as xeroderma pigmentosum, in adults. Some individuals with these disorders are now surviving into adulthood and thus we believe it appropriate to have a separate listing for these disorders. For more information about this new listing disorder, we refer you to the following:

1. Photosensitivity (Section 15), in: Harper J, Oranje A, Prose N, (eds) *Textbook of Pediatric Dermatology*, vols 1 & 2, Oxford: Blackwell Science, 2000:895–936.

2. Roelandts R., The Diagnosis of Photosensitivity, Arch Dermatol, 2000:136:1152–7.

3. Epstein JH., Photosensitivity and Photoallergy, Semin Cutan Med Surg., 1999:18:274–84.

Why Are We Proposing To Add Listings for Evaluating Skin Impairments in Children?

We propose to add new listings to evaluate claims filed by persons under age 18 who have skin impairments to maintain consistency with the other body system listings which have both adult and child criteria.

How Do the Skin Listings We Are Proposing for Children Differ From Those We Are Proposing for Adults?

The skin listings we are proposing for children are identical in content to those we are proposing for adults, except that we propose to include examples of erythropoietic porphyrias and hemangiomas in 108.00D, and not in 8.00D. We did this because the skin manifestations of these disorders are not likely to be the primary manifestations in adults. For example, most hemangiomas disappear spontaneously or are surgically removed in childhood. When the hemangiomas are associated with Kasabach-Merritt Syndrome, a rare condition in which the low number of blood platelets cause bleeding, the hemic manifestations are obvious in adults. Similarly, in erythropoietic porphyria, a rare metabolic disorder characterized by a deficiency of the enzyme ferrochelatase that is essential to the synthesis of hemoglobin, a major symptom in children is the hypersensitivity of their skin to sunlight and some types of artificial light. Generally, by adulthood, anemia is a prominent manifestation in the more severe cases, with possible complications related to liver and gallbladder function.

Clarity of These Proposed Rules

Executive Order 12866 requires each agency to write all rules in plain language. In addition to your substantive comments on these proposed rules, we invite your comments on how to make these proposed rules easier to understand.

For example:

- Have we organized the material to suit your needs?
- Are the requirements in the rules clearly stated?
- Do the rules contain technical language or jargon that is not clear?
- Would a different format (grouping and order of sections, use of headings, paragraphing) make the rules easier to understand?
- Would more (but shorter) sections be better?
- Could we improve clarity by adding tables, lists, or diagrams?
- What else could we do to make the rules easier to understand?

Regulatory Procedures

Executive Order (E.O.) 12866

We have consulted with the Office of Management and Budget (OMB) and determined that these proposed rules meet the requirements for a significant regulatory action under E.O. 12866. Thus, they were subject to OMB review.

Regulatory Flexibility Act

We certify that these proposed rules would not have a significant economic impact on a substantial number of small entities because they affect only individuals. Thus, a regulatory flexibility analysis as provided in the Regulatory Flexibility Act, as amended, is not required.

Paperwork Reduction Act

These proposed rules contain reporting requirements at 8.00B, 8.00C, 8.00D, 108.00B, 108.00C, and 108.00D. The public reporting burden is accounted for in the Information Collection Requests for the various forms that the public uses to submit the information to SSA. Consequently, a 1-hour placeholder burden is being assigned to the specific reporting requirement(s) contained in these rules. We are seeking clearance of the burdens referenced in these rules because they were not considered during the clearance of the forms. An Information Collection Request has been submitted to OMB. We are soliciting comments on the burden estimate; the need for the information; its practical utility; ways to enhance its quality, utility and clarity; and on ways to minimize the burden on respondents, including the use of

automated collection techniques or other forms of information technology. Comments should be submitted to the Social Security Administration at the following address: Social Security Administration, Attn: SSA Reports Clearance Officer, Rm. 1–A–20 Operations Building, 6401 Security Boulevard, Baltimore, MD 21235–6401.

Comments can be received for between 30 and 60 days after publication of this notice. Comments will be most useful if received by SSA within 30 days of publication.

List of Subjects in 20 CFR Part 404

Administrative practice and procedure, Blind, Disability benefits, Old-Age, Survivors, and Disability Insurance, Reporting and recordkeeping requirements, Social Security.

Dated: December 3, 2001.

Jo Anne B. Barnhart,

Commissioner of Social Security.

For the reasons set out in the preamble, we propose to amend subpart P of part 404 of 20 CFR chapter III as set forth below:

PART 404—FEDERAL OLD-AGE, SURVIVORS AND DISABILITY INSURANCE (1950–)

1. The authority citation for subpart P of part 404 continues to read as follows:

Authority: Secs. 202, 205(a), (b), and (d)–(h), 216(i), 221(a) and (i), 222(c), 223, 225, and 702(a)(5) of the Social Security Act (42 U.S.C. 402, 405(a), (b), and (d)–(h), 416(i), 421(a) and (i), 422(c), 423, 425, and 902(a)(5)); sec. 211(b), Pub. L. 104–193, 110 Stat. 2105, 2189.

Appendix 1 to Subpart P of Part 404—Listing of Impairments (Amended)

2. Item 9 of the introductory text before part A is amended by revising the heading title, revising the expiration date for section 8.00, and adding section 108.00 and its expiration date as follows:

* * * * *

9. Skin Disorders (8.00 and 108.00): (date 8 years from the date of publication of final rules in the **Federal Register**).

* * * * *

3. The list of sections for part A of appendix 1 is amended by revising 8.00 to read "8.00 Skin Disorders".

4. The list of sections for part B of appendix 1 is amended by revising of 108.00 to read "108.00 Skin Disorders".

5. Section 8.00 in part A of appendix 1 is revised and section 108.00 in part B of appendix 1 is added to read as follows:

APPENDIX 1 TO SUBPART P OF PART 404—LISTING OF IMPAIRMENTS

* * * * *

Part A

* * * * *

8.00 Skin Disorders

A. *What skin impairments do we evaluate with these listings?* We use these listings to evaluate skin impairments that may result from hereditary, congenital, or acquired pathological processes. Examples of impairments covered by these listings include: ichthyosis, bullous diseases, chronic infections of the skin or mucous membranes, dermatitis, hidradenitis suppurativa, and photosensitivity disorders.

B. *What documentation do we need?* Your case record should include information about onset, duration, frequency of flare-ups, and prognosis; location, size, and appearance of lesions; and, when applicable: history of exposure to toxins, allergens, or irritants; familial incidence; seasonal variation; and stress factors. To confirm the diagnosis, we often need laboratory findings (e.g., biopsy or serological testing) or evidence from other medically acceptable methods consistent with the prevailing state of medical knowledge and clinical practice.

C. *How do we determine if your skin impairment(s) prevents you from doing any gainful activity?* We base our assessment of severity on whether your skin lesions are extensive, how your symptoms (including pain) limit you, the extent of your treatment, and how your treatment affects you.

(1) *Extensive skin lesions.* Extensive skin lesions are those that involve sufficient surface area over multiple body sites or involve critical body areas, and result in very serious limitations. Examples of extensive lesions that result in very serious limitations include:

(a) Skin lesions that interfere with motion of joints that very seriously limit your use of more than one extremity, i.e. two upper extremities, two lower extremities, or one upper and one lower extremity; or

(b) Skin lesions on the palms of the hands or the axillary areas that very seriously limit your ability to do fine and gross motor movements; or

(c) Skin lesions on the soles of the feet, the perineum, or the inguinal areas that very seriously limit your ability to ambulate.

(2) *Symptoms (including pain).* Symptoms (including pain) may be important factors contributing to the severity of your skin impairment(s). We assess the impact of symptoms as explained in §§ 404.1525(f), 404.1529, 416.925(f), and 416.929.

(3) *Treatment.* Skin impairments frequently respond to treatment, however response to treatment can vary widely, with some impairments becoming resistant to treatment.

(a) We assess the effects of treatment by determining if there is improvement in the symptoms, signs, and laboratory findings of the disorder, and if there are side effects that may result in functional limitations. We assess the effects of medication, therapy, surgery, or any other form of treatment you receive when determining the severity and the duration of the impairment(s). An assessment of these issues may require:

(i) a description of the treatment prescribed (e.g., the type, dosage, method and frequency of administration of medication or therapy);

(ii) your response to the treatment;

(iii) any adverse effects of such treatment; or

(iv) the expected duration of the treatment.

(b) Because treatment itself or the effects of treatment may be temporary, in most cases sufficient time must elapse to allow us to evaluate the impact and expected duration of treatment and side effects. You must follow prescribed treatment for at least 3 months before your impairment can be determined to meet a skin listing. We consider your specific response to treatment when we evaluate overall severity of your impairment.

D. *How do we assess impairments that involve more than one body system?* These listings are only examples of common skin disorders that we consider severe enough to prevent you from doing any gainful activity. If your impairment(s) does not meet the criteria of any of these listings, we must also consider whether you have an impairment that satisfies the criteria of a listing in another body system. Also, when your impairment involves more than one body system, we first evaluate the predominant feature under the appropriate body system. For example:

(1) Tuberous sclerosis has cutaneous manifestations, but the more dominant feature involves the brain, often resulting in seizures (11.02 and 11.03) and organic mental disorders (12.02);

(2) Malignant tumors of the skin (e.g., malignant melanoma) are neoplastic diseases and we first evaluate them under 13.00ff;

(3) Connective tissue disorders or immune system disorders (e.g., systemic lupus erythematosis or HIV infection) involve more than one body system. We first evaluate these disorders under 14.00ff;

(4) Scleroderma, although at times limited to skin only, usually involves other body systems as a part of generalized systemic sclerosis which we evaluate under listing 14.04. However, when it involves skin contractures restricting joint motion we also consider the appropriate criteria in 1.00ff;

(5) Facial disfigurement resulting from skin lesions may also be associated with physical functional loss such as impairment of sight, hearing, speech, and mastication, which we evaluate under the appropriate criteria in 2.00ff and 5.00ff. Facial disfigurement or any kind of physical deformity due to skin lesions may also result in psychological impairment(s) with socialization, mood, or other related limitations. We evaluate those impairments under the appropriate criteria in 12.00ff.

E. *How do we evaluate burns?* Electrical, chemical, or thermal traumatic burns frequently affect more than one body system (e.g., musculoskeletal, special senses, respiratory, cardiovascular, skin, renal, neurological, or mental). Consequently, we evaluate impairments that can result from severe burns under the criteria of the affected body systems. For example, we evaluate soft tissue injuries resulting from burns under the musculoskeletal system criteria in 1.00ff and

we evaluate renal failure resulting from burns under the genito-urinary system criteria in 6.00ff.

F. *How do we determine if an impairment will continue at a disabling level of severity in order to meet the duration requirement?* If you have extensive skin lesions, and they persist for at least 3 months despite continuing treatment as prescribed, these listings allow us to infer that they will continue at that level of severity for at least 12 months. By persist, we mean the longitudinal clinical record shows that, with few exceptions, the lesions have been at the level of severity specified in the listing and that this pattern could be expected to continue. Where adverse effects of treatment contribute to the impairment severity, the duration or expected duration of the treatment must be considered in assessing the duration of the impairment(s).

G. *How do we assess skin impairments if there is no prescribed treatment, or extensive lesions have not persisted for 3 months?*

(1) For your impairment to meet a skin listing, you must have extensive lesions that persist for at least 3 months despite continuing treatment as prescribed, and you must follow that treatment, unless you have an acceptable reason for failing to follow prescribed treatment (see §§ 404.1530 and 416.930).

(2) If you have not received ongoing treatment nor have an ongoing relationship with the medical community despite the existence of a severe impairment(s), or if your skin lesions have not persisted for at least 3 months, but you are undergoing continuing treatment as prescribed, you still may have an impairment(s) that medically equals the listings. An individual who has an impairment(s) that does not meet or medically equal the listings may or may not have the residual functional capacity to engage in substantial gainful activity. For such an individual, we proceed to the fourth, and if necessary, the fifth steps of the sequential evaluation process in §§ 404.1520 and 416.920. When we decide whether an adult continues to be disabled, we use the rules in §§ 404.1594 and 416.994, as appropriate. We will base our evaluation on the current objective medical evidence and other available evidence. We will take into consideration your medical history, symptoms, and acceptable medical source opinions.

8.01 Category of Impairments, Skin

8.02 *Ichthyosis*, with extensive lesions that persist for at least 3 months despite continuing treatment as prescribed.

8.03 *Bullous disease (e.g., pemphigus, erythema multiforme bullosum, epidermolysis bullosa, bullous pemphigoid, dermatitis herpetiformis)*, with extensive lesions that persist for at least 3 months despite continuing treatment as prescribed.

8.04 *Chronic infections of the skin or mucous membranes*, with extensive fungating, or extensive ulcerating lesions that persist for at least 3 months despite continuing treatment as prescribed.

8.05 *Dermatitis (e.g., psoriasis, dyshidrosis, atopic dermatitis, exfoliative dermatitis, allergic contact dermatitis)*, with extensive lesions that persist for at least 3 months despite continuing treatment as prescribed.

8.06 *Hidradenitis suppurativa*, with extensive lesions involving the axillae, inguinal areas, or perineum that persist for at least 3 months despite continuing treatment as prescribed.

8.07 *Photosensitivity disorders (e.g., xeroderma pigmentosum)*, with extensive lesions that persist for at least 3 months despite continuing treatment as prescribed.

* * * * *

Part B

* * * * *

108.00 Skin Disorders

A. *What skin impairments do we evaluate with these listings?* We use these listings to evaluate skin impairments that may result from hereditary, congenital, or acquired pathological processes. Examples of impairments covered by these listings include: ichthyosis, bullous diseases, chronic infections of the skin or mucous membranes, dermatitis, hidradenitis suppurativa, and photosensitivity disorders.

B. *What documentation do we need?* Your case record should include information about onset, duration, frequency of flare-ups, and prognosis; location, size, and appearance of lesions; and, when applicable: history of exposure to toxins, allergens, or irritants; familial incidence; seasonal variation; and stress factors. To confirm the diagnosis, we often need laboratory findings (*e.g.*, biopsy or serological testing) or evidence from other medically acceptable methods consistent with the prevailing state of medical knowledge and clinical practice.

C. *How do we determine if your skin impairment(s) results in marked and severe limitations?* We base our assessment of severity on whether your skin lesions are extensive, how your symptoms (including pain) limit you, the extent of your treatment, and how your treatment affects you.

(1) *Extensive skin lesions.* Extensive skin lesions are those that involve sufficient surface area over multiple body sites or involve critical body areas, and result in very serious limitations. Examples of extensive lesions that result in very serious limitations include:

(a) Skin lesions that interfere with motion of joints that very seriously limit your use of more than one extremity, i.e. two upper extremities, two lower extremities, or one upper and one lower extremity; or

(b) Skin lesions on the palms of the hands or the axillary areas that very seriously limit your ability to do fine and gross motor movements; or

(c) Skin lesions on the soles of the feet, the perineum, or the inguinal areas that very seriously limit your ability to ambulate.

(2) *Symptoms (including pain).* Symptoms (including pain) may be important factors contributing to the severity of your skin impairment(s). We assess the impact of symptoms as explained in §§ 404.1525(f), 404.1529, 416.925(f) and 416.929.

(3) *Treatment.* Skin impairments frequently respond to treatment, however response to treatment can vary widely, with some impairments becoming resistant to treatment.

(a) We assess the effects of treatment by determining if there is improvement in the symptoms, signs, and laboratory findings of the disorder, and if there are side effects that may result in functional limitations. We assess the effects of medication, therapy, surgery, or any other form of treatment you receive when determining the severity and the duration of the impairment(s). An assessment of these issues may require:

(i) a description of the treatment prescribed (e.g., the type, dosage, method and frequency of administration of medication or therapy);

(ii) your response to the treatment;

(iii) any adverse effects of such treatment; or

(iv) the expected duration of the treatment.

(b) Because treatment itself or the effects of treatment may be temporary, in most cases sufficient time must elapse to allow us to evaluate the impact and expected duration of treatment and side effects. You must follow prescribed treatment for at least 3 months before your impairment can be determined to meet a skin listing. We consider your specific response to treatment when we evaluate overall severity of your impairment.

D. *How do we assess impairments that involve more than one body system?* These listings are only examples of common skin disorders that we consider severe enough to result in marked and severe functional limitations. If your impairment(s) does not meet the criteria of any of these listings, we must also consider whether you have an impairment that satisfies the criteria of a listing in another body system. Also, when your impairment involves more than one body system, we first evaluate the predominant feature under the appropriate body system. For example:

(1) Tuberous sclerosis has cutaneous manifestations, but the more dominant feature involves the brain, often resulting in seizures (111.02 and 111.03) and organic mental disorders (112.02);

(2) Malignant tumors of the skin (e.g., malignant melanoma) are neoplastic diseases and we first evaluate them under 113.00ff;

(3) Connective tissue disorders or immune system disorders (e.g., systemic lupus erythematosis or HIV infection) involve more than one body system. We first evaluate these disorders under 114.00ff;

(4) Scleroderma, although at times limited to skin only, usually involves other body systems as a part of generalized systemic sclerosis which we evaluate under listing 114.04. However, when it involves skin contractures restricting joint motion we also consider the appropriate criteria in 101.00ff;

(5) Facial disfigurement resulting from skin lesions may also be associated with physical functional loss such as impairment of sight, hearing, speech, and mastication, which we evaluate under the appropriate criteria in 102.00ff and 105.00ff. Facial disfigurement or any kind of physical deformity due to skin lesions may also result in psychological impairment(s) with socialization, mood, or other related limitations. We evaluate those impairments under the appropriate criteria in 112.00ff;

(6) We evaluate erythropoietic porphyrias under 107.00ff;

(7) We evaluate hemangiomas associated with thrombocytopenia and hemorrhage (e.g., Kasabach-Merritt Syndrome) involving

coagulation defects, under 107.00ff. But, when hemangiomas impinge on vital structures or interfere with function or feeding, we evaluate them under the appropriate body system.

E. *How do we evaluate burns?* Electrical, chemical, or thermal traumatic burns frequently affect more than one body system (e.g., musculoskeletal, special senses, respiratory, cardiovascular, skin, renal, neurological, or mental). Consequently, we evaluate impairments that can result from severe burns under the criteria of the affected body systems. For example, we evaluate soft tissue injuries resulting from burns under the musculoskeletal system criteria in 101.00ff and we evaluate renal failure resulting from burns under the genito-urinary system criteria in 106.00ff.

F. *How do we determine if an impairment will continue at a disabling level of severity in order to meet the duration requirement?* If you have extensive skin lesions, and they persist for at least 3 months despite continuing treatment as prescribed, these listings allow us to infer that they will continue at that level of severity for at least 12 months. By persist, we mean the longitudinal clinical record shows that, with few exceptions, the lesions have been at the level of severity specified in the listing and that this pattern could be expected to continue. Where adverse effects of treatment contribute to the impairment severity, the duration or expected duration of the treatment must be considered in assessing the duration of the impairment(s).

G. *How do we assess skin impairments if there is no prescribed treatment, or extensive lesions have not persisted for 3 months?*

(1) For your impairment to meet a skin listing, you must have extensive lesions that persist for at least 3 months despite continuing treatment as prescribed, and you must follow that treatment, unless you have an acceptable reason for failing to follow prescribed treatment (*see* §§ 404.1530 and 416.930).

(2) If you have not received ongoing treatment nor have an ongoing relationship with the medical community despite the existence of a severe impairment(s), or if your skin lesions have not persisted for at least 3 months, but you are undergoing continuing treatment as prescribed, you still may have an impairment(s) that medically equals the listings or, in the case of a childhood claim for SSI payments under Title XVI, functionally equals the listings. (See §§ 404.1526, 416.926, and 416.926a.) When we decide whether a child receiving SSI payments continues to be disabled, we use the rules in § 416.994a. We will base our evaluation on the current objective medical evidence and other available evidence. We will take into consideration your medical history, symptoms, and acceptable medical source opinions.

108.01 Category of Impairments, Skin

108.02 *Ichthyosis*, with extensive lesions that persist for at least 3 months despite continuing treatment as prescribed.

108.03 *Bullous disease (e.g., pemphigus, erythema multiforme bullosum, epidermolysis bullosa, bullous pemphigoid, dermatitis herpetiformis)*, with extensive lesions that persist for at least 3 months despite continuing treatment as prescribed.

108.04 *Chronic infections of the skin or mucous membranes*, with extensive fungating or extensive ulcerating lesions that persist for at least 3 months despite continuing treatment as prescribed.

108.05 *Dermatitis (e.g., psoriasis, dyshidrosis, atopic dermatitis, exfoliative dermatitis, allergic contact dermatitis)*, with extensive lesions that persist for at least 3 months despite continuing treatment as prescribed.

108.06 *Hidradenitis suppurativa*, with extensive lesions involving the axillae, inguinal areas, or perineum that persist for at least 3 months despite continuing treatment as prescribed.

108.07 *Photosensitivity disorders (e.g., xeroderma pigmentosum)*, with extensive lesions that persist for at least 3 months despite continuing treatment as prescribed.

Coast Guard

33 CFR Part 1

[USCG–2001–9175]

RIN 2115–AG15

Revised Options for Responding to Notices of Violations

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes changing the procedure for Notices of Violation when the recipient fails to either accept or decline it within 45 days. Instead of automatically converting the Notice of Violation to a marine violation case with its lengthier processing and potentially higher penalties, we would treat the Notice of Violation as a default and proceed with the civil penalty. Our proposal would not change the party's existing option to choose marine violation processing at any time during the 45-day response period.

DATES: Comments and related material must reach the Docket Management Facility on or before February 8, 2002.

ADDRESSES: To make sure that your comments and related material are not entered more than once in the docket, please submit them by only one of the following means:

(1) By mail to the Docket Management Facility (USCG–2001–9175), U.S. Department of Transportation, room PL–401, 400 Seventh Street SW., Washington, DC 20590–0001.

(2) By delivery to room PL–401 on the Plaza level of the Nassif Building, 400 Seventh Street SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202–366–9329.

(3) By fax to the Docket Management Facility at 202–493–2251.

(4) Electronically through the web site for the Docket Management System at *http://dms.dot.gov*.

The Docket Management Facility maintains the public docket for this rulemaking. Comments and material received from the public, as well as documents mentioned in this preamble as being available in the docket, will become part of this docket and will be available for inspection or copying at room PL–401 on the Plaza level of the Nassif Building, 400 Seventh Street SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. You may also find this docket on the Internet at *http://dms.dot.gov*.

FOR FURTHER INFORMATION CONTACT: If you have questions on this proposed rule, call LCDR Scott Budka, Project Manager, Office of Investigations & Analysis (G–MOA), Coast Guard, telephone 202–267–2026. If you have questions on viewing or submitting material to the docket, call Dorothy Beard, Chief, Dockets, Department of Transportation, telephone 202–366–5149.

SUPPLEMENTARY INFORMATION:

Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related material. If you do so, please include your name and address, identify the docket number for this rulemaking (USCG–2001–9175), indicate the specific section of this document to which each comment applies, and give the reason for each comment. You may submit your comments and material by mail, hand delivery, fax, or electronic means to the Docket Management Facility at the address under **ADDRESSES**; but please submit your comments and material by only one means. If you submit them by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit them by mail and would like to know that they reached the Facility, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this proposed rule in view of them.

Public Meeting

We do not plan to hold a public meeting. But you may submit a request for one to the Docket Management Facility at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that a public meeting would aid this rulemaking, we will hold one at a time and place announced by a later notice in the **Federal Register**.

Background

Notices of Violation provide an optional simplified civil penalty process for first and second minor violations of a law, regulation, or order enforced by the Coast Guard. A Notice of Violation (NOV) is like a ticket issued for a minor motor vehicle offense.

Until we started issuing NOVs, the marine violation (MV) procedures of 33 CFR 1.07–10 applied to all Coast Guard civil penalty cases. The lengthy processing time for MV cases resulted in some parties being charged with second or third violations before their first violation had been fully processed. We established the NOV procedures in 33 CFR 1.07–11 in 1994 (59 FR 66477, December 27, 1994).

NOVs offer both the party and the Coast Guard the benefits of speedier processing and a scheduled penalty that is fixed lower than the maximum penalty amount for the offense. The NOV form (CG–5582) describes the processing options available to the party. NOV recipients choose between NOV and MV processing. They have 45 days in which to notify the Coast Guard of their choice.

At present, if you receive an NOV, you can accept it, decline it, or take no action on it. If you accept it, you pay the scheduled penalty set out on the NOV, which is between $50 and $3,000. In this case, Coast Guard records show your case as proved. Declining an NOV is like choosing to "go to court" over a traffic ticket. Your NOV is converted to a MV case and a Coast Guard hearing officer processes the case and sets any penalty—up to the maximum $27,500 per offense. If you take no action during the 45-day response period, the NOV is automatically converted to an MV case, just as if you had declined the NOV. Once you decline or fail to take action on an NOV and it is converted to an MV case, the scheduled penalty amount on the NOV is no longer the maximum penalty for your offense; it is the maximum for an MV case, as previously noted.

Recently, we completed a review of the NOV program. The Coast Guard issues about 2300 NOVs each year. About 95% of the parties accept, 4% decline, and 1% fail to respond to the NOV issuance within the 45-day response period. To improve the program's efficiency, we are proposing a change in processing NOVs for which we receive no response. By streamlining the process for each "fail to respond" NOV that we now automatically convert to an MV case, we would expect to save MV processing time. Further, the Coast Guard would be able to quickly dispense with these cases and alleviate the situation noted earlier, where the first case has not finished processing before a second or third NOV is issued to the same party.

Discussion of Proposal

We propose changing the procedure that results when an NOV recipient fails to either accept or decline it within 45 days. Conversion of an NOV to an MV case costs the Coast Guard about 8 additional hours of personnel time in processing and reviewing the case and also subjects the party to a lengthier adjudication time and potentially higher penalty assessments. Instead of automatically converting the NOV to an MV case with its lengthier processing and potentially higher penalties, we would treat the NOV as a default and proceed with the civil penalty on the NOV. Our proposal would not change the party's existing option to choose marine violation processing at any time during the 45-day response period. However, the party would have to specifically request MV processing by marking the NOV as declined and returning it to the Coast Guard.

Regulatory Evaluation

This proposed rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not "significant" under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040, February 26, 1979).

We expect the economic impact of this proposed rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary.

This proposed rule would change the Notice of Violation (NOV) regulations in 33 CFR 1.07–11. Today, if you fail to respond to your NOV by accepting or declining it within 45 days, we convert the NOV to a marine violation (MV) case, as if you declined it. MV cases provide fuller processing and a higher potential penalty than NOVs ($27,500 maximum MV penalty per charge while scheduled NOV penalties of $50 to $3000 per charge are fixed by COMDTINST M5582). We propose changing the procedure that results when you fail to respond. After 45 days we would treat the NOV as a default and assess the scheduled penalty.

The proposed change would affect only those parties who receive an NOV and fail to respond to it within the allotted 45 days, about 1% of issued NOVs. Currently, of about 2300 NOVs issued each year, approximately 95% of the recipients accept, 4% decline, and 1% fail to respond. We spend an average of 8 hours per MV case. For each "fail to respond" NOV we now automatically convert to an MV case, we would save some MV processing time by showing the NOV charge as proved. If, however, all of these parties declined their NOVs, the Coast Guard expenditure of resources would remain the same. The parties who decline the NOV would shorten their MV processing time by up to 45 days, depending on how quickly they respond to the NOV.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The proposed rule would not change the choice (accept or decline the NOV option) currently required by 33 CFR section 1.07–11. The only change proposed is in the handling we provide, by default, to those parties who fail to make their choice within the 45 days allotted. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment to the Docket Management Facility at the address under **ADDRESSES**. In your comment, explain why you think it qualifies and how and to what degree this rule would economically affect it.

Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this proposed rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This proposed rule would not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Environment

We have considered the environmental impact of this proposed rule and concluded that, under figure 2–1, paragraph (34)(a) of Commandant Instruction M16475.lD, this rule is categorically excluded from further environmental documentation. The changes proposed here are procedural and serve to update and streamline the Coast Guard's processing of NOVs. A "Categorical Exclusion Determination" is available in the docket where indicated under **ADDRESSES.**

List of Subjects in 33 CFR Part 1

Administrative practice and procedure, Authority delegations (Government agencies), Freedom of information, Penalties.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 1 as follows:

PART 1—GENERAL PROVISIONS

Subpart 1.07—Enforcement; Civil and Criminal Penalty Proceedings

1. The authority citation for subpart 1.07 continues to read as follows:

Authority: 14 U.S.C. 633; Sec. 6079(d), Pub. L. 100–690, 102 Stat. 4181; 49 CFR 1.46.

2. In § 1.07–11, a new paragraph (b)(7) is added, paragraph (d) is revised, and paragraphs (e) and (f) are added, as follows:

§ 1.07–11 Notice of Violation.

* * * * *

(b) * * *

(7) A statement that failure to either pay the proposed penalty on the Notice of Violation or decline the Notice of Violation and request a hearing within 45 days will result in a finding of default and the Coast Guard will proceed with the civil penalty in the amount recommended on the Notice of Violation without processing the violation under the procedures described in 33 CFR 1.07–10(b).

* * * * *

(d) If a party declines a Notice of Violation within 45 days, the case file will be sent to the District Commander for processing under the procedures described in 33 CFR 1.07–10(b).

(e) If a party pays the proposed penalty on the Notice of Violation within 45 days, a finding of proved will be entered into the case file.

(f) If a party fails within 45 days to either pay the proposed penalty on the Notice of Violation or decline the Notice of Violation, the Coast Guard will enter a finding of default in the case file and proceed with the civil penalty in the amount recommended on the Notice of Violation without processing the violation under the procedures described in 33 CFR 1.07–10(b).

Dated: November 5, 2001.

Paul J. Pluta,

Rear Admiral, U.S. Coast Guard, Assistant Commandant for Marine Safety and Environmental Protection.

Coast Guard

33 CFR Part 147

[CGD08–01–025]

RIN 2115–AG22

Safety Zones for Outer Continental Shelf Facilities in the Gulf of Mexico

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to establish safety zones around five petroleum and gas production facilities in the Outer Continental Shelf in the Gulf of Mexico. The four platforms and one moored spar buoy need to be protected from vessels operating outside the normal shipping channels and fairways. Placing safety zones around these facilities will significantly reduce the threat of allisions, oil spills and releases of natural gas. The proposed regulation prevents all vessels from entering or remaining in specified areas around the platforms except for the following: An attending vessel; a vessel under 100 feet in length overall not engaged in towing; or a vessel

authorized by the Eighth Coast Guard District Commander.

DATES: Comments and related material must reach the Coast Guard on or before February 8, 2002.

ADDRESSES: You may mail comments and related material to Commander, Eighth Coast Guard District (m), Hale Boggs Federal Bldg., 501 Magazine Street, New Orleans LA 70130, or comments and related material may be delivered to Room 1341 at the same address between 8 a.m. and 3:30 p.m., Monday through Friday, except Federal holidays. The telephone number is (504) 589–6271. Commander, Eighth Coast Guard District (m) maintains the public docket for this rulemaking. Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, will become part of this docket and will be available for inspection or copying at Commander, Eighth Coast Guard District (m) between 8 a.m. and 3:30 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: LT Karrie Trebbe, Project Manager for Eighth Coast Guard District Commander, Hale Boggs Federal Bldg., 501 Magazine Street, New Orleans LA 70130, telephone (504) 589–6271.

SUPPLEMENTARY INFORMATION:

Requests for Comments

We encourage you to participate in this rulemaking by submitting comments and related material. If you do so, please include your name and address, identify the docket number for this rulemaking [CGD08–01–025], indicate the specific section of this document to which each comment applies, and give the reason for each comment. Please submit all comments and related material in an unbound format, no larger than 8½ by 11 inches, suitable for copying. If you would like to know they reached us, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this proposed rule in view of them.

Public Meeting

We do not plan to hold a public meeting. But you may submit a request for a meeting by writing to Commander, Eighth Coast Guard District (m) at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that one would aid this rulemaking, we will hold one at a time and place announced by a later notice in the **Federal Register**.

Background and Purpose

The Coast Guard proposes to establish safety zones around the following petroleum producing facilities in the Gulf of Mexico: ExxonMobil Hoover Floating OCS Facility, a moored spar buoy, Alaminos Canyon Block 25A (AC25A), located at position 26°56′33″ N, 94°41′19.55″ W; Sir Douglas Morpeth Tension Leg Platform (Morpeth TLP), Ewing Bank Block 921A (EB 921A), located at position 28°02′05.28″ N, 90°01′22.12″ W; and Allegheny Tension Leg Platform (Allegheny TLP), Green Canyon Block 254A (GC 254A), located at position 27°41′29.65″ N, 90°16′31.93″ W; Brutus Tension Leg Platform (Brutus TLP), Green Canyon Block 158 (GC 158), located at position 27°47′42.86″ N, 90°38′51.15″ W; Enchilada Platform, Garden Banks Block 128A (GB 128A), located at position 27°52′31.31″ N, 91°59′11.09″ W.

These five proposed safety zones are in the deepwater area of the Gulf of Mexico. For the purposes of this regulation it is considered to be waters of 304.8 meters (1,000 feet) or greater depth extending to the limits of the Exclusive Economic Zone (EEZ) contiguous to the territorial sea of the United States and extending to a distance up to 200 nautical miles from the baseline from which the breadth of the sea is measured. Navigation in the area of the proposed safety zones consists of large commercial shipping vessels, fishing vessels, cruise ships, tugs with tows and the occasional recreational vessel. The deepwater area also includes an extensive system of fairways. The fairways include the Gulf of Mexico East-West Fairway, the entrance/exit route of the Mississippi River, and the Houston-Galveston Safety Fairway. Significant amounts of vessel traffic occur in or near the various fairways in the deepwater area.

ExxonMobil Production Company, British Borneo USA, Inc and Shell Exploration and Production have requested that the Coast Guard establish safety zones in the Gulf of Mexico around the following: ExxonMobil Production Company, the ExxonMobil Hoover Floating OCS Facility, a moored spar buoy; British Borneo platforms, the Morpeth TLP and the Allegheny TLP; and Shell platforms, the Brutus TLP and the Enchilada Platform.

The request for the safety zones was made due to the high level of shipping activity around the facilities and the safety concerns for both the personnel on board the facilities and the environment. ExxonMobil Production Company, British Borneo USA, Inc and Shell Exploration and Production, indicated that the location, production level, and personnel levels on board the facilities make it highly likely that any allision with the facilities would result in a catastrophic event. The Enchilada Platform is located near the edge of a shipping safety fairway. The ExxonMobil Hoover Floating OCS Facility, Brutus TLP, Morpeth TLP and Allegheny TLP are located in open waters where no fixed structures previously existed. All are high production oil and gas drilling platforms producing from 20,000 to 108,000 barrels of oil per day, and are manned with crews ranging from approximately 18 to 160 people.

The Coast Guard has reviewed ExxonMobil Production Company's, British Borneo USA, Inc's and Shell Exploration and Production's concerns and agrees that the risk of allision to the facilities and the potential for loss of life and damage to the environment resulting from such an accident warrant the establishment of these safety zones. The proposed regulation would significantly reduce this threat of allisions, oil spills and natural gas and increase the safety of life, property, and the environment in the Gulf of Mexico. This regulation is issued pursuant to 14 U.S.C. 85 as set out in the authority citation for all of 33 CFR part 147.

Discussion of Proposed Rule

In addition to the general risks discussed above, the following specific risks apply to the individual facilities. The specific risk factors, which necessitate a safety zone for the *ExxonMobil Hoover Floating OCS Facility*, a moored spar buoy, are as follows: (1) There is no designated fairway at this distance offshore and mariners use the facility as a navigational aid; (2) the facility has a high production capacity of 100,000 barrels of petroleum oil per day and 325 million cubic feet of gas per day; and (3) the facility is manned with a crew of 160.

The specific risk factors, which necessitate a safety zone for the *Morpeth TLP*, are as follows: (1) Proximity to the Gulf of Mexico East-West fairway; (2) the facility has a high production capacity of 15,000 barrels of petroleum oil per day and 12,000 cubic feet of gas per day; and (3) the facility is manned with a crew of 18.

The specific risk factors, which necessitate a safety zone for the *Allegheny TLP*, are as follows: (1) There is no designated fairway at this distance offshore and mariners use the facility as a navigational aid; (2) the facility has a high production capacity of 23,500 barrels of petroleum oil per day and 32

million cubic feet of gas per day; and (3) the facility is manned with a crew of 18.

The specific risk factors, which necessitate a safety zone for the *Brutus TLP*, are as follows: (1) Proximity to the Gulf of Mexico East-West fairway; (2) the facility has a high production capacity of 100,000 barrels of petroleum oil per day and 150 million cubic feet of gas per day; and (3) the facility is manned with a crew of 150.

The specific risk factors, which necessitate a safety zone for the *Enchilada Platform*, are as follows: (1) Proximity to the Gulf of Mexico East-West fairway; (2) the facility has a high production capacity of 108,000 barrels of petroleum oil per day and 384 million cubic feet of gas per day; and (3) the facility is manned with a crew of 35.

Regulatory Evaluation

This proposed rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not significant under the regulatory policies and procedures of the Department of Transportation (44 FR 11040; February 26, 1979).

We expect the economic impact of this proposed rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary.

The impacts on routine navigation are expected to be minimal because the safety zone will not encompass any nearby safety fairways.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612.), we considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. Since the offshore facilities are located far offshore, few privately owned fishing vessels and recreational boats/yachts may be operating in the area and alternate routes are available for these vessels. Deviation of their intended course may cause a minimal loss of time (estimated loss of four to ten minutes) to their destination depending on how fast the vessel is traveling. The Coast Guard expects the impact of this regulation on small entities to be minimal.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Assistance for Small Entities

Small businesses may send comments on the actions of Federal Employees who enforce, or otherwise determine compliance with Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

We have analyzed this proposed rule under Executive Order 13132 and have determined that this rule does not have implications for federalism under that order.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) governs the issuance of Federal regulations that require unfunded mandates. An unfunded mandate is a regulation that requires a State, local, or tribal government or the private sector to incur direct costs without the Federal Government's having first provided the funds to pay those costs. This proposed rule would not impose an unfunded mandate.

Taking of Private Property

This proposed rule would not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not concern an environmental risk to health or risk to safety that may disproportionately affect children.

Environment

We considered the environmental impact of this proposed rule and concluded that, under figure 2–1, paragraph (34)(g), of Commandant Instruction M16475.lD, this proposed rule is categorically excluded from further environmental documentation. A "Categorical Exclusion Determination" is available in the docket for inspection or copying where indicated under **ADDRESSES**.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

List of Subjects in 33 CFR Part 147

Continental shelf, Marine safety, Navigation (water).

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 147 as follows:

PART 147—SAFETY ZONES

1. The authority citation for part 147 continues to read as follows:

Authority: 14 U.S.C. 85; 43 U.S.C. 1333; 49 CFR 1.46.

2. Add §§ 147.815, 147.817, 147.819, 147.821 and 147.23 to read as follows:

§ 147.815 ExxonMobil Hoover Floating OCS Facility safety zone.

(a) *Description.* The ExxonMobil Hoover Floating OCS Facility, a moored spar buoy, Alaminos Canyon Block 25A (AC25A), is located at position 26°56′33″ N, 94°41′19.55″ W. The area within 500 meters (1640.4 feet) from each point on the structure's outer edge is a safety zone.

(b) *Regulation.* No vessel may enter or remain in this safety zone except the following: (1) An attending vessel,

(2) A vessel under 100 feet in length overall not engaged in towing, or

(3) A vessel authorized by the Commander, Eighth Coast Guard District.

§ 147.817 Sir Douglas Morpeth Tension Leg Platform safety zone.

(a) *Description.* The Sir Douglas Morpeth Tension Leg Platform (Morpeth TLP), Ewing Bank Block 921A (EB 921A), is located at position 28°02′5.28″ N, 90°01′22.12″ W. The area within 500 meters (1640.4 feet) from each point on the structure's outer edge is a safety zone.

(b) *Regulation.* No vessel may enter or remain in this safety zone except the following: (1) An attending vessel,

(2) A vessel under 100 feet in length overall not engaged in towing, or

(3) A vessel authorized by the Commander, Eighth Coast Guard District.

§ 147.819 Allegheny Tension Leg Platform safety zone.

(a) *Description.* The Allegheny Tension Leg Platform (Allegheny TLP), Green Canyon Block 254A (GC 254A), is located at position 27°41′29.65″ N, 90°16′31.93″ W. The area within 500 meters (1640.4 feet) from each point on the structure's outer edge is a safety zone.

(b) *Regulation.* No vessel may enter or remain in this safety zone except the following: (1) An attending vessel,

(2) A vessel under 100 feet in length overall not engaged in towing, or

(3) A vessel authorized by the Commander, Eighth Coast Guard District.

§ 147.821 Brutus Tension Leg Platform safety zone.

(a) *Description.* The Brutus Tension Leg Platform (Brutus TLP), Green Canyon Block 158 (GC 158), is located at position 27°47′42.86″ N, 90°38′51.15″ W. The area within 500 meters (1640.4 feet) from each point on the structure's outer edge is a safety zone.

(b) *Regulation.* No vessel may enter or remain in this safety zone except the following: (1) An attending vessel,

(2) A vessel under 100 feet in length overall not engaged in towing, or

(3) A vessel authorized by the Commander, Eighth Coast Guard District.

§ 147.823 Enchilada Platform safety zone.

(a) *Description.* The Enchilada Platform, Garden Banks Block 128A (GB 128A), is located at position 27°52′31.31″ N, 91°59′11.09″ W. The area within 500 meters (1640.4 feet) from each point on the structure's outer edge, not to extend into the adjacent East—West Gulf of Mexico Fairway, is a safety zone.

(b) *Regulation.* No vessel may enter or remain in this safety zone except the following: (1) An attending vessel,

(2) A vessel under 100 feet in length overall not engaged in towing, or

(3) A vessel authorized by the Commander, Eighth Coast Guard District.

Dated: August 27, 2001.

R.J. Casto,

Rear Admiral, U.S. Coast Guard, Commander, Eighth Coast Guard District.

33 CFR Part 175

[USCG–2001–10163]

RIN 2115–AG18

Federal Requirements For Propeller Injury Avoidance Measures

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to require owners of non-planing recreational houseboats with propeller-driven propulsion located aft of the transom to install one of two propulsion unit measures or employ three combined measures. This change responds to recommendations made by the National Boating Safety Advisory Council (NBSAC). The proposed rule would reduce the number of boaters who are seriously or fatally injured when struck by a non-planing recreational houseboat with propeller-driven propulsion.

DATES: Comments and related material must reach the Docket Management Facility on or before March 11, 2002.

ADDRESSES: To make sure that your comments and related material are not entered more than once in the docket, please submit them by only one of the following means:

(1) By mail to the Docket Management Facility (USCG–2001–10163), U.S. Department of Transportation, room PL–401, 400 Seventh Street SW., Washington, DC 20590–0001.

(2) By delivery to room PL–401 on the Plaza level of the Nassif Building, 400 Seventh Street SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202–366–9329.

(3) By fax to the Docket Management Facility at 202–493–2251.

(4) Electronically through the Internet Site for the Docket Management System at *http://dms.dot.gov*. The Docket Management Facility maintains the public docket for this rulemaking. Comments and material received from the public, as well as documents mentioned in this preamble as being available in the docket, will become part of this docket and will be available for inspection or copying at room PL–401 on the Plaza level of the Nassif Building, 400 Seventh Street SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. You may also find this docket on the Internet at *http://dms.dot.gov*. You may obtain a copy of this proposed rule by calling the U. S. Coast Guard Infoline at 1–800–368–5647, or read it on the Internet, at the web site for the Office of Boating Safety, at *http://www.uscgboating.org or at http://dms.dot.gov*.

FOR FURTHER INFORMATION CONTACT: If you have questions on this proposed rule, contact Carlton Perry, Project Manager, Office of Boating Safety, U.S. Coast Guard, by telephone at 202–267–0979 or by e-mail at *cperry@comdt.uscg.mil*. If you have questions on viewing or submitting material to the docket, call Dorothy Beard, Chief, Dockets, Department of Transportation, telephone 202–366–5149.

SUPPLEMENTARY INFORMATION:

Request for Comments

We encourage you to participate in this rulemaking by submitting

comments and related material. If you do so, please include your name and address, identify the docket number for this rulemaking (USCG–2001–10163), indicate the specific section of this document to which each comment applies, and give the reason for each comment. You may submit your comments and material by mail, hand delivery, fax, or electronic means to the Docket Management Facility at the address under **ADDRESSES**; but please submit your comments and material by only one means. If you submit them by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit them by mail and want to know they reached the Facility, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this proposed rule in view of them.

Public Meeting

We do not plan to hold a public meeting but you may submit a request for one to the Docket Management Facility at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that a public meeting would aid this rulemaking, we will hold one at a time and place announced by a later notice in the **Federal Register**.

Background and Purpose

Regulatory History. The Coast Guard received requests from the National Boating Safety Advisory Council (NBSAC), propeller strike prevention organizations, and the general public to require installation of propeller guards on recreational houseboats and other displacement (non-planing) vessels, including those leased by livery operations. While accident data currently available to us does not show a high number of reported fatalities from propeller strikes annually, the number of responses to the 1995 and 1997 notices of request for comments (discussed below) indicate a great deal of public interest in whether and how the Federal government should act to prevent propeller-strike accidents. After consideration of public input and consultation with the National Boating Safety Advisory Council (NBSAC), we determined that we should promulgate regulations for owners of houseboats as non-planing recreational vessels with propeller-driven propulsion aft of the transom.

Initial Notice of Request for Comments. To gather information from the recreational boating public and industry, we published a notice of request for comments in the **Federal Register** in May 1995 (60 FR 25191). We asked the recreational boating public to comment on: (1) The economic and other impacts of establishing a requirement for propeller guards on recreational houseboats and other displacement (non-planing) vessels; (2) suggestions on alternatives to propeller guards that should also be considered; (3) recommendations on the applicability of regulations; and (4) concerns of the livery and charter industries.

We received over 100 comments during the 60-day comment period. Various parties, including the National Association of State Boating Law Administrators (NASBLA) requested an extension of the comment period. To accommodate this request, we published a notice to reopen the comment period for an additional 120-days in August 1995 (60 FR 40545). We received 1,994 comments to this notice, including more than 1,800 form letters that supported a requirement to use propeller guard technology or jet pump propulsion on rental houseboats. An additional 69 comments also supported developing such a requirement. Fifty-seven comments objected to such a requirement. The information received was voluminous, but too general to help us develop a regulation.

Advance Notice of Proposed Rulemaking. We published an advance notice of proposed rulemaking (ANPRM) in March 1996 (61 FR 13123) that asked questions to gather current and specific information about the injuries involving propeller strikes and rented boats. We also announced a series of meetings across the country to enable the public to express their views. Some of the questions specifically sought out the following information: the appropriate Federal and State roles in reducing propeller strike incidents; whether government intervention is appropriate; and if so, whether it should be directed at the vessels, their manufacturers, their operators, their owners, or the companies leasing such vessels.

Second Notice of Request for Comments. After reviewing available research and the comments from the public, and consulting with NBSAC at its November 1996 meeting, we published another notice of request for comments in April 1997 (62 FR 22991) and provided a 90-day comment period. We solicited comments on the effectiveness of specific devices and interventions that may reduce the number of recreational boating accidents involving rented powerboats in which individuals are injured by the propeller. We also asked for information about other devices or interventions (propeller injury avoidance measures) that may reduce the severity of injuries to individuals involved in propeller-strike accidents.

The devices or interventions we asked about included: (1) Swimming ladder locations and interlocks; (2) large warning notices to make the operators, passengers and swimmers more aware of the dangers; (3) propeller location wands; (4) clear vision aft to alert operators to the presence of swimmers near the propeller; (5) propeller shaft engagement alarms to alert passengers and swimmers of a rotating propeller; (6) conversion of a standard inboard, outboard, or inboard/outboard engine with a jet pump propulsion engine; (7) ignition cut-off/auto throttle and neutral returns to stop the propeller when the helm is vacated or unattended; and (8) education specifically directed to the location and dangers of propellers. We also solicited comments on propeller guards, and any other devices that might reduce the occurrence or severity of injuries due to propeller strikes. Based on requests from the public, we published a notice that extended the comment period an additional 210 days in August 1997 (62 FR 44507).

Summary of Comments. In response to the ANPRM and the notices, we received 2,027 comments, more than 1,800 of which were form letters and none of which contained information sufficient to support proposing requirements for manufacturers of new recreational boats, nor did they help us determine the estimated burdens and costs to boat manufacturers. Of the total comments received, 95% were in favor of initiating a Federal regulation.

NBSAC Consultation. At the April 30, 2000, NBSAC Subcommittee meeting, we presented the results of our research on accident report statistics: vessels most frequently involved with injuries are open recreational motorboats in the category "16 feet to less than 26 feet in length." We announced our intention to initiate a regulatory project that would require owners of this category of recreational vessels to attach pre-printed warning labels at strategic locations on their vessels. We would also propose requirements for owners to attach a propeller guard on a smaller number of rental non-planing houseboats. The Subcommittee report included the Coast Guard rulemaking project description. The Subcommittee presented its report to the full Council at the May 1, 2000, meeting and the Council accepted the Subcommittee's report without amendment.

At the October 2000 NBSAC Subcommittee meeting, the Subcommittee reviewed the preferred alternative from its April 2000 meeting and recommended that we propose, instead, an expanded list of interventions for vessels in the category "16 feet to less than 26 feet in length." As a result, we developed and presented a number of propeller injury avoidance measures to NBSAC for their review. Again, the full Council accepted the Subcommittee report.

At the April 2001 NBSAC Subcommittee meeting, we presented the expanded list of alternatives from which owners of the affected vessels can choose for their vessels. After discussing the alternatives and their cost, the Council recommended that the Coast Guard, instead, develop four specific regulations:

(1) Require owners of all propeller driven vessels 12 feet in length and longer with propellers aft of the transom to display propeller warning labels and to employ an emergency cut-off switch, where installed;

(2) Require manufacturers and importers of new planing vessels 12 feet to 26 feet in length with propellers aft of the transom to select and install one of several factory installed propeller injury avoidance methods;

(3) Require manufacturers and importers of new non-planing vessels 12 feet in length and longer with propellers aft of the transom to select and install one of several factory installed propeller injury avoidance methods; and

(4) Require owners of all non-planing rental boats with propellers aft of the transom to install either a jet propulsion system or a propeller guard or all of several propeller injury avoidance measures.

This regulatory project would focus on implementing the fourth NBSAC recommendation. We will address the other NBSAC recommendations in subsequent regulatory projects. Due to the extensive broadening of the initial regulatory project, we are withdrawing the initial regulatory project, as published in the Notices section of this document, and initiating the first of a series of separate regulatory projects in response to recent NBSAC recommendations. We have placed the public docket for the initial regulatory project (CGD 95–041) into a new public docket (USCG–2001–10299) at the Docket Management System (DMS) at the above address under **ADDRESSES** for public viewing.

Use of the propeller injury avoidance measures described in this proposed rule would, in most cases, prevent direct contact of the propeller blades with persons in the water and minimize serious and fatal injuries due to propeller strikes.

Discussion of Proposed Rule

1. Section 175.03 of Title 33 Code of Federal Regulations would be amended to include definitions of the following terms used in this subpart: clear vision aft, houseboat, ignition cut-off switch, non-planing vessel, planing vessel, and swim ladder interlock. We would specifically like public comment on these terms and definitions.

2. Part 175—Equipment Requirements would be revised by adding a new subpart E—Propeller Injury Avoidance Measures.

3. New section 175.301, Applicability, would describe the category of recreational vessels that are subject to the new requirements: Non-planing recreational houseboats with propeller-driven propulsion located aft of the transom. We would specifically like public comment on definitions for terms used in this section.

4. New sections 175.310 and 175.315 would describe the specific safety measures required by this proposed rule. Section 175.310 instructs owners and operators of vessels for rent; section 175.315 instructs owners and operators of vessels not for rent.

Owner and Operator Requirements for Vessels for Rent

Under proposed section 175.310, owners of recreational, non-planing houseboats for rent with propeller-driven propulsion located aft of the transom must equip their vessels with either a propeller guard, or a combination of three propeller injury avoidance measures: A swim ladder interlock, an aft visibility device, and an emergency ignition cut-off switch. Operators of vessels for rent must use either a propeller guard or all three propeller injury avoidance measures listed above.

Owner and Operator Requirements for Vessels Not for Rent

Under proposed section 175.315, owners of recreational, non-planing houseboats not for rent with propeller-driven propulsion located aft of the transom must equip their vessels with either a propeller guard, or both of the following propeller injury avoidance measures: a swim ladder interlock and an aft visibility device.

Operators of vessels not for rent must use either a propeller guard, or all of the following propeller injury avoidance measures: a swim ladder interlock, an aft visibility device, and an emergency ignition cut-off switch (if factory installed).

We are not requiring owners of vessels not for rent to install an emergency ignition cut-off switch because it may be cost-prohibitive. However, if a vessel has an emergency ignition cut-off switch that was installed at the factory, vessel operators must use it. If a vessel does not have a factory-installed emergency ignition cut-off switch, we encourage, but do not require the owner to get one.

We would specifically like public comment on the availability of, and experience with, the safety devices described in this proposed rule. We would also like feedback about your experience operating a vessel with a propeller guard; fitting a propeller guard to a vessel drive unit; or concerns about propeller guard clogging, if any.

5. *Phase-in period for installing safety measures.* To minimize the immediate economic burden on owners of both rental and non-rental vessels and to provide a reasonable time period for compliance, we would provide a phase-in period for implementing the safety measures. Owners of vessels not for rent, lease, or charter would have 2 years from the date that a final rule is published to install the prescribed safety measures. Owners of vessels for rent, lease, or charter would have an additional year (3 years) from the date that a final rule is published to install the prescribed safety measures. We are allowing owners of vessels for rent an extra year because, in many cases, they have multiple vessels on which they must install the safety measures.

Regulatory Evaluation

This proposed rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget (OMB) has not reviewed this rule under that Order. It is not "significant" under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040, February 26, 1979).

A draft Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT follows:

Costs of Proposed Rule

We estimate that this rule would impose a $12 to $30 million economic cost on owners of approximately 100,000 non-planing houseboats. Approximately 5,000 of these vessels are rented, leased or chartered.

Owners who lease, rent, or charter non-planing recreational houseboats would have to install either a propeller guard or three combined measures. The three measures include a swim ladder interlock ($100 plus installation), a clear visibility aft device ($20, self-installed), and an ignition cut-off switch ($40, plus installation). Owners of non-planing non-rental recreational houseboats would not be required to install an ignition cut-off switch. Therefore, in our calculation of the total minimum cost to this group of owners, we have only included the cost of the other two measures.

Owners could convert their engine into a jet pump at a cost of $2500 and be exempt from this rule. Because we do not expect many houseboat owners to do this, the maximum cost is based on installation of a propeller guard, which we estimate to be $300 (self-installed).

To minimize the immediate economic impact of this rule, owners of non-rental houseboats are provided two years to comply; rental and livery businesses are granted an additional year (three years) to comply.

We estimate that costs to the government would be minimal. The Coast Guard would have to expand its Boarding Officer personnel training to include checking for installation of the injury avoidance measures, a propeller guard, or a jet pump engine in a safe and determinative manner, during currently required field boardings of recreational vessels for safety equipment checks.

Benefits of Proposed Rule

This proposed rule is appropriate because the Boating Accident Reporting Database (BARD) shows that the number of injuries and fatalities reported during calendar years 1990 through 1999 occurred at a chronic rate. BARD data for the same period revealed a total of 18 injuries and 2 fatalities involving non-planing recreational houseboats. The number of injuries to be prevented by this rule may be greatly understated since many boaters are unaware of the requirement to report accidents.

The benefits of avoiding future propeller strike injuries and fatalities are based on the eighteen propeller strike injuries and two fatalities caused by non-planing houseboats from 1990 through 1999. If we anticipate 100% compliance with this regulation and assume the eighteen injuries to be severe, then the total monetary benefits of injuries avoided are $9.1 million. The total monetary benefits of injuries avoided are based on the value society is willing to pay to avert a severe injury, which the Office of the Secretary of Transportation has calculated to be $506,300.

In addition, two propeller-related fatalities were reported in the accident database from 1990 through 1999. If compliance with the regulation prevents these fatalities, then the total monetary benefits of fatalities avoided, based on the value society is willing to pay to avert a fatality, are $5.4 million ($2,700,000 × 2 deaths). The total monetary benefit to society for avoiding all of the injuries and fatalities involving non-planing houseboats are $14.5 million ($9.1 for injuries and $5.4 for fatalities) over a 10-year period. This exceeds our lowest cost estimates of $12 million. If at least twelve fatalities are averted due to the implementation of the regulation, the benefits will exceed our highest cost estimates of $30 million for this rule.

Vessel owners may incur additional benefits from lower insurance premiums as a result of their use of improved safety measures.

The Coast Guard expects that this rule would reduce the number of people who are killed or injured due to a propeller strike involving non-planing recreational houseboats.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

Individuals, not small entities, own the majority of non-planing recreational houseboats affected by this rule; however, under the Regulatory Flexibility Act, the Coast Guard must determine the impact on small entities. The Coast Guard estimates that there are 300 houseboat rental facilities that must install the propeller injury avoidance measures required by this rule. In order to minimize the burden on these small entities, the Coast Guard would provide them 3 years (an additional year beyond the 2 years provided to owners of non-rental houseboats) to comply with this rule.

Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic effect on it, please submit a comment to the Docket Management Facility at the address under **ADDRESSES**. In your comment, explain why you think it qualifies and how and to what degree this rule would affect it.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this proposed rule so that they can better evaluate its effect on them and participate in the rulemaking. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact Carlton Perry, Project Manager, Office of Boating Safety, by telephone at 202–267–0979, or by e-mail at *cperry@comdt.uscg.mil*.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for Federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them

We have analyzed this proposed rule under that Order and have determined that it does not have implications for federalism. Under this proposal, the Coast Guard establishment of a performance standard or equipment installation requirement would not conflict with any existing State statute. The Coast Guard routinely consults with the National Association of State Boating Law Administrators (NASBLA) and will continue to do so on this specific regulatory project.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This proposed rule would not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not concern an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

To help the Coast Guard establish regular and meaningful consultation and collaboration with Indian and Alaskan Native tribes, we published a notice in the **Federal Register** (66 FR 36361, July 11, 2001) requesting comments on how to best carry out the Order. We invite your comments on how this proposed rule might impact tribal governments, even if that impact may not constitute a "tribal implication" under the Order.

Energy Effects

We have analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Environment

We have considered the environmental impact of this proposed rule and concluded that, under figure 2–1, paragraph (34)(d), of Commandant Instruction M16475.1D, this proposed rule is categorically excluded from further environmental documentation. The proposed rule requires owners of non-planing recreational houseboats with propeller-driven propulsion located aft of the transom to install one of two propulsion unit measures or three combined measures. The propeller guard devices do not create sufficient drag through the water for these slow moving non-planing vessels to result in an increase of consumption of fossil fuels or increase air pollution due to increased exhaust. A "Categorical Exclusion Determination" is available in the docket where indicated under **ADDRESSES.**

List of Subjects in 33 CFR Part 175

Marine Safety.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 175 as follows:

PART 175—EQUIPMENT REQUIREMENTS

1. The authority citation for part 175 continues to read as follows:

Authority: 46 U.S.C. 4302; 49 CFR 1.46.

2. Amend § 175.3 by adding the following undesignated definitions in alphabetical order to the rest of the section, to read as follows:

§ 175.3 Definitions.

* * * * *

Clear visibility aft device means a device, such as a video camera and monitor or a mirror, that allows the operator to see aft of the vessel from the engine throttle control station to be aware of the presence of a swimmer near a propeller.

Houseboat means a motorized vessel designed primarily with accommodation spaces with little or no foredeck or cockpit, with low freeboard and with a low length to beam ratio.

Ignition cut-off switch means a device that interrupts the engine ignition to stop the engine when the operator moves away from the engine throttle control station.

* * * * *

Non-planing vessel means a vessel with a hull that is designed to ride through the water at any speed.

* * * * *

Planing vessel means a vessel with a hull that is designed to ride on top of the water beyond a minimum speed.

* * * * *

Swim ladder interlock means a device that interrupts the engine ignition to stop the engine when a swim ladder is moved into position near the propeller.

* * * * *

3. Amend part 175 by adding a new subpart E—Propeller Injury Avoidance Measures as follows:

Subpart E—Propeller Injury Avoidance Measures

§ 175.301 Applicability.

§ 175.310 Propeller safety measures for rental houseboats.

§ 175.315 Propeller safety measures for non-rental houseboats.

§ 175.301 Applicability.

(a) Sections 175.310 and 175.315 apply to recreational vessels described in § 175.1, which:

(1) Are monohull houseboats;

(2) Use a propulsion drive unit with an exposed propeller located aft of the transom; and

(3) Are designed to be operated in a non-planing manner.

(b) Sections 175.310 and 175.315 do not apply to multi-hull vessels or planing vessels.

§ 175.310 Propeller safety measures for rental houseboats.

(a) If you own a recreational non-planing houseboat and provide it for rent, charter or lease, you must either—

(1) Cover each exposed propeller located aft of the transom with a propeller guard attached in a secure manner; or;

(2) Do all of the following—

(i) Install and maintain an interlock device for each swim ladder;

(ii) Install and maintain a clear visibility aft device that provides a clear view, aft of the vessel from the engine throttle control area; and

(iii) Install and maintain an emergency ignition cut-off switch.

(b) If you operate a rented, chartered, or leased vessel that has an exposed propeller located aft of the transom, you must—

(1) Use all swim ladder interlock devices;

(2) Use a clear visibility aft device that provides a clear view, aft of the vessel from the engine throttle control station; and

(3) Use the emergency ignition cut-off switch.

§ 175.315 Propeller safety measures for non-rental houseboats.

(a) If you own a recreational non-planing houseboat and do not provide it for rent, charter or lease, you must either—

(1) Cover each exposed propeller located aft of the transom with a propeller guard attached in a secure manner; or

(2) Do both of the following—

(i) Install and maintain an interlock device for each swim ladder; and

(ii) Install and maintain a clear visibility aft device that provides a clear view, aft of the vessel from the engine throttle control station.

(b) If you operate a vessel with an exposed propeller located aft of the transom, you must—

(1) Use all swim ladder interlock devices;

(2) Use a clear visibility aft device that provides a clear view, aft of the vessel from the engine throttle control area; and

(3) Use the emergency ignition cut-off switch (if factory installed).

Dated: October 15, 2001.

Terry M. Cross,

Rear Admiral, U.S. Coast Guard, Assistant Commandant for Operations.

BILLING CODE 4910–15–U

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 181

[USCG–2001–10299; CGD 95–041]

RIN 2115–AE37

Propeller Injury Prevention Aboard Rental Boats

AGENCY: Coast Guard, DOT.

ACTION: Notice of withdrawal.

SUMMARY: The Coast Guard is withdrawing its proposed rulemaking regarding requirements for manufacturers to prevent propeller strike injuries and terminating rulemaking under the following Regulatory Identification Number: (RIN) 2115–AE37 (USCG–2001–10299; CGD 95–041). The Coast Guard lacks sufficient data to demonstrate that the benefits of requirements for manufacturers clearly outweigh the costs and burdens.

DATES: This withdrawal of the March 26, 1996 (61 FR 13123) advance notice of proposed rulemaking is made on December 10, 2001.

FOR FURTHER INFORMATION CONTACT: Randolph Doubt, Project Manager, Recreational Boating Product Assurance Division, Office of Boating Safety, 202–267–0981.

SUPPLEMENTARY INFORMATION:

Regulatory History

Initial Notice of Request for Comments. To gather information from the recreational boating public and industry, we published a notice of request for comments in the **Federal Register** in May 1995 (60 FR 25191). We asked the recreational boating public to comment on: (1) The economic and other impacts of establishing a requirement for propeller guards on recreational houseboats and other displacement (non-planing) vessels; (2) suggestions on alternatives to propeller guards that should also be considered; (3) recommendations on the applicability of regulations; and (4) concerns of the livery and charter industries.

We received over 100 comments during the 60-day comment period. Various parties, including the National Association of State Boating Law Administrators (NASBLA) requested an extension of the comment period. To accommodate this request, we published a notice to reopen the comment period for an additional 120-days in August 1995 (60 FR 40545). We received 1,994 comments to this notice, including more than 1,800 form letters that supported a requirement to use propeller guard technology or jet pump propulsion on rental houseboats. An additional 69 comments also supported developing such a requirement. Fifty-seven comments objected to such a requirement. The information received was voluminous, but too general to help us develop a regulation.

Advance Notice of Proposed Rulemaking. We published an advance notice of proposed rulemaking (ANPRM) in March 1996 (61 FR 13123) that asked questions to gather current and specific information about the injuries involving propeller strikes and rented boats. We also announced a series of meetings across the country to enable the public to express their views. Some of the questions specifically sought out the following information: the appropriate Federal and State roles in reducing propeller strike incidents; whether government intervention is appropriate; and if so, whether it should be directed at the vessels, their manufacturers, their operators, their owners, or the companies leasing such vessels.

Second Notice of Request for Comments. After reviewing available research and the comments from the public, and consulting with the National Boating Safety Advisory Council (NBSAC) at its November 1996 meeting, we published another notice of request for comments in April 1997 (62 FR 22991) and provided a 90-day comment period. We solicited comments on the effectiveness of specific devices and interventions that may reduce the number of recreational boating accidents involving rented powerboats in which individuals are injured by the propeller. We also asked for information about other devices or interventions (propeller injury avoidance measures) that may reduce the severity of injuries to individuals involved in propeller-strike accidents.

The devices or interventions we asked about included: (1) Swimming ladder locations and interlocks; (2) large warning notices to make the operators, passengers and swimmers more aware of the dangers; (3) propeller location wands; (4) clear vision aft to alert operators to the presence of swimmers near the propeller; (5) propeller shaft engagement alarms to alert passengers and swimmers of a rotating propeller; (6) conversion of a standard inboard, outboard, or inboard/outboard engine with a jet pump propulsion engine; (7) ignition cut-off/auto throttle and neutral returns to stop the propeller when the helm is vacated or unattended; and (8) education specifically directed to the location and dangers of propellers. We also solicited comments on propeller guards, and any other devices that might reduce the occurrence or severity of injuries due to propeller strikes. Based on requests from the public, we published a notice that extended the comment period an additional 210 days in August 1997 [62 FR 44507].

Summary of Comments. In response to the ANPRM and the notices, we received 2,027 comments, more than 1,800 of which were form letters and none of which contained information sufficient to support proposing requirements for manufacturers of new recreational boats, nor did they help us determine the estimated burdens and costs to boat manufacturers. Of the total

comments received, 95% were in favor of initiating a Federal regulation.

NBSAC Consultation. At the April 30, 2000 NBSAC Subcommittee meeting, we presented the results of our research on accident report statistics: vessels most frequently involved with injuries are open recreational motorboats in the category "16 feet to less than 26 feet in length." We announced our intention to initiate a regulatory project that would require owners of this category of recreational vessels to attach pre-printed warning labels at strategic locations on their vessels. We would also propose requirements for owners to attach a propeller guard on a smaller number of rental, non-planing houseboats. The Subcommittee report included the Coast Guard rulemaking project description. The Subcommittee presented its report to the full Council at the May 1, 2000 meeting and the Council accepted the Subcommittee's report without amendment.

At the October 2000 NBSAC Subcommittee meeting, the Subcommittee reviewed the preferred alternative from its April 2000 meeting and recommended that we propose, instead, an expanded list of interventions for vessels in the category "16 feet to less than 26 feet in length." As a result, we developed and presented a number of propeller injury avoidance measures to NBSAC for their review. Again, the full Council accepted the Subcommittee report.

At the April 2001 NBSAC Subcommittee meeting, we presented the expanded list of alternatives from which owners of the affected vessels can choose for their vessels. After discussing the alternatives and their cost, the Council recommended that the Coast Guard, instead, develop four specific regulations:

(1) Require owners of all propeller driven vessels 12 feet in length and longer with propellers aft of the transom to display propeller warning labels and to employ an emergency cut-off switch, where installed;

(2) Require manufacturers and importers of new planing vessels 12 feet to 26 feet in length with propellers aft of the transom to select and install one of several factory installed propeller injury avoidance methods;

(3) Require manufacturers and importers of new non-planing vessels 12 feet in length and longer with propellers aft of the transom to select and install one of several factory installed propeller injury avoidance methods; and

(4) Require owners of all non-planing rental boats with propellers aft of the transom to install either a jet propulsion system or a propeller guard or all of several propeller injury avoidance measures.

Withdrawal

We are withdrawing the rulemaking because of (1) the lack of substantive information about the benefits to society of a requirement for manufacturers to prevent propeller strike injuries, and (2) to simplify the development of a series of new regulatory projects initiated in response to the recent, broader NBSAC recommendations. For these reasons, we are terminating further rulemaking under RIN 2115–AE37 (USCG–2001–10299).

We have placed the public docket (CGD 95–041) for this project into an electronic docket under the Department of Transportation Docket Management System (DMS) under a new docket number: USCG–2001–10299. This new docket number will allow the public to access the early docket records electronically. These early docket records serve as background for new regulatory projects the Coast Guard is initiating in response to recommendations from the NBSAC in its April 2001 meeting.

We are publishing a notice of proposed rulemaking elsewhere in this issue under RIN 2115–AG18 (USCG–2001–10163). This rulemaking is the first of a series of separate regulatory projects initiated in response to the recent NBSAC recommendations.

Dated: October 15, 2001.

Terry M. Cross,

Rear Admiral, U.S. Coast Guard, Assistant Commandant for Operations.

BILLING CODE 4910–15–U

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 51

[CC Docket No. 01–321; FCC 01–339]

Performance Measurements and Standards for Interstate Special Access Services

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document seeks comment on whether the Commission should adopt a select group of performance measurements and standards for evaluating incumbent local exchange carrier (incumbent LEC) performance in the provisioning of special access services. These comments will assist the Commission in ensuring that these services are provisioned in a just, reasonable, and nondiscriminatory manner.

DATES: Comments are due January 9, 2002, and Reply Comments are due January 30, 2002.

FOR FURTHER INFORMATION CONTACT: Jon Reel, Attorney Advisor, Policy and Program Planning Division, Common Carrier Bureau, (202) 418–1580.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking (NPRM) in CC Docket No. 01–321, FCC 01–339, adopted November 16, 2001, and released November 19, 2001. The complete text of this Notice of Proposed Rulemaking is available for inspection and copying during normal business hours in the FCC Reference Information Center, Portals II, 445 12th Street, SW., Room CY–A257, Washington, DC, 20554. This document may also be purchased from the Commission's duplicating contractor, Qualex International, Portals II, 445 12th Street, SW., Room CY–B402, Washington, DC 20554, telephone 202–863–2893, facsimile 202–863–2898, or via e-mail *qualexint@aol.com*. It is also available on the Commission's website at *http://www.fcc.gov*.

Synopsis of the Notice of Proposed Rulemaking

1. *Jurisdiction and Enforcement.* The Commission has broad authority to establish national performance measurements and standards for special access services pursuant to sections 201, 202, and 272 of the Act. The Commission seeks comment on how, if the Commission were to adopt special access measures and standards, the state commissions might participate in enforcing these requirements. The Commission also seeks comment on whether and to what extent the Commission should exercise the fully panoply of enforcement mechanisms available to it under the Act to enforce any national measurements and standards it may adopt.

2. *Performance Measures and Standards.* In this NPRM, the Commission seeks comment on whether the Commission should adopt interstate special access measures and standards at this juncture. It seeks comment on whether national measurements, standards, and reporting requirements for special access provisioning should apply to all incumbent LECs, or should exclude small, rural or midsized incumbent LECs. The Commission also seeks comment on whether the proposed performance measurements and standards for unbundled network

elements should apply to provisioning of both high-capacity loops and special access circuits.

3. *Suggested Model Performance Measures and Standards.* The NPRM calls commenters attention to measurements and standards that have been proposed by New York in *Proceeding on Motion of the Commission to Review Service Quality Standards for Telephone Companies,* Order Adopting Revisions to Inter-Carrier Service Quality Guidelines, Case 97–C–0139 (December 15, 2000); *New York State Carrier-to-Carrier Guidelines Performance Standards and Reports,* NYPSC Case 97–C–0139 (Jan. 2001), and in Texas in *Texas Performance Remedy Plan and Performance Measurement, Attachment 17 to Texas 271 Agreement (Version 2.0)* (Aug. 2001). To facilitate access by commenters, these documents have been filed in the docket of the instant proceeding, CC Docket No. 01–321. The NPRM also calls commenters attention to proposals by WorldCom on August 6, 2001 and by Time Warner on July 16, 2001; these documents have also been filed in the docket of the instant proceeding, CC Docket. No. 01–321. Commenters are also directed to the performance measurements and standards in the *Performance Measurements and Standards for Unbundled Network Elements and Interconnection Notice,* CC Docket No. 01–318, FCC No. 01–331, at Section IV.B.

4. *Implementation.* The Commission asks commenters to discuss the same issues that apply in the context of performance measures and standards for UNEs and interconnection, namely (1) How may we best ensure that reported data are sufficiently accurate to form the basis for an enforcement action? (2) Should penalties be imposed if data inaccuracies are detected? (3) How may the Commission ensure the valid and accurate implementation of business rules and exclusions? (4) What auditing procedures, if any, are reasonable? (5) Would industry workshops under the direction of regulators be useful, and if so, should we adopt safeguards against delay and stalemate? In addition, the Commission solicits comment on appropriate reporting procedures that may help foster competition while avoiding increases on the overall burdens imposed on incumbent LECs. The Commission also seeks comment regarding the development, implementation, and analysis of the results of statistical measures that might be applicable and appropriately used in analyzing performance data.

5. *Sunset Requirements.* The Commission contemplates that when the services discussed herein are provisioned in a nondiscriminatory, just and reasonable manner, the Commission will suspend any reporting requirements that have become unnecessary. Accordingly, the Commission seeks comment on whether it should establish a sunset date on which the proposed reporting requirements would cease to apply to incumbent LECs. In particular, the Commission asks parties to comment on whether the reporting requirements should sunset on a date certain, such as in two, three or four years, or whether it should establish a specific trigger event. Similarly, for BOCs, the Commission seeks comment on whether these rules should sunset on a date certain after section 271 approval. The Commission also requests comments on additional proposals parties may have on establishing a sunset date.

Initial Regulatory Flexibility Analysis

6. As required by the Regulatory Flexibility Act (RFA), as amended, the Commission has prepared this Initial Regulatory Flexibility Analysis (IRFA) of the expected economic impact on small entities by the policies and rules proposed in this NPRM. Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments on the NPRM. The Commission will send a copy of the NPRM, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration. In addition, the NPRM will be published in the **Federal Register**.

Need for, and Objectives of, the Proposed Rules

7. In this NPRM, the Commission seeks comment on whether it should adopt a limited number of measurements and standards for evaluating incumbent local exchange carrier performance with respect to ordering, provisioning and maintaining and repairing of the facilities that are critical for competitive carriers to compete for end-user customers.

Legal Basis

8. The legal basis for any action that may be taken pursuant to the NPRM is contained in sections 1, 2, 4, 201, 202, 205, 206, 207, 209, 272, 303(r) and 503(b) of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154, 201, 202, 205, 206, 207, 209, 272, 303(r) and 503(b).

Description and Estimate of the Number of Small Entities to Which the Proposed Rules Will Apply

9. The RFA directs agencies to provide a description and, an estimate where feasible, of the number of small entities that will be affected by any rules. The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction." For the purposes of this Order, the RFA defines a "small business" to be the same as a "small business concern" under the Small Business Act, 15 U.S.C. 632, unless the Commission has developed one or more definitions that are appropriate to its activities. Under the Small Business Act, a "small business concern" is one that: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) meets any additional criteria established by the Small Business Administration (SBA). Consistent with the SBA's Office of Advocacy's view, we have included small incumbent LECs in this RFA analysis. We emphasize, however, that this RFA action has no effect on the Commission's analyses and determinations in other, non-RFA contexts.

10. *Local Exchange Carriers.* The most reliable source of information regarding the number of LECs nationwide appears to be the data that we collect annually in connection with the Telecommunications Relay Service. According to our most recent data, there are 1,335 incumbent LECs. Although some of these carriers may not be independently owned and operated, or have more than 1,500 employees, we are unable at this time to estimate with greater precision the number of LECs that would qualify as small business concerns under the SBA's definition. Consequently, we estimate that there are less than 1,335 small entity incumbent LECs that may be affected by the proposals in the NPRM.

Description of Projected Reporting, Recordkeeping and Other Compliance Requirements

11. We expect that any proposal we may adopt pursuant this NPRM will not substantially increase existing reporting, recordkeeping or other compliance requirements. The Commission already requires the filing of service quality reports and many states require the same of incumbent LECs.

Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

12. One objective of this proceeding is to adopt reporting requirements for UNEs that will not increase the existing regulatory burdens on small carriers.

Ordering Clauses

13. Pursuant to Sections 1, 2, 4, 201, 202, 205, 206, 207, 209, 272, 303(r) and 503(b) of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154, 201, 202, 205, 206, 207, 209, 272, 303(r), and 503(b) a NOTICE OF PROPOSED RULEMAKING IS ADOPTED.

14. CC Docket No. 00–51 IS HEREBY TERMINATED.

15. The Commission's Consumer Information Bureau, Reference Information Center, SHALL SEND a copy of this NPRM, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

Federal Communications Commission.

Magalie Roman Salas,

Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 01–2785, MM Docket No. 00–124, RM–9893]

Digital Television Broadcast Service; Bryan, TX

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a request filed by KWTX/KBTX License Corporation, requesting the substitution of DTV channel 50 for DTV channel 59 at Bryan, Texas. DTV Channel 50 can be allotted to Bryan, Texas, in compliance with the principle community coverage requirements of Section 73.625(a) at reference coordinates (30–33–16 N. and 96–01–51 W.). As requested, we propose to allot DTV Channel 50 to Bryan with a power of 1000 and a height above average terrain (HAAT) of 477 meters.

DATES: Comments must be filed on or before January 28, 2002, and reply comments on or before February 12, 2002.

ADDRESSES: Federal Communications Commission, 445 12th Street, SW., Room TW-A325, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Vincent A. Pepper, Pepper & Corazzini, LLP, 1776 K Street, NW., Suite 200, Washington, DC 20006–2334 (Counsel for KWTX/KBTX Licensee Corporation).

FOR FURTHER INFORMATION CONTACT: Pam Blumenthal, Mass Media Bureau, (202) 418–1600.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Further Notice of Proposed Rule Making, MM Docket No. 00–124, adopted December 4, 2001, and released December 5, 2001. The full text of this document is available for public inspection and copying during regular business hours in the FCC Reference Information Center, Portals II, 445 12th Street, SW., Room CY-A257, Washington, DC, 20554. This document may also be purchased from the Commission's duplicating contractor, Qualex International, Portals II, 445 12th Street, SW., Room CY-B402, Washington, DC, 20554, telephone 202–863–2893, facsimile 202–863–2898, or via e-mail *qualexint@aol.com*.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

List of Subjects in 47 CFR Part 73

Television, Digital television broadcasting.

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 73 as follows:

PART 73—TELEVISION BROADCAST SERVICES

1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334, and 336.

§ 73.622 [Amended]

2. Section 73.622(b), the Table of Digital Television Allotments under Texas is amended by removing DTV Channel 59 and adding DTV Channel 50 at Bryan.

Federal Communications Commission.

Barbara A. Kreisman,

Chief, Video Services Division, Mass Media Bureau.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 01–2682; MM Docket No. 99–196; RM–9619, RM–9674]

Radio Broadcasting Services; Bethel Springs, Martin, Tiptonville, Trenton, South Fulton, TN

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; dismissal.

SUMMARY: The Allocations Branch dismisses the petition for rule making filed by Sherry A. Brown proposing the allotment of Channel 249A at Bethel Springs, Tennessee, as being procedurally defective for failure to properly file comments in compliance with sections 1.415(b) and 1.420(e) of the Commission's Rules. *See* 64 FR 29979, June 4, 1999. In addition, the counterproposal filed by Thunderbolt Broadcasting Company, proposing two options for the substitution of Channel 267C3 for Channel 269A at Martin, and the reallotment of Channel 267C3 to South Fulton, Tennessee (described more fully in the *Report and Order*) is disposed of as follows: Option I is denied because it required the downgrade of vacant Channel 267C3 at Tiptonville, Tennessee, and there are expressions of interest for the Class C3 channel. Option II is dismissed for failure to be "technically correct" and "substantially complete" as required at the time it is filed.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 01–2737; MM Docket No. 01–322; RM–10332]

Radio Broadcasting Services; Fremont and Sunnyvale, CA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition for rulemaking filed on behalf of Chase Radio Properties, L.L.C., licensee of Station KCNL(FM), Channel 285A, at Fremont, California, requesting the reallotment of Channel 285A from Fremont to Sunnyvale, California, and modification of its authorization accordingly, pursuant to the provisions of section 1.420(i) of the Commission's Rules. Coordinates used for requested Channel 285A at Sunnyvale, California, are 37–18–41 North Latitude and 121–48–58 West Longitude.

Petitioner's reallotment proposal complies with the provisions of section 1.420(i) of the Commission's Rules, and therefore, the Commission will not accept competing expressions of interest in the use of Channel 285A at Sunnyvale, California, or require the petitioner to demonstrate the availability of an additional equivalent class channel.

DATES: Comments must be filed on or before January 14, 2002, and reply comments on or before January 29, 2002.

ADDRESSES: Secretary, Federal Communications Commission, 445 12th Street, SW., Room TW–A325, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner's counsel, as follows: Harry C. Martin; Fletcher, Heald & Hildreth, P.L.C.; 1300 North 17th Street, 11th Floor; Arlington, Virginia 22209.

FOR FURTHER INFORMATION CONTACT: R. Barthen Gorman, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 01–322 adopted November 14, 2001, and released

November 23, 2001. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC's Reference Information Center at Portals II, 445 12th Street, SW., CY–A257, Washington, DC 20554. This document may also be may also be purchased from the Commission's duplicating contractors, Qualex International, Portals II, 445 12th Street, SW., Room CY–B402, Washington DC 20554, telephone 202–863–2893, facsimile 202–863–2898, or via e-mail *qualexint@aol.com*.

The provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 73 as follows:

PART 73—RADIO BROADCAST SERVICES

1. The authority citation for Part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303. 334, and 336.

§ 73.202 [Amended].

2. Section 73.202(b), the Table of FM Allotments under California, is amended by adding Sunnyvale, Channel 285A, and removing Channel 285A at Fremont.

Federal Communications Commission.

John A. Karousos,

Chief, Allocations Branch, Policy and Rules Division, Mass Media Bureau.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AI28

Endangered and Threatened Wildlife and Plants; Listing the San Miguel Island Fox, Santa Rosa Island Fox, Santa Cruz Island Fox, and Santa Catalina Island Fox as Endangered

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose endangered status pursuant to the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*), for four subspecies of island fox (*Urocyon littoralis*): San Miguel Island Fox (*Urocyon littoralis littoralis*), Santa Rosa Island Fox (*U. l. santarosae*), Santa Cruz Island Fox (*U. l. santacruzae*), and Santa Catalina Island Fox (*U. l. catalinae*). Island fox populations on these four islands have experienced precipitous declines since 1995. The three island fox subspecies inhabiting the northern Channel Islands (San Miguel, Santa Rosa, and Santa Cruz) have declined due to predation by golden eagles (*Aquila chrysaetos*). Island foxes on San Miguel and Santa Rosa islands have been effectively extirpated in the wild; captive breeding efforts are underway on both islands. On Santa Cruz Island, the island fox population decreased from 1,300 to less than 100 animals; captive breeding efforts on Santa Cruz will begin in the fall of 2001. The Santa Catalina Island fox population experienced a precipitous decline in 1999 as a result of an outbreak of canine distemper virus; fewer than 200 Santa Catalina Island foxes are thought to remain in the wild.

DATES: Comments from all interested parties must be received by February 8, 2002. Public hearing requests must be received by January 24, 2002.

ADDRESSES: If you wish to comment, you may submit your comments and materials concerning this proposal by any one of several methods.

(1) You may submit written comments to the Field Supervisor, U.S. Fish and Wildlife Service, Ventura Fish and Wildlife Office, 2493 Portola Road, Suite B, Ventura, California 93003.

(2) You may send comments by electronic mail (e-mail) to: *fw1islandfox@r1.fws.gov*.

See the Public Comments Solicited section below for file format and other information about electronic filing.

(3) You may hand-deliver comments to our office at 2493 Portola Road, Suite B, Ventura, California 93003.

FOR FURTHER INFORMATION CONTACT: Diane Noda, Field Supervisor, U.S. Fish and Wildlife Service, Ventura Fish and Wildlife Office, at the address above (telephone 805/644–1766; facsimile 805/644–3958).

SUPPLEMENTARY INFORMATION:

Background

The island fox was first described as *Vulpes littoralis* by Baird in 1857 from the type locality of San Miguel Island, Santa Barbara County, California. Merriam (1888, in Hall and Kelson 1959) reclassified the island fox into the genus *Urocyon* and later described island foxes from Santa Catalina, San Clemente, and Santa Cruz islands as three separate taxa (*U. catalinae, U. clementae,* and *U. littoralis santacruzae*) (Merriam 1903). Grinnell *et al.* 1937 revised Merriam's classification, placing foxes from all islands under the species *U. littoralis* and assigning each island population a subspecific designation (*U. l. catalinae* on Santa Catalina Island, *U. l. clementae* on San Clemente Island, *U. l. dickeyi* on San Nicolas Island, *U. l. littoralis* on San Miguel Island, *U. l. santacruzae* on Santa Cruz Island, and *U. l. santarosae* on Santa Rosa Island). Recent morphological and genetic studies support the division of the *U. littoralis* complex into six subspecies which are each limited in range to a single island (Gilbert *et al.* 1990; Wayne *et al.* 1991a; Collins 1991a, 1993; Goldstein *et al.* 1999). Each subspecies is reproductively isolated from the others by a minimum of 5 kilometers (3 miles) of ocean waters. The island fox is closely related to the mainland gray fox, *U. cinereoargenteus*, but is smaller in size and darker in coloration (Moore and Collins 1995).

The island fox is a diminutive canid, weighing approximately 1.4 to 2.7 kilograms (3 to 6 pounds) and standing approximately 0.3 meters (1 foot) tall. Dorsal coloration is grayish-white and black. The base of the ears and sides of the neck and limbs are cinnamon-rufous in color. The underbelly is a dull white, and the tail is conspicuously short. Island foxes display sexual size dimorphism, with males being larger and heavier than females (Moore and Collins 1995).

Island foxes inhabit the six largest islands (San Miguel, Santa Rosa, Santa Cruz, San Nicolas, Santa Catalina, and San Clemente islands) off the coast of southern California. Genetic evidence suggests that all island foxes are descended from one colonization event (George and Wayne 1991), possibly from chance overwater dispersal by rafting on floating debris (Moore and Collins 1995). Fossil evidence indicates that island foxes inhabited the northern Channel Islands (San Miguel, Santa Rosa, and Santa Cruz) between 10,000 to 16,000 years ago (Orr 1968). However, island foxes are thought to have existed on the northern Channel Islands even before that time, during a period when Santa Cruz, Santa Rosa, and San Miguel were one land mass referred to as "Santarosae," last known to have been united 18,000 years before present (Johnson 1978, 1983). The island fox was thought to have reached the southern Channel Islands (San Nicolas, San Clemente, and Santa Catalina) much more recently (2,200 to 3,800 years ago), most likely introduced to these islands by Native Americans as pets or semi-domesticates (Collins 1991a, b). However, island fox remains recently recovered from San Nicolas Island extend this time period to approximately 5,200 years before present (Vellanoweth 1998).

Genetic evidence confirms the pattern of dispersal suggested by archeological and geological findings (Gilbert *et al.* 1990). The pattern of genetic relatedness supports the geological evidence of the sequence of isolation for each island, and each population, as rising sea levels separated Santarosae into the northern Channel Islands. Santa Cruz separated from the other northern Channel Islands first, about 11,500 years ago, followed by the separation of San Miguel and Santa Rosa about 9,500 years ago. Together with the fossil record, genetic evidence indicates that San Clemente was the first southern Channel Island colonized, probably by immigrants from San Miguel. Dispersal then occurred from San Clemente to San Nicolas and then Santa Catalina (Gilbert *et al.* 1990).

Island forms of species generally have less genetic variability than their mainland counterparts (Gill 1980), and island foxes are no exception. Mainland gray foxes are more variable both morphologically and genetically than island foxes (Wayne *et al.* 1991b; Goldstein *et al.* 1999). Island fox population size and genetic variability seem to decrease with island size; the smallest island fox populations, San Miguel and San Nicolas, show the least genetic variability, with San Nicolas having virtually no genetic variability, which is highly unusual among mammals. This lack of variability could be attributed either to extensive inbreeding, or to the population having passed through a bottleneck, a period of very low population (George and Wayne 1991).

The diminutive island fox is the largest native carnivore on the Channel Islands. The island fox is a habitat generalist, occurring in valley and foothill grasslands, southern coastal dunes, coastal bluff, coastal sage scrub, maritime cactus scrub, island chaparral, southern coastal oak woodland, southern riparian woodland, bishop (*Pinus muricata*) and torrey pine (*Pinus torreyana*) forests, and coastal marsh habitats. Although foxes can be found in a wide variety of habitats on the islands, they prefer areas of diverse topography and vegetation (Von Bloeker 1967; Laughrin 1977; Moore and Collins 1995). Laughrin (1973, 1980) found woodland habitats to support higher densities of island fox due to increased food availability, while Crooks and Van Vuren (1996) found island foxes to prefer fennel grasslands and avoid ravines and scrub oak patches.

Island foxes are omnivores, taking a wide variety of seasonally available plants and animals (Collins and Laughrin 1979; Collins 1980; Kovach and Dow 1981; Moore and Collins 1995; Crowell 2001). Island foxes forage opportunistically on any food items encountered within their home range. Selection of food items is determined largely by availability, which varies by habitat and island, as well as seasonally and annually. Island foxes prey on native deer mice (*Peromyscus maniculatus*), as well as introduced house mice (*Mus musculus*) and rats (*Rattus rattus*). Small mammals may be especially important prey during the breeding season, because they are large, energy-rich food items that adult foxes can bring back to their growing pups (Garcelon *et al.* 1999). In addition to small mammals, island foxes feed on ground-nesting birds such as horned larks (*Eremophila alpestris*) and western meadowlarks (*Sturnella neglecta*), and a wide variety of insect prey (Moore and Collins 1995). At certain times of the year, foxes feed heavily on orthopterans (e.g., grasshoppers and crickets) (Crooks and VanVuren 1995), especially Jerusalem crickets (*Stenopelmatus fuscus*). Less common in the diet are amphibians, reptiles, and carrion of marine mammals (Collins and Laughrin 1979). Island foxes feed on a wide variety of native plants, including the fruits of manzanita (*Arctostaphylos* spp.), summer holly (*Comarostaphylis* spp.), toyon (*Heteromeles* spp.), chollo cactus (*Opuntia* spp.), island cherry (*Prunus ilicifolia*), sumac (*Rhus* spp.), rose (*Rosa* spp.), nightshade (*Solanum* spp.), and huckleberry (*Vaccinium* spp.) (Moore and Collins 1995). Fruiting shrubs do not occur on San Miguel

Island, where island foxes rely more on the fruits of the low growing sea-fig, *Carpobrotus chilensis*.

The island fox is a docile canid, exhibiting little fear of humans in many instances. Although primarily nocturnal, the island fox is more diurnal than the mainland gray fox (Collins and Laughrin 1979; Fausett 1993). This is thought to be a result of the historical absence of large predators and freedom from human harassment on the islands (Laughrin 1977).

Mated island foxes maintain territories that are separate from the territories of other pairs (Crooks and Van Vuren 1996; Roemer *et al.* 2001a). Island fox home range size varies with sex, season, population density, landscape features, and habitat type (Laughrin 1977; Crooks and Van Vuren 1996; Thompson *et al.* 1998; Roemer *et al.* 2001a). Estimates of territory size range from 0.24 square kilometers (km^2) (59 acres (ac)) in mixed habitat (Crooks and Van Vuren 1996) and 0.87 km^2 (214 ac) in grassland habitat (Roemer 1999) on Santa Cruz Island, to 0.77 km^2 (190 ac) in canyons on San Clemente Island (Thompson *et al.* 1998). Island fox territory configuration changes after the death and replacement of paired male foxes, but not after the death and replacement of paired females or juveniles, indicating that adult males are involved in territory formation and maintenance (Roemer *et al.* 2001a).

Although island foxes appear monogamous, copulations with individuals other than the mate, and offspring as a result of those unions, are common (Roemer *et al.* 2001a). Courtship activities occur from late January to early March; genetic evidence suggests that inbreeding avoidance occurs (Roemer *et al.* 2001a). Recent endocrine assays on fecal samples from San Miguel Island indicate that, unlike all other canids studied to date, island foxes are induced rather than spontaneous ovulators (*i.e.*, the presence of males is necessary in order for females to go into estrous) (Bauman *et al.* 2001). Young are born from late April through May after a gestation period of approximately 50 days. Island foxes give birth to their young in simple dens, which are usually not excavated by the foxes themselves (Moore and Collins 1995). Rather, any available sheltered site (*e.g.*, brush pile, rock crevice, and hollow stump) is used (Laughrin 1977). Litter size ranges from one to five (average = 2.17). Both island fox care for the young (Garcelon *et al.* 1999). By 2 months of age, young foxes spend most of the day outside the den and will remain with their parents throughout the summer. Some pups disperse from their birth territories by winter, although others may stay on their natal territories into their second year (Coonan 2001). Island foxes can mate at the end of their first year (Collins and Laughrin 1979), although most breeding involves older animals. Coonan *et al.* (1998) found that only 16 percent of females under the age of 2 bred over a 5-year period, in contrast to 60 percent of older females.

Due to the low reproductive output of island foxes, survival of adults is the most important factor influencing population growth rate (Roemer *et al.* 1994; 2001a). Compared with the gray fox, island fox populations are skewed toward older adults (Laughrin 1980; Garcelon 1988). Adult island foxes live an average of 4 to 6 years (Moore and Collins 1995), although this may be an underestimate (Coonan *et al.* 1998).

In the 1970s, island foxes were found at higher densities than any other canid species, likely due to the lack of competition and predation compared with the island foxes' mainland canid counterparts (Laughrin 1980). At the time of Laughrin's early studies, island fox populations were stable on all islands except Santa Catalina (Laughrin 1973). Pre-decline trapping on Santa Cruz Island in 1993 and 1994 reconfirmed that island foxes existed at high densities (Roemer *et al.* 2001a)

San Miguel, Santa Rosa, Santa Cruz, and Santa Catalina island foxes have experienced precipitous declines in the last 6 years (Coonan *et al.* 1998, 2000, and in review; Roemer 1999; Timm *et al.* 2000; Roemer *et al.* in press). Total island fox numbers rangewide have fallen from approximately 6,000 individuals (Roemer *et al.* 1994) to fewer than 1,660 (Tim Coonan, Channel Islands National Park, pers. comm. 2001a). Island fox populations on San Miguel and Santa Cruz islands have declined by an estimated 80 to 90 percent and have a 50 percent chance of extinction over the next 5 to 10 years (Roemer 1999; Roemer *et al.* in press). During the period of decline, island fox population monitoring was not conducted on Santa Rosa Island; however, anecdotal observations and recent trapping efforts showed that a similar decline occurred for this subspecies as well (Roemer 1999; Coonan 2001). Island fox populations on the northern Channel Islands are considered critically endangered and in need of immediate conservation action (Coonan *et al.* 1998; Roemer 1999; Roemer *et al.* 2001b). On Santa Catalina, island foxes are now rare on the larger eastern portion of the island. This decline is thought to be a result of a canine distemper outbreak that swept through the population in 1999 (Timm *et al.* 2000).

San Clemente and San Nicolas islands have island fox populations estimated at more than 500 and 738 individuals, respectively (D. Garcelon, unpublished data; Roemer 2000), although the San Nicolas estimate is likely an overestimate, as it did not factor in habitat suitability (Grace Smith, Department of the Navy, pers. comm. 2001). San Clemente Island has not experienced the sharp declines seen on other islands; however, 13 years of trapping data display a slow decline of island fox since the early 1990s (Garcelon 1999; D. Garcelon, unpublished data). Populations of the San Nicolas Island fox appear to be stable. However, its small population size (Roemer *et al.* 1994), insular nature, lack of resistance to canine distemper and other diseases (Garcelon *et al.* 1992), high densities (Roemer 2000), and low genetic variability (Wayne *et al.* 1991a) increase the vulnerability of this subspecies (Roemer 1999). Protective measures have been put in place on these islands, such as implementing a wildfire management plan and feral cat management program and removing all feral ungulates, to prevent further decline of these two subspecies.

San Miguel Island Fox (Urocyon littoralis littoralis)

The first quantitative surveys for island foxes on San Miguel Island were conducted by Laughrin in the early 1970s (Laughrin 1973). Trap efficiency was high (43 percent) and Laughrin concluded that island fox populations were stable at 2.7 foxes per km^2 (7 foxes per square mile (mi^2)), although this may be an underestimate. In the late 1970s, the island foxes on San Miguel had an average density of 4.6 foxes per sq. km (12 foxes per mi^2) for a total estimated population of 151 to 498 individuals (Collins and Laughrin 1979). Island foxes on San Miguel Island were not surveyed again until the National Park Service (NPS) instituted a long-term population study in 1993 which recorded an average density of 7.7 foxes per sq. km (20 foxes per mi^2) on two trapping grids and estimated the total population at more than 300 foxes (Roemer *et al.* 1994; Coonan *et al.* 1998). A third trapping grid was added the following year, and yielded the highest island fox densities ever recorded to that point (15.8 foxes per km^2 (41 foxes per mi^2) in one study area), resulting in an island-wide estimate of 450 adults (Coonan *et al.* 1998). Annual population monitoring using capture-mark-recapture techniques documented a substantial decline in island fox

populations on San Miguel Island between 1994 and 1999 (Coonan *et al.* 1998; Coonan *et al.* in review). In the last 7 years, estimated population size dropped from as many as 450 adults in 1994 (Coonan *et al.* 1998) to 17 adults currently (T. Coonan, unpublished data). Data from a remote camera survey and from fox sign (scat and tracks) indicate only one fox (a lone female that has evaded capture efforts) exists in the wild on San Miguel Island (Coonan *et al.* in review); the remaining 16 foxes are captive.

In 1999, NPS captured 14 individuals (4 males and 10 females) from the San Miguel Island fox subspecies to protect them from further losses to predation and to initiate a captive propagation program. Captive breeding over the last 2 years has brought the captive San Miguel Island fox population up to 16 adults (5 males and 11 females) and 5 pups (all males). The captive San Miguel Island fox population has high parasite loads, which may affect the health of individual foxes (L. Munson, unpublished data). Until September 2001, all captive San Miguel Island foxes were held in one breeding facility, putting the subspecies in danger of extinction due to a catastrophic event such as wildfire or disease outbreak. The NPS moved half the captive foxes into a second breeding facility on San Miguel Island in October 2001 to minimize this risk (T. Coonan, pers. comm. 2001b).

Santa Rosa Island Fox (Urocyon littoralis santarosae)

The earliest island fox trapping study from Santa Rosa reported a trapping efficiency of 50 percent and a density of 4.2 foxes per km^2 (11 foxes per mi^2) (Laughrin 1973). Little population data has been collected on Santa Rosa Island foxes since Laughrin's studies. However, recent trapping data in 1998 and 2000 as well as anecdotal evidence suggests that Santa Rosa has experienced a decline similar to those on Santa Cruz and San Miguel Islands (Roemer 1999; Coonan 2001). During 132 trap nights in 1998, trap success was 4.8 percent, and only nine individuals were captured (Roemer 1999). Anecdotal sightings by park and ranch staff became much less frequent than in previous years (Coonan 2001).

Believing that fewer than 100 island foxes remained on Santa Rosa Island (T. Coonan pers. comm. 1999), the NPS captured 10 adult foxes (four males and six females) to initiate captive breeding in March 2000. Two seasons of captive breeding have increased the captive population to 22 adults (9 males and 13 females) and 10 pups (3 males and 7 females). The last known fox in the wild on Santa Rosa Island was brought into captivity in May 2001 (T. Coonan, pers. comm. 2001a). As with San Miguel Island, approximately half the captive foxes were moved to a second facility in October 2001 (T. Coonan, pers. comm. 2001b).

Santa Cruz Island Fox (Urocyon littoralis santacruzae)

Santa Cruz Island is the largest of the Channel Islands and has supported the highest known densities of island fox in the past (Laughrin 1973). Laughrin (1971) estimated the island fox population of Santa Cruz Island to be approximately 3,000 individuals. Average density between 1973 and 1977 was 7.9 foxes per km^2 (20.4 foxes per mi^2) (Laughrin 1980). Following Laughrin's studies, island fox populations on Santa Cruz Island were not surveyed again until 1993, when island foxes were found to be at an average density of 8.2 foxes per km^2 (21.2 foxes per mi^2) (Roemer *et al.* 1994). Since that time, the population has decreased from an estimated 1,312 in 1993 to an estimated size of 133 in 1999 (Roemer 1999; Roemer *et al.* 1994; Roemer *et al.* in press). In 1998, trapping efficiency was low (2.9 percent), and island fox density ranged from 0.0 to 2.4 foxes per km^2 (0.0 to 6.2 foxes per mi^2), the lowest ever reported from Santa Cruz Island (Roemer 1999).

Population monitoring efforts in 2001 have yielded captures of 75 individual foxes. Of these, 27 have been outfitted with radio collars. The highest numbers of foxes were captured in the areas of relatively high cover. Five radio-collared fox carcasses have been retrieved, and all deaths have been attributable to predation by golden eagles (David Garcelon, Institute for Wildlife Studies, pers. comm. 2001). The Island Fox Conservation Working Group, a team of experts convened by the NPS to recommend appropriate recovery actions for the island fox, found that "the existence of one pair of golden eagles on the island as of October 1, 2001, will warrant bringing foxes into captivity as the necessary conservative step in preserving the Santa Cruz Island fox population." Intensive trapping efforts to capture and relocate the remaining golden eagles in the spring and summer of 2001 have resulted in three captures; however, four eagles remain on the island (Brian Latta, Santa Cruz Predatory Bird Research Group (SCPBRG), pers. comm. 2001b). Thus, captive breeding of foxes will be initiated on Santa Cruz Island in early 2002 (T. Coonan, pers. comm. 2001b).

Santa Cruz Island is currently occupied by a large feral pig population (estimated at approximately 3,000 to 5,000 individuals), which facilitates the colonization of the island by golden eagles. The Nature Conservancy and the NPS are planning an island-wide pig eradication program which will take years to complete.

Santa Catalina Island Fox (Urocyon littoralis catalinae)

Santa Catalina Island has the largest human population, a large population of domestic dogs, and the highest degree of human activity and accessibility of the Channel Islands. Island fox numbers on Santa Catalina Island have fluctuated widely over the past 30 years. In Laughrin's early 1970s studies, only 2 island foxes were trapped on Santa Catalina Island for a trap efficiency of 6 percent and an average density of 0.1 fox per km^2 (0.3 foxes per mi^2) (Laughrin 1973). This density was 37 percent lower than any other island during this study. The reason for past low island fox numbers on Santa Catalina Island is unknown; the available food and habitats are comparable to that on the other islands. Island fox numbers on Santa Catalina Island increased slightly between 1975 and 1977 with average densities of 0.29 foxes per km^2 (0.77 foxes per mi^2) (Propst 1975) and 0.30 foxes per km^2 (0.8 foxes per mi^2) (Laughrin 1980). Between 1988 and 1991, average density increased, ranging from 2.6 to 12.8 foxes per km^2 (6.7 to 33.1 foxes per mi^2) (Garcelon *et al.* 1991). The Santa Catalina Island fox population increased to an estimated 1,342 foxes by 1994 (Roemer *et al.* 1994).

The Santa Catalina Island fox population has experienced a recent dramatic decline attributed to canine distemper, presumably introduced by domestic dogs, in the eastern portion of the island (Timm *et al.* 2000). Santa Catalina Island is separated into a large eastern side (40,000 acres) and a small western side (8,000 acres) by a narrow isthmus, which has apparently served as a barrier to the canine distemper virus. Trap success on the eastern side dropped from 26 percent in 1998 to 0.96 percent in 1999 and 2000, while remaining stable at approximately 36 percent on the western portion. Two live foxes and one deceased fox recovered from the eastern portion of the island tested positive for canine distemper virus, constituting the first positive record of canine distemper in island foxes (Timm *et al.* 2000). Island fox trapping efforts during 2000 and 2001 captured 137 island foxes on the western end and 37 on the eastern

portion of Santa Catalina Island (D. Garcelon, unpublished data).

A captive propagation program for the Santa Catalina Island fox is currently underway. The Institute for Wildlife Studies captured 16 adults (10 females and 6 males) between February and mid-March 2001 as the founder population for the captive breeding program. Of these, three were pregnant females, which gave birth to a total of 18 pups. Twelve of these pups died within 7 days of birth, likely due to stress to the females from capture during late pregnancy. The six remaining pups will be released onto the east end of the island in the fall of 2001 (Steve Timm, Institute for Wildlife Studies, pers. comm. 2001).

In addition to the captive breeding program, the Santa Catalina Conservancy and the Institute for Wildlife Studies initiated a translocation program in 2001 to repopulate island foxes on the east side of the island. Of the 10 island foxes relocated from the west end to the east end, one has died as a result of trauma, potentially from a vehicle strike (S. Timm, pers. comm. 2001). The remaining nine foxes appear to be alive and healthy.

Previous Federal Action

We published an updated candidate Notice of Review for animals on December 30, 1982 (47 FR 58454). This notice included all six subspecies of island fox in a list of category 2 candidate species. We maintained all six subspecies of island fox as category 2 candidates in subsequent notices: September 18, 1985 (50 FR 37958), January 6, 1989 (54 FR 554), November 21, 1991 (56 FR 58804) and November 15, 1994 (59 FR 58982). As announced in a notice published in the February 28, 1996, **Federal Register** (61 FR 7596), we discontinued the designation of category 2 candidates. Thus, all six subspecies of island fox were not included in this and subsequent notices of review. In our most recent Notice of Review, published on October 30, 2001 (65 FR 54808), we included the San Miguel, Santa Rosa, Santa Cruz and Santa Catalina island foxes as candidate species. Candidate species are those species for which listing is warranted but precluded by other pending listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act.

On June 1, 2000, we received a petition from the Center for Biological Diversity (Center) in Tucson, Arizona, and the Institute for Wildlife Studies in Arcata, California, requesting that we add four subspecies of island fox, the San Miguel Island fox, Santa Rosa Island fox, Santa Cruz Island fox, and Santa Catalina Island fox to the list of endangered species pursuant to the Act. Due to a lack of funding, we did not issue a 90-day finding for the petition. In response to our lack of action on the petition, the Center sent us a 60-day notice of intent to sue on December 4, 2000. This proposed rule satisfies a measure in the settlement agreement with the Center (*Center for Biological Diversity, et al.* v. *Norton*, Civ. No. 01–2063 (JR) (D.D.C.), entered by the Court on October 2, 2001.

Summary of Factors Affecting the Species

Section 4 of the Endangered Species Act and its implementing regulations (50 CFR part 424) issued to implement the listing provisions of the Act establish procedures for adding species to the Federal Lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1) of the Act. These factors and their application to the four island fox subspecies are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range

Habitat on all islands occupied by island foxes has been heavily affected by a history of livestock grazing, cultivation, and other disturbance. A century and a half of overgrazing by non-native herbivores, including sheep (*Ovis aries*), goats (*Capra hircus*), rabbits (*Oryctolagus cuniculus*), deer (*Odocoileus hemionus*), elk (*Cervus elaphus*), cattle (*Bos taurus*), pigs (*Sus scrofa*), and horses (*Equus caballus*) resulted in substantial impacts to the soils, topography, and vegetation of the islands (Coblentz 1980; Johnson 1980; O'Malley 1994; Peart *et al.* 1994). Damage to native island plants and their habitats on the northern Channel Islands by introduced stock and game animals is evidenced by our 1997 listing of 13 endemic island plants as endangered or threatened (62 FR 40954). One result of overgrazing has been the replacement of much of the native coastal sage scrub, chaparral, and oak woodland habitats with other vegetation, especially non-native annual grasses such as *Avena* and *Bromus* spp. (Brumbaugh 1980; Klinger *et al.* 1994). Annual grasslands are less preferred as habitat by island foxes (Laughrin 1977; Kovach and Dow 1982). The California Department of Fish and Game (CDFG), in recommending the retention of the island foxes classification as threatened under State law, cited the continued habitat degradation by herbivorous mammals on Santa Rosa, Santa Cruz, Santa Catalina, and San Clemente islands (CDFG 1987). Since that time, alien species removal programs have eradicated or reduced the introduced herbivore populations on many islands, but pigs remain on Santa Cruz Island; deer, elk, and horses remain on Santa Rosa Island; and pigs and goats remain on Santa Catalina Island. Even though many of the introduced herbivores have been removed, their earlier presence facilitated the invasion of and spread of non-native annual grasses on the islands. This invasion continues to be a problem as native island habitats are replaced by annual grasslands, which constitute less preferred habitats for foxes. On Santa Rosa Island, the continued presence of deer likely results in less available food for foxes, as deer browse the flowering and fruiting branches of native shrubs such as manzanita and toyon, which can be an important component of island fox diets during some seasons.

Even after the removal of non-native grazers on some islands, habitat recovery is slow (Hochberg *et al.* 1979) and threatened by the spread of non-native plants that became established during the ranching era. These exotic species continue to invade and modify island fox habitat resulting in lower diversity of vegetation, less diverse habitat structure, and reduced food availability. The replacement of native shrub communities by non-native annual grasslands has reduced protective cover for island foxes, making them more vulnerable to predation (Roemer 1999; Coonan *et al.* in review). Annual grasslands also offer fewer food resources to foxes, and the seeds of annual grasses can become lodged in the eyes of island foxes, causing damage or temporary blindness (Laughrin 1977).

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Although island foxes were used in the past for pelts and ceremonial uses by Native Americans (Collins 1991b), island foxes are not currently known to be exploited for commercial, recreational, scientific, or educational purposes.

C. Disease or Predation

Predation. Recent island fox declines on San Miguel, Santa Cruz, and Santa Rosa islands have been attributed to predation by golden eagles (Roemer 1999; Coonan *et al.* in review; Roemer *et al.* in press). Roemer (1999) linked 19 of 21 documented island fox mortalities on Santa Cruz Island between April 1994 and July 1997 to golden eagles. On

San Miguel Island, 5 of 7 mortalities of radio-collared foxes were attributed to golden eagle predation during 1998 to 1999 (Coonan *et al.* in review). No data exist from Santa Rosa Island, but due to its location between Santa Cruz and San Miguel islands, island foxes on Santa Rosa Island likely experience similar predation pressures from golden eagles. As island foxes did not evolve under the presence of a large avian predator, they are likely not vigilant towards avian predators, and thus provide an easy target for golden eagles (Roemer *et al.* in press). Golden eagle predation likely continues to be the leading cause of mortality of island foxes on Santa Cruz Island. The deaths of 5 radio-collared foxes during radio-tracking efforts in 2001 have been attributed to golden eagle predation, based on the state of the carcasses and the presence of golden eagle feathers or avian feces at the carcass site (D. Garcelon, pers. comm. 2001).

The current level of golden eagle activity on the northern Channel Islands is historically unprecedented (Paul Collins, Santa Barbara Museum of Natural History, unpublished data). Golden eagles were known to occasionally visit the islands but never to establish residence (Diamond and Jones 1980; Jones and Collins, in prep.). The first known active golden eagle nest from the Channel Islands was located on Santa Cruz Island in 1999 (Gary Roemer, New Mexico State University, pers. comm. 1999; SCPBRG 2001), but golden eagles were likely established on the island as early as 1994 (Roemer *et al.* in press). Island fox remains along with the remains of feral piglets (*Sus scrofa*), ravens (*Corvus corax*), Brandt's cormorants (*Phalacrocorax pencillatus*), and western gulls (*Larus occidentalis*) were found in the nest. In September 1999, surveys by SCPBRG identified 12 resident golden eagles, including possibly five breeding pairs on Santa Cruz Island. Santa Cruz Island is now the main nesting and roosting location for golden eagles on the northern Channel Islands, although one pair of golden eagles may have nested on Santa Rosa Island (B. Latta, pers. comm. 1999). Golden eagles breeding on Santa Cruz Island are thought to "commute" to Santa Rosa and San Miguel islands to feed, where eagles have fewer alternative prey species to island foxes (*i.e.*, no feral pigs as there are on Santa Cruz Island) and foxes have less cover from vegetation to hide them from avian predators (Roemer 1999).

Before golden eagles started utilizing the northern Channel Islands in the 1990s, the only known predator of island foxes was the red-tailed hawk (*Buteo jamaicensis*), which preyed only occasionally on young island foxes (Laughrin 1973; Moore and Collins 1995). The docile and inquisitive nature of the island fox (Laughrin 1977) suggests an evolutionary history lacking predation (Carlquist 1974).

The recent colonization of the northern Channel Islands by golden eagles is likely a combination of two factors: (1) Introduction of exotic mammals on the northern Channel Islands resulting in a historically unprecedented prey base, and (2) the extirpation of bald eagles (*Haliaeetus leucocephalus*) from the islands as a result of dichlorodiphenyltrichloroethane (DDT) poisoning. Historically, the small population of vertebrate island fauna would have provided little prey for golden eagles, which rely on a diet of small terrestrial vertebrates. Before the ranching era on the Channel Islands, transient golden eagles landing on the islands would have found little prey to encourage them to establish permanent residence. Furthermore, nesting bald eagles would have discouraged foraging golden eagles from establishing residence by aggressively defending their already established territories. Bald eagles are represented in the prehistoric fossil record of the northern Channel Islands (Guthrie 1993) and bred there until 1960 when nest failures, as a result of DDT contamination, extirpated them from the northern Channel Islands (Kiff 1980).

Roemer *et al.* (in press) modeled time-energy budgets and predation rates of golden eagles on Santa Cruz Island to determine if the precipitous decline in island foxes could be attributed to predation alone. They concluded that the island fox declines on the northern Channel Islands are a consequence of hyper-predation, defined as when a prey species that can sustain high predation rates subsidizes the extinction of another prey species by acting as an alternate food resource for a shared predator (Courchamp *et al.* 1999). In this case, the large feral pig population enabled the golden eagle to colonize Santa Cruz Island; a resident golden eagle population could not have been supported by the native terrestrial vertebrate fauna (Roemer *et al.* in press). Their model indicates that as few as six golden eagles could have driven the island fox populations to the current low levels. Between 1999 and the present, 19 golden eagles have been translocated from Santa Cruz Island (SCPBRG 2001).

To protect island foxes on the northern Channel Islands from further declines, the National Park Service, the Service, and The Nature Conservancy funded a golden eagle removal program beginning in August of 1999. Between the fall of 1999 and 2000, 13 golden eagles were captured from Santa Cruz Island and relocated to northern California. When trapping efforts ceased in the fall of 2000, an estimated seven golden eagles remained on the northern Channel Islands (Brian Walton, SCPBRG, pers. comm. 2000). Golden eagle trapping was resumed in 2001, with six eagles removed from Santa Cruz Island. Additional golden eagles seem to be coming from the mainland; currently, five eagles (two adult females, one adult male and two subadults) remain on Santa Cruz Island. Due to trap wariness, the abundance of feral pig prey, and the harsh topography of Santa Cruz Island, the remaining golden eagles have proven difficult to trap (B. Latta, pers. comm. 2001a). Thus, despite these efforts to remove golden eagles from the islands, golden eagle predation continues to be the main cause of mortality of island foxes on Santa Cruz Island, and would likely constitute a serious predation threat to any foxes subsequently released from captive breeding programs on Santa Rosa and San Miguel islands.

We are currently investigating the feasibility of reintroducing bald eagles to the northern Channel Islands (Valoppi *et al.* 2000). As part of this feasibility study, releases of juvenile bald eagles to Santa Rosa or Santa Cruz Island could begin as early as 2002 (Dan Welsh, U.S. Fish and Wildlife Service, pers. comm. 2001). The feasibility study is being conducted as a pilot project to assess the potential breeding success of bald eagles on the northern Channel Islands, and will include several aspects of monitoring bald eagle movement and exposure to 2, 2-Bis (p-chlorophenyl)-1, 1-dechloroethylene (DDE), the metabolized form of DDT. The presence of territorial golden eagles on the islands may hinder bald eagle reintroduction, because territorial golden eagles may chase away non-nesting bald eagles (B. Latta, pers. comm. 2001a). Currently, the NPS is in the process of capturing golden eagles on the northern Channel Islands as part of an overall island fox recovery strategy. The presence of territorial bald eagles on the northern Channel Islands may assist in discouraging transient golden eagles from establishing breeding territories on the islands. However, the success of bald eagle introduction efforts is uncertain, and would take years to discern, due to the long time it takes for bald eagles to reach sexual maturity (4 years or more). Therefore, if

reintroduction efforts are successful, bald eagles will not nest on this island until 2006. To ensure that no golden eagles return to the northern Channel Islands, a large resident bald eagle population would be necessary, because Santa Cruz Island is large enough for many eagle breeding territories.

Disease. On Santa Catalina Island, the large sudden decline in island foxes has been attributed to canine distemper, most likely brought to the island by a domestic dog (Timm *et al.* 2000). The steep and sudden pattern of decline on Santa Catalina Island is more indicative of a disease outbreak rather than the slower decline due to predation seen on the northern Channel Islands (Timm *et al.* 2000). In addition to positive testing for canine distemper in foxes caught on the east end of Santa Catalina Island, the evidence suggesting a disease-related decline versus other causes are: (1) The population decline on Santa Catalina Island is of a similar magnitude (90 percent) as on the northern Channel Islands, but has occurred within 1 year rather than the steady 6-year decline seen on San Miguel, Santa Cruz, and Santa Rosa Islands; (2) the declines on the northern islands are island-wide, while the geographically restricted western population on Santa Catalina Island has remained relatively healthy; and (3) sick foxes have been seen on Santa Catalina Island but not on the northern islands (G. Roemer, pers. comm. 2000).

Two healthy adult foxes caught on the east end of Santa Catalina Island in 1999 tested positive for canine distemper, constituting the first positive records of canine distemper in island fox. A necropsy of one island fox identified the cause of death as canine distemper (Timm *et al.* 2000). No island foxes tested positive for canine distemper in a previous comprehensive serologic survey of all islands (Garcelon *et al.* 1992), nor did any foxes from San Clemente, Santa Cruz, or San Miguel test positive for canine distemper virus during the period (1994 to 1997) of the fox decline on the northern islands (Roemer *et al.* in press). The absence of antibodies to canine distemper virus in any island foxes during these studies implies that either the virus had never been introduced to the islands, or the species is highly susceptible to the virus and none survive infection. As the closely related mainland gray fox is highly susceptible to canine distemper virus, island foxes likely have high susceptibility as well (Garcelon *et al.* 1992). This hypothesis is supported by the deaths of two island foxes in zoos from the inappropriate administration of modified live canine distemper vaccine (Linda Munson, University of California at Davis, pers. comm. 2001). Although the outbreak of canine distemper that precipitated the sudden decline of island foxes on Santa Catalina Island has apparently run its course, the Santa Catalina Island subspecies remains susceptible to another outbreak of the disease due to the continued exposure to domestic dogs that may transmit the virus.

Administration of an experimental canine distemper vaccine developed for ferrets (another species highly susceptible to canine distemper) to some island foxes captured on Santa Catalina Island has had promising preliminary results (S. Timm, pers. comm. 2001). With further testing, the vaccine may prove useful for protecting island foxes on all islands from future canine distemper outbreaks.

All island fox populations have been surveyed for other canine diseases and parasites. Although island foxes are known to carry antibodies for a variety of canine diseases, none of these could explain the type or geographic distribution of the observed decline on the northern Channel Islands (Garcelon *et al.* 1992; Coonan *et al.* 2000; Roemer 1999; Roemer *et al.* in press). Although pathology work has not identified a specific cause of population decline (with the exception of canine distemper virus on Santa Catalina Island), some underlying diseases or parasites may also affect population viability or individual health (L. Munson, pers. comm. 2001). The most common antibodies found in island foxes are canine adenovirus and canine parvovirus (Garcelon *et al.* 1992). Canine herpesvirus, coronavirus, leptospirosis, and toxoplasmosis have been recorded at low levels (Garcelon *et al.* 1992, Coonan *et al.* 2000, Roemer *et al.* in press). The relative occurrence of canine adenovirus was similar before and after the population crashes on these islands, while antibodies for parvovirus were detected from a small number of samples from 1994, but not detected in 1995 or 1997 samples (Coonan *et al.* 2000). Canine adenovirus may be typically present in the island fox populations (Garcelon *et al.* 1992), with little effect on individual health. Canine parvovirus has been found in other wild canids and can result in mortality of pups, prior to emergence from the den (Garcelon *et al.* 1992).

Canine heartworm (*Dirofilaria immitis*) has been documented in four island fox subspecies (San Miguel, Santa Cruz, Santa Rosa, and San Nicolas island foxes; Roemer *et al.* 2000). Despite the high seroprevalence or occurence of heartworm in these populations (between 58 and 100 percent in 1997–98), heartworm is not thought to be responsible for the decline of island foxes for the following reasons: (1) Seroprevalence on San Nicolas Island, where the population is stable, is higher than on Santa Cruz Island, where the population is decreasing (Roemer *et al.* in press), (2) heartworm was present in all four subspecies in or before 1988, pre-dating the population declines, (3) seroprevalence in the San Miguel population was high in 1994, when densities on that island reached the highest levels ever recorded for island foxes, and (4) necropsy results have found few adults worms in the hearts of island foxes and no evidence of heartworm disease (Roemer 1999). However, heartworm may have contributed to mortality in older foxes (Roemer *et al.* in press), exacerbating the conservation crisis for the island fox.

Necropsies performed at the University of California at Davis have detected an unusually high degree of thyroid atrophy (characterized by a complete absence of colloid in the thyroid gland) in island foxes from San Clemente, Santa Catalina, San Nicolas, and San Miguel islands (L. Munson, pers. comm. 2001). The cause of thyroid atrophy in island foxes has yet to be investigated; thyroid atrophy in other species has been linked to high levels of polychlorinated biphenyl (PCBs). It is unclear how thyroid atrophy is affecting fox populations (L. Munson, pers. comm. 2001). Pathology work on 89 foxes has also detected an increased prevalence of emaciation (20 percent pre-1994; 47 percent post-1994); it is unknown why increased emaciation has occurred.

Island foxes held in captivity are likely to be exposed to increased parasite loads due to artificial densities and unnaturally low mobility. On San Miguel Island, captive island foxes have been found to have high parasite loads of *Angiocaulus* spp., *Spirocerca* spp., and *Uncinaria* spp. (L. Munson, unpublished data). These parasites, thought to have had minor effects on the population in the past (see Coonan *et al.* in review), may have significant effects on individual fox health due to the facilitation of their spread and density by the captive breeding situation. For example, fox handlers have noticed high incidence of rectal bleeding in the captive San Miguel population, likely due to *Uncinaria* (a type of hookworm). Hookworms feed on the inner lining of the small intestine and cause loss of blood or hemorrhaging to the host, sometimes to the point of severe anemia and death. The NPS is working to address this threat by developing a

treatment process for hookworm in coordination with the veterinary team of the Island Fox Conservation Working Group. Captive breeding programs to facilitate recovery are planned to continue for these four island fox subspecies. Therefore, exposure to increased parasitic loads will continue to be a threat.

D. The Inadequacy of Existing Regulatory Mechanisms

The primary causes of the decline of the island fox are the degradation of habitat by introduced herbivores, unprecedented predation by golden eagles, and the rapid transmission of canine distemper through the Santa Catalina subspecies. Federal, State and local laws have not been sufficient to prevent past and ongoing losses of island foxes.

In 1971, the State of California listed the island fox as State-rare (a designation later changed to threatened), which means that it may not be taken without a special (*i.e.*, scientific collecting) permit (CRC, Title 14, Section 41) or an incidental take permit issued pursuant to section 2081 of the California Endangered Species Act. However, this protection applies generally only to actual possession or intentional killing of individual animals, or actual death of individual animals incidental to otherwise lawful activity, and may afford little or no protection to habitat. State law does not require Federal agencies to avoid or compensate for impacts to the island fox and its habitat. There are currently no State regulatory mechanisms designed to protect island foxes on federally managed lands, including San Miguel, Santa Rosa, and Santa Cruz islands.

Federal law governs the management of NPS and Navy lands, including the National Environmental Policy Act (NEPA), the Endangered Species Act, the National Park Service Organic Act, and the Marine Mammal Protection Act. Many federally listed plant and animals species, including 14 listed plants, the brown pelican (*Pelecanus occidentalis*), the southern sea otter (*Enhydra lutris nereis*), the island night lizard (*Xantusia riversiana*), and the western snowy plover (*Charadrius alexandrinus nivosus*), occur on the Channel Islands. NPS management is further dictated by Department of the Interior policies and NPS policies and guidelines, including NPS guidelines for natural resources management (NPS 1991), and the Channel Islands National Park Management Plan (NPS 1985). Both the NPS and the Navy have adequate authority to manage the land and activities under their administration to benefit the welfare of the island fox. The NPS developed a draft recovery plan for island foxes on the northern Channel Islands to guide their recovery options. Steps are being taken to eliminate feral pigs on Santa Cruz Island and decrease predation pressure on island foxes by relocating golden eagles from the northern Channel Islands. However, in some cases because of conflicting management concerns, other priorities, and lack of funding, conservation efforts are not proceeding as quickly as necessary. In addition to removing golden eagles, their feral pig prey base must be removed to prevent golden eagles from recolonizing the islands.

San Miguel Island is under the jurisdiction of the Navy, but the NPS assists in managing the natural, historic, and scientific values of San Miguel Island through a Memorandum of Agreement (MOA) originally signed in 1963, an amendment signed in 1976, and a supplemental Interagency Agreement (IA) signed in 1985. The MOA states that the "paramount use of the islands and their environs shall be for the purpose of a missile test range, and all activities conducted by or in behalf of the Department of the Interior on such islands, shall recognize the priority of such use" (Navy 1963). In addition to San Miguel, Santa Cruz and Santa Rosa lie wholly within the Navy's Pacific Missile Test Center (PMTC) Sea Test Range. The 1985 IA provides for PMTC to have access and use of portions of those islands, for expeditious processing of any necessary permits by NPS, and for mitigation of damage of park resources from any such activity (Navy 1985). Should the Navy no longer require use of the islands, NPS would seek authorization for the islands to be preserved and protected as units within the NPS system (Navy 1976). To date, conflicts concerning protection of sensitive resources on San Miguel Island have not occurred. However, if the Navy were to resume use of San Miguel Island, there are no mechanisms in place to protect the island fox.

On islands managed by Federal agencies, prohibitions against bringing domestic pets to the islands exist. These prohibitions are difficult to enforce and violations are known to occur. Boaters have been observed bringing pets onshore to all three northern Channel Islands with island fox populations. On Santa Catalina Island, health certificates or quarantines are not necessary to bring domestic pets to the islands, exposing island foxes to increased risk of disease. On Santa Rosa Island, a ranching enterprise operating under a special use permit from the NPS is allowed to have ranch dogs on the island provided that the dogs have proof of vaccination in compliance with Santa Barbara County regulations, which requires only rabies shots.

Federal protection of golden eagles by the Bald and Golden Eagle Protection Act of 1962, as amended, has increased the golden eagle population on mainland California (B. Walton, pers. comm. 2000). As a result, golden eagles have expanded their range in order to establish breeding territories. The protections afforded golden eagles limit management alternatives to protect island foxes. Lethal removal of golden eagles would require a depredation permit from the Service. Such a permit would allow golden eagles to be taken by firearms, traps, or other suitable means except by poison or from aircraft (50 CFR 22.23). The regulatory restrictions on taking golden eagles limit the effectiveness of golden eagle removal, as the very steep topography on Santa Cruz Island makes lethal removal of golden eagles from the ground unfeasible.

California State law (Food and Agricultural Code 31752.5) prohibits lethal control of feral cats unless cats are held for a minimum of six days. This law prevents the Catalina Island Conservancy from taking steps to eradicate feral cats on the island, as it does not have adequate facilities to hold cats (see Factor E).

E. Other Natural or Manmade Factors Affecting Its Continued Existence

Several other factors, including competition from introduced species and stochastic environmental factors, may have negative effects on island foxes and their habitats.

Competition with feral cats. CDFG, in recommending the retention of the threatened classification of the island fox under State law, cited competition with feral cats on Santa Catalina, San Nicolas, and San Clemente islands (CDFG 1987). The effects of cats on island foxes are unknown and may differ among islands. Feral cats outweigh island fox by an average of 2 to 1 and may negatively affect island foxes by direct aggression, predation on young, disease transmission, and competition for food resources (Laughrin 1978). Island fox population decreases on San Nicolas Island were accompanied by a concomitant increase in feral cat populations (Laughrin 1978). The presence of feral cats increases the risk of a transfer of infectious disease to island foxes (Roelke-Parker *et al.* 1996). Feral cats have been found to displace island foxes from habitats on San Nicolas Island (Kovach and Dow 1985).

As has been seen on San Nicolas and San Clemente islands, feral cats are extremely difficult to eradicate, requiring ongoing yearly programs to keep numbers controlled (Phillips and Schmidt 1997). No feral cat control exists on Santa Catalina Island due to local ordinances and resistance to lethal control from the residents of the island.

Lack of genetic variability. As a population becomes genetically homogenous, its susceptibility to disease, parasites, and extinction increases (O'Brien and Evermann 1988) and its ability to evolve and adapt to environmental change is diminished (Templeton 1994). The four island fox subspecies that have suffered large population declines could be at risk of having reduced genetic variability. Such population or demographic "bottlenecks" may result in reductions in genetic variation, depending on the size of the bottleneck and the growth rate of the population afterward (Meffe and Carroll 1997). In fact, at least one previously variable microsatellite locus is now fixed (i.e., one DNA marker no longer exhibits any genetic variability) in the San Miguel Island captive population following the decline (Gray *et al.* 2001). The San Nicolas Island fox has an unusually low degree of genetic variability (Gilbert *et al.* 1990; Wayne *et al.* 1991a; Goldstein *et al.* 1999), which may have been due to a major historical bottleneck (Gilbert *et al.* 1990). A lack of genetic variability can correspond to a reduced resistance to disease or physical abnormalities due to inbreeding. Due to the low numbers of individuals in the captive breeding programs and the lack of wild populations on San Miguel and Santa Rosa Islands, the lack of genetic variability threatens the island foxes from these islands.

Stochastic environmental and population factors. Island endemic species have high extinction risk due to isolation and small population sizes (MacArthur and Wilson 1967). Because the island fox is restricted to small islands, it is more subject to the effects of environmental perturbations and decline of birth rates due to low densities (*i.e.*, Allee effects; Allee 1931) than species occurring on the mainland. Reduced population size exposes the island fox to both catastrophic environmental events (*e.g.*, drought, wildfire, or disease) and demographic factors (*e.g.*, skewed sex ratios) that could cause or hasten extinction. Wildfires could affect island foxes by reducing food availability, altering vegetation or resulting in the death of individual foxes (especially pups during the denning season). On San Miguel and Santa Rosa islands, which no longer have wild populations, the concentration of all island foxes into small geographic areas increases the vulnerability of these subspecies to disease outbreaks. The extremely small island fox population sizes on San Miguel, Santa Rosa and Santa Cruz islands puts those populations at risk of extinction due to demographic factors as well. For example, 4 of the 14 original island foxes brought into the captive propagation program on San Miguel Island were male. Skewed sex ratios may hinder recovery efforts for the species, because island foxes typically form long-standing pair bonds and unpaired females have never been recorded to raise a litter.

Road mortalities. The fearless nature of island foxes, coupled with relatively high vehicle traffic on the southern Channel Islands, results in a number of vehicle collisions each year on islands with human populations (Wilson 1976; Garcelon 1999; G. Smith, unpublished data). For example, on San Nicolas Island where vehicle collisions are the largest documented mortality source, an average of 13 fox carcasses attributed to vehicle collisions are recovered each year (G. Smith, unpublished data). On San Clemente Island, vehicle strikes claimed a minimum of 26 foxes between the years 1991 and 1995 (Garcelon 1999), while in earlier times, Wilson (1976) estimated that approximately 25 island foxes were killed each year. Although no records have been kept, vehicle collisions on Santa Catalina Island likely cause a number of deaths comparable to San Nicolas and San Clemente Islands. Vehicle collisions on the northern Channel Islands are uncommon due to low traffic volume and the rough unpaved nature of most roads.

We have carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by these taxa in determining to propose this rule. The precipitous declines of all four island fox subspecies addressed in this rule are due to the indirect and direct effects of the introduction of non-native mammals on all islands. Other threats include disease and competition from feral cats, road mortality on Santa Catalina Island, and natural events which could diminish or destroy the small extant populations. Existing regulatory mechanisms are inadequate to protect these taxa. Based on our evaluation, the preferred action is to list the San Miguel Island fox, Santa Cruz Island fox, Santa Rosa Island fox, and Santa Catalina Island fox as endangered.

Critical Habitat

Critical habitat is defined in section 3 of the Act as: (i) The specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the Act, on which are found those physical or biological features (I) essential to the conservation of the species and (II) that may require special management consideration or protection and, (ii) specific areas outside the geographical area occupied by a species at the time it is listed in accordance with the provisions of section 4 of the Act, upon a determination that such areas are essential for the conservation of the species. "Conservation" means the use of all methods and procedures needed to bring the species to the point at which listing under the Act is no longer necessary.

Section 4(a)(3) of the Act, as amended, and implementing regulations (50 CFR 424.12) require that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time the species is determined to be endangered or threatened. Our regulations (50 CFR 424.12(a)(1) state that the designation of critical habitat is not prudent when one or both of the following situations exist—(1) The species is threatened by taking or other human activity, and identification of critical habitat can be expected to increase the degree of threat to the species, or (2) such designation of critical habitat would not be beneficial to the species.

In the case of these subspecies, designation of critical habitat would not be expected to increase the threats to the subspecies and may provide some benefits. The primary regulatory effect of critical habitat is the section 7 requirement that agencies refrain from taking any action that destroys or adversely modifies critical habitat. While a critical habitat designation for habitat currently occupied by this species would not be likely to change the section 7 consultation outcome because an action that destroys or adversely modifies such critical habitat would also be likely to result in jeopardy to the species, there may be instances where section 7 consultation would be triggered only if critical habitat is designated. Examples could include unoccupied habitat or occupied habitat that may become unoccupied in the future. Designating critical habitat may also produce some educational or informational benefits. Therefore, designation of critical habitat is prudent for the San Miguel, Santa Rosa, Santa Cruz, and San Clemente Island foxes.

However, our budget for listing activities is currently insufficient to allow us to immediately complete all the listing actions required by the Act. Listing these four island fox subspecies without designation of critical habitat will allow us to concentrate our limited resources on higher priority critical habitat and other listing actions, while allowing us to put in place protections needed for the conservation of these island fox subspecies without further delay. This is consistent with section 4(b)(6)(C)(i) of the Act, which states that final listing decisions may be issued without critical habitat designations when it is essential that such determinations be promptly published. We will prepare a critical habitat designation in the future at such time when our available resources allow it.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages public awareness and results in conservation actions by Federal, State, and local agencies, private organizations, and individuals. The Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Funding may be available through section 6 of the Act for the State to conduct recovery activities. The protection required of Federal agencies and the prohibitions against certain activities involving listed animals are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer with the Service on any action that is likely to jeopardize the continued existence of a species proposed for listing or result in destruction or adverse modification of proposed critical habitat. If a species is subsequently listed, section 7(a)(2) of the Act requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of the species or destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into consultation with the Service, under section 7(a)(2) of the Act. San Miguel and Santa Rosa islands are entirely federally owned and managed. Although 75 percent of Santa Cruz Island is owned by The Nature Conservancy, the entire island lies within the Channel Islands National Park and Channel Islands National Marine Sanctuary, and The Nature Conservancy and the NPS coordinate many of the resource management activities occurring on the island. Santa Catalina Island is the only island fox locality that does not have substantial Federal involvement. Federal agency actions that may affect the San Miguel, Santa Rosa, Santa Cruz, and Santa Catalina island foxes and may require conference and/or consultation with us include, but are not limited to, those within the jurisdiction of the U.S. Army Corps of Engineers, the Navy, the NPS, and the National Oceanic and Atmospheric Administration.

The listing of the San Miguel, Santa Rosa, Santa Cruz, and Santa Catalina island foxes as endangered would provide for the development and implementation of a recovery plan for these taxa. Such a plan will bring together Federal, State, and local efforts for the conservation of these taxa. The plan will establish a framework for agencies to coordinate activities and to cooperate with each other in conservation efforts. The plan will set recovery priorities and estimate the costs of the tasks necessary to accomplish the priorities. It will also describe site-specific management actions necessary to achieve the conservation of the San Miguel, Santa Rosa, Santa Cruz, and Santa Catalina island foxes. Additionally, pursuant to section 6 of the Act, we would be able to grant funds to the State for management actions promoting the protection and recovery of the San Miguel, Santa Rosa, Santa Cruz, and Santa Catalina island foxes.

The Act and its implementing regulations set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.21 for endangered species, make it illegal for any person subject to the jurisdiction of the United States to take (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect; or to attempt any of these), import or export, ship in interstate commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It is also illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Further, it is illegal for any person to attempt to commit, to solicit another person to commit, or to cause to be committed, any of these acts. Certain exceptions apply to our agents and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife under certain circumstances. Regulations governing permits are codified at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in the course of otherwise lawful activities. Permits are also available for zoological exhibitions, educational purposes, or special purposes consistent with the purposes of the Act. Requests for copies of the regulations on listed species and inquiries about prohibitions and permits may be addressed to the U.S. Fish and Wildlife Service, Endangered Species Permits, 911 NE 11th Avenue, Portland, Oregon 97232–4181 (503/231–2063, facsimile 503/231–6243).

As published in the **Federal Register** on July 1, 1994 (59 FR 34272), it is our policy to identify to the maximum extent practicable at the time a species is listed those activities that would or would not constitute a violation of section 9 of the Act. The intent of this policy is to increase public awareness of the effect of this listing on proposed and ongoing activities within the species' range.

We believe that, based on the best available information, the following actions are not likely to result in a violation of section 9, provided these activities are carried out in accordance with existing regulations and permit requirements:

(1) Possession, delivery, or movement, including interstate transport and import into or export from the United States, involving no commercial activity, of dead specimens of these taxa that were collected prior to the date of publication in the **Federal Register** of a final regulation adding these taxa to the list of endangered species;

(2) Actions that may affect the San Miguel, Santa Rosa, Santa Cruz, or Santa Catalina island foxes that are authorized, funded, or carried out by a Federal agency, when the action is conducted in accordance with an incidental take statement issued by us under section 7 of the Act;

(3) Actions that may affect the Santa Cruz or Santa Catalina island foxes that are not authorized, funded, or carried out by a Federal agency, when the action is conducted in accordance with

an incidental take permit issued by us under section 10(a)(1)(B) of the Act. To obtain a permit, an applicant must develop a habitat conservation plan and apply for an incidental take permit that minimizes and mitigates impacts to the species to the maximum extent practicable; and

(4) Actions that may affect the San Miguel, Santa Rosa, Santa Cruz, or Santa Catalina island foxes that are conducted in accordance with the conditions of a section 10(a)(1)(A) permit for scientific research or to enhance the propagation or survival of the species.

We believe that the following actions could result in a violation of section 9; however, possible violations are not limited to these actions alone:

(1) Unauthorized collecting, trapping, capturing, killing, harassing, sale, delivery, or movement, including interstate, and foreign commerce, or harming, or attempting any of these actions, of San Miguel, Santa Rosa, Santa Cruz, or Santa Catalina island foxes without a permit (research activities where San Miguel, Santa Rosa, Santa Cruz, or Santa Catalina island foxes are trapped or captured will require a permit under section 10(a)(1)(A) of the Endangered Species Act);

(2) The transportation of unvaccinated domestic animals, which transmit diseases or parasites to island foxes causing serious injury or death on the San Miguel, Santa Rosa, Santa Cruz, or Santa Catalina islands;

(3) Destruction or alteration of occupied habitat of the San Miguel, Santa Rosa, Santa Cruz, or Santa Catalina island foxes (e.g., excavating, compacting, grading, discing, or removing soil or vegetation);

(4) Destruction or alteration of San Miguel, Santa Rosa, Santa Cruz, or Santa Catalina island fox dens, even when seasonally unoccupied when the destruction results in irreparable harm; and

(5) Discharges or dumping of toxic chemicals, or other pollutants into San Miguel, Santa Rosa, Santa Cruz, or Santa Catalina island fox habitat, including dens or burrows, that results in death or injury of the species or that results in degradation of their occupied habitat.

Questions regarding whether specific activities would constitute a violation of section 9 should be directed to our Ventura Fish and Wildlife Office (see **ADDRESSES** section).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial, trade, or other relevant data concerning any threat (or lack thereof) to San Miguel, Santa Rosa, Santa Cruz, or Santa Catalina island foxes;

(2) The reasons why any habitat should or should not be determined to be critical habitat pursuant to section 4 of the Act;

(3) Additional information concerning the essential habitat features (biotic and abiotic), range, distribution, and population size of these taxa; and

(4) Current or planned activities in the subject area and their possible impacts on these taxa.

If you wish to comment, you may submit your comments and materials concerning this proposal by any one of several methods, as listed above in **ADDRESSES.** If you submit comments by e-mail, please submit comments as an ASCII file format and avoid the use of special characters and encryption. Please include "Attn: [RIN 1018–AI28]" and your name and return address in your e-mail message. If you do not receive a confirmation from the system that we have received your e-mail message, contact us directly by calling our Ventura Fish and Wildlife Office at phone number 805/644–1766. Please note that this e-mail address will be closed out at the termination of the public comment period.

Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. Commenters may request that we withhold their home address, which we will honor to the extent allowable by law. In some circumstances, we may also withhold a commenter's identity, as allowable by law. If you wish us to withhold your name or address, you must state this request prominently at the beginning of your comment. However, we will not consider anonymous comments. To the extent consistent with applicable law, we will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

You may request a public hearing on this proposal. Your request for a hearing must be made in writing and filed within 45 days of the date of publication of the proposal in the **Federal Register**. Address your requests to the Field Supervisor (see **ADDRESSES** section).

Peer Review

In accordance with our policy published on July 1, 1994 (59 FR 34270), we will seek expert opinions of at least three appropriate independent specialists regarding this proposed rule. The purpose of such review is to ensure listing decisions are based on scientifically sound data, assumptions, and analysis. We will send copies of this proposed rule immediately following publication in the **Federal Register** to these peer reviewers. We will invite these peer reviewers to comment, during the public comment period, on the specific assumptions and conclusions regarding the proposed designation of critical habitat.

Executive Order 12866

Executive Order 12866 requires agencies to write regulations that are easy to understand. We invite your comments on how to make this proposal easier to understand including answers to questions such as the following: (1) Is the discussion in the **SUPPLEMENTARY INFORMATION** section of the preamble helpful in understanding the proposal? (2) Does the proposal contain technical language or jargon that interferes with its clarity? (3) Does the format of the proposal (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce its clarity? What else could we do to make the proposal easier to understand?

National Environmental Policy Act

We have determined that an environmental impact statement and environmental assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Act. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Paperwork Reduction Act

This rule does not contain any information collection requirements for which Office of Management and Budget (OMB) approval under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, is required. Any information collection related to the rule pertaining to permits for endangered and threatened species has

OMB approval and is assigned clearance number 1018–0094. This rule does not alter that information collection requirement. For additional information concerning permits and associated requirements for endangered wildlife species, see 50 CFR 17.22.

Executive Order 13211

On May 18, 2001, the President issued an Executive Order (E.O. 13211) on regulations that significantly affect energy supply, distribution, and use. Executive Order 13211 requires agencies to prepare Statements of Energy Effects when undertaking certain actions. This rule is not expected to significantly affect energy supplies, distribution, or use. Therefore, this action is not a significant energy action and no Statement of Energy Effects is required.

Proposed Regulation Promulgation

Accordingly, we hereby propose to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—[AMENDED]

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500, unless otherwise noted.

2. Section 17.11(h) is amended by adding the following, in alphabetical order under MAMMALS, to the List of Endangered and Threatened Wildlife:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

Species		Historic range	Vertebrate population where endangered or threatened	Status	When listed	Critical habitat	Special rules

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Parts 20 and 21

RIN 1018–AI07

Migratory Bird Hunting and Permits; Regulations for Managing Harvest of Light Goose Populations; Extension of Comment Period

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; extension of comment period.

SUMMARY: The U.S. Fish and Wildlife Service (Service) is extending the comment period on a proposed rule published in the **Federal Register** on October 12, 2001. The rule would implement our preferred alternative identified in a Draft Environmental Impact Statement (DEIS) on light goose management. The rule would authorize new methods of take for light goose hunting. In addition, the rule would revise the regulations for the management of overabundant light goose populations and modifies the conservation order that will increase take of such populations.

DATES: Written comments on the proposed rule must be received on or before January 25, 2002.

ADDRESSES: Comments on the proposed rule should be mailed to Chief, Division of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, ms 634—ARLSQ, 1849 C Street NW., Washington, DC 20240. Requests for copies of the DEIS should be mailed to the above address. Copies of the DEIS can be downloaded from the Division of Migratory Bird Management web site at *http://migratorybirds.fws.gov/issues/snowgse/tblcont.html*. Comments on the DEIS should be sent to the above address. Alternatively, comments may be submitted electronically to the following address: *white_goose_eis@fws.gov*.

FOR FURTHER INFORMATION CONTACT: Jon Andrew, Chief, Division of Migratory Bird Management, (703) 358–1714.

SUPPLEMENTARY INFORMATION: On September 28, 2001 (66 FR 49668), and October 5, 2001 (66 FR 51274), notices were published in the **Federal Register** announcing the availability of our DEIS on light goose management. The DEIS evaluates four management alternatives to address habitat destruction and agricultural depredations caused by light geese on various breeding, migration, and wintering areas: (1) No Action or a continuation to manage light goose populations through existing wildlife management policies and practices (Alternative A); (2) modify harvest regulation options and refuge management (Alternative B) (PREFERRED); (3) implement direct agency control of light goose populations on migration and wintering

areas in the U.S. (Alternative C); (4) seek direct light goose population control on breeding grounds in Canada (Alternative D). Our preferred alternative (Alternative B) modifies existing light goose hunting regulations to expand methods of take during normal hunting season frameworks. In addition, we propose to create a conservation order to allow take of light geese outside of normal hunting season frameworks. On October 12, 2001 (66 FR 52077) we published a proposed rule in the **Federal Register** that would implement our preferred alternative. On November 7, 2001 (66 FR 56266) we published a correction in the **Federal Register** that added New Jersey to the list of States eligible to implement special light goose regulations. We inadvertently omitted New Jersey from the list of States contained in the proposed rule.

We have received a request to extend the comment period on the DEIS. The Service invites careful consideration by all parties, and welcomes serious scrutiny from those committed to the long-term conservation of migratory birds. Therefore, to facilitate substantive public review, we are also extending the comment period on the proposed rule from December 11, 2001, to January 25, 2002. Extension of the comment period on the DEIS is made through a separate notice in this issue of the **Federal Register**.

In order to be considered, electronic submission of comments must include your name and postal mailing address; we will not consider anonymous comments. All comments received, including names and addresses, will become part of the public record. The public may inspect comments during normal business hours in Room 634—Arlington Square Building, 4401 N. Fairfax Drive, Arlington, Virginia. Requests for such comments will be handled in accordance with the Freedom of Information Act and the Council on Environmental Quality's National Environmental Policy Act regulations [40 CFR 1506.6(f)]. Our practice is to make comments available for public review during regular business hours. Individual respondents may request that we withhold their home address from the record, which we will honor to the extent allowable by law. If a respondent wishes us to withhold his/her name and/or address, this must be stated prominently at the beginning of the comment.

Dated: November 21, 2001.

Joseph E. Doddridge,

Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310–55–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[I.D. 112701C]

Fisheries of the Northeastern United States; Northeast Monkfish Fishery; Scoping Process

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of intent to prepare a Supplemental Environmental Impact Statement (SEIS) and notice of scoping process; request for comments.

SUMMARY: The New England and Mid-Atlantic Fishery Management Councils (Councils) announce their intent to prepare Amendment 2 to the Monkfish Fishery Management Plan (FMP) and to prepare an SEIS in accordance with the National Environmental Policy Act (NEPA) to analyze the impacts of any proposed management measures on the human environment. The Councils, with New England Council having the lead authority, jointly manage the fishery. The amendment would be developed pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The Councils also formally announce the initiation of a public process to determine the scope of issues to be addressed in the environmental impact statement (EIS). The purpose of this notice is to alert the interested public of the scoping process and to provide for public participation in compliance with NEPA.

DATES: The Councils will discuss and take scoping comments at public meetings in January and February 2002. See **SUPPLEMENTARY INFORMATION** for specific dates and times. Written scoping comments must be received on or before 5 p.m. local time, February 11, 2002.

ADDRESSES: Written comments and requests for copies of the scoping document and other information should be directed to Paul J. Howard, Executive Director, New England Fishery Management Council, 50 Water Street, Newburyport, MA, 01950, Telephone (978) 465–0492. Comments may also be submitted via facsimile (fax) to (978) 465–3116. Comments and requests for information should be marked "Monkfish Amendment 2." The Council will not accept unsigned faxes or comments by email.

FOR FURTHER INFORMATION CONTACT: Contact Paul J. Howard, Executive Director, telephone (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Background

The FMP, implemented November 8, 1999 (64 CFR 54732, October 7, 1999), contains management programs for the Northern and Southern Fishery Management Areas (NFMA and SFMA, respectively) based on incremental reductions in fishing mortality rates to stop overfishing and rebuild monkfish stocks by 2009. The FMP calls for elimination of the directed fishery for monkfish in Year 4, starting May 1, 2002, unless a plan review during Year 3 indicates that the Councils should use another management measure. The 31st Northeast Regional stock Assessment Workshop SAW 31) conducted by NMFS in 2000 concluded that the current proxy-based biological reference points on which the plan is based are unreliable, and that current fishing mortality rates could not be reliably estimated. Based on this assessment, the Councils are considering a 1-year delay in the Year 4 default measures.

A new assessment, scheduled for January, 2002 will address many of the issues raised at SAW 31, and incorporate data collected during a cooperative survey with the monkfish industry in the spring of 2001. The Councils intend to consider this new scientific information and take appropriate action to modify the FMP so that the goal of rebuilding the stocks can be achieved by 2009.

In addition, while the Councils were developing the original Monkfish FMP, a new fishery for monkfish emerged in the waters south of the North Carolina/Virginia border. Some vessels from that area began participating in the fishery shortly after publication of a notice of control date for limited entry into the Atlantic monkfish fishery on February 27, 1995 (60 FR 10574). These vessels did not hold any northeast fishery permits and, therefore, did not receive timely notice of the actions related to the monkfish fishery being considered by the Councils. Although the management unit for the FMP was initially defined as ending at the North Carolina/Virginia border, which would have excluded those vessels from the FMP provisions, the boundary was

shifted southward (to the North Carolina/South Carolina border) during the development of the FMP. Meanwhile, the public hearing document mistakenly retained the original management unit definition with the North Carolina/Virginia boundary as its Southern border. As a result of the circumstances described above, a number of vessels failed to qualify for limited access permits. Because of some confusion regarding the correct southern boundary line, the Councils are considering options for addressing this issue in Amendment 2.

Third, in response to a U.S. District Court Order (*AOC* v. *Daley*, September 14, 2000), NMFS and the Councils are re-evaluating the essential fish habitat (EFH) components of the FMP. NMFS has already initiated scoping on this matter (66 FR 46979, September 10, 2001) and the Councils will consider scoping comments submitted in that process when preparing Amendment 2. NMFS and the Councils will jointly develop EFH analysis and management alternatives to minimize adverse effects of fishing activities on EFH for consideration in the FMP.

Scoping Process

The public will have an opportunity to provide oral comments at the January meetings of the Councils and may submit written comments through February 11, 2002 (see **DATES** and **ADDRESSES**). The New England Council meeting is scheduled for January 15-17, 2002 at the Courtyard by Marriott, Portsmouth, NH and the Mid-Atlantic Council meeting for January 29-31 at the Meadowlands Plaza Hotel, Secaucus, NJ. The Councils will notify the public of the specific times on the agendas where the public scoping comments will be heard when those agendas are finalized.

All persons affected by, or otherwise interested in monkfish fisheries management, are invited and encouraged to participate in this process, and to assist the Councils in developing the scope of issues to be considered and alternatives to be analyzed in the SEIS. The Councils will also use the scoping process to identify and eliminate from consideration issues that are not significant.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 4, 2001.

Valerie L. Chambers,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Farm Service Agency

Request for Extension of a Currently Approved Information Collection

AGENCY: Farm Service Agency, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the intent of the Farm Service Agency (FSA) to request an extension of currently approved information collection for a regulation used in support of the FSA Farm Loan Programs (FLP). This renewal does not involve any revisions to the program rules.

DATES: Comments on this notice must be received on or before February 8, 2002 to be assured consideration.

FOR FURTHER INFORMATION CONTACT: Michael Cumpton, Senior Loan Officer, USDA, Farm Service Agency, Farm Loan Programs, Loan Servicing Division, 1400 Independence Avenue, SW., STOP 0523, Washington, DC 20250–0523; Telephone (202) 690–4014; Electronic mail: *mike.cumpton@usda.gov.*

SUPPLEMENTARY INFORMATION:

Title: (7 CFR 1965–A) Servicing of Real Estate Security for Farmer Program Loans and Certain Note-Only Cases.

OMB Control Number: 0560–0158.

Expiration Date: Jan. 31, 2002.

Type of Request: Extension of a Currently Approved Information Collection.

Abstract: This regulation promulgates provisions of sections 331 and 335 of the Consolidated Farm and Rural Development Act (Act) (7 U.S.C. Secs. 1981 and 1985). Section 331 of the Act, in part, authorizes the Secretary of Agriculture to modify, subordinate and release terms of security instruments, leases, contracts, and agreements entered into by FSA. That section also authorizes transfers of security property as the Secretary deems necessary to carry out the purpose of the loan or protect the Government's financial interest. Section 335 of the Act provides servicing authority for real estate security, operation or lease of realty, disposition of property, conveyance of real property interests of the United States, including dispositions for easements and rights of way. The information collection required by this subpart relates to a program benefit recipient or loan borrower requesting action on security which they own which has been mortgaged to the Agency to secure a Government loan. The information to be collected will primarily be financial data not already on file, such as borrower asset values.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average .42 hours per response.

Respondents: Individuals or households, businesses or other for profit farming entities.

Estimated Number of Respondents: 15,246.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 6,436 hours.

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. These comments should be sent to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 and to Michael Cumpton, Senior Loan Officer, USDA, FSA, Farm Loan Programs, Loan Servicing Division, 1400 Independence Avenue, SW., STOP 0523, Washington, DC 20250–0523.

Comments will be summarized and included in the request for OMB approval of the information collection. All comments will also become a matter of public record.

Signed in Washington, DC, on November 20, 2001.

John W. Williams,

Acting Administrator, Farm Service Agency.

AGENCY: Office of the Under Secretary for Food Safety, USDA.

ACTION: Notice of public meeting, request for comments.

SUMMARY: The Office of the Under Secretary for Food Safety, U.S. Department of Agriculture (USDA), is sponsoring a public meeting on December 12, 2001, to provide information and receive public comments on agenda items that will be discussed at the Eighth Session of the Codex Committee on Meat and Poultry Hygiene, which will be held in Wellington, New Zealand, on February 18–22, 2002. The Under Secretary recognizes the importance of providing interested parties with information about the Codex Committee on Meat and Poultry Hygiene of the Codex Alimentarius Commission and to address items on the Agenda for the 8th Session of the Committee.

DATES: The public meeting is scheduled for Wednesday, December 12, 2001, from 9 a.m. to 12 p.m.

ADDRESSES: The public meeting will be held at the Washington Plaza Hotel in the Diplomat Room, 10 Thomas Circle, Washington, DC.

To receive copies of the documents referenced in the notice contact the FSIS Docket Room, U.S. Department of Agriculture, Food Safety and Inspection Service, Room 102, Cotton Annex, 300 12th Street, SW., Washington, DC 20250–3700. The documents will also be accessible via the World Wide Web

at the following address: *http://www.codexalimentarius.net/agend.htm.*

If you have comments, please send an original and two copies to the FSIS Docket Room at the address above and reference Docket 01–038N and the document number. All comments submitted will be available for public inspection in the Docket Room between 8:30 a.m. and 4:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Patrick J. Clerkin, Associate U.S. Manager for Codex, U.S. Codex Office, Food Safety and Inspection Service, Room 4861, South Building, 1400 Independence Avenue, SW., Washington, DC 20250, Phone: (202) 205–7760, Fax: (202) 720–3157.

SUPPLEMENTARY INFORMATION:

Background

The Codex Alimentarius Commission was established in 1962 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Codex is the major international organization for encouraging fair international trade in food and protecting the health and economic interests of consumers. Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to ensure that the world's food supply is sound, wholesome, free from adulteration, and correctly labeled. In the United States, USDA, FDA, and EPA manage and carry out U.S. Codex activities.

The Codex Executive Committee (CEC), at its 47th Session in 2000, asked that the Codex Committee on Meat Hygiene reconvene to redraft the existing codes on meat hygiene so that they reflect contemporary developments. The CEC also asked that the scope of the existing codes include poultry hygiene. These recommendations were confirmed by the 24th Session of the Codex Alimentarius Commission in July 2001, and it was agreed that the name of the Committee would be amended to the Codex Committee on Meat and Poultry Hygiene (CCMPH).

Issues To Be Discussed at the Public Meeting

The provisional agenda items to be discussed during the public meeting are:

—Proposed Draft General Principles of Meat Hygiene

—Proposed Draft Code of Hygienic Practice for Fresh Meat

Public Meeting

At the December 10th public meeting, the agenda items will be described and discussed, and attendees will have the opportunity to pose questions and offer comments. Written comments should state that they relate to activities of the 8th Session of the Codex Committee on Meat and Poultry Hygiene.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, in an effort to better ensure that minorities, women, and persons with disabilities are aware of this notice, FSIS will announce it and provide copies of this **Federal Register** publication in the FSIS Constituent Update. FSIS provides a weekly Constituent Update, which is communicated via fax to over 300 organizations and individuals. In addition, the update is available on-line through the FSIS web page located at *http://www.fsis.usda.gov*. The update is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, recalls, and any other types of information that could effect or would be of interest to our constituents/stakeholders. The constituent fax list consists of industry, trade, and farm groups, consumer interest groups, allied health professionals, scientific professionals, and other individuals that have requested to be included. Through these various channels, FSIS is able to provide information to a much broader, more diverse audience.

For more information and to be added to the constituent fax list, fax your request to the Congressional and Public Affairs Office, at (202) 720–5704.

F. Edward Scarbrough,

U.S. Manager for Codex Alimentarius.

DEPARTMENT OF AGRICULTURE

Natural Resources Conservation Service

Hackberry Draw Watershed, Eddy County, NM

AGENCY: Natural Resources Conservation Service

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Regulations (40 CFR part 1500); and the Natural Resources Conservation Service Rules (7 CFR part 650); the Natural Resources Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the rehabilitation of two dams (Sites 1 and 2) and a floodwater diversion (FD–1) in the Hackberry Draw Watershed.

FOR FURTHER INFORMATION CONTACT: Rosendo Treviño III; State Conservationist; Natural Resources Conservation Service; 6200 Jefferson, NE; Albuquerque, NM 87109–3734; telephone 505–761–4400.

SUPPLEMENTARY INFORMATION: The environmental assessment (EA) of this federally assisted action indicates that the project will not cause significant local, regional, or national effects on the human environment. As a result of these findings, Rosendo Treviño III, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project purpose is flood damage prevention. The action includes the rehabilitation of two floodwater retarding dams and one floodwater diversion. The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency; various Federal, state, and local agencies; and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address. Basic data developed during the EA are on file and may be reviewed by contacting Rosendo Treviño III. No administrative action on implementation of the proposed action will be taken until 30 days after the date of this publication in the **Federal Register**.

Rosendo Treviño III,

State Conservationist.

BILLING CODE 3410–15–P

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

Georgia Transmission Corporation; Notice of Finding of No Significant Impact

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice of finding of no significant impact.

SUMMARY: Notice is hereby given that the Rural Utilities Service (RUS) has made a finding of no significant impact (FONSI) with respect to a request from Georgia Transmission Corporation for assistance from the RUS to finance the

construction of a 230 kV transmission line in Mitchell County, Georgia.

FOR FURTHER INFORMATION CONTACT: Bob Quigel, Environmental Protection Specialist, Engineering and Environmental Staff, RUS, Stop 1571, 1400 Independence Avenue, SW., Washington, DC 20250–1571, telephone (202) 720–0468, fax (202) 720–0820, e-mail at *bquigel@rus.usda.gov*.

SUPPLEMENTARY INFORMATION: No comments were received by RUS via e-mail or telephone during the 30-day comment period, which closed on November 5, 2001. However, mail service to the U.S. Department of Agriculture has been disrupted during the comment period due to screening of mail for potential anthrax contamination. Any person that sent written comments on the environmental assessment through the U.S. Postal Service to RUS during the comment period should contact RUS at the telephone number listed above within 5 working days of this notice to ensure their comments are considered prior to project construction. Should RUS conclude that any written comments that may have been submitted during the official comment period warrant further review and would cause reconsideration of RUS' decision, the public would be so notified. Otherwise, this FONSI notice will serve as the final public notice of this project.

The project is to be named the Raccoon Creek Transmission Line. Georgia Transmission Corporation proposes to construct the 230 kV electric transmission line south of Albany, Georgia, in Mitchell County. The approximate length of the transmission line is 6 miles. It will traverse between Plant Mitchell located west of Route 19 near the Dougherty/Mitchell County line to the 500/230 kV Raccoon Creek Substation which is currently under development near the intersection of Jackson Darry Road and Stagecoach Road.

Copies of the FONSI are available for review at, or can be obtained from, RUS at the address provided herein or from Mr. John Lasseter, Georgia Transmission Corporation, 2100 East Exchange Place, Tucker, Georgia 30085–2088, telephone (770) 270–7710. Mr. Lasseter's e-mail address is *john.lasseter@gatrans.com*.

Dated: December 4, 2001.

Alfred Rodgers,

Acting Assistant Administrator, Electric Program, Rural Utilities Service.

BILLING CODE 3410–15–P

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

Georgia Transmission Corporation; Notice of Finding of No Significant Impact

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice of finding of no significant impact.

SUMMARY: Notice is hereby given that the Rural Utilities Service (RUS) has made a finding of no significant impact (FONSI) with respect to a request from Georgia Transmission Corporation for assistance from the RUS to finance the construction of a 230 kV transmission line and a 230/25 kV substation in Hall County, Georgia.

FOR FURTHER INFORMATION CONTACT: Bob Quigel, Environmental Protection Specialist, Engineering and Environmental Staff, RUS, Stop 1571, 1400 Independence Avenue, SW., Washington, DC 20250–1571, telephone (202) 720–0468, fax (202) 720–0820, e-mail at *bquigel@rus.usda.gov*.

SUPPLEMENTARY INFORMATION: No comments were received by RUS via e-mail or telephone during the 30-day comment period, which closed on November 23, 2001. However, mail service to the U.S. Department of Agriculture has been disrupted during the comment period due to screening of mail for potential anthrax contamination. Any person that sent written comments on the environmental assessment through the U.S. Postal Service to RUS during the comment period should contact RUS at the telephone number listed above within 5 working days of this notice to ensure their comments are considered prior to project construction. Should RUS conclude that any written comments that may have been submitted during the official comment period warrant further review and would cause reconsideration of RUS' decision, the public would be so notified. Otherwise, this FONSI notice will serve as the final public notice of this project.

The transmission line will tap off of the existing 230 kV Gainesville #2—Winder transmission line at a point approximately ½ mile southeast of the junction of Lee Land Road and Webb Girth Road. The transmission line will traverse approximately 8.25 miles in a southwesterly direction paralleling Georgia Power Company's 500 kV Norcross-Oconee transmission line to the proposed 230/25 kV Spout Spring Substation which is to be located approximately 2000 feet east of the intersection of Williams Road and Spout Springs Road. The transmission line and substation would require virtually no clearing or major earth movement activities. The transmission line support structures will be between 60 and 80 feet tall. The substation will require 2.25 acres.

Copies of the FONSI are available for review at, or can be obtained from, RUS at the address provided herein or from Ms. Wende Martin, Georgia Transmission Corporation, 2100 East Exchange Place, Tucker, Georgia 30085–2088, telephone (770) 270–7591. Ms. Martin's e-mail address is *wende.martin@gatrans.com*.

Dated: December 4, 2001.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–863]

Notice of Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order; Honey From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of antidumping duty order and amendment to final determination.

EFFECTIVE DATE: December 10, 2001.

FOR FURTHER INFORMATION CONTACT: Angelica Mendoza, Charles Rast, or Donna Kinsella at (202) 482–3019, (202) 482–1324, or (202) 482–0194, respectively; Antidumping and Countervailing Duty Enforcement Group III, Office Eight, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

The Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Act) by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department of Commerce (Department) regulations are to the regulations codified at 19 CFR part 351 (April 2000).

Scope of Order

For purposes of this investigation, the products covered are natural honey, artificial honey containing more than 50 percent natural honey by weight, preparations of natural honey containing more than 50 percent natural honey by weight, and flavored honey. The subject merchandise includes all grades and colors of honey whether in liquid, creamed, comb, cut comb, or chunk form, and whether packaged for retail or in bulk form.

The merchandise subject to this investigation is currently classifiable under subheadings 0409.00.00, 1702.90.90, and 2106.90.99 of the harmonized tariff schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and U.S. Customs Service (Customs) purposes, the Department's written description of the merchandise under investigation is dispositive.

Amendment to the Final Determination

On September 26, 2001, the Department determined that honey from the People's Republic of China (PRC) is being, or is likely to be, sold in the United States at less than fair value (LTFV), as provided in section 735(a) of the Tariff Act. *See Notice of Final Determination of Sales at Less Than Fair Value; Honey from the People's Republic of China*, 66 FR 50608 (October 4, 2001). On October 10, 2001, respondents Zhejiang Native Produce and Animal By-Products Import and Export Corporation (Zhejiang), Inner Mongolia Autonomous Region Native Produce and Animal By-Products Import and Export Corporation (Inner Mongolia), and Kunshan Foreign Trade Co., Ltd. (Kunshan), filed timely allegations that the Department made ministerial errors in the final determination. On October 15, 2001, petitioners filed timely comments in rebuttal to respondents' ministerial error allegations.

Section 735(e) of the Act defines a "ministerial error" to include "errors in addition, subtraction, or other arithmetic function, clerical errors resulting from inaccurate copying, duplication, or the like, and any other type of unintentional error which the administering authority considers ministerial." *See also* section 351.224(f) of the Department's regulations.

Comment 1: Zhejiang, Inner Mongolia, and Kunshan argue that the Department erred in its calculation of total raw honey costs by including the freight expenses associated with raw honey purchased during the period of investigation (POI). They argue that the Department should have included only the freight expenses associated with raw honey consumed in the production of processed honey during the POI.

Petitioners argue that, contrary to respondents' claims, the Department did in fact calculate raw honey expenses based on the freight costs associated with raw honey consumed in the production of processed honey during the POI.

Department's Position: We disagree with Zhejiang, Inner Mongolia, and Kunshan that our method of calculating inland freight for raw honey constitutes a ministerial error. Our computations for each respondent are shown in the final determination analysis memoranda. *See* Memorandum to the File from Fred Baker through Donna Kinsella, dated September 26, 2001 at Appendix V and Memoranda to the File from Angelica Mendoza through Donna Kinsella, dated September 26, 2001 at Appendix V. These memoranda show that we used both raw honey purchase volumes and raw honey consumption volumes in calculating the total raw honey inland freight costs. We used the volumes of raw honey *consumed* (column E) to represent the quantity to which freight costs should be attributed. We used the volumes of raw honey *purchased* (column C) as the basis for allocating a percentage of the total cost of inland freight to each individual supplier of raw honey. The volumes purchased from each supplier during the POI were the only supplier-specific volumes on the record, and were identified in the analysis memorandum for each company as the quantities we intended to use for allocation purposes.

Comment 2: Kunshan argues that the Department used an incorrect surrogate labor rate to calculate direct labor, indirect labor, and packing labor.

Department's Position: We agree. In the final determination, the Department calculated Kunshan's direct labor, indirect labor, and packing labor, using a standard country-wide rate from the Department's website, but from a country other than the PRC. We have corrected this error in this amended final determination.

We are amending the final determination of the antidumping duty investigation of honey from the PRC to reflect the correction of a ministerial error with respect to Kunshan. As a result of this correction the margin has also changed for the four cooperative respondents who were not selected as mandatory respondents but who were given separate rates. Those four respondents are High Hope, Shanghai Eswell, Anhui, and Henan. The revised final weighted-average dumping margins are shown below.

Antidumping Duty Order

On November 19, 2001, the U.S. International Trade Commission (the ITC) notified the Department of its final determination, pursuant to section 735(b)(1)(A)(i) of the Act, that an industry in the United States is materially injured by reason of LTFV imports of subject merchandise from the PRC. In addition, the ITC made an affirmative determination that critical circumstances exist with respect to subject imports from the PRC for which the Department made affirmative critical circumstances determinations. In rendering its critical circumstances determination, we note that three ITC Commissioners found that critical circumstances exist with regard to such merchandise, and three Commissioners found that critical circumstances do not exist with regard to imports of subject merchandise from the PRC. Section 771(11) of the Act provides that-if the Commissioners voting on a determination "are evenly divided as to whether the determination should be affirmative or negative, the ITC shall be deemed to have made an affirmative determination." We consider that the tie-vote provision in section 771(11) applies to critical circumstances determinations.

We note that critical circumstances decisions are referred to as both "determinations" and "findings" in the statute. Moreover, while the legislative history will sometimes refer to the ITC's critical circumstances decisions as "findings" (*see, e.g.*, H.R. Rep. No. 96–317, at 69 (1979), these decisions are more often identified as "determinations." *See, e.g.*, S. Rep. No. 96–249, at 74 (1979); H.R. Rep. No. 103–826 (Part 1), at 50 (1994). Since the terms "findings" and "determinations" are used interchangeably in the statute and legislative history, the use of one or the other does not preclude the application of section 771(11) to the ITC's consideration of the critical circumstances issue.

Congress promulgated the critical circumstances provision in order "to provide prompt relief to domestic industries suffering from large volumes of, or a surge over a short period of, imports and to deter exporters whose merchandise is subject to an investigation from circumventing the intent of the law by increasing their exports to the United States during the period between initiation of an investigation and a preliminary determination by the [Department]." H.R. Rep. 96–317, at 63 (1979). In

amending the critical circumstances provisions in 1988, Congress developed "an improved critical circumstances procedure [that] will significantly strengthen antidumping and countervailing duty procedures by revitalizing a provision that has up to now been ineffective." H.R. Rep. No. 100–576, at 611 (1988). Considering this legislative history, we conclude that Congress did not intend to limit the availability of retroactive relief in cases such as this one to only those instances where two-thirds of the ITC votes to grant such relief. Moreover, as noted above, the ITC itself explicitly stated in its final injury determination that it made "an affirmative determination that critical circumstances exist with respect to subject imports from China for which Commerce made affirmative critical circumstances determinations." *See Honey from Argentina and China*, Inv. Nos. 701–TA–402 and 731–TA–892–893 (Final), USITC Pub., 3470 (November 19, 2001).

Therefore, for all the reasons discussed above, we consider the ITC to have made an affirmative critical circumstances determination. The Department's finding in this regard is consistent with the Department's treatment of this issue in previous critical circumstances cases involving tie votes at the ITC. *See Notice of Amendment of Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Certain Preserved Mushrooms from the PRC*, 64 FR 8308 (February 19, 1999) and *Notice of Antidumping Order: Coumarin from the People's Republic of China*, 60 FR 7751 (February 9, 1995).

In accordance with section 736(a)(1) of the Act, the Department will direct Customs to assess, upon further advice by the Department, antidumping duties equal to the amount by which the normal value of the subject merchandise exceeds the U.S. price of the subject merchandise for all relevant entries of honey from the PRC. These antidumping duties will be assessed on all unliquidated entries of honey from the PRC entered, or withdrawn from warehouse, for consumption on or after May 11, 2001, the date on which the Department published its notice of preliminary determination for this investigation in the **Federal Register**, except for subject merchandise exported by Kunshan, High Hope, Zhejiang, or other companies not specifically named below. For merchandise exported by Kunshan, High Hope, Zhejiang, or by other companies not specifically named below, we are directing the Customs Service to assess antidumping duties on all unliquidated entries of the subject merchandise that are entered, or withdrawn from warehouse, for consumption on or after February 10, 2001, the date 90 days prior to the date of publication of the preliminary determination in the **Federal Register** (*see Notice of Preliminary Determination of Sales at Less Than Fair Value; Honey from the PRC*, 66 FR 24101, (May 11, 2001)), in accordance with the critical circumstances finding in the final determination.

On or after the date of publication of this notice in the **Federal Register**, Customs must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins noted below:

Exporter/Manufacture	Margin (percent)	Critical circumstances
Inner Mongolia	57.13	No.
Kunshan	49.60	Yes.
Zhejiang	25.88	Yes.
High Hope	45.46	Yes.
Shanghai Eswell	45.46	No.
Anhui	45.46	No.
Henan	45.46	No.
PRC-wide Entity	183.80	Yes.

The "PRC-wide" rate applies to all exporters in the PRC of subject merchandise not specifically listed above.

In accordance with section 735(c)(1)(B) of the Act, we are directing the United States Customs Service to continue suspending liquidation of all imports of the subject merchandise from the PRC. Customs shall require a cash deposit or the posting of a bond equal to the weighted-average amount by which normal value exceeds the export price as indicated in the chart above. These suspension-of-liquidation instructions will remain in effect until further notice.

This notice constitutes the antidumping duty order with respect to honey from the PRC, pursuant to section 736(a) of the Act. Interested parties may contact the Department's Central Records Unit, room B–099 of the main Commerce building, for copies of an updated list of the antidumping duty orders currently in effect.

This determination and order are issued and published in accordance with sections 735(d), 736(a), and 777(i)(1) of the Act.

Dated: November 28, 2001.

Richard W. Moreland,

Acting Assistant Secretary for Import Administration.

[FR Doc. 01–30468 Filed 12–7–01; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–357–812]

Notice of Antidumping Duty Order; Honey From Argentina

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Antidumping Duty Orders.

EFFECTIVE DATE: December 10, 2001.

FOR FURTHER INFORMATION CONTACT: Melissa Blackledge at (202) 482–3518 or Donna Kinsella at (202) 482–0194, Antidumping and Countervailing Duty Enforcement Group III, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

Applicable Statute and Regulations: Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Tariff Act) by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department of Commerce's (the Department's) regulations refer to the regulations codified at 19 CFR part 351 (2000).

Scope of the Order

For purposes of this order, the products covered are natural honey, artificial honey containing more than 50 percent natural honey by weight, preparations of natural honey containing more than 50 percent natural honey by weight, and flavored honey. The subject merchandise includes all grades and colors of honey whether in liquid, creamed, comb, cut comb, or chunk form, and whether packaged for retail or in bulk form.

The merchandise subject to this order is currently classifiable under subheadings 0409.00.00, 1702.90, and 2106.90.99 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and U.S. Customs Service (U.S. Customs) purposes, the Department's written description of the merchandise under investigation is dispositive.

Antidumping Duty Order

In accordance with section 735(a) of the Tariff Act, as amended, the Department made its final determination that honey from Argentina is being sold at less than fair value (*see Notice of Final Determination*

of Sales at Less Than Fair Value: Honey From Argentina, 66 FR 50611 (October 4, 2001)). On November 9, 2001, the Department issued an amended final determination (*see Notice of Amended Final Determination of Sales at Less Than Fair Value: Honey*, 66 FR 58434 (November 21, 2001)). On November 13, 2001, the International Trade Commission (the Commission) notified the Department of its final determination pursuant to section 735(b)(1)(A)(i) of the Tariff Act that an industry in the United States is materially injured by reason of less-than-fair-value imports of subject merchandise from Argentina.

In accordance with section 736(a)(1) of the Tariff Act, the Department will direct Customs officers to assess, upon further advice by the Department, antidumping duties equal to the amount by which the normal value of the merchandise exceeds the export price (or constructed export price) of the merchandise for all relevant entries of honey from Argentina. These antidumping duties will be assessed on all unliquidated entries of honey from Argentina entered, or withdrawn from warehouse, for consumption on or after May 11, 2001, the date on which the Department published its notice of preliminary determination in the **Federal Register** (66 FR 24108). Effective on the date of publication of the order, customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins as noted below. The "All Others" rate applies to all exporters of honey not specifically listed.

Article VI.5 of the General Agreement on Tariffs and Trade (GATT 1994) prohibits assessing antidumping duties on the portion of the margin attributable to an export subsidy. In this case, the product under investigation is subject to a countervailing duty investigation. *See Notice of Final Affirmative Countervailing Duty Determination: Honey from Argentina*, 66 FR 50613 (October 4, 2001). Therefore, for all entries of honey from Argentina entered, or withdrawn from warehouse, for consumption on or after the date on which the order in the companion countervailing duty investigation is published in the **Federal Register**, we will request for duty deposit purposes that the Customs Service deduct the portion of the margin attributable to export subsidies as determined in the countervailing duty investigation. The antidumping duty cash deposit rates, as adjusted for export subsidies, are as follows:

Producer/manufacturer/ exporter	Cash deposit rate (percent)
Asociacion Cooperativas Argentinas (ACA)	31.92
Radix S.R.L. (Radix)	27.04
ConAgra Argentina	55.15
All Others	30.24

This notice constitutes the antidumping duty order with respect to honey from Argentina. Interested parties may contact the Department's Central Records Unit, room B–099 of the main Commerce building, for copies of an updated list of antidumping duty orders currently in effect.

This order is published in accordance with section 736(a) of the Tariff Act.

Dated: November 30, 2001.

Richard W. Moreland,

Acting Assistant Secretary for Import Administration.

[FR Doc. 01–30469 Filed 12–7–01; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[C–357–813]

Notice of Countervailing Duty Order: Honey From Argentina

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 10, 2001.

FOR FURTHER INFORMATION CONTACT: Thomas Gilgunn at (202) 482–4236, or Holly Hawkins at (202) 482–0414, Office of AD/CVD Enforcement VII, Group III, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

The Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the Tariff Act of 1930, as amended (the Act). In addition, unless otherwise indicated, all citations to the Department of Commerce (the Department) regulations refer to the regulations codified at 19 CFR part 351 (2000).

Scope of Order

The merchandise subject to this investigation is natural honey, artificial honey containing more than 50 percent natural honeys by weight, preparations of natural honey containing more than 50 percent natural honeys by weight, and flavored honey. The subject merchandise includes all grades and colors of honey whether in liquid, creamed, combs, cut comb, or chunk form, and whether packaged for retail or in bulk form.

The merchandise subject to this investigation is currently classifiable under subheadings 0409.00.00, 1702.90, and 2106.90.99 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and U.S. Customs Service (Customs) purposes, the Department's written description of the merchandise under investigation is dispositive.

Countervailing Duty Order

In accordance with section 705(d) of the Act, on October 4, 2001, the Department published in the **Federal Register** its final affirmative determination in the countervailing duty investigation of Honey from Argentina (66 FR 50613). On November 19, 2001, the International Trade Commission (ITC) notified the Department of its final determination, pursuant to section 705(b)(1)(A)(i) of the Act, that an industry in the United States is materially injured by reason of imports of honey from Argentina.

Therefore, countervailing duties will be assessed on all unliquidated entries of honey from Argentina entered, or withdrawn from warehouse, for consumption on or after March 13, 2001, the date on which the Department published its preliminary countervailing duty determination in the **Federal Register**, and before July 11, 2001, the date that the Department instructed the U.S. Customs Service to terminate the suspension of liquidation in accordance with section 703(d) of the Act, and on all entries and withdrawals on or after the date of publication of this countervailing duty order in the **Federal Register**. Section 703(d) of the Act states that the suspension of liquidation pursuant to a preliminary determination may not remain in effect for longer than four months. Entries of honey made on or after July 11, 2001, and prior to the date of publication of this order in the **Federal Register** are not liable for the assessment of countervailing duties due to the Department's termination, effective July 11, 2001, of suspension of liquidation.

In accordance with section 706 of the Act, the Department will direct U.S. Customs officers to reinstate the suspension of liquidation effective the date of publication of this notice in the **Federal Register** and to assess, upon

further advice by the Department pursuant to section 706(a)(1) of the Act, countervailing duties for each entry of the subject merchandise in an amount based on the countervailable subsidy rate for the subject merchandise.

On or after the date of publication of this notice in the **Federal Register**, U.S. Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the countervailable subsidy rate noted below. In accordance with section 777A(e)(2)(B) of the Act, we have calculated an aggregate or industry-wide rate for all of the producers/exporters of honey under investigation. We have determined that the total estimated countervailable subsidy rate is 4.53 percent *ad valorem*. However, due to a program-wide change, we have established a cash deposit rate of 5.85 percent *ad valorem* in accordance with section 351.526(a) of the Department's regulations.

This notice constitutes the countervailing duty order with respect to honey from Argentina pursuant to section 706(a) of the Act. Interested parties may contact the Central Records Unit, for an updated list of countervailing duty orders currently in effect.

This countervailing duty order is published in accordance with section 706(a) of the Act and 19 CFR 351.211.

Dated: November 28, 2001.

Richard W. Moreland,

Acting Assistant Secretary, for Import Administration.

DEPARTMENT OF COMMERCE

International Trade Administration

[C–437–805]

Sulfanilic Acid From Hungary: Postponement of Preliminary Determination of Countervailing Duty Investigation

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of postponement of preliminary determination.

SUMMARY: The Department of Commerce is postponing the preliminary determination of the countervailing duty investigation of sulfanilic acid from Hungary. This postponement is made pursuant to section 703(c) of the Tariff Act of 1930, as amended by the Uruguay Round Agreements Act.

EFFECTIVE DATE: December 10, 2001.

FOR FURTHER INFORMATION CONTACT: Melani Miller at (202) 482-0116, Office of AD/CVD Enforcement I, Group I, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Ave, NW., Washington, DC 20230.

Postponement of Preliminary Determination

The Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 ("the Act") by the Uruguay Round Agreements Act. All citations to the Department of Commerce's ("the Department") regulations are to 19 CFR Part 351 (2001).

Statutory Time Limits

Section 703(b)(1) of the Act, requires the Department to make a preliminary determination in a countervailing duty investigation within 65 days after the date on which the Department initiates an investigation. However, if the Department concludes that the parties concerned are cooperating and determines pursuant to section 703(c) of the Act that the case is extraordinarily complicated and additional time is necessary to make the preliminary determination, according to section 703(c) of the Act, the Department may postpone making the preliminary determination until no later than 130 days after the date of initiation of the investigation.

Background

On October 18, 2001, the Department initiated the countervailing duty investigation of sulfanilic acid from Hungary. See Notice of Initiation of Countervailing Duty Investigation: Sulfanilic Acid from Hungary, 66 FR 54229 (October 26, 2001). Currently, the preliminary determination must be issued by December 24, 2001.

Postponement of Preliminary Determination

Because of the complexity of certain issues in this investigation (*e.g.*, change in ownership and privatization and new subsidy allegations), it is not practicable to complete the preliminary determination within the original time limit. *See* December 4, 2001 memorandum to Richard W. Moreland, *"Extension of Time Limit for the Preliminary Determination: Countervailing Duty Investigation of Sulfanilic Acid from Hungary."* Therefore, pursuant to 703(c) of the Act and 19 CFR 351.205(b)(2), the Department is postponing the preliminary determination until no later than February 25, 2002.

We are issuing and publishing this notice in accordance with sections 703(c)(2) and 777(i)(1) of the Act.

Dated: December 4, 2001.

Bernard T. Carreau.

Acting Assistant Secretary, for Import Administration.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

Minority Business Development Agency

[Docket No. 000724217–1278–04]

Amendment to Selection Procedures To Include Site Visits

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: This notice announces the Minority Business Development Agency's (MBDA) amendment of prior **Federal Register** notices published by MBDA that identified selection procedures for MBDA's Minority Business Development Center Program and its Native American Business Development Center Program. MBDA amends the selection procedures to provide that the National Director or his designee reserves the right to conduct a site visit to the location of qualified applicants receiving an average of at least 70% of the total points available for all four evaluation criterion.

DATES: December 10, 2001.

FOR FURTHER INFORMATION CONTACT: Ms. Juanita E. Berry at (202) 482–3262.

SUPPLEMENTARY INFORMATION: Under Executive Order 11625, MBDA provides business development services to persons who are members of groups determined by the U. S. Department of Commerce to be socially or economically disadvantaged, and to business concerns owned and controlled by such individuals.

MBDA has determined that site visits to qualified applicants would support MBDA's selection and would confirm the applicant's stated ability to best fulfill MBDA's Funding Priorities, particularly identifying and working to meet the needs of minority businesses seeking to obtain large-scale contracts with institutional customers, as set out

in the prior **Federal Register** Notices (65 FR 52069 and 66 FR 58990).

Therefore, MBDA's prior **Federal Register** notices (65 FR 52069 and 66 FR 41202 and 66 FR 58990) are hereby amended to provide that the National Director or his designee reserves the right to conduct a site visit to applicant organizations receiving an average of at least 70% of the total points available for all four evaluation criterion in order to assist with the application of the selection procedures provided at 65 FR 52083 and 52095 and 66 FR 59000.

The Department of Commerce Pre-Award Notification Requirements for Grants and Cooperative Agreements contained in the **Federal Register** notice of October 1, 2001 (66 FR 49917), are applicable to this notice.

Executive Order 12866: This notice was determined to be not significant for purposes of E.O. 12866.

Administrative Procedure Act: The provisions of the Administrative Procedure Act requiring notice of proposed rulemaking, the opportunity for public participation, and a delay in effective date, are inapplicable because this notice is a matter relating to public property, loans, grants, benefits, or contracts 5 U.S.C. 553(a)(2),

Regulatory Flexibility Act: Because a notice of proposed rulemaking and opportunities for public comment are not required to be given for this notice by 5 U.S.C. 553 or by any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 are inapplicable.

Executive Order 13132: This notice does not contain policies with Federalism implications as that term is defined in Executive Order 13132.

Authority: 15 U.S.C. 1512 and Executive Order 11625.

Dated: December 4, 2001.

Juanita E. Berry,

Federal Register Liaison Officer, Minority Business Development Agency.

Ronald N. Langston,

National Director, Minority Business Development Agency.

[FR Doc. 01–30416 Filed 12–7–01; 8:45 am]

[Docket No. 011113275–1275–01; I.D. 120401A]

RIN 0648–ZB11

Coral Reef Conservation Program Proposed Implementation Guidelines

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Request for comments on Proposed Implementation Guidelines for the Coral Reef Conservation Program.

SUMMARY: The purpose of this document is to request comments on NOAA's proposed Implementation Guidelines (Guidelines) for the Coral Reef Conservation Program (Program) under the Coral Reef Conservation Act of 2000 (Act). The Act authorizes the Secretary of Commerce (Secretary), through the NOAA Administrator (Administrator) and subject to the availability of funds, to provide matching grants of financial assistance for coral reef conservation projects under the Act (Coral Reef Conservation Program). As per the Act, NOAA has developed this set of proposed Implementation Guidelines for the Program for Fiscal Year (FY) 2002 through FY 2004. NOAA proposes to use several existing grant programs and mechanisms to implement the Program. Final Guidelines and specific Program information including available funding, dates, and detailed application requirements and proposal evaluation criteria will be published annually in a separate **Federal Register** solicitation. NOAA is in the process of developing a National Coral Reef Action Strategy (Strategy), as also required under the Act. The purpose of the Strategy is to provide an implementation plan to advance coral reef conservation, including a basis for funding allocations to be made under the Program. The Final Strategy will be published concurrently with the Final Program Guidelines and the FY 2002 Program Solicitation in the first quarter of calendar year 2002. The Department of Commerce Pre-Award Notification Requirements for Grants and Cooperative Agreements contained in the **Federal Register** notice of October 1, 2001 (66 FR 49917), will be applicable to solicitations under this Program. This document is not a solicitation for FY 2002 project proposals.

DATES: In order to be considered, comments on this document must be received by NOAA on or before January 14, 2002.

ADDRESSES: Only written comments will be accepted. Please send your comments by mail or fax to: David Kennedy, NOAA Coral Program Coordinator, Office of Response and Restoration, N/ORR, NOAA National Ocean Service, 1305 East-West Highway, Silver Spring, MD 20910, Fax: 301-713-4389.

FOR FURTHER INFORMATION CONTACT: Bill Millhouser, Pacific Regional Manager, CPD/OCRM, N/ORM-3, NOAA National Ocean Service, 1305 East-West Highway, Silver Spring, MD 20910; 301–713–3155 extension 189, Internet: bill.millhouser@noaa.gov; or Robin Bruckner, Community-based Restoration Coordinator, NOAA Restoration Center, F/HC3, NOAA National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910; 301–713–0174 extension 162, Internet: robin.bruckner@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Background

The Coral Reef Conservation Act of 2000 (16 U.S.C. 6401 *et seq.*) was enacted on December 14, 2000, for the following purposes:

(1) To preserve, sustain and restore the condition of coral reef ecosystems;

(2) To promote the wise management and sustainable use of coral reef ecosystems to benefit local communities and the Nation;

(3) To develop sound scientific information on the condition of coral reef ecosystems and the threats to such ecosystems;

(4) To assist in the preservation of coral reefs by supporting conservation programs, including projects that involve affected local communities and non-governmental organizations;

(5) To provide financial resources for those programs and projects; and

(6) To establish a formal mechanism for the collecting and allocating of monetary donations from the private sector to be used for coral reef conservation projects.

Under section 6403 of the Act, the Secretary, through the NOAA Administrator (Administrator) and subject to the availability of funds, is authorized to provide matching grants of financial assistance for coral reef conservation projects. Section 6408(c)of the Act authorizes up to $8,000,000 in each of FY 2001 through FY 2004 for projects under the Program.

As required under section 6403(j) of the Act, NOAA has developed this set of proposed Implementation Guidelines for the Program and through this document, is making them available for public review and comment.

NOAA proposes to use several existing grant programs and mechanisms to implement the Program. Each fiscal year the Program will publish a **Federal Register** notice to describe the availability of funds and solicit project proposals. These annual solicitations, beginning in FY 2002, will provide greater detail on the year's program priorities, application process, and proposal evaluation criteria. This document is not a solicitation for project proposals.

II. Electronic Access

The Coral Reef Conservation Act of 2000 can be found on the Internet at: http://thomas.loc.gov/ (Select Bill Text, then select 106th Congress, search on Bill Number HR 1653, select H.R. 1653.EH). Information on the U.S. Coral Reef Task Force, established June 11, 1998 under Executive Order 13089, can be found at: http://coralreef.gov.

III. Coral Reef Conservation Program

The objective of the Program is to provide financial assistance for coral reef conservation projects consistent with the Act and National Coral Reef Action Strategy currently under development. NOAA's role in administering the Program is to strengthen and support the development and implementation of sound coral reef conservation projects, as well as ensure that the most beneficial projects are recommended for funding.

IV. Applicant Eligibility Requirements

As per section 6403(c) of the Act, eligible applicants include: any natural r esource management authority of a state or other government authority with jurisdiction over coral reefs or whose activities directly or indirectly affect coral reefs or coral reef ecosystems, or educational or non-governmental institutions with demonstrated expertise in the conservation of coral reefs. Each subcategory of funding under this Program, as described in section VII of this document, encompasses a specific subgroup of eligible applicants, per this section.

As a matter of policy, funding Federal agency activities under this Program will be a low priority unless such activities are an essential part of a cooperative project with other eligible governmental or non-governmental entities.

NOAA agencies are not eligible for funding under this Program, as funding for such activities is provided for under section 6406 of the Act (National Program).

V. Eligible Coral Reef Conservation Activities

As described in section 6403(g) of the Act, projects considered for funding under this Program must be consistent with the National Coral Reef Action Strategy, scheduled to be published concurrently in the **Federal Register** with the FY 2002 solicitation for proposals, in the first quarter calendar year 2002. In addition, per the same section, the Administrator may not approve a project proposal unless it will enhance the conservation of coral reefs by addressing at least one of the following:

(1) Implementing coral conservation programs which promote sustainable development and ensure effective, long-term conservation of coral reefs;

(2) Addressing the conflicts arising from the use of environments near coral reefs or from the use of corals, species associated with coral reefs, and coral products;

(3) Enhancing compliance with laws that prohibit or regulate the taking of coral products or species associated with coral reefs or regulate the use and management of coral reef ecosystems;

(4) Developing sound scientific information on the condition of coral reef ecosystems or the threats to such ecosystems, including factors that cause coral disease;

(5) Promoting and assisting to implement cooperative coral reef conservation projects that involve affected local communities, non-governmental organizations, or others in the private sector;

(6) Increasing public knowledge and awareness of coral reef ecosystems and issues regarding their long term conservation;

(7) Mapping the location and distribution of coral reefs;

(8) Developing and implementing techniques to monitor and assess the status and condition of coral reefs;

(9) Developing and implementing cost-effective methods to restore degraded coral reef ecosystems; or

(10) Promoting ecologically sound navigation and anchorages near coral reefs.

VI. Program Funding and Distribution

Section 6408(c) of the Act authorizes up to $8,000,000 for use by the Secretary for each of FY 2001 through FY 2004 for the Coral Reef Conservation Program. The number of individual awards to be made each year will depend on the total amount of funds appropriated for coral reef activities within NOAA and the portion of those funds that are allocated to this Program. The total annual Program funding amount, suggested ranges for funding requests, and specific funding categories under which an applicant may choose to be considered will be published in the Program's annual *Federal Register* solicitation.

Program funding awarded during any given fiscal year will be distributed, per section 6403(d) of the Act, in the following manner:

(1) No less than 40 percent of funds available shall be awarded for coral reef conservation projects in the Pacific Ocean within the maritime areas and zones subject to the jurisdiction or control of the United States;

(2) No less than 40 percent of funds available shall be awarded for coral reef conservation projects in the Atlantic Ocean, Gulf of Mexico and the Caribbean Sea within the maritime areas and zones subject to the jurisdiction or control of the United States; and

(3) Remaining funds shall be awarded for projects that address emerging priorities or threats, including international priorities or threats, identified by the Administrator. When identifying emerging threats or priorities, the Administrator may consult with the Coral Reef Task Force.

VII. Funding Categories and Mechanisms

In order to ensure adequate funding for each of the purposes envisioned under the Act and provide for a balanced overall Program, existing NOAA programs will be used to award funds in the five funding categories described below. Each of the five categories references the general activity and applicant eligibility requirements associated with proposals submitted therein. Specific activity and applicant eligibility information and proposal evaluation criteria for each category, consistent with Guideline sections IV. Applicant Eligibility Requirements, VI. Funding and Funding Distribution, VIII. Matching Funds, IX. Application Process, and X. Project Review, will be published in each year's solicitation for proposals.

(1) *U.S. state and territorial government coral reef conservation activities*, as described in section V(1-10) of the Guidelines (section 6403(g) of the Act) for the purposes of comprehensively managing coral reef ecosystems and associated fisheries within their jurisdictions. Eligibility to receive an award is limited to one agency in each state or territory with jurisdiction over coral reefs, as designated by the respective governors. These proposals will be reviewed and awarded by the National Ocean Service

(NOS) Office of Ocean and Coastal Resource Management (OCRM) per guidelines published June 28, 2001 in the **Federal Register** (66 FR 34425), and pursuant to Section 310 of the Coastal Zone Management Act, under title, Coastal Zone Management Administration Awards, CFDA 11.419.

(2) *U.S. state and territorial government coral reef ecosystem monitoring and/or assessment activities*, as described in section V(8) of the Guidelines (section 6403(g)(8) of the Act). Such activities include the collection, analysis, and reporting of long-term coral reef monitoring data pursuant to scientifically valid methodologies and protocols. Eligible applicants are limited to one natural resource management authority in each U.S. state or territory with jurisdiction over coral reefs, as designated by the respective governors. Cooperative agreements between these agencies and the NOS National Centers for Coastal and Ocean Science (NCCOS) will be developed without competition under title, Financial Assistance for National Centers of Coastal Ocean Science, CFDA 11.426.

(3) *U.S. state, territorial, or other governmental and non-governmental entities, not eligible under other categories*, for the purpose of implementing cooperative coral reef conservation, protection, restoration, research, or education projects, as described in section V(1-10) of the Guidelines (section 6403(g) of the Act). These proposals will be reviewed and awarded by the National Marine Fisheries Service (NMFS) Office of Habitat Conservation under title, Habitat Conservation, CFDA 11.463.

(4) *Projects to develop, improve, or amend Fishery Management Plans to conserve, protect and restore coral reef habitats and associated fishery populations within the U.S. Exclusive Economic Zone*; with the overall goal of improving the management of coral reefs and associated organisms through the avoidance of fishing impacts, ecosystem management or similar approaches and practices; as described in section V(3) of the Guidelines (section 6403(g)(3) of the Act). Eligible applicants include Regional Fishery Management Councils with jurisdiction over coral reefs, as established under the Magnuson-Stevens Fishery Conservation and Management Act (16 USC 1801 et seq.). These proposals will be reviewed and awarded by the NMFS Office of Habitat Conservation under title, Habitat Conservation, CFDA 11.463.

(5) *International coral reef conservation projects* for the purpose of implementing cooperative coral reef conservation activities as described in section V(1-10) of the Guidelines (section 6403(g) of the Act). Eligible applicants include all international governmental and non-governmental entities, including those in the Freely Associated States of the Pacific. These proposals will be reviewed and awarded by the NOS International Programs Office or the NMFS Office of Habitat Conservation, as appropriate, under title, Habitat Conservation, CFDA 11.463.

The annual solicitation will establish the range of funds available and specific evaluation criteria for each of these five categories. NOAA may add additional funding categories in the annual solicitation based on available funding and/or coral reef conservation priorities under the Strategy. Applicants will be required to specify in their application the category(s) under which they are applying for funding. Selected applications may be funded and awards administered by NOAA, through either NMFS or NOS. Generally, one award will be made for each proposal accepted for funding.

NOAA will determine the most appropriate funding mechanisms (grant, cooperative agreement, or interagency agreement) for selected individual projects, in consultation with the applicant, based on the degree of direct NOAA involvement with the project beyond the provision of financial assistance.

Proposals from non-Federal applicants that are selected for funding will be funded either through a project grant or cooperative agreement. Selected Federal proposals will be funded through interagency agreements; however, under the Program, such agreements must include a local sponsor of the coral reef conservation project.

VIII. Matching Funds

As per section 6403(b)(1) of the Act, Federal funds for any coral conservation project funded under this Program may not exceed 50 percent of the total costs of such project. The match may comprise a variety of public and private sources and can include in-kind contributions and other non-cash support. NOAA strongly encourages applicants to leverage as much investment as possible. Federal funds may not be considered as matching funds.

For applicants who cannot meet the match requirement, as per section 6403(b)(2) of the Act, the Secretary may waive all or part of the matching requirement if the Administrator determines that the project meets the following two requirements:

(1) No reasonable means are available through which an applicant can meet the matching requirement, and

(2) The probable benefit of such project outweighs the public interest in such matching requirement.

Applicants must specify in their proposal the source and amount of the proposed match and may be asked to provide letters of commitment to confirm stated contributions. In the case of a waiver request, the applicant must provide a detailed justification explaining the need for the waiver, as described in section IX(6) of these Guidelines.

Notwithstanding any other provision herein, and in accordance with 48 U.S.C. 1469a(d), this Program shall waive any requirement for local matching funds for any project under $200,000 (including in kind contributions) to the governments of Insular Areas, defined as the jurisdictions of the U.S. Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

IX. Application Process

NOAA will publish in the **Federal Register** one annual notification soliciting project proposals, pursuant to these Guidelines. Applications submitted in response to solicitation notices will be screened for eligibility and conformance with the Program Guidelines.

To submit a proposal, a complete NOAA standard grants application package must be filed in accordance with the guidelines in this document and instructions in the Department of Commerce Pre-Award Notification Requirements for Grants and Cooperative Agreements contained the **Federal Register** notice of October 1, 2001 (66 FR 49917).

A more detailed description of specific application requirements will be published in the annual solicitation; however, pursuant to section 6403(e)of the Act and NOAA, each application must include the following elements:

(1) A cover sheet with the name of the individual or entity responsible for conducting the project;

(2) A description of the qualifications of the individual(s) who will conduct the project;

(3) A succinct statement of the purposes of the project, including the specific geographic location where the project will be carried out;

(4) An estimate of the funds and time required to complete the project including: a detailed breakdown by

category of cost estimates as they relate to specific aspects of the project, with appropriate justification for both the Federal and non-Federal shares;

(5) Evidence of support for the project by appropriate representatives of states or other government jurisdictions in which the project will be conducted, including obtaining or proceeding to obtain all applicable State and/or Federal permits, consultations, and consistencies. U.S. state or territorial applicants must also provide evidence of coordination with all relevant state or territorial agencies, including a list of agencies consulted in developing the proposal;

(6) Information regarding the amount of matching funding available to the applicant. In the case of a waiver request, the applicant must provide a detailed justification explaining the need for the waiver including attempts to obtain sources of matching funds, how the benefit of the project outweighs the public interest in providing match, and any other extenuating circumstances preventing the availability of match;

(7) A description of how the project meets one or more the goals and objectives stated in section V of the Guidelines (section 6403(g) of the Act); and

(8) Any other information the Administrator considers to be necessary for evaluating the eligibility of the project for funding under this title.

In order to streamline the application and award process, and to allow NOAA to fully evaluate all coral reef conservation applications in the context of the overall Program, applicants must indicate under which category(s) (as described in section VII of these Guidelines) they are seeking funds, and are encouraged to submit only one comprehensive application per solicitation. The Program will give preference to projects where requested funding will be used to complete proposed coral reef conservation activities within a period of 12 months from the time the awards are distributed.

X. Project Review

As per section 6203(f) of the Act, NOAA will review eligible coral reef conservation proposals using an external governmental review and merit-based peer review. After such reviews, NOAA will implement an internal ranking and selection process. The overall project review and selection process will include the following five steps:

(1) NOAA will request and consider written comments on the proposal from each Federal agency, state government, or other government jurisdiction, including the relevant regional Fishery Management Councils established under the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.), or any National Marine Sanctuary, with jurisdiction or management authority over coral reef ecosystems in the area where the project is to be conducted. Pursuant to this requirement of the Act, NOAA will apply the following standard in requesting comments:

(A) Proposals for projects in state or territorial waters, including Federal marine protected areas in such waters (e.g. National Marine Sanctuaries), will be submitted to that state or territorial government's designated U.S. Coral Reef Task Force point of contact for comment;

(B) Proposals for projects in Federal waters will be submitted to the relevant Fishery Management Council for comment;

(C) Proposals for projects which require Federal permits will be submitted to the Federal agency which issued the permit for comment;

(D) Proposals for projects in Federal marine protected areas managed by Federal agencies (e.g. National Wildlife Refuges, National Parks, National Marine Sanctuaries, etc.) will be submitted to the respective Federal management authority for comment; and

(E) NOAA will seek comments from other government entities, authorities, and/or jurisdictions, including international entities for projects proposed outside of U.S. waters, as necessary based on the nature and scope of the proposed project.

Specifically, agencies will be requested to comment on: the extent to which the project is consistent with locally established coral reef conservation priorities and projects; whether the project has been coordinated with existing or planned projects; suggestions for improving project coordination and/or technical approach; and appropriate staff points of contact. Each entity will be provided 21 days to review and comment on subject proposals. Comments submitted will be part of the public record.

(2) Each NOAA program office will provide for a merit-based peer review and standardized documentation of that review for proposals considered appropriate for funding under their respective category(s). Each proposal will be reviewed by a minimum of three individuals with knowledge of the subject of the proposal. Each reviewer will submit a separate and individual review and reviewers will not provide a consensus opinion. The identities of the peer reviewers will be kept anonymous to the degree permitted by law. Specific evaluation criteria for projects submitted under each funding category will be published in each annual **Federal Register** solicitation.

(3) Each NOAA Program Office will subsequently implement an internal review process to rank each proposal that is appropriate for funding under their program based upon consideration of: comments and recommendations from the reviews under paragraphs (1) and (2), and their evaluation of each proposal consistent with the five following criteria:

(A) *Direct Benefit to Coral Reef Resources and Ecosystems.* NOAA will evaluate proposals based on the potential of the project to meet goals and objectives stated in section 6403(g) of the Act.

(B) *Technical Merit and Adequacy of Implementation Plan.* Proposals will be evaluated on the technical feasibility of the project and the qualifications of project leaders and/or partners based on demonstrated abilities to:

(i) Deliver the conservation objective stated in the proposal;

(ii) Provide educational benefits, where appropriate;

(iii) Incorporate assessment of project success in terms of meeting the proposed objectives;

(iv) Demonstrate that the conservation activity will be sustainable and long-lasting;

(v) Provide assurance that implementation of the project will meet all state environmental laws and Federal consistency requirements by obtaining or proceeding to obtain applicable permits and consultations; and

(C) *Past Performance.* Proposals will be evaluated on the previous accomplishments of the applicants in achieving coral reef conservation objectives similar to those outlined in section V. Eligible Coral Reef Conservation Activities of these Guidelines. Applicants submitting their first coral reef conservation project should document past experience in related activities;

(D) *Consistency with the National Coral Reef Action Strategy and the National Action Plan to Conserve Coral Reefs.* Proposals will be evaluated on how well they meet the respective programmatic goals and objectives (e.g. goals and objectives for restoration) outlined in the National Coral Reef Action Strategy, currently under development pursuant to Section 6402 of the Act, and the National Action Plan to Conserve Coral Reefs (U.S. Coral Reef

Task Force, 2000, http://coralreef.gov). Applicants are strongly encouraged to review both documents and identify in their application the specific conservation objectives that their project proposal will address; and

(E) *Cost-effectiveness and Budget Justification.* Proposals will be evaluated on their ability to demonstrate that significant benefit will be generated for the most reasonable cost. Projects will also be reviewed in terms of their need for funding and the ability of NOAA funds to act as a catalyst to implement projects and precipitate partnerships and other sources of funding to achieve conservation objectives. Preference will be given to projects that will be completed within a period of 12 months from the time the awards are distributed;

(4) A NOAA review panel made up of representatives from each NOAA program office will review the project rankings from each program office and make consensus-based, final project selections and funding recommendations to be presented to the NOAA Administrator, or his designee, for final approval. The review panel and Administrator, or designee, will ensure that the Act requirements for geographic funding distribution and consistency with the overall Program goals outlined in the Strategy have been met. NOAA reserves the right to consult with applicants, prior to making an award, to determine the exact amount of funds to be awarded, as well as the most appropriate funding category and mechanism under which to consider the project for funding; and

(5) NOAA will provide written notification of a proposal's approval or disapproval to each applicant within 6 months of submitting a coral reef conservation proposal. Similarly, NOAA will also provide written notification of a project's approval to each State or other government jurisdiction that provided comments and/or reviews.

Definitions

In this Program:

(1) Administrator means the Administrator of the National Oceanic and Atmospheric Administration.

(2) Conservation means the use of methods and procedures necessary to preserve or sustain corals and associated species as diverse, viable, and self-perpetuating coral reef ecosystems, including all activities associated with resource management, such as assessment, conservation, protection, restoration, sustainable use, and management of habitat; mapping; habitat monitoring; assistance in the development of management strategies for marine protected areas and marine resources consistent with the National Marine Sanctuaries Act (16 U.S.C. 1431 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*); law enforcement; conflict resolution initiatives; community outreach and education; and that promote safe and ecologically sound navigation.

(3) Cooperative Agreement means a legal instrument reflecting a relationship between the Department of Commerce (DoC) and a recipient whenever: (1) the principal purpose of the relationship is to transfer money, property, services or anything of value to accomplish a public purpose of support or stimulation authorized by Federal statute, and (2) substantial involvement (e.g. collaboration, participation, or intervention by DoC in the management of the project) is anticipated between DoC and the recipient during performance of the contemplated activity.

(4) Coral means species of the phylum Cnidaria, including--

(A) all species of the orders Antipatharia (black corals), Scleractinia (stony corals), Gorgonacea (horny corals), Stolonifera (organpipe corals and others), Alcyanacea (soft corals), and Coenothecalia (blue coral), of the class Anthozoa; and

(B) all species of the order Hydrocorallina (fire corals and hydrocorals) of the class Hydrozoa.

(5) Coral Reef means any reefs or shoals composed primarily of corals.

(6) Coral Reef Ecosystem means coral and other species of reef organisms (including reef plants) associated with coral reefs, and the non-living environmental factors that directly affect coral reefs, that together function as an ecological unit in nature.

(7) Coral Products means any living or dead specimens, parts, or derivatives, or any product containing specimens, parts, or derivatives, of any species referred to in paragraph (3).

(8) Grant means a legal instrument reflecting a relationship between DoC and a recipient whenever: (1) the principal purpose of the relationship is to transfer money, property, services, or anything of value in order to accomplish a public purpose of support or stimulation authorized by Federal statute, and (2) no substantial involvement is anticipated between DoC and the recipient during the performance of the contemplated activity.

(9) Interagency Agreement, for the purposes of these Guidelines, means a written document containing specific provisions of governing authorities, responsibilities, and funding, entered into between NOAA and another Federal agency where NOAA is funding the other Federal agency, pursuant to the Act.

(10) Secretary means the Secretary of Commerce.

(11) State means any State of the United States that contains a coral reef ecosystem within its seaward boundaries, American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, and the Virgin Islands, and any other territory or possession of the United States, or separate sovereign in free association with the United States, that contains a coral reef ecosystem within its seaward boundaries.

Classification: This is a new Program and will be added to the Catalog of Federal Domestic Assistance under the Coastal Zone Management Act (11.419), Financial Assistance for National Centers for Coastal Ocean Science (11.426), and Habitat Conservation (11.463). The Program uses only the existing NOAA Federal assistance application package requirements per 15 CFR parts 14 and 24.

The program will determine NEPA compliance on a project by project basis.

This action has been determined to be not significant for purposes of Executive Order 12866.

The use of the standard grants application package referred to in this notice involves collection-of-information requirements subject to the Paperwork Reduction Act. The use of Standard Forms 424, 424A, 424B, and SF–LLL have been approved by OMB under the respective control numbers 0348–0043, 0348–0044, 0348–0040, and 0348–0046.

The proposed guidelines also contain new collection-of- information requirements subject to review and approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act. These requirements will be submitted to OMB for approval. Public reporting burden for these collections of information is estimated to average one hour per request for a matching funds waiver (section IX(6) of these Guidelines) and one hour per comment on proposals (section X(1) of these Guidelines), including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Public comment is sought regarding: whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility;

the accuracy of the burden estimate; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information, including through the use of automated collection techniques or other forms of information technology. Send comments on these or any other aspects of the collection of information to NOAA Office of Response and Restoration at the **ADDRESSES** above, and to OMB at the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Attention: NOAA Desk Officer).

Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the Paperwork Reduction Act, unless that collection displays a currently valid OMB control number.

Dated: November 30, 2001.

Scott Gudes,

Acting Under Secretary for Oceans and Atmosphere/Administrator and Deputy Under Secretary

[FR Doc. 01–30383 Filed 12–7–01; 8:45 am]

BILLING CODE 3510–JE–S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 112101B]

Small Takes of Marine Mammals Incidental to Specified Activities; Repairs at the Carpinteria Oil and Gas Processing Facility, Carpinteria, CA

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of issuance of an incidental harassment authorization.

SUMMARY: In accordance with provisions of the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that an Incidental Harassment Authorization (IHA) to take small numbers of Pacific harbor seals (*Phoca vitulina richardsi*) by harassment incidental to repairs at the Carpinteria Oil and Gas Processing Facility in Carpinteria, CA., has been issued to Venoco, Inc.

DATES: Effective from November 28, 2001, until November 28, 2002.

ADDRESSES: The application, Wildlife Protection Plans, Project Execution Plans, and IHA are available by writing to Donna Wieting, Chief, Marine Mammal Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Silver Spring, MD 20910–3225.

FOR FURTHER INFORMATION CONTACT: Simona P. Roberts, (301) 713–2322, ext. 106 or Christina Fahy, (562) 980–4023.

SUPPLEMENTARY INFORMATION:

Background

Sections 101 (a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce to allow, upon request, the incidental, but not intentional taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, notice of a proposed authorization is provided to the public for review.

Authorization may be granted if NMFS finds, based on the best available scientific evidence, that the taking will have a negligible impact on the marine mammal species or stock(s). Negligible impact is defined in regulation (50 CFR 216.103) as "an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival".

Summary of Request

On June 17, 2001, NMFS received an application from Venoco, Inc., the owner and operator of the Carpinteria Oil and Gas Processing Facility in Carpinteria, CA, requesting an IHA for the take of small numbers of Pacific harbor seals incidental to repair of gas pipeline supports and pier pilings at Casitas Pier.

On October 24, 2001, Venoco notified NMFS that the project had been modified such that only repairs to the gas pipeline supports and not the pier were to be made. In addition, Venoco revised its original Project Execution Plan and Wildlife Protection Plan to better address the issue of acoustic harassment. A detailed description of the work proposed for 2001 is contained in the revised Project Execution Plan, which are available upon request (see **ADDRESSES**).

Venoco plans to complete all repair activities in a three-week period. However, to account for potential weather and logistical delays and reduce further paperwork, the IHA will be issued for a full 1–year period (November 2001–November 2002).

Comments and Responses

On September 12, 2001 (66 FR 47453), NMFS published a notice of receipt and a 30–day public comment period was provided on the application and proposed authorization. Comments were received from the Santa Barbara County Energy Division, the California Coastal Commission, the City of Carpinteria, and a private citizen.

Cumulative Impact Concerns

Comment 1: The California Coastal Commission recommended that the authorization address the potential for cumulative impacts from chronic disturbances to the Pacific harbor seal rookery located near the gas pipeline and the possibility that additional disturbances such as the proposed activity could cause the seal rookery to permanently abandon this location.

Response: Based on previous observations conducted in the vicinity of the gas pipeline and pier, as well as daily observations made by the Carpinteria Seal Watch, there is no evidence that chronic disturbances, such as people walking along the beach, are negatively impacting the Pacific harbor seals hauling out on the beach over the long-term (Seagars, 1986; Howorth,1995). From information provided by Howorth (1995), the most negative disturbance to date, resulting in haul-out abandonment, has been not from direct disturbance by humans but rather from disturbance and pup injury and predation by a coyote. Based on these previous documented observations at Carpinteria and nearby haul-out sites, there is very low probability that the harbor seals will completely abandon the Carpinteria haul-out site as a result of Venoco's repair activities. While there is evidence from other haul-out sites in San Francisco Bay that seals will abandon haul-out sites during chronic daytime disturbance, the San Francisco Bay seals did not completely abandon the site and continued to use the site during nighttime hours when there was no disturbance (Paulbitsky, 1975; Risebrough *et al.*, 1980).

Biologically, the primary concerns of harbor seal haul-out site abandonment are physiological stress resulting from the inability to find alternate haul-out sites and the inability to find alternate haul-out sites for pupping and molting. In the Carpinteria case, there are two alternate haul-out sites in the vicinity; offshore rocks west of the beach and off Carpinteria Beach State Park. Harbor seals have been observed hauling out in these locations after having been disturbed on the beach (Sadler, 1976;

Rambo, 1978; Bowland, 1978; Carpinteria Seal Watch records; Howorth, 1995). In order to minimize disturbance to the Carpinteria site as much as possible all activities undertaken by Venoco will be subject to the mitigation conditions in the IHA, which are designed to reduce the sights and sounds associated with human presence. Further, there will be no access to the beach from December 1–May 31, pursuant to the City of Carpineria's Municipal Code, eliminating potential disturbance from Venoco's activities during the pupping season.

Mitigation, Monitoring and Reporting Concerns

Comment 2: The County of Santa Barbara, Energy Division and the California Coastal Commission both recommended that NMFS require safety zones and ramp-up procedures for the pile driving operations occurring near the harbor seal haul-out area to address the potential for acoustic harassment and injury. Specifically, the County of Santa Barbara recommended that NMFS' mitigation requirements follow previous conditions imposed by the California Coastal Commission for work necessary to stabilize two leaking oil wells located in the surf zone, including designating a 500–foot (152–meter) safety zone around pile driving activity, an initial ramp up period at the commencement of pile driving activities, and scheduling of pile driving activities during periods of low tides to the maximum extent feasible.

Response: Under the IHA, Venoco must establish a 500–foot (152–meter) buffer zone around each of the pile driving sites. If any marine mammal is sighted within this 500–foot (152–meter) zone immediately prior to planned commencement of driving, pile driving must not occur until marine mammals have left the area. In addition, pile driving must not commence unless the buffer zone can be monitored for a minimum of 15 minutes immediately prior to the start-up of the pile driving episode. Due to the characteristics of the sounds produced by these pile-driving operations, NMFS does not support an initial ramp-up period during Venoco's repairs. Pile driving in a different sediment type (i.e., clay) than at Carpinteria has shown that instituting an initial ramp-up period at the commencement of pile-driving activities may lengthen the period of time and necessitate higher energy levels to adequately drive the piles, thus increasing the amount of time marine mammals are exposed to increased sound levels (California Department of Transportation, 2001). Until there is better data on the operational requirements of ramping-up pile driving activities in varying sediment types, NMFS will not require ramp-up for any pile-driving activity. In contrast, NMFS does support an initial ramp-up period at the commencement of seismic and shallow-hazard surveys.

NMFS found no scientific or anecdotal evidence that scheduling pile driving activities only during periods of low tides would reduce the disturbance to seals while they are hauled out. On the contrary, the greatest number of harbor seals observed hauled out at the Carpinteria site was in the month of September during an early morning low tide (Horworth, 1995). Clearly the tide cycles, as well as still undetermined environmental variables, play a significant role in harbor seal haul out behavior; however, Howorth (1995) noted that the most prevalent cause of natural disturbance to the Carpinteria haul out site was from waves striking the beach and washing over seals on the rising tides. If pile driving activities occurred during this rising tide phase, it may be very difficult for monitors to determine a causal relationship between seals entering the water, environmental variables, and repair activities. In order to gather more information on the relationship between harbor seal behavior, environmental factors, and the repair activities, the IHA requires the collection and reporting of the following information: tide height, sea state, weather conditions, type of repair activity being conducted, and harbor seal observations (including number and age ranges present and behavior).

Comment 3: The California Coastal Commission recommended that the authorization require the presence of one or more onsite biological monitors with the authority to suspend project operations if marine mammals are observed within or enter into established safety zones or if it is determined that impacts to marine mammals are greater than those authorized in the IHA.

Response: All IHA's require the presence of one or more onsite biological monitors, with relevant marine mammal experience and approved by NMFS, to document marine mammal presence and any disturbances. These monitors have the authority to suspend activities that are in violation of the conditions set out in the IHA.

Comment 4: The City of Carpinteria requested that the City's Municipal Code governing access to the city beach from December 1-May 31 each year be made part of the conditions of the proposed authorization. The City supports NMFS' proposals to condition the authorization so that all noise, sudden movement, and unnecessary personnel be minimized in or adjacent to the project site.

Response: NMFS has made the Municipal Code part of the IHA conditions by restricting work on the pipeline and other activities occurring on the beach or surf zone within 750 ft (230 m) of the harbor seal haul-out from December 1–May 31.

Comment 5: The private citizen who commented volunteers with the Carpinteria Seal Watch. This commentor protested the application for takings and requested that NMFS condition the authorization so that: (1) work would not occur between November 30 and May 31, (2) work would not occur during the molting season, (3) work would be ceased if the seals are not returning in "usual" numbers during the evening hours after the workday, and (4) monitoring biologist(s) would consult with Carpinteria Seal Watch representatives to discuss daily observations and data collection.

Response: The IHA issued by NMFS restricts work on the pipeline and other activities occurring on the beach or surf zone from December 1–May 31. However, based on previous harbor seal observations there is no scientific or anecdotal evidence to support restricting work during the molting season (SRS Technologies, 2001). Scientific research and monitoring studies carried out on haul-out sites on Vandenberg Air Force Base in California from 1997 through 2001 have shown that molting Pacific harbor seals entering the water because of disturbance from rocket launches are not adversely affected in their ability to molt and do not become subject to thermo-regulatory stress. Until similar site-specific research is carried out on the Carpinteria haul-out, NMFS accepts the Vandenberg evidence as the best scientific information available on the behavior of the California stock of Pacific harbor seals during molting. While on average the greatest number of harbor seals haul out during the molting season (starting in May and continuing through the summer), this is confounded at the Carpinteria site by a September estimate of 364 seals during an early morning low tide (Horworth, 1995). Clearly, not only molting and pupping, but tide cycle, as well as still undetermined environmental variables, play a significant role in harbor seal haul-out behavior.

Given this difficulty in determining the underlying natural factors involved

in harbor seal haul-out behavior, NMFS cannot assume that in all cases a failure of seals to return to the beach during the evening hours after work has finished is a direct result of the daytime work activities. However, in order to mitigate for disturbances that could result from Venoco's activities, the IHA is conditioned such that if the biological monitor(s) have direct evidence that work activities during the day resulted in 100 percent haul-out abandonment with no return to the haul-out site after work has ceased for a full 48–hour period, then the monitor must notify Venoco, and Venoco must contact NMFS to discuss appropriate changes to the mitigation plan.

NMFS agrees that the Carpinteria Seal Watch data will be an important contribution to the overall monitoring of the marine mammal impacts of Venoco's activities. In addition, the Seal Watchers provide an invaluable service in educating the public about the potential for human activities to negatively impact the harbor seals and their haul-out habitat. The biological monitor(s) will consult with Seal Watch representatives at the beginning and end of Venoco's repair activities to share observational data.

Description of Marine Mammals and Habitat Potentially Affected by the Activity

Harbor seals generally are non-migratory, with local movements associated with such factors as tides, weather, season, food availability, and reproduction (Scheffer and Slipp, 1944; Fisher, 1952; Bigg, 1969, 1981). They haul out on rocks, reefs, beaches, and drifting glacial ice, and feed in marine, estuarine, and occasionally fresh waters. Harbor seals have also displayed strong fidelity for haulout sites (Pitcher and Calkins, 1979; Pitcher and McAllister, 1981). The eastern Pacific harbor seal has an estimated population of 285,000 individuals distributed along the entire west coast of North America from the Pribilof and Aleutian Islands in Alaska to Baja, CA.

In Carpinteria, Pacific harbor seals haul out year round. This area is one of two along the mainland coast of southern California that is readily accessible to the public. The other haul out is in La Jolla, CA. There are four other sizable haul outs along the mainland coast of Santa Barbara County, one at Naples, one at Point Conception, and two at Vandenberg Air Force Base. However, unlike the Carpinteria haul out, these sites are on private land and not readily accessible to the public.

In Carpinteria, peak numbers are reached during the pupping season (late February through March) and molting season (summer months). The pups born at these sites are weaned in 4 to 6 weeks, so nearly all pups are independent by the end of May. Twenty to 30 pups are usually born there each year (Howorth, 1995, 1998). A peak abundance count made during the 1998 pupping season was 345 seals (Howorth, 1998).

The project site is adjacent to a small beach used by harbor seals as a haul-out and rookery area. Harbor seals continue to use this area despite pier activity and human presence (Howorth, 1995, 1998). Two-hundred and sixty-five feet (ft) (81 meters (m)) east of Casitas Pier, a small sandy beach and offshore rock area marks the western limits of the local harbor seal haul outs.

California sea lions (*Zalophus californianus*) do occasionally haul out on the beach or rocks adjacent to the project site. However, such individuals are usually not healthy and are taken to the Santa Barbara Marine Mammal Center (Howorth, 1995, 1998).

Bottlenose dolphins (*Tursiops truncatus*) and the eastern North Pacific gray whale (*Eschrichtius robustus*) have been reported near the project site (Howorth, 1995, 1998). Both species, when sighted near the project site, have consistently avoided the pier. Years of data from previous projects and from the Carpinteria Seal Watch have not observed any instances of cetaceans within the project area.

Potential Effects on Marine Mammals and their Habitat

Potential harassment may result from noise generated by repair activities to the pipeline as well as from the physical presence of people and machinery on the beaches.

Seals may be disturbed and leave the beach when pile driving activities are underway; however, previous monitoring has shown that all seals returned once activities had ceased (Venoco, 2001).

Number of Marine Mammals Potentially Harassed

During repair work carried out by Venoco an estimated 364 Pacific harbor seals have the potential to be incidentally harassed. This number is the maximum count documented by Howorth (1995, 1998) during the summer molting season.

Mitigation

Mitigation measures described in this section have been designed to reduce the potential for harassment and eliminate the potential for incidental injury and mortality due to repair activities.

If operationally feasible, all repairs will take place during daylight hours in a three-week period before the annual harbor seal pupping period and while the beach is open to the public. During this period few, if any, seals are present on shore because beachwalkers, dogs, joggers, kayakers, and others frequent the beach during daylight hours. During November, early storms and currents erode the sand covering the rocks and reefs, which will also reduce the amount of excavation necessary to expose the base of the pier pilings.

Work on pilings closest to the haul-out site will be conducted at the beginning of the project and only during low tides (American Marine Corp., 2000). Therefore, any potential for disturbing harbor seals would be limited to times of low tide or approximately 4 hours each 24–hour period.

To reduce the potential for acoustically and visually disturbing the seals, mitigation measures include: establishment of a 500–foot (152–meter) buffer zone around each of the pile driving sites; equipping the diving air compressor, trucks, and equipment motors with quiet mufflers; disconnecting backup alarms on trucks; securing all lines, floats, cables, etc. used in handling materials to the pier or removing them from the site; instruction of all personnel on avoidance of rapid or sudden movements, shouting, throwing objects or other actions that could startle the seals; allowing only the minimum number of people needed to perform the work on the beach; insuring divers stay submerged while performing their tasks; and using hand-held radio for verbal communications from the pier or other project site to divers or workers.

Successful implementation by Venoco and their contractors of additional mitigation measures specified by NMFS in the IHA are designed to further reduce the potential for adverse impacts on Pacific harbor seals in the area.

Monitoring

Issuance of the IHA requires Venoco to monitor the impact of pile driving and other repair activities on harbor seals. Monitoring will be conducted by one or more NMFS-approved biologists. As part of the IHA monitoring requirements, Venoco will notify the designated on-site biological monitor(s) at least 30 minutes before a pile driving session begins and if there are unexpected changes to the work plan. In addition, monitoring information should be collected a minimum of 1 hour before the work day begins, a minimum of 15 minutes prior to

planned pile driving sessions, during pile driving sessions, and for a minimum of 1 hour after pile driving or other work is completed.

On-site biological monitor(s) are required to collect the following information related to harbor seals: (1) date; (2) time of arrival/departure of monitor(s) and work crew; (3) number of harbor seals on the beach; (4) number of harbor seals in the water; (5) number of adults, subadults, and pups; (6) number of molting seals; (7) disturbance reactions observed; and (8) Concurrently, the monitor(s) will record type of repair activity (including specific equipment used), location of activity, and duration of activity. The monitor(s) will also collect the following information related to environmental conditions: (1) date; (2) time; (3) cloud cover; (4) visibility; (5) wind direction; (6) wind velocity; (7) swell direction; (8) swell height; and (9) tidal stage. The presence of other marine mammal species on the beach and in the water is also a requirement.

The NMFS-approved biological monitor has the authority under the IHA to prevent pile driving operations from commencing if a harbor seal pup is sighted on the beach. If a harbor seal pup is sighted after pile driving has begun, then the monitor is required to notify Venoco, who must stop pile driving as soon as operationally practicable and consult immediately with NMFS' Southwest Regional Office.

Reporting

During periods of operation, Venoco will provide weekly reports to NMFS' Southwest Regional Administrator, including a summary of the previous week's monitoring activities and an estimate of the number of seals that may have been disturbed as a result of repair activities. A description of the repair activities at the time of observation will also be provided.

An interim report must be submitted to the Southwest Regional Administrator on or about July 30, 2001. This report will contain a description of the methods, results, and interpretation of all monitoring tasks. A draft final report is due 90 days after expiration of the IHA. If comments are received from the Regional Administrator on the draft final report, then the final report must be submitted to the Southwest Regional Administrator within 30 days after receiving comments. If no comments are received from the Southwest Regional Administrator, the draft final report will be considered the final report.

Endangered Species Act (ESA) Consultation

This proposed authorization would not allow the take of any species listed as endangered or threatened under the ESA; therefore, no ESA Section 7 consultation was necessary for issuance of the IHA.

Coastal Zone Management Act Consistency

On November 19, 2001, the California Coastal Commission issued a conditioned emergency permit to Venoco, Inc. to begin repair activities on the Carpinteria pipeline. The determination to issue an emergency permit was based on the conclusion of the Commission that an imminent threat to the nearby seal haul-out and the marine environment will exist if repairs to the pipeline are not made due to inadequate support of the pipeline during the winter storm season. The Commission's emergency permit contains conditions similar to NMFS' IHA designed to prevent the "take" of marine mammals during the course of Venoco's activities. All of the marine mammal conditions were added to the Coastal Commission's permit in close consultation with NMFS.

Conclusions

NMFS has determined that the impact of conducting repair activities at the Carpinteria Oil and Gas Processing Facility in Carpinteria, CA, will have a negligible impact on Pacific harbor seal stocks in California. While behavioral modifications may be made by individuals to avoid the resultant noise and activities, the avoidance of the area is not reasonably expected to, and is not reasonably likely to, adversely affect the annual rates of recruitment or survival of the stock.

The number of potential harassment takings is estimated to be small. In addition, no take by injury or death is anticipated, and the potential for such taking will be avoided through the incorporation of the mitigation measures mentioned in this document and in the IHA. Haul-out sites, rookeries, mating grounds, areas of concentrated feeding, and other areas of special significance for harbor seals within or near the planned area of operations will be avoided in order to minimize any potential impacts.

Authorization

NMFS has issued an IHA for repair activities at the Carpinteria Oil and Gas Processing Facility in Carpinteria, CA from November 28, 2001, until November 28, 2002, provided the mitigation, monitoring, and reporting requirements defined by NMFS in the IHA are implemented successfully. NMFS has determined that the proposed activity would result in the harassment of only small numbers of Pacific harbor seals and would have a negligible impact on stocks of harbor seals in California waters.

Dated: December 3, 2001.

David Cottingham,

Deputy Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 01–30465 Filed 12–7–01; 8:45 am]

BILLING CODE 3510–22–S

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Restraint Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Pakistan

December 4, 2001.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits.

EFFECTIVE DATE: January 1, 2002.

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927–5850, or refer to the U.S. Customs website at http://www.customs.ustreas.gov. For information on embargoes and quota re-openings, refer to the Office of Textiles and Apparel website at http://otexa.ita.doc.gov.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The import restraint limits for textile products, produced or manufactured in Pakistan and exported during the period January 1, 2002 through December 31, 2002 are based on limits notified to the Textiles Monitoring Body pursuant to the Uruguay Round Agreement on Textiles and Clothing (ATC).

Pursuant to the provisions of the ATC, the third stage of the integration of textile and apparel products into the General Agreement on Tariffs and Trade 1994 will take place on January 1, 2002

(see 60 FR 21075, published on May 1, 1995). Accordingly, certain previously restrained categories have been modified and their limit has been revised, and other limits have been eliminated. Integrated products will no longer be subject to quota.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to establish the 2002 limits.

Carryforward that has been applied to the 2001 limits is being deducted from the 2002 limits.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 65 FR 82328, published on December 28, 2000). Information regarding the availability of the 2002 CORRELATION will be published in the **Federal Register** at a later date.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 4, 2001.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended; and the Uruguay Round Agreement on Textiles and Clothing (ATC), you are directed to prohibit, effective on January 1, 2002, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in the following categories, produced or manufactured in Pakistan and exported during the twelve-month period beginning on January 1, 2002 and extending through December 31, 2002, in excess of the following limits:

Category	Twelve-month restraint limit
Specific limits	
219	12,361,182 square meters.
226/313	169,841,711 square meters.
237	601,202 dozen.
239pt.[1]	2,596,432 kilograms.
314	8,989,949 square meters.
315	109,140,142 square meters.
317/617	48,310,478 square meters.
331pt./631pt.[2]	787,805 dozen pairs.
334/634	336,230 dozen.
335/635	548,386 dozen.
336/636	721,444 dozen.
338	6,238,373 dozen.
339	1,934,985 dozen.
340/640	961,925 dozen of which not more than 360,721 dozen shall be in Categories 340–D/640–D[3].
341/641	1,082,165 dozen.
342/642	535,616 dozen.
347/348	1,132,284 dozen.
351/651	455,399 dozen.
352/652	1,138,500 dozen.
359–C/659–C[4]	2,164,331 kilograms.
360	7,315,629 numbers.
361	8,506,544 numbers.

369–S[5]	1,042,777 kilograms.
613/614	33,630,217 square meters
615	35,776,820 square meters.
625/626/627/628/629	110,033,519 square meters of which not more than 55,016,761 square meters shall be in Category 625; not more than 55,016,761 square meters shall be in Category 626; not more than 55,016,761 square meters shall be in Category 627; not more than 11,382,779 square meters shall be in Category 628; and not more than 55,016,761 square meters shall be in Category 629.
638/639	604,934 dozen.
647/648	1,146,931 dozen.
666–P[6]	1,018,061 kilograms.
666–S[7]	5,389,734 kilograms.

[1] Category 239pt.: only HTS number 6209.20.5040 (diapers).

[2] Category 331pt.: all HTS numbers except 6116.10.1720, 6116.10.4810, 6116.10.5510, 6116.10.7510, 6116.92.6410, 6116.92.6420, 6116.92.6430, 6116.92.6440, 6116.92.7450, 6116.92.7460, 6116.92.7470, 6116.92.8800, 6116.92.9400 and 6116.99.9510; Category 631pt.: all HTS numbers except 6116.10.1730, 6116.10.4820, 6116.10.5520, 6116.10.7520, 6116.93.8800, 6116.93.9400, 6116.99.4800, 6116.99.5400 and 6116.99.9530.

[3] Category 340–D: only HTS numbers 6205.20.2015, 6205.20.2020, 6205.20.2025 and 6205.20.2030; Category 640–D: only HTS numbers 6205.30.2010, 6205.30.2020, 6205.30.2030, 6205.30.2040, 6205.90.3030 and 6205.90.4030.

[4] Category 359–C: only HTS numbers 6103.42.2025, 6103.49.8034, 6104.62.1020, 6104.69.8010, 6114.20.0048, 6114.20.0052, 6203.42.2010, 6203.42.2090, 6204.62.2010, 6211.32.0010, , 6211.32.0025 and 6211.42.0010; Category 659–C: only HTS numbers 6103.23.0055, 6103.43.2020, 6103.43.2025, 6103.49.2000, 6103.49.8038, 6104.63.1020, 6104.63.1030, 6104.69.1000, 6104.69.8014, 6114.30.3044, 6114.30.3054, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.9010, 6211.33.0010, 6211.33.0017 and 6211.43.0010.

[5] Category 369–S: only HTS number 6307.10.2005.

[6] Category 666–P: only HTS numbers 6302.22.1010, 6302.22.1020, 6302.22.2010, 6302.32.1010, 6302.32.1020, 6302.32.2010 and 6302.32.2020.

[7] Category 666–S: only HTS numbers 6302.22.1030, 6302.22.1040, 6302.22.2020, 6302.32.1030, 6302.32.1040, 6302.32.2030 and 6302.32.2040.

The limits set forth above are subject to adjustment pursuant to the provisions of the ATC and administrative arrangements notified to the Textiles Monitoring Body.

Products in the above categories exported during 2001 shall be charged to the applicable category limits for that year (see directive dated November 2, 2000) to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such products shall be charged to the limits set forth in this directive.

Products to be integrated into the General Agreement on Tariffs and Trade 1994 on January 1, 2002 (listed in the Federal Register notice published on May 1, 1995, 60 FR 21075) which are exported during 2001 shall be charged to the applicable 2001 limits to the extent of any unfilled balances. After January 1, 2002, should those 2001 limits be filled, such products shall no longer be charged to any limit.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,
D. Michael Hutchinson,
Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc.01–30435 Filed 12–7–01; 8:45 am]

BILLING CODE 3510–DR–S

DEPARTMENT OF DEFENSE

Department of the Army

Armed Forces Epidemiological Board (AFEB); Closed Meeting

AGENCY: Office of The Surgeon General, DoD.

ACTION: Notice of closed meeting.

SUMMARY: In accordance with section 10(a)(2) of Public Law 92–463, The Federal Advisory Committee Act, this announces the forthcoming select AFEB subcommittee meeting. This Board will meet via teleconference on 20 December 2001. The purpose of the meeting is to review a draft manuscript and make recommendations on potential policy implications. The manuscript has not formally been published and is protected by intellectual property rights.

This meeting will be closed to the public.

FOR FURTHER INFORMATION CONTACT: Lt Col James R. Riddle, Executive Secretary, Armed Forces Epidemiological Board, Skyline Six, 5109 Leesburg Pike, Room 682, Falls Church, Virginia 22041–3258, (703) 681–8012/3.

SUPPLEMENTARY INFORMATION: None.

Luz D. Ortiz,

Army Federal Register Liaison Officer.

[FR Doc. 01–30462 Filed 12–7–01; 8:45 am]

BILLING CODE 3710–08–M

DEPARTMENT OF DEFENSE

Department of the Navy

Meeting of the U.S. Naval Academy Board of Visitors

AGENCY: Department of the Navy, DOD.

ACTION: Notice of partially closed meeting.

SUMMARY: The U.S. Naval Academy Board of Visitors will meet to make such inquiry as the Board shall deem necessary into the state of morale and discipline, the curriculum, instruction, physical equipment, fiscal affairs, and academic methods of the Naval Academy. During this meeting inquiries will relate to the internal personnel rules and practices of the Academy, may involve on-going criminal investigations, and include discussions of personal information the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. The executive session of this meeting will be closed to the public.

DATES: The meeting will be held on Friday, December 14, 2001, from 8:30 a.m. to 1 p.m. The closed Executive Session will be from 12:15 p.m. to 1 p.m.

ADDRESSES: The meeting will be held in the Bo Coppedge Dining Room of Alumni Hall at the U.S. Naval Academy.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Thomas E. Osborn, Executive Secretary to the Board of Visitors, Office of the Superintendent, U.S. Naval Academy, Annapolis, MD 21402–5000, telephone number (410) 293–1503.

SUPPLEMENTARY INFORMATION: This notice of meeting is provided per the Federal Advisory Committee Act (5 U.S.C. App. 2). The executive session of the meeting will consist of discussions of information, which pertain to the conduct of various midshipmen at the Naval Academy and internal Board of Visitors matters. Discussion of such information cannot be adequately segregated from other topics, which precludes opening the executive session of this meeting to the public. In accordance with 5 U.S.C. App. 2, section 10(d), the Secretary of the Navy has determined in writing that the special committee meeting shall be partially closed to the public because they will be concerned with matters as outlined in section 552(b)(2), (5), (6), and (7) of title 5 U.S.C. Due to an unavoidable delay in administrative processing, the 15 days advance notice could not be provided.

Dated: December 5, 2001.

T.J. Welsh,

Lieutenant Commander, U.S. Navy, Judge Advocate General's Corps, Federal Register Liaison Officer.

BILLING CODE 3810–FF–P

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

SUMMARY: The Leader, Regulatory Information Management Group, Office of the Chief Information Officer, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before February 8, 2002.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Leader, Regulatory Information Management Group, Office of the Chief Information Officer, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g. new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology.

Dated: December 4, 2001.

John Tressler,

Leader, Regulatory Information Management, Office of the Chief Information, Officer.

Office of Special Education and Rehabilitative Services

Type of Review: New.

Title: Field Test of Agency Capacity to Implement Reporting Requirements Associated with Draft Evaluation Standard 3 and section 101 (a)(10)(c) of the Rehabilitation Act, as Amended.

Frequency: One time.

Affected Public: State, Local, or Tribal Gov't, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden:

Responses: 81.

Burden Hours: 9,801.

Abstract: This field test will assess Designated State Unit (VR agency) capacity to obtain and use unemployment insurance wage record data maintained by the State Employment Security Agencies (SESAs) needed to implement a proposed evaluation standard and associated performance indicators mandated by the 1992 amendments to the Rehabilitation Act, as amended by the Workforce Investment Act of 1998.

Requests for copies of the proposed information collection request may be accessed from *http://edicsweb.ed.gov*, or should be addressed to Vivian Reese, Department of Education, 400 Maryland Avenue, SW., Room 4050, Regional

Office Building 3, Washington, DC 20202–4651. Requests may also be electronically mailed to the internet address *OCIO.RIMG@ed.gov* or faxed to 202–708–9346. Please specify the complete title of the information collection when making your request.

Comments regarding burden and/or the collection activity requirements should be directed to Sheila Carey at (202) 708–6287 or via her internet address *Sheila.Carey@ed.gov*. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

National Energy Technology Laboratory

Notice of Availability of a Financial Assistance Solicitation

AGENCY: National Energy Technology Laboratory (NETL), Department of Energy (DOE).

ACTION: Notice of availability of a Financial Assistance Solicitation.

SUMMARY: Notice is hereby given of the intent to issue Financial Assistance Program Solicitation No. DE-PS26–02NT40865 entitled "Solid State Energy Conversion Alliance (SECA) Core Technology Program." The purpose of the SECA Core Technology Program is to develop science and technologies that address specific technical challenges and barriers faced by the SECA Industrial Teams. The goal for SECA Industrial Teams is to develop a 3 kilowatt (kW)–10kW solid-oxide fuel cell system including stack and balance of plant that has a Factory Cost of $400/kW by 2010. Additional information associated with the SECA program is located at *http://www.seca.doe.gov*.

DATES: The solicitation will be available on the "Industry Interactive Procurement System" (IIPS) Web page located at *http://e-center.doe.gov* on or about December 10, 2001. Prospective applicants can obtain access to the solicitation from the above Internet address or through the DOE/NETL's Internet address at *http://www.netl.doe.gov/business*.

ADDRESSES: The solicitation and any subsequent amendments will be published on the DOE/NETL's Internet address at *http://www.netl.doe.gov/business* and on the IIPS Web page located at http://e-center.doe.gov. Comments and/or questions prior to the issuance of the solicitation shall be forwarded to the mailing address or E-mail address provided below.

FOR FURTHER INFORMATION CONTACT: Mary S. Gabriele, MS I07, U.S. Department of Energy, National Energy Technology Laboratory, 3610 Collins Ferry Road, P.O. Box 880, Morgantown, WV 26507–0880, E-mail Address: *mgabri@netl.doe.gov*, Telephone Number: (304) 285–4253.

SUPPLEMENTARY INFORMATION: The subject solicitation will focus on specific sub-topics under the following six Core Technology topic areas:

1. Fuel Processing.
2. Manufacturing.
3. Controls & Diagnostics.
4. Power Electronics.
5. Modeling & Simulation.
6. Materials.

Each topic area contains one or more sub-topics that describe needs for specific science, engineering and technologies to support the SECA Industrial Teams. The Core Technology Program will focus on generating new scientific and engineering knowledge and on creating technology breakthroughs to address technical risks and barriers that limit achievement of the SECA performance and cost goals for solid-state fuel cell systems. Universities and small business research entities are considered well suited for this role of generating new knowledge and creating breakthroughs. The solicitation is however open to any nonprofit or for-profit organization, university or other institution of higher education, or non-federal agency, unless otherwise restricted by the Simpson-Craig Amendment.

The DOE anticipates award of multiple cooperative agreements in the various topic/subtopic areas; but the DOE reserves the right to award the agreement type and number deemed in its best interest. Each award will consist of two phases, and the selection for each phase will be based on a competitive process. Phase I will investigate the feasibility of the proposed concept/approach and will be limited to approximately $150,000 (DOE Funding) and twelve (12) months. Only Phase I recipients will have the opportunity to submit a renewal application to receive funds for Phase II research. If the Phase I work demonstrates feasibility, the selected Industrial Team members see sufficient commercialization merit, and adequate program funds are available, the recipient will be awarded a Phase II renewal agreement. Phase II work includes advancing the science and technology to a sufficient maturity level that it will be adopted by the Industrial Team(s). The Phase II effort will be limited to approximately $500,000 (DOE Funding) and twenty-four (24) months. Phase II renewal awards may be partially funded to pick only the aspects of the Phase II work that have sufficient merit to the SECA Industrial Team(s).

Applicants are advised that a minimum of 20% cost sharing will be required in Phase I and Phase II for technologies proposed under Topic Areas 1 through 5. Cost sharing is not mandatory for Phase I or Phase II under Topic Area 6, but is highly encouraged.

Once released, the solicitation will be available for downloading from the IIPS Internet page. At this Internet site you will also be able to register with IIPS, enabling you to submit an application. If you need technical assistance in registering or for any other IIPS function, call the IIPS Help Desk at (800) 683–0751 or E-mail the Help Desk personnel at *IIPS—HelpDesk@e-center.doe.gov*. The solicitation will only be made available in IIPS, no hard (paper) copies of the solicitation and related documents will be made available.

Prospective applicants who would like to be notified as soon as the solicitation is available should subscribe to the Business Alert Mailing List at *http://www.netl.doe.gov/business*. Once you subscribe, you will receive an announcement by E-mail that the solicitation has been released to the public. Telephone requests, written requests, E-mail requests, or facsimile requests for a copy of the solicitation package will not be accepted and/or honored. Applications must be prepared and submitted in accordance with the instructions and forms contained in the solicitation. The actual solicitation document will allow for requests for explanation and/or interpretation.

Issued in Morgantown, WV on November 30, 2001.

Randolph L. Kesling,

Director, Acquisition and Assistance Division.

[FR Doc. 01–30444 Filed 12–7–01; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

National Nuclear Security Administration; Stewardship Science Academic Alliances Program Financial Assistance Number DE–PS03–01SF22349

AGENCY: National Nuclear Security Administration (NNSA), U.S. Department of Energy (DOE).

ACTION: Notice of competitive financial assistance solicitation.

SUMMARY: The DOE/NNSA, through the Oakland Operations Office, is seeking applications/proposals in specific areas of physical science with the principal goals of: (1) Grow the U.S. scientific community, through the funding of research projects at universities, in areas of fundamental science and technology relevant to stockpile stewardship, with a focus on those areas that have not been traditionally supported by other federal agencies and for which there is a recruiting need within the NNSA/DP laboratories complex; and (2) Providing fundamental-science information and developing advanced experimental measurement techniques in selected areas of physical sciences: condensed matter physics and materials science, hydrodynamics, plasma and high-energy-density physics, fluid dynamics, and low-energy nuclear science.

ADDRESSES: The formal solicitation document, Stewardship Science Academic Alliances Program (DE–PS03–01SF22349), is available through the Industry Interactive Procurement System (IIPS) located at the following URL: *http://e-center.doe.gov*. IIPS provides the medium for disseminating solicitations, receiving financial assistance applications and evaluating applications in a paperless environment. Completed applications are required to be submitted via IIPS. Individuals who have the authority to enter their university or academic institution into a financial assistance award and intend to submit proposals/applications via the IIPS system must register and receive confirmation that they are registered prior to being able to submit an application on the IIPS system. An IIPS "User Guide for Contractor" can be obtained by going to the IIPS Homepage at the following URL: *http://e-center.doe.gov* and then clicking on the "Help" button. Questions regarding the operation of IIPS may be e-mailed to the IIPS Help Desk at *IIPSHelpDesk@e-center.doe.gov* or call the help desk at (800) 683–0751.

FOR FURTHER INFORMATION CONTACT: Ms Bertha Crisp, Contract Specialist, U.S. Department of Energy, Oakland Operations Office, 1301 Clay Street, N–700, Oakland, CA 94612–5208; e-mail *bertha.crisp@oak.doe.gov*

SUPPLEMENTARY INFORMATION: Proposals for Research Grants and Centers of Excellence are invited from universities or other academic institutions in the following specific areas of physical science: (1) Properties of materials under extreme conditions and hydrodynamics, (2) high-energy-density physics and fluid dynamics, and (3) low-energy nuclear science. The Stewardship Science Academic Alliances Program is an expansion of the currently funded "Inertial Fusion Science in Support of Stockpile Stewardship" Grant Program. The Office of Research, Development and Simulation anticipates supporting multiple awards in physical sciences totaling approximately $12.5M annually, subject to the availability of funds, as a result of this solicitation. Awards will be for one to three-year projects of work at a funding level appropriate for the proposed scopes. Funding of awards will range up to approximately $2,000,000 per year for Centers of Excellence and will range up to a few hundred thousand dollars per year for Research Grants. The solicitation document contains all the information relative to this action for prospective applicants. The North American Industry Classification System (NAICS) number for this program is 541.

Issued in Oakland, CA, on December 3, 2001.

R. Arlene Coleman,

Acting Director, Financial Assistance Center, Oakland Operations Office.

[FR Doc. 01–30443 Filed 12–7–01; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection Activities: Submission for emergency OMB Review; Comment Request

AGENCY: Energy Information Administration (EIA), Department of Energy (DOE).

ACTION: Agency information collection activities: Submission for Emergency OMB review; comment request.

SUMMARY: The EIA has submitted the energy information collections listed at the end of this notice to the Office of Management and Budget (OMB) for emergency processing under section 3507(j)(1) of the Paperwork Reduction Act of 1995 (Pub. L. 104–13) (44 U.S.C. 3501 et seq.). The DOE is requesting an emergency clearance from OMB for the Form EIA–417R by December 18, 2001. This form is used to collect information on emergency situations in U.S. electric power systems. Approval of the request will provide DOE with the time necessary to more thoroughly evaluate its information needs in light of the changed environment since September 11, 2001.

DOE has responsibilities for tracking actual and potential emergency situations on the U.S. electric energy supply system so that Federal emergency response and national security measures can be implemented in a timely and effective manner, as necessary. DOE has had regulations in place since the 1980's requiring electric energy entities to report on systems' incidents and disturbances.

In 1998, the DOE received OMB approval, under Form EIA–417R, to collect electric systems' emergency information through December 31, 2001. DOE is requesting emergency approval to continue use of the existing Form EIA–417R while the revised form is being prepared for submittal to OMB.

During the summer of 2001, DOE developed revised reporting requirements for the form and issued a request for public comments. The **Federal Register** notice (66 FR 47189) requesting public comments was published on September 11. Given the events of September 11, 2001, public comments received in response to the **Federal Register** notice, and consultations with affected groups, DOE is reassessing the information it will require on electric power systems' incidents and disturbances. DOE will not complete this reassessment prior to expiration of the EIA–417R's approval, and thus needs to request an emergency 6-month approval to continue collecting information under the existing regulations (10 CFR 205.350—353).

DATES: Comments must be filed with OMB by December 17, 2001.

ADDRESSES: Send comments to the Bryon Allen, OMB Desk Officer for DOE, Office of Information and Regulatory Affairs, Office of Management and Budget. To ensure receipt of the comments by the due date, submission by FAX at 202–395–7285 or e-mail to *BAllen@omb.eop.gov* is recommended. The mailing address is 726 Jackson Place NW., Washington, DC 20503. The OMB DOE Desk Officer may be telephoned at (202) 395–7318. (A copy of your comments should also be provided to EIA's Statistics and Methods Group at the address below.)

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Herbert Miller.. To ensure receipt of the comments by the due date, submission by FAX at 202–287–1705 or e-mail to *herbert.miller@eia.doe.gov* is recommended. The mailing address is Statistics and Methods Group (EI–70), Forrestal Building, U.S. Department of

Energy, Washington, DC 20585–0670. Mr. Miller may be contacted by telephone at (202) 287–1711.

SUPPLEMENTARY INFORMATION: This section contains the following information about the energy information collection submitted to OMB for review: (1) The collection number and title; (2) the sponsor (i.e., the Department of Energy component); (3) the current OMB docket number (if applicable); (4) the type of request (i.e, new, revision, extension, or reinstatement); (5) response obligation (i.e., mandatory, voluntary, or required to obtain or retain benefits); (6) a description of the need for and proposed use of the information; (7) a categorical description of the likely respondents; and (8) an estimate of the total annual reporting burden (i.e., the estimated number of likely respondents times the proposed frequency of response per year times the average hours per response).

1. Form EIA–417R, "Electric Power System Emergency Report"

2. Office of Emergency Management, Office of Security and Emergency Operations.

3. OMB Number 1901–0288.

4. Reinstatement (emergency clearance request).

5. Mandatory.

6. The Form EIA–417R serves the purpose of alerting the Federal government about actual or projected incidents that will impact the operational and/or reliability of the Nation's domestic electric power systems. Respondents are the owners and/or operators of the Nation's electric power systems. Data are used to examine the incidents and track recovery process, along with alerting the senior policy makers of the Executive branch.

7. Businesses or other for-profit; Federal Government; Not-for-profit institutions; and State, Local or Tribal Governments.

8. 139 total burden hours; (48 respondents × 1 report × 2.89 hours/report).

Statutory Authority: Section 3507(j)(1) of the Paperwork Reduction Act of 1995 (Pub. L. No. 104–13).

Issued in Washington, D.C., December 4, 2001.

Jay H. Casselberry,

Agency Clearance Officer, Statistics and Methods Group, Energy Information Administration.

Federal Energy Regulatory Commission

[Docket No. RP02–59–000]

Algonquin Gas Transmission Company; Notice of Compliance Filing

December 4, 2001

Take notice that on November 28, 2001 Algonquin Gas Transmission Company (Algonquin) tendered for filing as part of its FERC Gas Tariff, Fourth Revised Volume No. 1 and Original Volume No. 2, the revised tariff sheets listed on Appendix A to the filing to become effective January 1, 2002.

Algonquin states that the purpose of this filing is to revise the Gas Research Institute (GRI) surcharges to be effective January 1, 2002 in compliance with the January 21, 1998, Stipulation and Agreement Concerning GRI Funding approved by the Commission in Gas Research Institute, 83 FERC ¶ 61,093 (1998), order on reh'g, 83 FERC ¶ 61, 331 (1998).

Algonquin states that the filing complies with the surcharges set forth in Appendix A to the Stipulation and Agreement as adjusted upward by 10% consistent with Article II, Section 1.0 of the Stipulation and Agreement, which was approved for filing by GRI member pipelines to be effective on January 1, 2002 without suspension or potential refund obligation by OMTR letter order issued September 19, 2001 in GRI's Docket No. RP01–434.

Specifically, Algonquin states that the approved 2002 surcharges are as follows: (1) A GRI volumetric surcharge of 0.55¢ per dekatherm will be charged on all non-discounted firm commodity and interruptible transportation services; (2) a 0.88¢ per dekatherm surcharge will be charged on all non-discounted firm commodity units delivered to small customers qualifying for service under Algonquin's Rate Schedules AFT–1S and AFT–ES; (3) a reservation surcharge of 6.6¢ per dekatherm per month will be charged on non-discounted firm high load factor customers, *i.e.*, greater than 50% load factor; and (4) a reservation surcharge of 4.07¢ per dekatherm per month will be charged on non-discounted firm low load factor customers, *i.e.*, less than or equal to 50% load factor.

Algonquin states that copies of the filing were mailed to all affected customers of Algonquin and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

Alliance Pipeline L.P.; Notice of Negotiated Rates

December 4, 2001.

Take notice that on November 26, 2001, Alliance Pipeline L.P. (Alliance) tendered for filing as part of its FERC Gas Tariff, Volume No. 1, the following tariff sheets to become effective January 1, 2002:

First Revised Sheet No. 11
First Revised Sheet No. 12
First Revised Sheet No. 13
First Revised Sheet No. 14

Alliance states that it provides firm service under Rate Schedule FT–1 for its existing shippers, all of whom have agreed to pay negotiated rates. The negotiated rate agreements provide that changes in Alliance's costs will be reflected in its negotiated rates from time to time. Alliance states that the tariff sheets listed above set forth the essential elements of its Rate Schedule FT–1 negotiated rate transactions, including the rates thereunder, and that it is filing the listed tariff sheets to reflect changes made to the rates charged under its negotiated rate agreements as a result of changes in its

costs. Alliance states that its filing is made pursuant to the authorization set forth in its negotiated rates agreements and section 39 of the General Terms and Conditions of its FERC Gas Tariff. Alliance states that copies of its filing have been mailed to all customers, state commissions, and other interested customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Dominion Transmission, Inc.; Notice of Negotiated Rate

December 4, 2001.

Take notice that on November 27, 2001, Dominion Transmission, Inc. (DTI) filed with the Commission the following tariff sheets for disclosure of a recently negotiated rate transaction:

Sixth Revised Sheet No. 1300
Second Revised Sheet No. 1406

DTI states that copies of its letter of transmittal and enclosures have been served upon DTI's customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. East Tennessee Natural Gas Company; Notice of Compliance Filing

December 4, 2001.

Take notice that on November 28, 2001, East Tennessee Natural Gas Company (East Tennessee) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, Twenty-Second Revised Sheet No. 4 and First Revised Sheet No. 4A to become effective January 1, 2002.

East Tennessee states that the purpose of this filing is to revise the Gas Research Institute (GRI) surcharges to be effective January 1, 2002 in compliance with the January 21, 1998, Stipulation and Agreement Concerning GRI Funding approved by the Commission in Gas Research Institute, 83 FERC ¶61,093 (1998), order on reh'g, 83 FERC ¶61,331 (1998).

East Tennessee states that the filing complies with the surcharges set forth in Appendix A to the Stipulation and Agreement as adjusted upward by 10% consistent with Article II, Section 1.0 of the Stipulation and Agreement, which was approved for filing by GRI member pipelines to be effective on January 1, 2002 without suspension or potential refund obligation by OMTR letter order issued September 19, 2001 in GRI's Docket No. RP01–434.

Specifically, East Tennessee states that the approved 2002 surcharges are as follows: (1) A GRI volumetric surcharge of 0.55¢ per dekatherm will be charged on all non-discounted firm commodity and interruptible transportation services; (2) a 0.88¢ per dekatherm surcharge will be charged on all non-discounted firm commodity units delivered to small customers qualifying for service under East Tennessee's Rate Schedule FT–GS; (3) a reservation surcharge of 6.6¢ per dekatherm per month will be charged on non-discounted firm high load factor customers, *i.e.*, greater than 50% load factor; and (4) a reservation surcharge of 4.07¢ per dekatherm per month will be charged on non-discounted firm low load factor customers, *i.e.*, less than or equal to 50% load factor.

East Tennessee states that copies of the filing were mailed to all affected customers of East Tennessee and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. [Docket No. EC02–25–000]

Llano Estacado Wind, LP Shell WindEnergy Inc.; Notice of Filing

December 4, 2001.

Take notice that on November 14, 2001, Llano Estacado Wind, LP (Llano Estacado Wind) and Shell WindEnergy, Inc. (Shell WindEnergy) (collectively, Applicants) tendered for filing the Federal Energy Regulatory Commission (Commission) an application pursuant to section 203 of the Federal Power Act for authorization of a disposition of jurisdictional facilities whereby Shell WindEnergy will indirectly acquire all the interests in Llano Estacado Wind, including jurisdictional rate schedules and certain substation and interconnection facilities.

Llano Estacado Wind owns the Llano Estacado Wind Ranch at White Dear, a wind-powered generation facility and Qualifying Small Power Production Facility with a nameplate gross output rating of 79.8 megawatts. Applicants have requested confidential treatment of certain commercially sensitive information.

Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions and protests should be filed on or before December 14, 2001. Protests will be considered by the Commission to determine the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). [Docket No. RP99–176–044]

Natural Gas Pipeline Company of America; Notice of Negotiated Rate

December 4, 2001.

Take notice that on November 28, 2001, Natural Gas Pipeline Company of America (Natural) tendered for filing to become part of its FERC Gas Tariff, Sixth Revised Volume No. 1, Substitute Original Sheet No. 26T, to be effective November 21, 2001.

On November 21, 2001, Natural filed Original Sheet No. 26T at Docket No. RP99–176–043 to implement a negotiated rate transaction under Rate Schedule ITS with Nicor Enerchange, LLC. Subsequently, it was discovered that certain provisions were inadvertently omitted. Therefore, Natural is now submitting Substitute Original Sheet No. 26T reflecting the appropriate provisions to be accepted in lieu of Original Sheet No. 26T previously submitted on November 21, 2001.

Natural requests waivers of the Commission's Regulations, including the 30-day notice requirement of section 154.207, to the extent necessary to permit the proposed tariff sheet to become effective November 21, 2001.

Natural states that copies of the filing are being mailed to its customers, interested state commissions and all parties set out on the Commission's official service list in Docket No. RP99–176.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Federal Energy Regulatory Commission

[Docket No. RP02–99–000]

Shell Offshore Inc., Complainant, v. Transcontinental Gas Pipeline Corporation, Williams Gas Processing—Gulf Coast Company, L.P., and Williams Field Services Company, Respondents; Notice of Complaint

December 4, 2001.

Take notice that on November 30, 2001, pursuant to rule 206 of the rules of practice and procedure of the Federal Energy Regulatory Commission (Commission), 18 CFR 385.206, Shell Offshore Inc. (Shell) tendered for filing a Complaint Requesting Fast Track Processing and Request for Interim Relief against Transcontinental Gas Pipeline Corporation (Transco), Williams Gas Processing—Gulf Coast Company, L.P.(WGP), and Williams Field Services Company (WFS). Shell alleges that Transco, in concert with its affiliates WGP and WFS, are acting in an anti-competitive manner in connection with the transportation of gas in interstate commerce. More specifically, Shell alleges that Transco and its affiliates are implementing the abandonment of the North Padre facilities in a manner that frustrates the Commission's expectation that the abandonment would foster competition within the gathering industry and in a manner contrary to the Commission's policies and effective regulation of the interstate transportation of natural gas.

Shell has requested the Commission to: (1) Reassert jurisdiction over Transco's integrated system to protect shippers such as Shell from the anti-competitive behavior of Transco and its affiliates; (2) protect Shell from the immediate danger of losing its essential service on the North Padre facilities and the jurisdictional IT-feeder facilities by providing immediate interim relief requiring Transco and its affiliates to continue service without interruption at the Pre-December 1, 2001 rates, and under the same terms and conditions of service; and (3) provide permanent

relief to Shell against the loss of essential service on the North Padre facilities and the jurisdictional IT-feeder facilities by requiring Transco and its affiliates to continue service without interruption at just and reasonable rates and terms and conditions of service.

Any person desiring to be heard or to protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests must be filed on or before December 14, 2001. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Answers to the complaint shall also be due on or before December 14, 2001. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). [Docket Nos. RP96–312–063]

Tennessee Gas Pipeline Company; Notice of Negotiated Rate and Compliance Filing

December 4, 2001.

Take notice that on November 27, 2001, Tennessee Gas Pipeline Company (Tennessee), submitted for filing and approval a Gas Transportation Agreement between Tennessee and eCORP Marketing, L.L.C., pursuant to Tennessee's Rate Schedule FT–IL for service on Tennessee's Stagecoach Lateral, dated November 5, 2001 (November 5 Lateral Service Agreement).

Tennessee states that the filing is being made in compliance with the Commission's February 23, 2001 Order Issuing Certificates and Authorizing Abandonment in Docket Nos. CP00–65–000, *et al.*, and the Commission's November 2, 2001 letter order in Docket Nos. RP02–17–000 and CP00–65–005. Tennessee requests that the Commission accept and approve on an expedited basis the negotiated rates in the November 5 Lateral Service Agreement to be effective on December 1, 2001.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's Regulations. DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP02–60–000]

Texas Eastern Transmission, LP; Notice of Compliance Filing

December 4, 2001.

Take notice that on November 28, 2001, Texas Eastern Transmission, LP (Texas Eastern) tendered for filing as part of its FERC Gas Tariff, Seventh Revised Volume No. 1 and First Revised Volume No. 2, the revised tariff sheets listed on Appendix A to the filing, to become effective January 1, 2002.

Texas Eastern states that the purpose of this filing is to revise the Gas Research Institute (GRI) surcharges to be effective January 1, 2002 in compliance with the January 21, 1998, Stipulation and Agreement Concerning GRI Funding approved by the Commission in Gas Research Institute, 83 FERC ¶ 61,093 (1998), order on reh'g, 83 FERC ¶ 61,331 (1998).

Texas Eastern states that the filing complies with the surcharges set forth in Appendix A to the Stipulation and Agreement as adjusted upward by 10% consistent with Article II, Section 1.0 of the Stipulation and Agreement, which was approved for filing by GRI member pipelines to be effective on January 1, 2002 without suspension or potential refund obligation by OMTR letter order issued September 19, 2001 in GRI's Docket No. RP01–434.

Specifically, Texas Eastern states that the approved 2002 surcharges are as follows: (1) A GRI volumetric surcharge of 0.55¢ per dekatherm will be charged on all non-discounted firm commodity and interruptible transportation services; (2) a 0.88¢ per dekatherm surcharge will be charged on all non-discounted firm commodity units delivered to small customers qualifying for service under Texas Eastern's Rate Schedule SCT; (3) a reservation surcharge of 6.6¢ per dekatherm per month will be charged on non-discounted firm high load factor customers, *i.e.*, greater than 50% load factor; and (4) a reservation surcharge of 4.07¢ per dekatherm per month will be charged on non-discounted firm low load factor customers, *i.e.*, less than or equal to 50% load factor.

Texas Eastern states that copies of the filing were mailed to all affected customers of Texas Eastern and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and

interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EG02–4–000, et al.]

GNE, LLC, et al.; Electric Rate and Corporate Regulation Filings

December 3, 2001.

Take notice that the following filings have been made with the Commission:

1. GNE, LLC

[Docket No. EG02–4–000]

Take notice that on November 30, 2001, GNE, LLC located at 1 Katahdin Avenue, Millinocket, Maine, 04462–1398, tendered for filing with the Federal Energy Regulatory Commission (Commission) an amendment to application for exempt wholesale generator status pursuant to Part 365 of the Commission's regulations.

GNE, LLC is a Delaware limited liability company that will own and operate four hydroelectric plants located at or near Millinocket, Maine, with a total nameplate capacity of approximately 130 megawatts and certain undivided joint ownership interest in several transmission interconnection components that will be part of the eligible facility. GNE, LLC will be engaged directly and exclusively in the business of owning and operating all or part of one or more eligible facilities and selling electric energy at wholesale.

Comment date: December 24, 2001, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

2. Portland General Electric Company

[Docket No. ES01–33–001]

Take notice that on November 28, 2001, Portland General Electric Company submitted an amendment to its original application pursuant to section 204 of the Federal Power Act. The amendment seeks authorization to issue short-term debt securities in an amount not to exceed $550 million.

Comment date: December 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

3. Northeast Utilities Service Company, Select Energy, Inc., Northeast Generation Company

[Docket No. ER96–496–010, Docket No. ER99–14–007, and Docket No. ER99–4463–001]

Take notice that on November 28, 2001, Northeast Utilities Service Company (NUSCO), on behalf of The Connecticut Light and Power Company, Western Massachusetts Electric Company, Holyoke Water Power Company, Holyoke Power and Electric Company, and Public Service of New Hampshire (the NU Operating Companies), and Select Energy, Inc. (Select), and Northeast Generation Company (NGC) (collectively, Applicants) jointly filed with the Federal Energy Regulatory Commission (Commission), an updated market power analysis. This filing serves as the triennial updated market power analysis in Docket Nos. ER96–496–000 for the NU Operating Companies; ER99–14–000 for Select; and ER99–4463–000 for NGC. In addition, Applicants request the Commission to synchronize their future triennial market power updates.

Comment date: December 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

4. Phoenix Wind Power LLC

[Docket No. ER02–417–000]

Take notice that on November 28, 2001, Phoenix Wind Power LLC filed with the Federal Energy Regulatory Commission (Commission) a Notice of Succession informing the Commission that the name of PPM One LLC had been changed to Phoenix Wind Power LLC. Phoenix Wind Power LLC included with the Notice of Succession its First Revised Rate Schedule No. 1, effective November 27, 2001, which was revised to reflect the name change and to satisfy the Commission's regulations in 18 CFR 35.9.

Comment date: December 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

5. Klamath Generation LLC

[Docket No. ER02–418–000]

Take notice that on November 28, 2001, Klamath Generation LLC filed with the Federal Energy Regulatory Commission (Commission) a Notice of Succession informing the Commission that the name of PPM Four LLC had been changed to Klamath Generation LLC. Klamath Generation LLC included with the Notice of Succession its First Revised Rate Schedule No. 1, effective November 27, 2001, which was revised to reflect the name change and to satisfy the Commission's regulations in 18 CFR 35.9.

Comment date: December 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

6. Southern Company Services, Inc.

[Docket No. ER02–419–000]

Take notice that on November 28, 2001, Southern Company Services, Inc. (SCS), acting on behalf of Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, and Savannah Electric and Power Company (collectively referred to as Southern Companies), filed eleven (11) service agreements for point-to-point transmission service under the Open Access Transmission Tariff of Southern Companies (FERC Electric Tariff, Fourth Revised Volume No. 5). Specifically, this filing concerns seven (7) agreements for short-term firm point-to-point transmission service executed between SCS, as agent for Southern Companies, and: (i) TXU Energy Trading Company; (ii) Enron Power Marketing, Inc.; (iii) Cinergy Services, Inc.; (iv) Cargill-Alliant, LLC; (v) Avista Energy, Inc.; (vi) Sempra Energy Trading Corporation; and (vii) NRG Power Marketing, Inc. This filing also concerns four (4) agreements for non-firm point-to-point transmission service executed between SCS, as agent for Southern Companies, and: (i) TXU Energy Trading Company; (ii) Cargill-Alliant, LLC; (iii) Sempra Energy Trading Corporation; and (iv) NRG Power Marketing, Inc.

Comment date: December 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

7. Tucson Electric Power Company

[Docket No. ER02–420–000]

Take notice that on November 28, 2001, Tucson Electric Power Company tendered for filing one (1) Umbrella Service Agreement (for short-term firm service) and one (1) Service Agreement (for non-firm service) pursuant to Part II of Tucson's Open Access Transmission Tariff, which was filed in Docket No. ER01–208–000.

The details of the service agreements are as follows:

Umbrella Agreement for Short-Term Firm Point-to-Point Transmission Service dated as of July 24, 2001 by and between Tucson Electric Power Company PPL EnergyPlus, LLC–FERC Electric Tariff Vol. No. 2, Service Agreement No. 182. No service has commenced at this time.

Form of Service Agreement for Non-Firm Point-to-Point Transmission

Service dated as of July 24, 2001 by and between Tucson Electric Power Company and PPL EnergyPlus, LLC—FERC Electric Tariff Vol. No. 2, Service Agreement No. 183. No service has commenced at this time.

Comment date: December 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

8. Southwest Power Pool, Inc.

[Docket No. ER02–421–000]

Take notice that on November 28, 2001, Southwest Power Pool, Inc. (SPP) tendered for filing with the Federal Energy Regulatory Commission (Commission), a Notice of Cancellation for SPP Service Agreement Nos. 518 through 521, between SPP and McCurtain Energy Associates, LLC, and SPP Service Agreement Nos. 522 through 524, between SPP and Sequoyah Energy Associates, LLC (collectively, Transmission Customers).

SPP requests an effective date of November 6, 2001 for this cancellation.

Copies of this filing have been served upon the Transmission Customers.

Comment date: December 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

9. West Texas Utilities Company

[Docket No. ER02–422–000]

Take notice that on November 28, 2001, West Texas Utilities Company (WTU) submitted for filing revised tariff sheets under WTU's Wholesale Power Choice Tariff (WPC Tariff) to modify billing procedures.

WTU seeks an effective date of August 1, 2001.

WTU states that a copy of this filing has been served on all customers taking service under the WPC Tariff and the Public Utilities Commission of Texas.

Comment date: December 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

10. Commonwealth Edison Company

[Docket No. ER02–423–000]

Take notice that on November 28, 2001 Commonwealth Edison Company (ComEd) submitted for filing a Form of Service Agreement for Firm Point-to-Point Transmission Service (Service Agreement) between ComEd and Exelon Generation Company, LLC (Exelon) under the terms of ComEd's Open Access Transmission Tariff (OATT).

ComEd requests an effective date of November 21, 2001.

Copies of this filing were served on Exelon.

Comment date: December 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

11. Michigan Electric Transmission Company and Consumers Energy Company

[Docket No. ER02–424–000]

Take notice that on November 28, 2001, Consumers Energy Company (Consumers) and Michigan Electric Transmission Company (Michigan Transco) tendered for filing a Notice of Succession and several documents related to the transfer of specified Rate Schedules from Consumers to Michigan Transco. (The filing is intended to supplement a prior filing in Docket No. ER01–1683–000).

The changes therein noted are to become effective April 1, 2001.

A full copy of the filing was served upon the Michigan Public Service Commission, and the Customers served under the affected Rate Schedules.

Comment date: December 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

12. Cleco Power LLC

[Docket No. ER02–425–000]

Take notice that on November 28, 2001, Cleco Power LLC (Cleco) filed a Revised Electric System Interconnection Agreement with Southwestern Electric Power Company that provides for a new delivery point for SWEPCO deliveries at Grand Bayou and the terms and conditions for the installation of new meter and communications equipment associated with that delivery point. The revised agreement is designated as Cleco Power LLC First Revised Rate Schedule FERC No. 17.

Comment date: December 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

13. American Transmission Company LLC

[Docket No. ER02–426–000]

Take notice that on November 28, 2001, American Transmission Company LLC (ATCLLC) tendered for filing an executed Distribution-Transmission Interconnection Agreement between ATCLLC and Cloverland Electric Cooperative.

ATCLLC requests an effective date of June 29, 2001.

Comment date: December 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

Linwood A. Watson, Jr.,

Acting Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP02–25–000]

Copiah County Storage Company; Notice of Intent To Prepare an Environmental Assessment for the Proposed Copiah Storage Project and Request for Comments on Environmental Issues

December 4, 2001.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Copiah Storage Project involving construction and operation of facilities by Copiah County Storage Company (Copiah) in Copiah County, Mississippi.[1] Copiah proposes to construct a compressor station, a natural gas storage cavern, approximately 635 feet of 20-inch-diameter pipeline, and up to five freshwater withdrawal/brine injection well sites. This EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

If you are a landowner receiving this notice, you may be contacted by a pipeline company representative about

[1] Copiah's application was filed with the Commission under section 7 of the Natural Gas Act and part 157 of the Commission's regulations.

the acquisition of an easement to construct, operate, and maintain the proposed facilities. The pipeline company would seek to negotiate a mutually acceptable agreement. However, if the project is approved by the Commission, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings in accordance with state law.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" was attached to the project notice Copiah provided to affected landowners. This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is available for viewing on the FERC Internet Web site (*www.ferc.gov*).

Summary of the Proposed Project

Copiah wants to provide a storage facility that would act as a reservoir for a supply of natural gas to the Mississippi regional area. The proposed project would meet load swings brought about by gas-fired electric generation and the peak winter heating load and growth of local distribution companies for rapid fuel delivery services to nearby pipeline systems. The storage facility would have an initial natural gas storage working capacity of approximately 3.3 billion cubic feet (Bcf) with 300,000 dekatherms per day (Dth/d) of deliverability capability and 150,000 Dth/d of injection capability. Specifically, Copiah seeks authority to construct and operate:

- A single 3.3 Bcf capacity gas storage cavern extending approximately 5,500 feet below the ground surface within an underground salt dome;
- 13,350 horsepower (hp) of gas engine-driven compression at the new Copiah Storage Project compressor station to provide compression for injection and withdrawal of natural gas from the gas storage cavern;
- Approximately 635 feet of 20-inch-diameter pipeline from the compressor station to the storage cavern wellhead; and
- Up to five well sites consisting of a freshwater withdrawal well and brine injection well at each site.

The location of the project facilities is shown in appendix 1.[2]

Land Requirements for Construction

Approximately 730 acres have been identified by Copiah as the project area. However, only 59 acres would be disturbed by construction and 53 acres would be necessary for the operation of the proposed project.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us[3] to discover and address concerns the public may have about proposals. We call this "scoping". The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission requests public comments on the scope of the issues it will address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern.

The EA will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- Geology and soils
- Land use
- Water resources, fisheries, and wetlands
- Endangered and threatened species
- Vegetation and wildlife
- Air quality and noise
- Cultural resources

We will also evaluate possible alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

Our independent analysis of the issues will be in the EA. Depending on the comments received during the scoping process, the EA may be published and mailed to Federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we make our recommendations to the Commission.

To ensure your comments are considered, please carefully follow the instructions in the public participation section below.

Currently Identified Environmental Issues

We have already identified several issues that we think deserve attention based on a preliminary review of the proposed facilities and the environmental information provided by Copiah. This preliminary list of issues may be changed based on your comments and our analysis.

- The project would be located in a United States Environmental Protection Agency-designated sole-source aquifer area, the Southern Hills Regional Aquifer System.
- The project would require approximately 34 million barrels of non-potable freshwater for cavern solution leaching. The rate of withdrawal from each well would be approximately 600 to 1,000 gallons per minute (gpm). Brine resulting from cavern leaching would be disposed of by injection into disposal wells.

Public Participation

You can make a difference by providing us with your specific comments or concerns about the project. By becoming a commentor, your concerns will be addressed in the EA and considered by the Commission. You should focus on the potential environmental effects of the proposal, alternatives to the proposal (including alternative locations), and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be. Please carefully follow these instructions to ensure that your comments are received in time and properly recorded:

- Send an original and two copies of your letter to: Secretary, Federal Energy Regulatory Commission, 888 First St., NE., Room 1A, Washington, DC 20426.
- Label one copy of the comments for the attention of Gas/Hydro.
- Reference Docket No. CP02–025–000.
- Submit your comments so that they will be received in Washington, DC on or before January 15, 2002.

Comments, protests, and interventions may be filed electronically via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web

[2] The appendices referenced in this notice are not being printed in the **Federal Register**. Copies are available on the Commission's Web site at the "RIMS" link or from the Commission's Public Reference and Files Maintenance Branch, 888 First Street, NE., Washington, DC 20426, or call (202) 208–1371. For instructions on connecting to RIMS refer to the last page of this notice. Copies of the appendices were sent to all those receiving this notice in the mail.

[3] "We", "us", and "our" refer to the environmental staff of the Office of Energy Projects (OEP).

site at *http://www.ferc.gov* under the "e-Filing" link and link to the User's Guide. Before you can file comments you will need to create an account which can be created by clicking on "Login to File" and then "New User Account."

Everyone who responds to this notice or comments throughout the EA process will be retained on our mailing list. If you do not want to send comments at this time but still want to remain on our mailing list, please return the Information Request (appendix 3). If you do not return the Information Request, you will be taken off the mailing list.

Due to current events, we cannot guarantee that we will receive mail on a timely basis from the U.S. Postal Service, and we do not know how long this situation will continue. However, we continue to receive filings from private mail delivery services, including messenger services in a reliable manner. The Commission encourages electronic filing of any comments or interventions or protests to this proceeding. We will include all comments that we receive within a reasonable time frame in our environmental analysis of this project.

Becoming an Intervenor

In addition to involvement in the EA scoping process, you may want to become an official party to the proceeding known as an "intervenor". Intervenors play a more formal role in the process. Among other things, intervenors have the right to receive copies of case-related Commission documents and filings by other intervenors. Likewise, each intervenor must provide 14 copies of its filings to the Secretary of the Commission and must send a copy of its filings to all other parties on the Commission's service list for this proceeding. If you want to become an intervenor you must file a motion to intervene according to Rule 214 of the Commission's rules of practice and procedure (18 CFR 385.214) (see appendix 2).[4] Only intervenors have the right to seek rehearing of the Commission's decision.

Affected landowners and parties with environmental concerns may be granted intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which would not be adequately represented by any other parties. You do not need intervenor status to have your environmental comments considered.

Additional information about the proposed project is available from the Commission's Office of External Affairs at (202) 208–1088 or on the FERC Web site (*www.ferc.gov*) using the "RIMS" link to information in this docket number. Click on the "RIMS" link, select "Docket #" from the RIMS Menu, and follow the instructions. For assistance with access to RIMS, the RIMS helpline can be reached at (202) 208–2222.

Similarly, the "CIPS" link on the FERC Internet Web site provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings. From the FERC Internet Web site, click on the "CIPS" link, select "Docket #" from the CIPS menu, and follow the instructions. For assistance with access to CIPS, the CIPS helpline can be reached at (202) 208–2474.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP01–433–000]

Transcontinental Gas Pipe Line Corporation; Notice of Intent To Prepare an Environmental Assessment for the Proposed Station 35 Clean Air Project and Request for Comments on Environmental Issues

December 4, 2001.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Station 35 Clean Air Project involving construction and operation of facilities by Transcontinental Gas Pipe Line Corporation (Transco) in Harris County, Texas.[1] These facilities would consist of 14,910 horsepower (hp) of compression at an existing compressor station. The EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

If you are a landowner you might have also received previous notification from Transco. FERC regulations require the applicant to notify all landowners within one-half mile of the compressor station. However, the proposed facility modifications will take place entirely within Transco property and no additional land will be required for this project.

Summary of the Proposed Project

Transco proposes to modify its existing compressor site at Compressor Station 35 in Harris County, Texas to comply with Clean Air Act Amendments (CAA) of 1990 and the Texas Natural Resource Conservation Commission for the Houston-Galveston Intrastate Air Quality Control Region. To reduce emissions and comply with the CAA, Transco proposes to:

- Install 2 electric motors driving two 7455 HP centrifugal compressors and associated equipment;
- Remove 4 existing gas-fired compressors;
- Construct a new 75 feet x 110 feet compressor building, a 35 feet x 72 feet auxiliary building, a 120 feet x 200 feet electrical auxiliary building and a 16 feet x 50 feet switchgear station;
- Demolish the old compressor building and remove associated equipment; and;
- Modify existing yard piping.

Land Requirements for Construction

Construction of the proposed facilities would require about 4 acres of land in a completely fenced site that has been previously disturbed.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us[2] to discover and address concerns the public may have about proposals. We call this "scoping". The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission requests public comments on the scope of the issues it will address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern.

The EA will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

[4] Interventions may also be filed electronically via the Internet in lieu of paper. See the previous discussion on filing comments electronically.

[1] Transco's application was filed with the Commission under section 7 of the Natural Gas Act and part 157 of the Commission's regulations.

[2] "We", "us", and "our" refer to the environmental staff of the Office of Energy Projects (OEP).

1. Geology and soils.
2. Land use.
3. Water resources, fisheries, and wetlands.
4. Cultural resources.
5. Vegetation and wildlife.
6. Air quality and noise.
7. Endangered and threatened species.
8. Hazardous waste.
9. Public safety.
10. Water resources, fisheries, and wetlands.

Our independent analysis of the issues will be in the EA. Depending on the comments received during the scoping process, the EA may be published and mailed to Federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we make our recommendations to the Commission.

To ensure your comments are considered, please carefully follow the instructions in the public participation section beginning on page 4.

Currently Identified Environmental Issues

We have already identified several issues that we think deserve attention based on a preliminary review of the proposed facilities and the environmental information provided by Transco. This preliminary list of issues may be changed based on your comments and our analysis.

11. Air quality effects.
12. Noise impact.
13. Land-use compatibility.

Public Participation

You can make a difference by providing us with your specific comments or concerns about the project. By becoming a commentor, your concerns will be addressed in the EA and considered by the Commission. You should focus on the potential environmental effects of the proposal, alternatives to the proposal (including alternative locations/routes), and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be. Please carefully follow these instructions to ensure that your comments are received in time and properly recorded:

14 Send an original and two copies of your letter to: Secretary, Federal Energy Regulatory Commission, 888 First St., NE., Room 1A, Washington, DC 20426.

15. Label one copy of the comments for the attention of (Gas/Hydro Branch).

16. Reference Docket No. CP01–433–000.

17. Mail your comments so that they will be received in Washington, DC on or before (January 15, 2002).

Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

If you do not want to send comments at this time but still want to remain on our mailing list, please return the Information request (appendix 2). If you do not return the Information Request, you will be removed from the environmental mailing list.

Due to current events, we cannot guarantee that we will receive mail on a timely basis from the U.S. Postal Service, and we do not know how long this situation will continue. However, we continue to receive filings from private delivery services, including messenger services in a reliable manner. The Commission encourages electronic filing of any comments or interventions or protests to this proceeding. We will include all comments that we receive within a reasonable time frame in our environmental analysis of this project.

Becoming an Intervenor

In addition to involvement in the EA scoping process, you may want to become an official party to the proceeding known as an "intervenor". Intervenors play a more formal role in the process. Among other things, intervenors have the right to receive copies of case-related Commission documents and filings by other intervenors. Likewise, each intervenor must provide 14 copies of its filings to the Secretary of the Commission and must send a copy of its filings to all other parties on the Commission's service list for this proceeding. If you want to become an intervenor you must file a motion to intervene according to Rule 214 of the Commission's rules of practice and procedure (18 CFR 385.214) (see appendix 2).[3] Only intervenors have the right to seek rehearing of the Commission's decision.

Affected landowners and parties with environmental concerns may be granted intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which would not be adequately represented by any other parties. You do not need intervenor status to have your environmental comments considered.

[3] Interventions may also be filed electronically via the Internet in lieu of paper. See the previous discussion on filing comments electronically.

Additional information about the proposed project is available from the Commission's Office of External Affairs at (202) 208–1088 or on the FERC Web site (*www.ferc.gov*) using the "RIMS" link to information in this docket number. Click on the "RIMS" link, select "Docket #" from the RIMS Menu, and follow the instructions. For assistance with access to RIMS, the RIMS helpline can be reached at (202) 208–2222.

Similarly, the "CIPS" link on the FERC Internet Web site provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings. From the FERC Internet Web site, click on the "CIPS" link, select "Docket #" from the CIPS menu, and follow the instructions. For assistance with access to CIPS, the CIPS helpline can be reached at (202) 208–2474.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–7114–8]

Equipment Containing Ozone Depleting Substances at Industrial Bakeries

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed bakery partnership program and request for comments.

SUMMARY: In today's **Federal Register** the Environmental Protection Agency announces a unique voluntary Partnership Program for the baking industry. EPA believes that there are many bakeries that are leaking ozone depleting substances, including chlorofluorocarbons (CFCs), in excess of permitted levels, and therefore, intends to establish a voluntary program for reducing these emissions in an expeditious, highly cost-effective manner. This program generally requires participants to audit certain appliances and phase out Class I industrial process refrigeration appliances. It also provides incentives to replace existing appliances with non-ozone depleting systems, and requires compliance with the leak repair regulations.

Participation in the partnership program is purely voluntary, and this is not a rule, but it does combine the advantages of predictability and

reduced penalties with incentives to move away from the use of ozone depleting substances (ODS). Participating companies will be asked to agree to phase out use of the more hazardous Class I ODS by July 15, 2003, reflecting the fact that use of these substances is being rapidly phased out under existing rules. Bakeries that have installed non-ODS systems by March 15, 2002, can avoid all penalties under this agreement. Bakeries that install non-ODS systems after that date but no later than July 15, 2004 (unless an extension is granted) are limited to penalties of $10,000 per appliance. All other appliances must pay a per pound penalty for any leaks that cross a high threshold but again, this per pound penalty can be avoided by conversion to non-ODS systems. Companies already under national investigation for violations are not eligible to participate in this program. EPA solicits comments on the Bakery Partnership Program described below.

DATES: Comments should be submitted by January 9, 2002.

ADDRESSES: Comments should be submitted: Bakery Partnership Program Comments, the Docket Clerk, Enforcement and Compliance Docket and Information Center (Mail Code 2201A), Docket Number EC–2001–007, U.S. Environmental Protection Agency, Ariel Rios Building, 1200 Pennsylvania Ave, NW., Washington, DC 20460 (in triplicate, if possible). Please use a font size no smaller than 12. Commenters are encouraged to submit their comments electronically in lieu of or in addition to standard delivery, by sending those comments electronically to a separate email box established for the purpose of receiving comments and other notices under this Bakery Partnership Program: *docket.oeca@epa.gov*. Attach electronic comments as an ASCii (text) file, and avoid the use of special characters and any form of encryption. Be sure to include the docket number, EC–2001–007 on your document. Comments may also be faxed to (202) 501–1011. In person, deliver comments to Enforcement and Compliance Docket and Information Center, U.S. Environmental Protection Agency, Ariel Rios Building, Room 4033, 1200 Pennsylvania Ave, NW., Washington, DC 20460. Persons interested in reviewing this docket may do so by calling (202) 564–2614 or (202) 564–2119.

FOR FURTHER INFORMATION CONTACT: Mr. Charles Garlow, Air Enforcement Division (2242A), U.S. EPA, 1200 Pennsylvania Ave NW., Washington, DC 20460, telephone 202–564–1088.

SUPPLEMENTARY INFORMATION: Many industries, including most industrial bakeries, use ozone depleting substances [ODS], such as CFCs and hydrochlorofluorocarbons [HCFCs], to cool their products. Like other industrial sources, most industrial bakeries have industrial process refrigeration appliances that are subject to 40 CFR part 82, subpart F. The equipment that produces the product contains CFCs or other ozone depleting substances in jackets around the product. The equipment may sometimes leak these coolants in sizeable quantities into the air, not into the product. If certain leak rates are exceeded, the company may be required to retrofit or retire the equipment.

EPA has concluded two large industrial process refrigeration enforcement cases, one of which involved a baking company with bakeries in several states. In both cases, the companies voluntarily chose to replace their industrial process refrigeration appliances with equipment designed to prevent pollution. The ozone depleting coolant was replaced by a cooling system which uses a secondary loop containing a cooling solution, glycol, that is not an ozone depleting substance. Although the primary loop of the refrigeration system may still contain some ozone depleting substances, the quantity is greatly reduced, and the ODS refrigerant is located where vibration and the potential for leaks is greatly reduced. The EPA wants to encourage all companies with industrial process refrigeration appliances that may be leaking to consider a similar pollution prevention approach to ensuring their compliance with the refrigerant recycling and emissions reduction regulations found at 40 CFR part 82, subpart F.

EPA is inviting the baking industry to participate in a voluntary program to address these potential violations. It offers an expedited way for companies to correct past violations and prevent future ones, in return for a release from past liabilities and reduced penalties. The largest trade association representing bakeries accepted this invitation on behalf of its members. The total number of industrial bakeries is not exactly known yet, but it is believed that there may be over 1,000 bakeries in the United States. Each bakery will likely have one or more industrial process refrigeration appliances that are subject to the regulations, such as mixers or chillers, at each bakery. Many of these industrial process refrigeration appliances, have already been converted to non-ODS, pollution prevention equipment.

In the interests of promoting fast, efficient and widespread emission reductions, and better compliance with the regulatory structure, EPA intends to offer and enter into agreements with baking companies providing for the following:

- Audit their facilities;
- Identify problem areas;
- Pay a greatly reduced penalty, and propose solutions that will protect the environment; and,
- Ensure greater compliance with the refrigerant recycling and emissions reduction regulations found at 40 CFR part 82, subpart F.

EPA's proposal offers clear and consistent terms to reduce uncertainty and eliminate the need for extended, individualized negotiations. Presented here are the basic elements, illustrations and a chronology of key steps that EPA and participants will be expected to take. The basic elements of the program are as follows:

- *Notice to EPA*. Bakeries not already the subject of a national enforcement investigation or action, and which have industrial process refrigeration appliances containing 50 pounds or more of ODS refrigerants, are eligible to participate. Companies intending to participate should notify EPA by March 15, 2002 and as soon thereafter as possible, but no later than March 30, 2002, identify the number of appliances to be audited. If some of the industrial process refrigeration appliances have been converted to non-ODS systems prior to March 15, 2002, a count of these appliances should also be provided. If, during the audit, a more accurate tally is obtained, an updated notice may be submitted at that time. Appendix A contains a sample notice of participation. It can be sent by electronic mail or hard copy mail, but electronic mail or e-mail is preferred.
- *Annualized leak rate*. For the purposes of this Partnership Agreement, the annualized leak rate shall be calculated for every instance in which refrigerant was added to the appliance. The leak rate shall be calculated by the formula agreed upon by EPA in the *Compliance Guidance for Industrial Process Refrigeration Leak Repair Regulations under Section 608 of the Clean Air Act*.
- *Audit*. Participating companies must audit up to June 15, 2003, i.e., assess the compliance status of all their industrial process refrigeration appliances and facilities. They must then report to EPA a summary of their findings, by July 15, 2003. If a company complies with the program, EPA intends

to grant a release from civil liability for the matters identified and corrected, so long as reduced penalties are paid as described below. However, if violative conduct is not identified and corrected, EPA is not granting any release for such problems. Good faith participants in this Partnership Program will receive a release for the period of time prior to September 30, 2000, even though this period may not be audited. If a facility has installed non-ODS technology on any of their appliances prior to the March 15, 2002 start date for this partnership program, such an appliance need not be audited, and a complete release from civil liabilities and penalties will be granted for such appliances. By non-ODS systems, EPA means systems that contain no ODS at all [e.g. HFC systems or ammonia systems] or no ODS in the secondary loop, but may contain an ODS in the primary loop. Typically, the ODS in the primary loop [compressor] is a much smaller volume, and is not subjected to the vibration in the process areas that may cause greater leaks. If the primary loop contains less than 50 pounds of ODS, as is frequently the case, then the appliance is exempt from the leak repair regulations. It is still subject to other requirements such as the "no venting" requirement of 40 CFR 82.154(a).

• *Class I appliances.* All Class I appliances must be audited and converted either to a non-ODS system or to a system using an ODS with an ozone depleting potential [ODP] of less than 0.1. Class I appliances are those containing Class I controlled substances, listed in appendix A to subpart A of 40 CFR part 82, and include CFC refrigerants (e.g., R–12). Leaks from these Class I appliances are more damaging to the Earth's ozone layer than an equivalent amount of leakage from Class II appliances. The phaseout of the production of CFCs was completed as of December 31, 1995. Since the availability of CFCs will continue to decrease over time, EPA believes that this is a good time to switch to a less ozone-depleting technology. EPA estimates that the vast majority of appliances in this industry have already switched from using Class I ODS to either Class II or non-ODS systems. Participating companies must identify their Class I appliances and submit a plan for change/conversion to either the Class II ODS with an ODP of 0.1 or less, such as R–22, or to a non-ODS system. The audits must be completed and plans must be submitted to EPA by July 15, 2002. An Administrative Order on Consent [AOC] will incorporate a pledge to complete the audits of Class II appliances and to submit plans if needed, for those appliances by July 15, 2003 and pay penalties as specified in the agreement. EPA expects the plans for Class I appliances to be fully implemented by July 15, 2003, but may grant additional time in exceptional circumstances pursuant to 40 CFR 82.156(i)(7).

• *Class II appliances.* All Class II appliances must be audited by June 15, 2003. Class II appliances are those containing Class II controlled substances, listed in appendix B to subpart A of 40 CFR part 82 (including all HCFC refrigerants, such as R–22). If any of these appliances are being changed/converted to non-ODS systems, then plans to accomplish this must be submitted by July 15, 2003 as agreed to in the July 2002 AOC.

• *CAFO.* EPA will issue Compliance Agreement Final Orders [CAFOs] to participating companies that reflect the audit findings, implementation plans and schedule of corrections, any reduced penalties that must be paid and a release from civil liability conditioned on completion of the implementation plans and corrections. EPA will issue CAFOs at the completion of all audits in July of 2003. If a company has only Class I appliances, EPA will issue the CAFO in July of 2002. Companies must also commit to compliance with all regulations.

• *Plan Implementation.* By July 15, 2003 for Class I appliances and by July 15, 2004 for Class II appliances, all plans for equipment changes/conversions should be completely implemented, unless extensions are granted pursuant to 40 CFR 82.156(i)(7). EPA is still considering whether the proposal outlined above satisfies the Clean Air Act requirement that Section 113(a) administrative orders must require compliance within twelve months of their issuance.

• *Program Completion.* By July 15, 2004 or such later date that all conversions are completed, the participating company will notify EPA and EPA will respond with a confirmation letter acknowledging the completion of the Bakery Partnership Program.

Penalties

• *Per appliance penalty.* A penalty of $10,000 shall be paid for all ODS containing appliances, regardless of whether violations are identified or not, except that no penalties are due for any appliance converted to a non-ODS system before March 15, 2002. No bakery facility must pay more than $50,000 in these penalties. This penalty will be paid with other penalties no later than 30 days after receipt of the CAFO.

• *Per pound penalties.* Additional "per pound" penalties for all appliance leaks discovered during the audit, occurring after a 35% annualized leak rate, must be calculated on a 12 month basis, beginning when the auditing period starts, *i.e.*, September 30, 2000. At the end of the 12 month period following a 35% annualized leak rate, per pound calculations cease, unless a subsequent 35% annualized leak is discovered, in which case another 12 month period of calculation begins. Per pound penalty calculations end June 15, 2003.

• *No per pound penalties for replacement with non-ODS system.* Switching to a non-ODS system is encouraged. If a participating company agrees to replace an ODS system with a non-ODS system in an appliance, no "per pound" penalties need be paid for that appliance. If a company is facing high per pound penalties for a particular appliance but has decided that it does not make technical or economic sense for the company to convert that particular appliance to a non-ODS system, it may instead substitute another appliance[s] and still avoid the per pound penalties for the first appliance. The first appliance must still be brought into full compliance. This "bubbled compliance" concept would allow a company to substitute another appliance or appliances that have 120% of the full charge of the appliance that will not be changed/converted. For example, if a 1000 pound appliance has very high per pound penalties that the company wishes to avoid, it may avoid those penalties either by converting this appliance to a non-ODS system, or by converting one or more other ODS containing appliances [that were not already required to convert to non-ODS systems] which have a total charge of at least 1200 pounds. This could be one other appliance with a full charge of 1200 pounds or two appliances of 600 pounds each or some other combination of appliances that total at least 1200 pounds of refrigerant. If the two 600 pound appliances in this example had per pound penalties of their own, those penalties would still be due, unless some other appliance or appliances in turn were converted to non-ODS systems in their stead, at the 1.2 to 1 ratio, as above.

• *Start-up period.* No leaks will be counted as part of the per pound calculation for the period 60 days after a new installation or after an appliance is changed/converted to a non-ODS or lower than 0.1 ODP system, as a "start up" period.

• *Per pound amounts.* Per pound penalties will be calculated per appliance as follows: $20 per pound for up to 500 pounds, $30 per pound for 501–1000 pounds and $40 per pound for the pounds over 1000 for each 12 month period after a 35% annualized leak rate is identified.

In summary, all sources must achieve and maintain full compliance with the refrigerant recycling and emissions reduction regulations found at 40 CFR part 82, subpart F. In addition, appliances using class I substances must be audited and changed/converted. Appliances using class II substances must be audited. Owners of Class I and II appliances may elect to convert to non-ODS to avoid paying fees for higher leaks. Each company will sign an Administrative Order on Consent [AOC] on or before July 15, 2002 and sign a Consent Agreement Final Order [CAFO] on or before July 15, 2003, which will specify a conditional waiver of liability. These are the main points of interest in this partnership agreement. There are some other minor details that are mentioned in the Partnership Agreement and the other Appendices, which should be self explanatory. Other approaches to achieving the objectives of this program were considered by EPA and the industry representatives, but this approach was chosen as being the best from the point of view of administrative ease of implementation and environmental improvement.

Here is an example of what a participating company may encounter during participation in this partnership agreement:

If a participating company, is eligible and wants to participate, it should send a notice to EPA by March 15, 2002, identifying the company and its facilities and appliances. If this company has five bakeries and five appliances in each bakery, for a total of 25 appliances, seven of which have been converted to a non-ODS system prior to March 15, 2002, then there will be a $10,000 penalty per appliance for the 18 ODS containing appliances. This company will, however, get a release from civil liability for all 25 appliances for problems identified and corrected. The company is best advised to pay particular attention to their Class I appliances, if any, as audits must be conducted and a decision on these appliances must be made by July 15, 2002. If there are four Class I appliances, they should be audited first to determine what "per pound" penalties may be due for these appliances. If the per pound penalties determined from this audit indicate that a large per pound penalty may be due for several of these appliances, then this may be persuasive in deciding to convert these appliances to a non-ODS system in order to avoid the per pound penalties. If, instead, the company chooses to convert some or all of the Class I appliances to a Class II ODS refrigerant with an ODP of less than 0.1, rather than a non-ODS system, then the per pound penalties will still be due and payable by 30 days after receipt of the CAFO, which should be shortly after July 2003. Auditing and calculation of per pound penalties should continue through June 15, 2003 to ensure continuing compliance and lowered emissions.

By July 15, 2002, this company must prepare a plan and submit this plan to EPA, indicating which of the appliances are the Class I appliances, and what changes or conversions the company pledges to make to them, with a schedule for the work anticipated. The company should submit, along with the plans, the auditing summaries for the Class I appliances [see the sample below]. EPA will incorporate the plans for these four Class I appliances, along with the pledge to continue auditing the other appliances and to prepare and submit plans for them within a year in an Administrative Order on Consent [AOC] which should be signed by both the company, and then by EPA. EPA will return a copy of the signed AOC to the company.

For the other Class II appliances, a similar audit of compliance should begin covering the period from September 30, 2000 until June 15, 2003. Per pound penalties, if any, should be calculated for these appliances. As with the Class I appliances, if the company wishes to avoid paying these per pound penalties, it may do so by agreeing to convert the Class II systems to non-ODS systems. The company should make that decision and submit plans, if any, for such conversions to EPA by July 15, 2003. These plans will be incorporated in the CAFO. EPA expects that these plans will be implemented by July 15, 2004 with the possibility of extensions if additional time is needed.

In calculating per pound penalties, this company should look at each appliance and calculate its per pound penalties, if any. If, for example, the first Class I appliance had a 50% annualized leak rate in October 2000 and thereafter in the next 12 months had small and large leaks totaling 1500 pounds, then the per pound penalty for these 1500 pounds would be calculated as follows: $20 per pound for the first 500 pounds or $10,000, $30 per pound for pounds 501–1000 or $15,000 and $40 per pound for pounds 1001–1500 or $20,000. Thus, the total for this 12 month block period would be $45,000 [$10,000 + $15,000 + $20,000]. If a large leak rate was discovered in December 2000, that does not start another 12 month block period up to December 2001, as this is a leak inside the October 2000–2001 12 month period. If after October 2001 this same appliance had another annualized leak greater than 35%, for example, a 90% annualized leak rate, then leaks after that point would be calculated as above and added to the $45,000 total. This process should continue through June 15, 2003 and a total per pound penalty should be calculated for this appliance, and for all other appliances. The company then has the option of paying this per pound penalty or avoiding it by submitting a plan for converting to a non-ODS system. EPA hopes that this financial incentive will cause more companies to choose conversion to non-ODS systems while still giving the company the flexibility to decide which option is best for it.

On July 15, 2003, the company should submit audit summaries and plans for any equipment changes/conversions that it intends to make to the Class II appliances. It should also be prepared to pay any penalties that may be due shortly after the CAFO is received by the company. EPA will also prepare a CAFO with the release from civil liability for all matters that the company has identified as being a potential problem and corrected. This listing of audit discovered problems can be included in the plan for equipment changes/conversions or can be listed separately. It can include matters such as technician certification, better recordkeeping systems, equipment certifications, etc. Problem areas, or violations, not so identified and corrected will not receive a release from liability, so it is very important to identify all these problem areas and correct all these problems.

By July 15, 2004, the company will have completed the equipment changes/conversions, unless more time is needed and corrected other problems identified in the audit. The company will send a letter certifying that all these matters have been attended to and EPA will reply accepting this certification and thanking the company for participating. This is the end of the program for this company.

Key Dates

September 30, 2000

Begins period of compliance audit and monthly measurement of annual leak rates from industrial process refrigeration appliances for all partnership participants.

"Look-back" period gives credit to companies that have taken steps to improve leak management.

March 15, 2002

Notice of intent to participate in partnership program

—Companies must identify charging capacity and location of all appliances using over 50 lbs of Class I or Class II ozone depleting substances, and those which have converted to use of non-ODS refrigerant in secondary loop by March 15, 2002.

—Companies commit to complete audit and submit implementation plans by July 15, 2002, to convert Class I appliances to at least Class II, and to pay stipulated penalties or switch to non-ODS refrigeration appliances by July 15, 2003 (unless extension granted).

—All penalties waived for appliances that have been converted to non-ODSs by March 15, 2002.

—Program open to all companies not subject of national enforcement investigation.

July 15, 2002

EPA issues administrative order/information request on consent to participating companies reflecting commitment to complete audit by June 15, 2003 and submit implementation plans for Class II appliances by July 15, 2003.

Companies that have switched all appliances to non-ODS by March 15, 2002 may receive compliance agreement/final order (CAFO) discharging all liabilities for past violations without payment of penalty.

June 15, 2003

Audits are completed.

July 15, 2003

Bakeries submit audit results and final implementation plans.

Bakeries pay stipulated penalties for 12 months following any single month in which annualized leak rate exceeds 35%, but:

—Bakeries can avoid stipulated penalties if implementation plan commits to replace leaking appliance with non-ODS system no later than July 15, 2004 (unless program grants extension).

—Bakeries can "bubble" by substituting ODS conversion at another appliance (must have charge 120% greater than leaking appliance).

All Class I ODS appliances must convert to at least Class II ODS appliances by July 15, 2003, unless program grants extension.

EPA issues compliance agreement/final order reflecting conversion to Class II or non-ODS systems, and payment of stipulated penalties.

July 15, 2004

Bakeries must complete conversion to non-ODS systems reflected in implementation plans, unless program has granted an extension.

Key Definitions

Annualized leak rate—(pounds of refrigerant added/pounds of full charge) × (365 days/# days since refrigerant last added) × 100%.

Appliance—industrial process refrigeration device containing 50 pounds or more of ODS refrigerants.

Class I—an ODS listed in appendix A to 40 CFR part 82, subpart A.

Class II—an ODS listed in appendix B to 40 CFR part 82, subpart A.

ODS—ozone depleting substance.

Facility—a discrete parcel of real property or such a parcel improved by Participating Company's building, structure, factory, plant, premises, or other thing, related to Participating Company's wholesale baking/bakery business, and containing at least one appliance as defined in this agreement.

Non-ODS system—systems that contain no ODS at all [e.g. HFC systems or ammonia systems] or no ODS in the secondary loop, but may contain an ODS in the primary loop.

Additional Sources of General Information

To find out more about compliance with Title VI of the Clean Air Act, access the EPA's web site at *www.epa.gov/ozone*. The U.S. Environmental Protection Agency (EPA) and the Chemical Manufacturer's Association (CMA) have developed a guidance document entitled Compliance Guidance For Industrial Process Refrigeration Leak Repair Regulations Under Section 608 of the Clean Air Act [see *http://www.epa.gov/ozone/title6/608/compguid/compguid.html*] that provides greater detail than the discussion on the EPA web site. The guidance document is intended for those persons who are responsible for complying with the requirements. The guidance should not be used to replace the actual regulations published in the **Federal Register** on August 8, 1995 (60 FR 40420) [see http://www.epa.gov/spdpublc/title6/608/leakfrm.txt] ; however, it can act as a supplement to explain the requirements. Reliance on this fact sheet alone will likely not result in compliance. Another useful web site is one pertaining to general leak repair: *http://www.epa.gov/ozone/title6/608/leak.html*. EPA has also made available a sample inspector's checklist to the trade association, which is available online at *http://www.epa.gov/ozone/title6/608/compguid/compguid.html* or *http://www.epa.gov/oeca/ore/aed/bakery/index.html* or by contacting the Ozone Hotline at 800–296–1996.

Conclusion

EPA believes that the above-described program is the best, most cost-effective way to achieve immediate environmental improvement and achieve significant progress in resolving the myriad compliance concerns that may be present in this industry. Its terms, conditions and protections will be available only to those companies that are eligible and elect to participate. As appropriate, non-participants may be subject to enforcement actions in which significant penalties would be sought for violations of the part 82 regulations at issue here.

Comments on the approach outlined above, as well as on the specific items and terms reflected in the following Appendices, are solicited. To be fully considered, comments must be received by January 9, 2002.

Eric Schaeffer,

Director, Office of Regulatory Enforcement, Office of Enforcement and Compliance Assurance.

Ozone-Depleting Substance Emission Reduction Bakery Partnership Agreement

The United States Environmental Protection Agency ("EPA") and _____ ("Participating Company"), the parties to this agreement, desire to enter into and be bound by the terms of this Ozone-Depleting Substance (ODS) Emission Reduction Bakery Partnership Agreement ("Agreement").

Introduction

The Agreement specifies an audit, self-disclosure and corrective action program, which shall result in a release from liability for the conditions that are identified and corrected. This Agreement incorporates the features of the Bakery Partnership Program as detailed in the **Federal Register** on this topic, published January ____, 2002.

Applicability

1. This Partnership Agreement shall apply to and be binding upon both EPA and Participating Company, including but not limited to its officers, directors, agents, servants, employees, successors, and assigns. Participating Company shall give notice of this Agreement to any successor in interest prior to the transfer of any ownership interest in any machinery subject to Title VI, Clean Air Act (42 U.S.C. 7671 et. seq.) (the "Act") and its incorporating regulations, 40 CFR Part 82 ("Regulations"). The Notice for this Program ("Program Notice") was given to the baking industry by the EPA in cooperation with baking industry trade officials and trade journals.

2. In order for a Participating Company to be eligible to participate in this Agreement, the Participating Company must be a wholesale bakery not currently under corporate-wide investigation by EPA for a violation of Title VI of the Clean Air Act.

Definitions

3. "Participating company" means any eligible company and its wholly-or partially-owned subsidiaries, including all their bakeries, which agree to abide by the conditions of this Agreement.

4. "Corporate-wide investigation" means an investigation that requires information disclosure from either (1) five or more facilities owned by a company that seeks to be a Participating Company or (2) all facilities that are subject to Title VI and owned by a company that seeks to be a Participating Company.

5. "Non-ODS system" means pollution prevention technology recommended to and agreed upon by EPA that supplants standard ODS technology, including but not limited to glycol, chilled water, or other non-ODS coolant in a secondary-loop system or totally non-ODS systems, such as HFCs or ammonia.

6. "Facility" means a discrete parcel of real property or such a parcel improved by Participating Company's building, structure, factory, plant, premises, or other thing, related to Participating Company's baking/bakery business, containing at least one appliance.

7. "Retrofit" means to install new or modified parts in an appliance which were not provided as a part of the originally manufactured equipment. The retrofitted appliance must use a refrigerant with an ozone depleting potential that is lower than that which was used before the retrofit.

8. "Retire" means to withdraw an appliance from service and replace it with an appliance containing a refrigerant with an ozone depleting potential that is lower than that which was used in the retired appliance.

9. "Appliance" means an industrial process refrigeration appliance containing 50 pounds of more of ODS refrigerant that is housed within the facility.

10. "ODS" means Ozone Depleting Substance used as a refrigerant.

Initial Notice

11. Participating Company represents that:

a. It notified EPA of Participating Company's intent to participate in the Ozone Depleting Substance Emission Reduction Bakery Partnership Program by 5 p.m. Eastern Time, March 15, 2002 by submitting this executed Partnership Agreement.

b. Annex A, submitted with this Agreement, or updated shortly thereafter, is a true, accurate, and complete identification of:

i. Name of the Participating Company; and

ii. Name, street address, ZIP code, and city of each facility at which the Participating Company believes any subject appliance is presently located; and

iii. State in which the facility is located; and

iv. EPA region in which the facility is located; and

v. The number or best estimate of the number of appliances with more than 50 pounds of refrigerant when fully charged, as determined by calculation, weight, manufacturer supplied information, or an established range as described in 40 CFR 82.152.

vi. The number or best estimate of the number of non-ODS industrial process refrigeration appliances.

c. Participating Company certifies that it is eligible to be a participating company, that is, it meets the qualifications specified in paragraphs 2 and 3.

d. Participating Company agrees to audit all its facilities as specified below and disclose the summary results of such audits to EPA and correct any and all violations in accordance with this Agreement.

e. Participating Company agrees to toll the applicable statute of limitations during the life of the Agreement that may apply to the violations that may have occurred within the time period five years prior to the signing of this Agreement.

f. In the event that ownership of a facility subject to this agreement is (or was) transferred during the period covered by the agreement, the agreement shall apply to the former owner for the period during which the facility was owned by the former owner, provided all applicable terms and conditions are otherwise satisfied. The agreement shall also apply prospectively, according to its terms, to the party to whom the facility is transferred, if the new owner provides EPA with written confirmation of intent to comply with the agreement.

Audit Conduct, Report and Plans

12. Participating Company agrees to assist EPA with EPA's review of audit results. Such assistance may take the form of responding to telephone calls for clarification and other reasonable informal inquiries, without the need for formal information demands.

13. Participating Company agrees to identify all facilities with applicable industrial process refrigeration appliances.

14. Participating Company agrees to undertake a reasonable investigation and to the extent it can reasonably assemble such information, report to EPA for each applicable appliance, dates of service, beginning September 30, 2000 and continuing until June 15, 2003; pounds of refrigerant added; days since the last addition of refrigerant; percent annualized leak rate; and any associated comments by using a spreadsheet such as the one contained in Annex C. To the extent that a change in system components, such as a new compressor, may have altered the full charge, or where other special conditions arise, these conditions should be noted in the comments section.

15. Participating Company agrees to complete audits of all industrial process refrigeration appliances at each facility, except for those appliances converted to a non-ODS system prior to March 15, 2002, and notify EPA with a summary of the audit results as specified in the preceding paragraph and corrective actions planned, as necessary, by July 15, 2002 for Class I appliances and by July 15, 2003 for Class II appliances. Participating Company may, at its sole discretion, include commercial and comfort cooling appliances subject to 40 CFR 82.156(i) in the audit for compliance and receive a release from liability for problems identified and corrected.

16. Participating Company agrees to calculate the total per appliance and per pound penalties, if any, due and owing by July 15, 2003 in accordance with the method outlined in the **Federal Register** final announcement of the Bakery Partnership Program, and to submit this calculation to EPA.

17. Participating Company agrees to provide, in writing, by July 15, 2003, the steps that Participating Company will take to achieve continuous compliance with the requirements of 40 CFR Part 82. Such measures may include, but are not limited to, such things as training, record keeping, replacement, repair, installation of non-ODS systems. See Annex E for additional required Compliance Plan elements. Participating Company agrees to implement this Plan.

Audit Compliance Program

18. For all Class I appliances Participating Company will complete an audit and submit plans for the retrofit of these appliances with an ODS having an ozone depleting potential of 0.1 or less or retirement/replacement with a non-ODS system. Plans for these Class I appliances must be submitted by July 15, 2002, with a schedule for the completion of these activities within one year, unless additional time is allowed pursuant to 40 CFR 82.156(i)(7). These plans will be incorporated in an Administrative Order on Consent [AOC]. See Annex B.

19. For Class II appliances, Participating Company will sign an Administrative Order on Consent agreeing to develop, within the next twelve months, plans, where needed, for the replacement of these Class II appliances with non-ODS systems.

20. If any appliance within a facility owned by Participating Company contains a refrigerant that is not an EPA-approved refrigerant for that particular end-use (such as R–409A use in an industrial process refrigeration appliance) or is not in compliance with use restrictions of an approved refrigerant, Participating Company must take immediate steps to properly recover said refrigerant from the appliance (in accordance with the Regulations) and replace it with an approved refrigerant, in accordance with any use restrictions. Recovered refrigerant must be sent to an EPA-certified refrigerant reclaimer for ultimate reclamation or disposal.

Certification of Complete Compliance

21. Participating Company shall sign and submit to EPA a Certification of Complete Compliance (Annex D) when all plans, retrofits and other steps necessary to ensure continuous compliance have been finalized.

Employee Participation

22. Participating Company shall provide a procedure for its employees to report violations or potential problems to the auditing team. Participating Company agrees to ensure that employees who disclose violations or potential violations to the auditing team under the Act and the Regulations are not subject to adverse job actions (including without limitation disciplinary action, denial of promotion, bonuses or pay) on the basis of such employee disclosing such violations or potential violations in accordance with company policies.

Participating Company Records Retention

23. Participating Company agrees to keep and retain on site or readily available any and all records from March 15, 1999 until two years after the conclusion of all obligations under this Agreement. Records for appliances that have been converted to non-ODS systems need not retain records for more than three years prior to the completion of the conversion to the non-ODS system. Such records shall be from both Participating Company and its employees, agents and any contractors working for Participating Company. All records are required to be retained for this period of time to facilitate review by EPA, should EPA choose to conduct such a review. Participating Company agrees to notify all employees, agents and contractors that any such record is not to be destroyed.

Penalties

24. A "per appliance" penalty of $10,000, with a cap of $50,000 per facility, shall be due and owing for each industrial process refrigeration appliance that contains greater than 50 pounds of ODS after March 15, 2002. A "per pound" penalty, as specified in the above-referenced **Federal Register** notice, shall be calculated for each appliance, unless equipment conversions to non-ODS systems eliminate this penalty.

25. The total penalty shall be paid within 30 days of receipt of the CAFO which should be shortly after July 2003.

Forbearance

26. EPA agrees to forbear on Part 82 enforcement activity against Participating Company during the course of this Agreement. EPA may however, inspect and request information to ensure that the audits are being conducted fully and properly.

27. Participating Company understands that any violations discovered by EPA subsequent to the completion of the audit or compliance efforts and/or the expiration of this Agreement are subject to standard regulatory enforcement. That is, nothing in this Agreement, other than the release from civil liability for problems/violations disclosed and corrected, is to the derogation of EPA's full enforcement and compliance authority at the conclusion of the Partnership.

28. EPA does not forbear or relinquish any right to access and inspection under this agreement.

29. If EPA believes that the Participating Company has miscategorized or mischaracterized any problem/violation under this Agreement, the Dispute Resolution section of this Agreement shall be utilized.

Release From Liability/CAFO

30. Participating Company understands and acknowledges that participation in the Program will not absolve Participating Company or its employees from any criminal liability. Good faith compliance efforts with this program, as always, will be considered in the context of any alleged criminal liability.

31. EPA agrees to execute an administrative Consent Agreement Final Order conditionally releasing Participating Company from civil liability for any and all violations or potential violations that have been self-disclosed and corrected, on condition that Participating Company pays penalties that may be due and completes the plans with compliance schedules that have been submitted and agreed upon by the Participating Company and the EPA. A complete release from civil liability will be granted for any appliance that is converted to a non-ODS system. Good faith participants in this Partnership Program will receive a release for the period of time prior to September 30, 2000, even though this period may not be audited.

32. EPA and Participating Company will execute an Administrative Compliance Order on Consent and CAFO confirming that understanding.

Publicity

33. Participating Company may publicize that it is partnering with the EPA in an effort to reduce ODS emissions.

34. Upon request by the Participating Company, EPA will recognize and acknowledge Participating Company's participation and assistance under the Program.

Access and Inspection

35. Without prior notice, any authorized representative of EPA (including a designated contractor), upon presentation of credentials at any of Participating Company's facilities, may enter such location(s) at reasonable

times to determine compliance with this Agreement. Access under this clause is subject to the normal health and safety and confidentiality requirements in effect at such facilities.

Dispute Resolution

36. Should the need arise, Participating Company agrees to first engage in informal dispute resolution with EPA's Air Enforcement Division staff concerning any determination made by EPA in its review of the program. Such informal dispute resolution will consist of negotiations between Participating Company and the designated attorney(s) and/or Division Director of the Air Enforcement Division at the address in paragraph 41. To exercise informal dispute resolution, Participating Company shall send a written notice to EPA outlining the nature of the dispute or disagreement and request informal negotiations to resolve the dispute. Such period of informal negotiations shall not extend beyond thirty (30) days from the date when the notice was received, unless the parties agree otherwise in writing.

37. Should the Participating Company be dissatisfied with the results of the informal dispute resolution, the Participating Company may request that the dispute be elevated to the Director of the Office of Regulatory Enforcement or the Assistant Administrator of the Office of Enforcement and Compliance Assurance, Headquarters US EPA, to determine the outcome of the dispute or disagreement. As part of any such dispute elevation, the Office of Air and Radiation staff and managers will be consulted. Participating Company agrees that elevation within EPA is the sole and final dispute resolution mechanism. [EPA is exploring additional ways to resolve disputes such as Alternative Dispute Resolution with a third party].

Effective Date

38. This Agreement shall become effective upon the date signed by the parties to this agreement (below).

Miscellaneous

39. Nothing in this Agreement will relieve the Participating Company of its obligation to comply with any other Clean Air Act provision, other environmental law, or applicable environmental regulations, either state or Federal.

40. Participating Company agrees to accept service from EPA by mail with respect to all matters relating to this Agreement at the address listed below (if different from the one listed in Annex A).

Annex A—Sample Identification of Facilities

Participating company/facility name	Location, mailing address, city, zip	State	Region	Number of ODS-containing and non-ODS appliances, if known
Marvy Bread/Plant 4	123 Main St, Lodi 94588	CA	9	15 ODS, 5 non-ODS.

Annex B—Sample Administrative Order on Consent

United States Environmental Protection Agency

In the Matter of [Participating Company]
Respondent. Bakery Partnership Program,
Agreement Number _____

Findings and Order

Pursuant to Sections 113(a)(3) and 114 of the Clean Air Act ("CAA"), consistent with the Bakery Partnership Program identified above and entered into between the United States Environmental Protection Agency ("EPA") and Respondent, and based upon available information, EPA hereby makes and issues the following Findings and Order, with the expressed consent of Respondent:

Findings

1. Respondent is a Participating Company under the above-identified Bakery Partnership Program.

2. EPA promulgated regulations for the control of Ozone Depleting Substances, appearing in 40 CFR Part 82, Subpart F.

3. Respondent owns or operates certain affected equipment under Part 82 that contains or contained Ozone Depleting Substances, at facilities identified in Attachment A attached hereto.

Order

4. Respondent shall retrofit or replace the referenced equipment as specified in Attachment A by the date(s) there indicated. Where additional time may be required to complete these actions, application to EPA shall be timely made pursuant to 40 CFR 82.156(i)(7).

5. Within 12 months of this Order, Respondent shall prepare and submit to EPA plans for the conversion of Class II appliances to non-ODS systems, for the appliances identified in Attachment B, attached hereto.

6. Consistent with the Bakery Partnership Agreement entered into between EPA and [the Participating Company], per appliance and per pound penalties shall be calculated and submitted to EPA by July 15, 2003.

7. Pursuant to Section 113(a) of the CAA, failure to comply with this Order may lead to a civil action to obtain compliance or an action for penalties.

Issued this _____ day of _____, 2003

_____

U.S. Environmental Protection Agency

8. [Participating Company] consents to the issuance of this Order and further agrees not to contest EPA's authority to issue this Order.

Signed this _____ day of _____, 2003

_____

For [Participating Company]

Annex C—Leak Rate Calculation Sheet for each Appliance—Sample

Beanie Bread/ Plant 4. The Appliance Serial Number 456789 containing 350 pounds full charge of R–22.

The leak rate is calculated by dividing the number of pounds added by the full charge [here 350 pounds].

Then multiply that number by 365 days.

Then divide that number by days since the last add.

Multiply that number by 100 to express it as a percentage, if over 35%.

Date	lbs added	Days since last add	Leak rate (percent)	Comments
10/28/00 ...	112	base	.....	
2/20/01	60	115	54	
2/27/01	14	7	.....	
5/31/01	30	93	33	
6/18/01	166	18	961	
12/3/01	100	168	62	
				Total pounds added since high leak rate=310 pounds × $20 per pound=$6200, the "per pound" penalty.

Annex D—Certification of Completion and Compliance

I certify, based on personal inspection, that correction of the violations/problems identified as a part of the Bakery Partnership Agreement with the United States Environmental Protection Agency, dated _____, is complete.

I certify that _____, Participating Company, has corrected all violations, and training, recordkeeping, equipment replacement, and all other necessary and prudent measures have been taken to ensure complete compliance with Title VI, Clean Air Act (42 U.S.C. 7671 *et seq.*).

I certify that the following summary of the actions taken are true and complete:

_____

_____

_____

_____

I certify that I am an officer of _____, Participating Company, and am duly authorized to sign and complete this Certification of Compliance on behalf of Participating Company.

Date

Annex E—Compliance Plan Required Elements for Appliances Containing Greater than 50 pounds of a Class I or Class II substance

A. Each Participating Company will have at least one employee in each facility responsible for ensuring compliance with the refrigerant Compliance Plan.

B. Only technicians certified in accordance with 40 CFR Part 82 will perform refrigerant-related service on refrigerant containing appliances.

C. Technicians will use/ have available for use and use, as required, recycle/recovery equipment certified pursuant to 40 CFR 82.156.

D. Repairs to refrigerant-leaking appliances will be conducted within the time frames outlined in 40 CFR 82.156.

E. Initial verification tests on industrial process equipment will be conducted following any refrigerant-related repairs.

F. Follow-up verification tests on industrial process equipment will be conducted within thirty days of any refrigerant-related repairs.

G. Leak rates will be calculated (a) when refrigerant is added to appliances containing greater than 50 pounds of a class I or class II substance and (b) when the follow-up verification test reveals an unsuccessful repair.

H. Procedures documenting what additional action will be taken as a result of a failed repair will be written.

I. Each Participating Company will maintain the following records in a single location at each facility:

1. An inventory of appliances containing greater than 50 pounds of a class I or class II substance and their refrigerant capacities.

2. A unique identification for each appliance containing greater than 50 pounds of a class I or class II substance.

3. Date the refrigerant-related service is performed on each appliance containing greater than 50 pounds of a class I or class II substance.

4. Type of refrigerant-related service performed on each appliance containing greater than 50 pounds of a class I or class II substance.

5. Amount and type of refrigerant added to each appliance containing greater than 50 pounds of a class I or class II substance.

6. Name of the technician performing work on each appliance containing greater than 50 pounds of a class I or class II substance.

7. A copy of the technician certification card for all technicians performing work.

8. Refrigerant purchase records.

9. A copy of the recycle/recovery equipment owner's certification.

J. Each participant will provide refresher training on the refrigerant compliance program annually for facility personnel responsible for oversight of maintenance and service of refrigerant-containing appliances.

Sample CAFO

United States Environmental Protection Agency

Washington, D.C.

In the Matter of: [Participating Company] Respondent. Docket No. CAA–HQ–2003–XXX

Consent Agreement and Final Order

I. Preliminary Statement

1. The United States Environmental Protection Agency ("EPA") and [Participating Company] have entered into a voluntary Bakery Partnership Agreement, pursuant to which an audit of compliance status and self-correction program has been undertaken. It was further agreed by the parties that certain civil penalties would be paid pursuant to the administrative authority of Section 113(d) of the Clean Air Act ("CAA), 42 U.S.C. 7413(d).

2. This Consent Agreement and Final Order [CAFO] is issued pursuant to the authority of 40 CFR 22.13(b), 22.18(b)(2) and (3), which pertain to the quick

resolution and settlement of matters without the filing of a complaint.

3. This Consent Agreement and Final Order resolves the liability for violations that may have been discovered pursuant to an audit of the Respondent's facilities regarding compliance with Title VI of the Clean Air Act, Stratospheric Ozone Protection, and more particularly 40 CFR Part 82, Subpart F, relating to recycling and emissions reductions from appliances containing ozone depleting substances.

II. Consent Agreement

4. As a result of the voluntary audit conducted pursuant to the Bakery Partnership Agreement, EPA and Respondent have agreed to resolve this matter by executing this Consent Agreement.

5. For the purpose of this proceeding, Respondent does not contest the jurisdiction of this tribunal, consents to the assessment of the civil penalty as specified below, and consents to implement the corrective action Plans and Other Conditions, attached hereto.

6. The execution of this Consent Agreement is not an admission of liability by Respondent, and Respondent neither admits nor denies any specific factual allegations contained herein. EPA alleges that one or more of the conditions contained in the attached Summary of Audit Findings constitutes a violation of 40 CFR Part 82.

7. As a complete settlement for all problematic conditions specified in the attached Summary of Audit Findings, Respondent hereby agrees to pay to the United States a civil penalty as specified in the attached Penalty Calculation. EPA agrees to conditionally release Respondent from civil liability for the conditions, and only those conditions, identified in the attached Summary of Audit Findings, except for those appliances that are identified as having been or being converted to non-ozone depleting substances, for which a complete release of civil liability is granted. This release is conditioned upon the satisfactory completion of the Plans and Other Conditions attached hereto, and the timely payment of the civil penalty. Good faith participants in this Partnership Program will receive a release for the period of time prior to September 15, 2000, even though this period may not be audited. The parties agree that the attached Summary of Audit Findings, Penalty Calculation and Plans and Other Conditions are incorporated herein by reference and made a part of this CAFO.

8. Respondent waives its right to request an adjudicatory hearing on any issue addressed in this Consent Agreement.

9. Respondent and EPA represent that they are duly authorized to execute this Consent Agreement and that the parties signing this Agreement on their behalf are duly authorized to bind Respondent and EPA to the terms of this Consent Agreement.

10. Respondent agrees not to claim or attempt to claim a federal income tax deduction or credit covering all or any part of the civil penalty paid to the United States Treasurer.

11. Respondent and EPA stipulate to issuance of the proposed Final Order below.

[Participating Company], Respondent
By
(Print name)
Title:

Dated: _____

III. Final Order

It Is Hereby Ordered and Adjudged as follows:

12. Respondent shall comply with all terms of the Consent Agreement.

13. For the reasons set forth above, Respondent is hereby assessed a penalty in the amount of $_____.

14. Respondent shall pay the assessed penalty no later than thirty (30) calendar days from the date a conformed copy of this Consent Agreement and Final Order ("CAFO) is received by Respondent.

15. All payments under this CAFO shall be made by certified check or money order, payable to the United States Treasurer, mailed to: U.S. Environmental Protection Agency, (Washington D.C. Hearing Clerk), P.O. Box 360277, Pittsburgh, Pennsylvania 15251–6277. A transmittal letter, indicating Respondent's name, complete address, and this case docket number must accompany the payment. Respondent shall file a copy of the check and of the transmittal letter with the Headquarters Hearing Clerk.

16. Failure to pay the penalty assessed under this CAFO may subject Respondent to a civil action pursuant to Section 113(d)(5) of the CAA, 42 U.S.C. 7413(d)(5), to collect any unpaid portion of the assessed penalty, together with interest, handling charges, enforcement expenses, including attorneys fees, and nonpayment penalties. In any such collection action, the validity, amount, and appropriateness of this order or the penalty assessed hereunder are not subject to review.

17. Pursuant to 42 U.S.C. 7413(d)(5) and 31 U.S.C. 3717, Respondent shall pay the following amounts:

a. *Interest.* Any unpaid portion of the assessed penalty shall bear interest at the rate established pursuant to 26 U.S.C. 6621(a)(2) from the date a conformed copy of this CAFO is received by Respondent; provided, however, that no interest shall be payable on any portion of the assessed penalty that is paid within 30 days of the date a copy of this CAFO is received by Respondent.

b. Attorney *Fees, Collection Costs, Nonpayment Penalty.* Pursuant to 42 U.S.C. 7413(d)(5), should Respondent fail to pay on a timely basis the amount of the assessed penalty, Respondent shall be required to pay, in addition to such penalty and interest, the United States' enforcement expenses, including but not limited to attorney fees and costs incurred by the United States for collection proceedings, and a quarterly nonpayment penalty for each quarter during which such failure to pay persists. Such nonpayment penalty shall be ten percent of the aggregate amount of Respondent's outstanding penalties and nonpayment penalties accrued from the beginning of such quarter.

18. This document constitutes an "enforcement response" as that term is used in the CAA Penalty Policy for the purposes of determining Respondent's "full compliance history" as provided in Section 113(e) of the CAA, 42 U.S.C. 7413(e).

19. Each party shall bear its own costs, fees, and disbursements in this action.

20. The provisions of this CAFO shall be binding on Respondent, its officers, directors, employees, agents, servants, authorized representatives, successors and assigns.

It Is So Ordered.
Dated this _____ day of _____, 1999.

Sample Summary of Findings

Annex C—Leak Rate Calculation Sheet for each Appliance—Sample

Marvy Bread/Plant 4. The Appliance Serial Number 456789 containing 350 pounds full charge of R–22.

The leak rate is calculated by dividing the number of pounds added by the full charge [here 350 pounds].

Then multiply that number by 365 days.

Then divide that number by days since the last add.

Multiply that number by 100 to express it as a percentage, if over 35%.

Date	lbs added	days since last add	Leak rate (percent)	Comments
10/28/00	112	base	.....	
2/20/01	60	115	54	
2/27/01	14	7	.....	
5/31/01	30	93	33	
6/18/01	166	18	961	
12/3/01	100	168	62	
				Total pounds added since high leak rate = 310 pounds × $20 per pound = $6200, the "per pound" penalty.

Technician Certifications for two technicians, Joe Jones and Sam Spade, at Plant 4 were missing.

Those certifications are now on file.

Service records before September 2000 were missing.

Sample Penalty Calculation

Marvy Bread Plant 4 The Appliance Serial Number 456789 containing 350 pounds full charge of R–22.

Per pound penalty: $6,200—waived as this machine is being converted to non-ODS.

Per appliance penalty: 10,000.

Total Penalty: 10,000.

Sample Plans and Other Conditions

Beanie Bread agrees to convert the Bun Mixer at Plant 4, Serial Number 45678, to a non-ODS system.

Completion date: July 30, 2004.

Beanie Bread agrees to develop a computer based recordkeeping program to ensure that complete and accurate records are retained as required.

Completion date: September 30, 2003.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–7115–1]

Notice of Availability of the Draft Supplemental Guidance for Dermal Risk Assessment, Risk Assessment Guidance for Superfund, Volume I, Part E

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability, request for comment, request for data.

SUMMARY: The U.S. Environmental Protection Agency (EPA) has developed and is requesting public comment on a draft Risk Assessment Guidance for Superfund: Volume I Human Health Evaluation Manual (Part E, Supplemental Guidance for Dermal Risk Assessment) (RAGS Part E). EPA is also requesting data pertinent to reducing the uncertainty and variability in assessing the risks from dermal exposure. RAGS Part E is available electronically on the Internet at *http://www.epa.gov/superfund/programs/risk/ragse/index.htm*. This guidance is intended to assist risk assessors and others in addressing concerns resulting from the evaluation of dermal exposure risk assessment pathways. It proposes a consistent methodology for assessing the exposures from the dermal pathway for Superfund human health risk assessments. It incorporates and updates principles of the EPA (1992) interim report, *"Dermal Exposure Assessment: Principles and Applications"*.

DATES: You may submit comments and data until February 8, 2002. Comments received after that date may be considered to the extent feasible.

ADDRESSES: You are invited to submit written comments and data to: EPA, Superfund Docket RAGS Part E, Mail Code 5202G, 1200 Pennsylvania Ave, NW., Washington, DC 20460. For cost savings the draft RAGS Part E document is available electronically on the Internet at *http://www.epa.gov/superfund/programs/risk/ragse/index.htm*. EPA plans to print the document only after it is finalized. The Superfund Docket, containing the RAGS Part E document and public comments, is physically located at 1235 Jefferson Davis Highway, Arlington, Virginia. Appointments to review the docket can be made by calling (703) 603–9232.

FOR FURTHER INFORMATION CONTACT: Contact the RCRA/Superfund Call Center at (800) 424–9346; from the Washington, DC, metropolitan area call (703) 412–9810. The Telecommunications Device for the Deaf (TDD) number is (800) 553–7672; from the Washington, DC, metropolitan area the number is (703) 412–3323. For technical inquiries, you may contact Lee Hofmann, Office of Solid Waste and Emergency Response, Mail Code 5101, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460: telephone number 202–260–2230, email *hofmann.lee@epa.gov*.

SUPPLEMENTARY INFORMATION:

Background

In January 1992, the Office of Health and Environmental Assessment (OHEA), in the Office of Research and Development (ORD) of the U.S. Environmental Protection Agency (EPA) issued an interim report, *Dermal Exposure Assessment: Principles and Applications* (DEA). The DEA provided guidance for conducting dermal exposure assessments and was peer-reviewed by EPA's Science Advisory Board. A Workgroup was subsequently formed to develop guidance for Superfund based on the DEA. In August 1992, a draft Superfund Interim Dermal Risk Assessment Guidance was circulated for comment but was never issued. This current guidance supersedes the 1992 Superfund document.

This 2001 Superfund RAGS Part E, Supplemental Guidance for Dermal Risk Assessment (RAGS Part E) is the result of Superfund RAGS Part E Workgroup

meetings from FY 95 through FY 01 on issues associated with the characterization of risk resulting from the dermal exposure pathway. RAGS Part E updates recommendations presented in the DEA, and incorporates additional information from the *Exposure Factors Handbook* (U.S. EPA, 1997a) and scientific literature, as cited. Users of this guidance are strongly encouraged to review and understand the material presented in the DEA. This guidance is considered interim, pending release of any update to the DEA from ORD. As more data become available, RAGS Part E may be updated.

This Supplemental Guidance for Dermal Risk Assessment (RAGS Part E) has undergone external peer review in January 1998 and in February 2000. Also, EPA's Risk Assessment Forum conducted a Peer Consultation Workshop on this document in December 1998.

Elements of the RAGS Part E Approach

Risk Assessment Guidance for Superfund: Volume I–Human Health Evaluation Manual (Part E, Supplemental Guidance for Dermal Risk Assessment) (RAGS Part E) is structured to be consistent with the four steps of the Superfund risk assessment process: hazard identification, exposure assessment, toxicity assessment, and risk characterization. RAGS Part E is organized into six chapters and four appendices. To provide an indication of the scope of the document, we have included the Table of Contents below:

1.0 Introduction and Flowchart
1.1 Introduction
1.2 Organization of Document
1.3 Flowcharts
2.0 Hazard Identification
2.1 Choosing Contaminants of Concern for the Dermal-water Pathway
2.2 Choosing Contaminants of Concern for the Dermal-soil Pathway
3.0 Exposure Assessment
3.1 Estimation of Dermal Exposures to Chemicals in Water
3.1.1 Standard Equation for Dermal Contact with Chemicals in Water
3.1.2 Exposure Parameters
—Permeability coefficient for compounds in water (K_p in cm/hr)
—Chemical concentration in water
—Skin surface area
—Event time, frequency and duration of exposure
3.2 Estimation of Dermal Exposure to Chemicals in Soil
3.2.1 Standard Equation for Dermal Contact with Chemicals in Soil
3.2.2 Exposure Parameters
—Skin Surface Area
—Soil-to-Skin Adherence Factors
—Recommended Soil Adherence Factors
—Dermal Absorption Fraction from Soil
—Age-adjusted Dermal Factor
—Event Time, Exposure Frequency and Duration
3.3 Estimation of Dermal Exposure to Chemicals in Sediment
4.0 Toxicity Assessment
4.1 Principles of Route-to-route Extrapolation
4.2 Adjustment of Toxicity Factors
4.3 Calculation of Absorbed Toxicity Values
4.4 Direct Toxicity
5.0 Risk Characterization
5.1 Quantitative Risk Evaluation
5.1.1 Risk Calculations
5.1.2 Risks for All Routes of Exposure
5.2 Uncertainty Assessment
5.2.1 Hazard Identification
5.2.2 Exposure Assessment
—Dermal Exposure to Water—Uncertainties Associated with the Model for DA_{event}
—Dermal Exposure to Soil
5.2.3 Toxicity Assessment
5.2.4 Risk Characterization
6.0 Conclusions/Recommendations
6.1 Summary
6.2 Exposures Not Included in Current Dermal Guidance
6.3 Recommendations
7.0 References
Appendix A: Water Pathway
A.1 Dermal Absorption Model
A.1.1 Calculation of Parameters in Da_{event}
A.1.2 Model Validation
A.2 Estimation of K_p for Organic Compounds
A.3 Estimation of K_p for Inorganic and Ionized Organic Compounds
A.4 Uncertainty Analysis
A.5 Screening Procedure for Chemicals in Water
A.6 Procedures for Calculating Dermal Dose
A.6.1 Stepwise Procedure for Calculating Dermal Dose Using Given Equations
A.6.2 Stepwise Procedure for Calculating Dermal Dose Using Spreadsheets
Appendix B: Screening Tables and Reference Values for The Water Pathway
Table B.1: Flynn Data Set
Table B.2: Predicted K_p for 200's Organic Contaminants In Water
Table B.3: Calculation of Dermal Absorbed Dose for Organic Chemicals in Water
Table B.4: Calculation of Dermal Absorbed Dose for Inorganic Chemicals in Water
Appendix C: Soil Pathway
Appendix D: Sample Calculations

RAGS Part E focuses on dermal contact with soil and water, and it does not provide guidance on quantifying dermal absorption of chemicals resulting from exposure to vapors. The Superfund RAGS Part E Workgroup agreed with the finding in the DEA report that many chemicals, with low vapor pressure and low environmental concentrations, cannot achieve adequate vapor concentration to pose a dermal exposure hazard. For chemicals with the potential to achieve adequate vapor concentrations, this guidance assumes that they are primarily absorbed through the respiratory tract.

Goals

EPA welcomes feedback on this draft RAGS Part E document. EPA is seeking public comment at this time in order to ensure hearing the widest range of views and obtaining all information relevant to the development of policy. In addition, EPA is soliciting data pertinent to reducing uncertainty and variability in assessing risks from dermal exposure. EPA will review public comments received on the draft RAGS Part E document and will make appropriate changes in the document. EPA expects to respond in a summarized manner to the principal comments received on the draft RAGS Part E document as a matter of public information.

Dated: November 30, 2001.

Michael H. Shapiro,

Principal Deputy Assistant Administrator, Office of Solid Waste and Emergency Response.

FEDERAL COMMUNICATIONS COMMISSION

Sunshine Act Meeting; Open Commission Meeting Wednesday, December 12, 2001

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Wednesday, December 12, 2001, which is scheduled to commence at 9:30 a.m. in Room TW–C305, at 445 12th Street, SW., Washington, DC.

Item No.	Bureau	Subject
1	Common Carrier	Title: Development of a Regulatory Framework for Incumbent LEC Broadband Services; and SBC Petition for Expedited Ruling That it is Non-Dominant in its Provision of Advanced Services and for Forbearance from Dominant Carrier Regulation of Those Services. Summary: The Commission will consider a Notice of Proposed Rule Making initiating a comprehensive examination of the appropriate regulatory framework for incumbent LECs' provision of broadband services. As part of this proceeding, the Commission also invites comment on the petition filed by SBC Communications, Inc.

Item No.	Bureau	Subject
2	Common Carrier	Title: Review of the Section 251 Unbundling Obligations of Incumbent Local Exchange Carriers; Implementation of the Local Competition Provisions of the Telecommunications Act of the 1996 (CC Docket No. 96–98); and Deployment of Wireline Services Offering Advanced Telecommunications Capability (CC Docket No. 98–147). Summary: The Commission will consider a Notice of Proposed Rule Making to initiate its "triennial" review of the definitions of and rules concerning access to incumbent LEC unbundled network elements.
3	Common Carrier	Title: Numbering Resource Optimization (CC Docket No. 99–200); Petition for Declaratory Ruling and Request for Expedited Action on the July 15, 1997 Order of the Pennsylvania Public Utility Commission Regarding Area Codes 412, 610, 215, and 717 (CC Docket No. 96–98); and Telephone Number Portability (CC Docket No. 95–116). Summary: The Commission will consider a Third Report and Order and Second Order on Reconsideration in CC Docket No. 96–98 and CC Docket No. 99–200 regarding plans for nationwide thousands-block number pooling and other strategies to ensure that the numbering resources of the North American Numbering Plan are used efficiently.
4	Mass Media	Title: Review of the Commission's Broadcast and Cable Equal Employment Opportunity Rules and Policies (MM Docket No. 98–204). Summary: The Commission will consider a Second Notice of Proposed Rule Making concerning new equal opportunity rules for broadcast licensees and cable entities.
5	Office of Engineering and Technology and Wireless Telecommunications.	Title: Reallocation and Service Rules for the 698–746 MHz ASpectrum Band (Television Channels 52–59) (GN Docket No. 01–74). Summary: The Commission will consider a Report and Order concerning allocation and service rules to reallocate television channels 52–59, pursuant to the Balanced Budget Act of 1997.
6	Office of Engineering and Technology.	Title: Revision of Part 15 of the Commission's Rules Regarding Ultra-Wideband Transmission System (ET Docket No. 98–153). Summary: The Commission will consider a First Report and Order to provide for new ultra-wideband devices.

Additional information concerning this meeting may be obtained from Maureen Peratino or David Fiske, Office of Media Relations, telephone number (202) 418–0500; TTY 1–888–835–5322.

Copies of materials adopted at this meeting can be purchased from the FCC's duplicating contractor, Qualex International (202) 863–2893; Fax (202) 863–2898; TTY (202) 863–2897. These copies are available in paper format and alternative media, including large print/type; digital disk; and audio tape. Qualex International may be reached by e-mail at Qualexint@apl.com

This meeting can be viewed over George Mason University's Capitol Connection. The Capitol Connection also will carry the meeting live via the Internet. For information on these services call (703) 993–3100. The audio portion of the meeting will be broadcast live on the Internet via the FCC's Internet audio broadcast page at <http://www.fcc.gov/realaudio/>. The meeting can also be heard via telephone, for a fee, from National Narrowcast Network, telephone (202) 966–2211 or fax (202) 966–1770. Audio and video tapes of this meeting can be purchased from Infocus, 341 Victory Drive, Herndon, VA 20170, telephone (703) 834–1470, Ext. 10; fax number (703) 834–0111.

Federal Communications Commission.

Magalie Roman Salas,

Secretary.

GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090–0043]

Submission for OMB Review; Comment Request Entitled Appraisal of Fair Annual Parking Rate Per Space for Standard Level User Charge (GSA Form 3357)

AGENCY: General Services Administration (GSA).

ACTION: Notice of a request for an extension to an existing OMB clearance.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the General Services Administration (GSA) has sumitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a previously approved information collection requirement Appraisal of Fair Annual Parking Rate Per Space for Standard Level User Charge (GSA Form 3357). A request for public comments was published at 66 FR 43871, August 21, 2001. No comments were received.

DATES: Comments may be submitted on or before January 9, 2002.

FOR FURTHER INFORMATION CONTACT: Robert A. Yevoli, Public Buildings Service, GSA (202) 219–1403.

ADDRESSES: Comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, should be submitted to: Edward Springer, GSA Desk Officer, OMB Room 10236, NEOB, Washington, DC 20503, and a copy to Stephanie Morris, General Services Administration (MVP), 1800 F Street, NW., Room 4035, Washington, DC 20405.

SUPPLEMENTARY INFORMATION:

A. Purpose

The General Services Administration is requesting the Office of Management and Budget (OMB) to review and approve information collection, 3090–0043, concerning Appraisal of Fair Annual Parking Rate Per Space for Standard Level User Charge (GSA Form 3357). Form 3357 is needed by GSA contract and staff appraisers who use the form for estimating parking rates assessed on Federal agencies occupying space in GSA owned or controlled buildings.

B. Annual Reporting Burden

Respondents: 260.
Annual Responses: 1,300.
Average Hours Per Response: 1.6.
Burden Hours: 2,080.
Obtaining Copies of Proposals: A copy of this proposal may be obtained from the General Services

Administration, Acquisition Policy Division (MVP), 1800 F Street, NW., Room 4035, Washington, DC 20405, or by telephoning (202) 501–4744, or by faxing your request to (202) 501–4067. Please cite OMB Control No. 3090–0043, Appraisal of Fair Annual Parking Rate Per Space for Standard Level User Charge (GSA Form 3357), in all correspondence.

Dated: December 3, 2001.

Michael Carleton,

Chief Information Officer.

[FR Doc. 01–30461 Filed 12–7–01; 8:45 am]

BILLING CODE 6820–61–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Findings of Scientific Misconduct

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Office of Research Integrity (ORI) and the Assistant Secretary for Health have taken final action in the following case:

Momiao Xiong, Ph.D., The University of Texas Health Science Center at Houston: On November 26, 2001, the U.S. Public Health Service (PHS) entered into a Voluntary Exclusion Agreement with The University of Texas Health Science Center at Houston (UTHSCH) and Momiao Xiong, Ph.D., an Assistant Professor at UTHSCH. Based on the report of an inquiry conducted by UTHSCH, and any related actions and findings by UTHSCH, as well as additional analysis conducted by ORI in its oversight review, PHS found that Dr. Xiong engaged in scientific misconduct by plagiarizing and fabricating data in National Institute of General Medical Sciences (NIGMS), National Institutes of Health (NIH), grant application R01 GM64353–01, "Genetics of Human Pigmentation and Skin Response" (Pigmentation Application), on which he was a co-investigator. The plagiarized and fabricated data were essential to the scientific validity of the proposed research and were important for NIH's scientific evaluation of the Pigmentation Application. Dr. Xiong has admitted his actions.

Specifically, PHS and UTHSCH found that Dr. Xiong: (1) plagiarized text from another researcher's grant application, which Dr. Xiong had obtained during the NIH confidential review process and used without appropriate citation in the Pigmentation Application; and (2) falsified research in the Pigmentation Application by (a) falsely claiming that he had performed an extensive series of simulations to evaluate the power to detect genes influencing pigmentation traits by the proposed statistical analysis, and (b) falsely representing estimates from previous work on unrelated individuals as being appropriate for large families in the proposed research.

The Voluntary Exclusion Agreement (Agreement) states that Dr. Xiong:

(1) Will not serve as a principal investigator on PHS grants for one (1) year, beginning on November 26, 2001;

(2) Will exclude himself from serving in any advisory capacity to PHS, including but not limited to service on any PHS advisory committee, board, and/or peer review committee, or as a consultant for a period of three (3) years, beginning on November 26, 2001;

(3) Agrees that he and any institution employing him are required to certify, in every PHS application or report in which Dr. Xiong is involved: (a) That all persons who contribute original sources of ideas, data, or research results to the applications or reports are properly cited or otherwise acknowledged; and

(b) that the applications or reports do not contain any falsified, fabricated, or misleading information, for a period of three (3) years, beginning on November 26, 2001. This requires Dr. Xiong and the institution, with respect to Dr. Xiong's contributions to the application or report, to certify that all individuals (both within and outside the institution) who contributed to the application or report are acknowledged. The institution must also send a copy of the certification to ORI; and

(4) Accepts the following UTHSCH administrative actions: (a) Dr. Xiong must send a formal, written apology to the principal and co-investigators explicitly acknowledging his plagiarism from their grant application; (b) for a one year period starting October 11, 2001, Dr. Xiong may not: (i) Submit, as a principal investigator, any new grant applications, including applications to any federal, state, or local government agencies, as well as any private foundations or agencies; or (ii) submit any publications without providing certification, co-signed by his immediate supervisor, that any manuscript for publication does not contain any plagiarized information or any falsified, fabricated, or misleading information; (c) for an additional two year period, Dr. Xiong must similarly certify any grant application or publication; (d) for the next three years, to submit any grant application or publication, Dr. Xiong must have a signed statement from his immediate supervisor stating that the supervisor has reviewed the materials and finds no indication of plagiarism, falsification or fabrication of data, nor any other form of scientific misconduct; (e) for the next academic year, Dr. Xiong is required to participate in a course in the responsible conduct of research, and in the year after completing the course, serve as a co-instructor in a small discussion group for all breakout sessions of the course; and (f) within two years, Dr. Xiong must write a formal essay, of publication quality, in English and Chinese, on plagiarism for submission to the Executive Vice President for Research, UTHSCH, and for publication.

FOR FURTHER INFORMATION CONTACT: Director, Division of Investigative Oversight, Office of Research Integrity, 5515 Security Lane, Suite 700, Rockville, MD 20852, (301) 443–5330.

Chris B. Pascal,

Director, Office of Research Integrity.

BILLING CODE 4155–31–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–02–15]

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 639–7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques

or other forms of information technology. Send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS–D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Project: Evaluation of Block Grants for Rape Prevention and Education—New—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC). The Rape Prevention and Education (RPE) Grant Program strengthens violence against women prevention efforts by supporting increased awareness, education and training, and the operation of hotlines. The purpose of this program is to award formula grants to States and Territories to be used for RPE programs conducted by rape crisis centers, state sexual assault coalitions, and other public and private nonprofit entities.

Although the Rape Prevention and Education program has been funded since 1996 little is known about how the funds are allocated and utilized in each state and what each state's public health needs are with regard to rape prevention and education. In order to effectively administer and collaboratively work with state's to enhance the utilization of these funds, the CDC needs to know how these funds are allocated, what activities are being conducted with these funds and the kinds of data they are collecting. The primary objectives of this study are to:

1. Document the intended goals and objectives of the RPE program as it relates to the activities of state health departments and sexual assault coalitions, from the perspective of various stakeholder levels (*e.g.*, National, state and local); 2. Assess the allocation mechanisms, uses, and impact of the funds for RPE as they relate to these documented intentions; and, 3. Assess public health needs of states and local programs in terms of knowledge, skills, resources, and barriers to effective implementation.

To meet these objectives, a variety of data collection tasks will be employed. A critical review of the published literature and related materials pertaining to the monies for RPE will be conducted to provide guidance for the survey instrument development. Two e-mail surveys will be conducted: One with the state health department RPE coordinators and the other with sexual assault coalition directors. Each survey instrument will take approximately 30 minutes to complete. Site visits will be conducted with a sample of 15 sites to obtain more detailed information about the RPE programs and the current systems in place. Sites will be purposefully selected to maximize variability and interviews will be conducted with both the state health department RPE coordinators and the state sexual assault coalition directors. There is no cost to the respondent.

Respondents	Number of respondents	Number of responses/respondent	Average burden/response (in hours)	Total burden (in hours)
State Health Department RPE Coordinators	59	1	30/60	30
State Sexual Assault Coalition Directors	59	1	30/60	30
State Health Department RPE Coordinators	15	1	3	45
State Sexual Assault Coalition Directors	15	1	3	45
Total				150

Dated: December 3, 2001.

Nancy E. Cheal,

Acting Associate Director for Policy, Planning and Evaluation, Centers for Disease Control and Prevention.

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 639–7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Send comments to Anne O'Connor, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Project: National Hospital Ambulatory Medical Care Survey (NHAMCS) OMB No. 0920–0278—Revision—National Center for Health Statistics, (NCHS) Centers for Disease Control and Prevention (CDC). The National Hospital Ambulatory Medical Care Survey (NHAMCS) has been conducted annually since 1992 and is directed by the Division of Health Care Statistics, National Center for Health Statistics, CDC. The purpose of the NHAMCS is to meet the needs and demands for statistical information about the provision of ambulatory medical care services in the United States. Ambulatory services are rendered in a wide variety of settings, including physicians' offices and hospital outpatient and emergency departments. The target universe of the NHAMCS is in-person visits made in the U.S. to outpatient departments and emergency departments of non-Federal, short-stay hospitals (hospitals with an average length of stay of less than 30 days) or those whose specialty is general (medical or surgical) or children's general. The NHAMCS was initiated to complement the National Ambulatory Medical Care Survey (NAMCS, OMB No. 0920–0234) which provides similar data concerning patient visits to physicians' offices. The NAMCS and NHAMCS are the principal sources of data on approximately 90 percent of ambulatory care provided in the United States.

The NHAMCS provides a range of baseline data on the characteristics of the users and providers of ambulatory medical care. Data collected include patients' demographic characteristics and reason(s) for visit, and the physicians' diagnosis(es), diagnostic equipment and services, medications, and disposition. These data, together with trend data, may be used to monitor the effects of change in the health care system, for the planning of health services, improving medical education, determining health care work force needs, and assessing the health status of the population.

Users of NHAMCS data include, but are not limited to, congressional offices, Federal agencies such as NIH, state and local governments, schools of public health, colleges and universities, private industry, nonprofit foundations, professional associations, as well as individual practitioners, researchers, administrators, and health planners. Uses vary from the inclusion of a few selected statistics in a large research effort, to an in-depth analysis of the entire NHAMCS data set covering several years.

To calculate the burden hours the number of respondents for the NHAMCS is based on an annual sample of approximately 500 hospitals with an 94 percent participation rate. The total cost to respondents is estimated to be $300,000.

Respondents (non-Federal general and short-stay hospitals)	Number of respondents	Number of responses/respondent	Avg. burden/response (in hrs.)	Response burden (in hrs.)
Induction forms:				
Ineligible hospitals	50	1	15/60	13
Eligible hospitals	440	1	1	440
Emergency departments	400	1	1	400
Outpatient departments	240	4	1	960
Patient record forms:				
Emergency departments	400	100	5/60	3,333
Outpatient departments	240	200	5/60	4,000
Pediatric emergency services and equipment	400	1	30/60	200
Total				9,346

Dated: November 30, 2001.

Nancy E. Cheal,

Acting Associate Director for Policy, Planning and Evaluation, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60 Day–02–13]

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 639–7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Send comments to Anne O'Connor, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS–D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Project: National Ambulatory Medical Care Survey OMB No. 0920–0234—Revision—National Center for Health Statics (NCHS), Centers for Disease Control and Prevention, (CDC): The National Ambulatory Medical Care Survey (NAMCS) was conducted annually from 1973 to 1981, again in 1985, and resumed as an annual survey in 1989. It is directed by the Division of Health Care Statistics, National Center for Health Statistics, CDC. The purpose of NAMCS is to meet the needs and demands for statistical information about the provision of ambulatory medical care services in the United States. Ambulatory services are rendered in a wide variety of settings, including physicians' offices and hospital outpatient and emergency departments. The NAMCS target population consists of all office visits within the United States made by ambulatory patients to non-Federal office-based physicians (excluding those in the specialties of anesthesiology, radiology, and pathology) who are engaged in direct patient care. Since more than 80 percent of all direct ambulatory medical care visits occur in physicians' offices, the NAMCS provides data on the majority of ambulatory medical care services. To complement these data, in 1992 NCHS initiated the National Hospital Ambulatory Medical Care Survey (NHAMCS, OMB No. 0920–0278) to provide data concerning patient visits to hospital outpatient and emergency departments. The NAMCS, together with the NHAMCS constitute the ambulatory component of the National Health Care Survey (NHCS), and will provide coverage of more than 90 percent of ambulatory medical care.

The NAMCS provides a range of baseline data on the characteristics of the users and providers of ambulatory medical care. Data collected include the patients' demographic characteristics and reason(s) for visit, and the physicians' diagnosis(es) and diagnostic services, medications and disposition. These data, together with trend data, may be used to monitor the effects of change in the health care system, provide new insights into ambulatory medical care, and stimulate further research on the use, organization, and delivery of ambulatory care.

Users of NAMCS data include, but are not limited to, congressional and other

federal government agencies such as NIH and FDA, state and local governments, medical schools, schools of public health, colleges and universities, private businesses, nonprofit foundations and corporations, professional associations, as well as individual practitioners, researchers, administrators and health planners. Uses vary from the inclusion of a few selected statistics in a large research effort, to an in-depth analysis of the entire NAMCS data set covering several years.

To calculate the burden hours the number of respondents for NAMCS is based on a sample of 3,150 physicians with a 50 percent participation rate (this includes physicians who are out-of-scope as well as those who refuse). The total cost to respondents is estimated to be $300,000.

Respondents	Number of respondents	Number of response/respondent	Avg. burden/responses (in hrs.)	Response burden (in hrs.)
Office-based physicians Induction form	1,575	1	25/60	656
Patient record form	1,575	30	5/60	3,938
Total				4,594

Dated: November 30, 2001.

Nancy E. Cheal,

Acting Associate Director for Policy, Planning and Evaluation, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 01N–0496]

Patient Profile Viewer; Notice of Pilot Project

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA), Center for Drug Evaluation and Research (CDER), is seeking volunteers to participate in a pilot project involving the testing of the Patient Profile Viewer (PPV). The PPV is computer software that allows a reviewer to display data collected from case report tabulations (CRTs) submitted in electronic format. We are working with PPD Informatics to develop the PPV under a Cooperative Research and Development Agreement (CRADA) in an effort to improve review efficiency, develop standards for submission of data, and eliminate the need for the submission of patient profiles by applicants of new drug applications (NDAs). To help in this development, we are seeking volunteers to provide CRT datasets from clinical studies to test the PPV. Data supplied during the pilot project will not replace any regulatory requirements for submitting CRTs.

DATES: Submit written or electronic requests to participate in the pilot project by January 9, 2002. Comments on the pilot project may be submitted at any time.

ADDRESSES: Submit written requests to participate and comments regarding this pilot project to the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Submit written comments on the pilot project to the Dockets Management Branch (address above). Submit electronic comments to http://www.fda.gov/dockets/ecomments.

FOR FURTHER INFORMATION CONTACT: Randy Levin, Center for Drug Evaluation and Research (HFD–001), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–594–5411, e-mail: levinr@cder.fda.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Under current FDA regulations (21 CFR 314.50), applicants must provide CRTs with NDAs. Since November 1997, under 21 CFR part 11, we have accepted CRTs in electronic format instead of paper.

We have published several guidance documents that provide recommendations concerning electronic submissions. In the **Federal Register** of January 28, 1999 (64 FR 4432), CDER published the guidance entitled "Providing Regulatory Submissions in Electronic Format—NDAs." This guidance describes how applicants can provide CRTs as electronic datasets. This guidance also offers recommendations on how to organize the datasets and how to provide descriptive information on the datasets and the data variables (metadata). In the **Federal Register** of November 12, 1999 (64 FR 61647), the Center for Biologics Evaluation and Research (CBER) provides similar recommendations for biologic license applications (BLAs) in their guidance entitled "Providing Regulatory Submissions in Electronic Format—BLAs." A joint CBER and CDER guidance for industry entitled "Providing Regulatory Submissions in Electronic Format—General Considerations," provides recommendations for the file formats for clinical datasets (64 FR 4433, January 28, 1999).

The datasets described in these guidance documents are organized by domain (e.g., labs, adverse events). For NDAs, however, we also recommend the submission of CRTs organized by individual patients—a format we call patient profiles. Patient profiles are provided in portable document format (PDF) and not as electronic datasets. Patient profiles are not recommended for submissions to CBER. CDER is working with CBER to update the guidance documents with more detailed standards for the submission of CRT datasets and metadata.

Recently, we have received recommendations for a standard presentation of the most common CRT datasets and metadata from the Clinical Data Interchange Standards Consortium, Inc. (CDISC). CDISC is a nonprofit organization and its members are from pharmaceutical companies, biotechnology companies, contract research organizations, and software vendors.

CDER has also entered into a CRADA with PPD Informatics (PPD) to develop a module for PPD's commercially available CrossGraphs software that will generate patient profiles directly from CRT datasets provided with NDA submissions. The use of standardized datasets and metadata reduces the amount of preparation required by the reviewer to generate patient profiles and would eliminate the need for applicants to provide patient profiles in PDF. The purpose of the pilot project is to test the PPV module with standardized datasets and metadata and to obtain feedback from reviewers and pharmaceutical

companies on the creation and use of standardized clinical data and metadata.

II. Pilot Project Description

The pilot project is part of an effort to improve the standards for submission of clinical data. Eventually, we expect to recommend detailed clinical data and metadata standards for the submission of CRTs. Participants in this PPV pilot project will not only assist us in testing the use of the PPV and standard clinical data and metadata but will also familiarize themselves with the process at an early stage of development. Only a few participants are needed for this pilot.

A. Initial Approach

Because a limited number of voluntary participants are needed, the agency will use its discretion in choosing volunteers, based on their experience with providing CRTs and their familiarity with the standards recommended by CDISC. During the pilot project, the agency will make available to the public specific technical instructions for providing the clinical data and metadata for testing. See the **Electronic Access** section for instructions. Participants in the pilot project will be asked to provide clinical trial datasets and metadata as described in the technical instructions and to provide technical feedback.

B. Scope

The pilot project will test the PPV module and the preparation and use of the submitted data and metadata. Existing requirements for the submission of CRT datasets will not be waived, suspended, or modified for purposes of this pilot project.

III. Pilot Project Participation

Written requests to volunteer for the pilot project should be submitted to the Dockets Management Branch (address above). Requests are to be identified with the docket number found in brackets in the heading of this document.

IV. Comments

Interested persons may submit to the Dockets Management Branch (mail and electronic addresses above) written comments regarding this pilot project. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. FDA will consider comments in making a determination on electronic filing and in drafting a guidance document for submitting clinical trial data and metadata electronically. Received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

V. Electronic Access

These instructions will be available on the Internet at http://www.fda.gov/cder/regulatory/ersr/default.htm.

Dated: December 3, 2001.

Margaret M. Dotzel,

Associate Commissioner for Policy.

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 01D–0532]

Food Code; 2001 Revision; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of the 2001 revision of the Food Code (2001 Food Code). This 2001 revision was initiated in cooperation with the Conference for Food Protection (CFP or Conference) to help ensure that food sold or offered for human consumption by retail food establishments is safe, unadulterated, and honestly presented.

DATES: Submit written or electronic comments on the 2001 Food Code at any time.

ADDRESSES: Submit written requests for single copies of the 2001 Food Code to the Office of Field Programs (HFS–600), Center for Food Safety and Applied Nutrition, Food and Drug Administration, 200 C St. SW., Washington, DC 20204 (after December 14, 2001, the Center for Food Safety and Applied Nutrition's address will be 5100 Paint Branch Pkwy., College Park, MD 20740). Send two self-addressed adhesive labels to assist that office in processing your request. Submit written comments on the 2001 Food Code to the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Submit electronic comments to http://www.fda.gov/dockets/ecomments. See the **SUPPLEMENTARY INFORMATION** section for electronic access and ordering information for the 2001 Food Code.

FOR FURTHER INFORMATION CONTACT: Glenda R. Lewis, Center for Food Safety and Applied Nutrition (HFS–627), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–205–8140. (After December 14, 2001, the Center for Food Safety and Applied Nutrition's address will be 5100 Paint Branch Pkwy., College Park, MD 20740.)

SUPPLEMENTARY INFORMATION:

I. Background

FDA provides assistance to Federal, State, local, and tribal governmental bodies with jurisdiction over food safety to help ensure that food provided to consumers by retail food establishments is not a vehicle of communicable diseases. A primary mechanism for providing that assistance is the regular publication of a model code that sets out FDA's best advice for a uniform system of regulation that is designed to help ensure that food sold or offered for human consumption by retail food establishments is safe, unadulterated, and honestly presented.

In 1971, the CFP was established to provide a dialogue on food safety issues. The CFP is a voluntary organization comprised of Federal, State, and local regulatory officials, food industry representatives, consumer groups, and academia. The public also may participate in the CFP process. The Conference meets biennially for discussion among all parties regarding ways to improve food safety in the retail segment of the food industry. FDA recognizes the CFP as a voluntary national organization that is qualified to provide technical guidance and information toward the development and implementation of codes and standards pertaining to retail food service, retail food stores, and retail vending operations. At the 1986 meeting of the CFP, it was recommended that the three distinct model codes in existence at that time (retail food stores, food service facilities, and vending) be combined into a Food Protection Unicode. The CFP endorsed this approach, FDA concurred, and issued the first Food Code in 1993. FDA has issued subsequent versions of the Food Code every 2 years. Revisions to the Food Code are based in part on recommendations that are cooperatively developed by CFP members in response to issues submitted to the CFP by interested parties.

The 2001 Food Code responds to recommendations made by the CFP and addresses needed clarifications, updates, and corrections. Significant changes between the 2001 Food Code and the 1999 Food Code include the following:

- A revised definition of juice, information on juice treated to control

pathogens, and information that addresses issues relating to juice provided to populations that are particularly vulnerable to foodborne illness;

- A revised definition of "highly susceptible populations" and new definitions relating to employee health including "exclusion" and "restriction";
- New provisions for the refrigeration and labeling of eggs consistent with new requirements in the Code of Federal Regulations (CFR);
- An updated roast beef cooking chart consistent with new U.S. Department of Agriculture/Food Safety and Inspection Service criteria;
- A revised preface to recognize Federal performance standards relating to food products and processes. (Federal performance standards are acceptable, equivalent alternatives to the command-and-control provisions that now provide specific times and temperatures for cooking);
- A new definition for "shiga toxin-producing *E. coli*" and a replacement of references to "*E. coli 0157:H7* "with Ashiga toxin-producing *E.* coli";
- Clarification of hand washing procedures with respect to time and water temperature; application of hand washing procedures to persons with prosthetic devices; and hand washing procedures before donning gloves;
- Clarification of the provisions relating to marking refrigerated, ready-to-eat food to indicate its shelf life;
- A new provision that allows the use of a thermometer embedded in a nonfood substance as a means of monitoring the temperature of food products in a refrigerator, as well as encouraging the use of small diameter probes for measuring the internal temperature of thin masses of food;
- New provisions that address backflow prevention devices for beverage carbonators;
- Additional references relating to time as a public health control and cooling; and
- Provisions updated to reflect consistency with the current CFR and guidances issued by Federal agencies.

The 2001 Food Code is a level 1 guidance being issued consistent with FDA's good guidance practices regulation in § 10.115 (21 CFR 10.115). With certain exceptions, this regulation requires that the public be afforded an opportunity to comment on level 1 guidance documents before their implementation. FDA is not seeking public comment before implementing this edition of the Food Code because we have determined that it is not feasible or appropriate in accordance with § 10.115(g)(2). The Food Code is revised biennially to keep it up-to-date. Each revision is based on comments received on a previous Food Code, as well as issues presented to the CFP for further development and discussion. Each revision also reflects current public comment. The Conference engages in outreach in a number of ways. First and foremost, its members communicate within their respective constituencies (industry—retail food store, food service, vending, processing; government—Federal, State, and local; consumer and academia). In addition, the Conference has a Web site at http://www.foodprotect.org; press releases go out to various organizations; and members receive a Conference newsletter. Thus, each revision of the Food Code is part of an ongoing dialogue and serves effectively as a "draft" for the next revision.

The 2001 Food Code does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such an approach satisfies the requirements of applicable statutes and regulations.

II. Comments

The public may comment on this document at any time. The public may comment in one of two ways: (1) By participating in the CFP meeting held biennially for the purpose of, among other things, considering recommended changes to the Food Code; or (2) by commenting in writing or electronically to FDA. Comments submitted to the agency may be offered for consideration and vote at a subsequent CFP meeting.

Interested persons, at any time, may submit written or electronic comments to the Dockets Management Branch (address above) on the 2001 Food Code. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. The 2001 Food Code and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

III. Electronic Access and Ordering Information

Persons with access to the Internet may obtain the document at http://www.cfsan.fda.gov/dms/guidance.html, http://vm.cfsan.fda.gov/list.html, or http://www.fedworld.com. In addition, the 2001 Food Code may be ordered from the National Technical Information Service, U.S. Department of Commerce, Springfield, VA 22161, 1–800–553–6847, in several formats: Docutek copy, spiral bound, Microsoft Word 97 files on diskette, enhanced electronic version on cassette or CD–ROM, including Adobe Reader. The enhanced versions include electronic features such as hypertext links that enable the reader to locate quickly a specific code provision and to read simultaneously the text of cross-referenced documents.

Dated: December 5, 2001.

Margaret M. Dotzel,

Associate Commissioner for Policy.

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Current List of Laboratories Which Meet Minimum Standards To Engage in Urine Drug Testing for Federal Agencies

AGENCY: Substance Abuse and Mental Health Services Administration, HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services notifies Federal agencies of the laboratories currently certified to meet standards of Subpart C of Mandatory Guidelines for Federal Workplace Drug Testing Programs (59 FR 29916, 29925). A notice listing all currently certified laboratories is published in the **Federal Register** during the first week of each month. If any laboratory's certification is suspended or revoked, the laboratory will be omitted from subsequent lists until such time as it is restored to full certification under the Guidelines.

If any laboratory has withdrawn from the National Laboratory Certification Program during the past month, it will be listed at the end, and will be omitted from the monthly listing thereafter.

This notice is also available on the internet at the following websites: *http://workplace.samhsa.gov; http://www.drugfreeworkplace.gov;* and *http://www.health.org/workplace.*

FOR FURTHER INFORMATION CONTACT: Mrs. Giselle Hersh or Dr. Walter Vogl, Division of Workplace Programs, 5600 Fishers Lane, Rockwall 2 Building, Room 815, Rockville, Maryland 20857; Tel.: (301) 443–6014, Fax: (301) 443–3031.

SUPPLEMENTARY INFORMATION: Mandatory Guidelines for Federal Workplace Drug Testing were developed in accordance with Executive Order 12564 and section 503 of Pub. L. 100–

71. Subpart C of the Guidelines, "Certification of Laboratories Engaged in Urine Drug Testing for Federal Agencies," sets strict standards which laboratories must meet in order to conduct urine drug testing for Federal agencies. To become certified an applicant laboratory must undergo three rounds of performance testing plus an on-site inspection.

To maintain that certification a laboratory must participate in a quarterly performance testing program plus periodic, on-site inspections.

Laboratories which claim to be in the applicant stage of certification are not to be considered as meeting the minimum requirements expressed in the HHS Guidelines. A laboratory must have its letter of certification from SAMHSA, HHS (formerly: HHS/NIDA) which attests that it has met minimum standards.

In accordance with Subpart C of the Guidelines, the following laboratories meet the minimum standards set forth in the Guidelines:

ACL Laboratories, 8901 W. Lincoln Ave., West Allis, WI 53227, 414–328–7840/800–877–7016 (Formerly: Bayshore Clinical Laboratory)

ACM Medical Laboratory, Inc., 160 Elmgrove Park, Rochester, NY 14624, 716–429–2264

Advanced Toxicology Network, 3560 Air Center Cove, Suite 101, Memphis, TN 38118, 901–794–5770/888–290–1150

Aegis Analytical Laboratories, Inc., 345 Hill Ave., Nashville, TN 37210, 615–255–2400

Alliance Laboratory Services, 3200 Burnet Ave., Cincinnati, OH 45229, 513–585–9000 (Formerly: Jewish Hospital of Cincinnati, Inc.)

American Medical Laboratories, Inc., 14225 Newbrook Dr., Chantilly, VA 20151, 703–802–6900

Associated Pathologists Laboratories, Inc., 4230 South Burnham Ave., Suite 250, Las Vegas, NV 89119–5412, 702–733–7866/800–433–2750

Baptist Medical Center—Toxicology Laboratory, 9601 I–630, Exit 7, Little Rock, AR 72205–7299, 501–202–2783 (Formerly: Forensic Toxicology Laboratory Baptist Medical Center)

Clinical Laboratory Partners, LLC, 129 East Cedar St., Newington, CT 06111, 860–696–8115 (Formerly: Hartford Hospital Toxicology Laboratory)

Clinical Reference Lab, 8433 Quivira Rd., Lenexa, KS 66215–2802, 800–445–6917

Cox Health Systems, Department of Toxicology, 1423 North Jefferson Ave., Springfield, MO 65802, 800–876–3652/417–269–3093 (Formerly: Cox Medical Centers)

Diagnostic Services Inc., dba DSI, 12700 Westlinks Drive, Fort Myers, FL 33913, 941–561–8200/800–735–5416

Doctors Laboratory, Inc., P.O. Box 2658, 2906 Julia Dr., Valdosta, GA 31602, 912–244–4468

DrugProof, Divison of Dynacare, 543 South Hull St., Montgomery, AL 36103, 888–777–9497/334–241–0522 (Formerly: Alabama Reference Laboratories, Inc.)

DrugProof, Division of Dynacare/Laboratory of Pathology, LLC, 1229 Madison St., Suite 500, Nordstrom Medical Tower, Seattle, WA 98104, 206–386–2672/800–898–0180 (Formerly: Laboratory of Pathology of Seattle, Inc., DrugProof, Division of Laboratory of Pathology of Seattle, Inc.)

DrugScan, Inc., P.O. Box 2969, 1119 Mearns Rd., Warminster, PA 18974, 215–674–9310

Dynacare Kasper Medical Laboratories,* 14940–123 Ave., Edmonton, Alberta, Canada T5V 1B4, 780–451–3702/800–661–9876

ElSohly Laboratories, Inc., 5 Industrial Park Dr., Oxford, MS 38655, 662–236–2609

Express Analytical Labs, 1301 18th Ave NW, Suite 110, Austin, MN 55912, 507–437–7322

Gamma-Dynacare Medical Laboratories,* A Division of the Gamma-Dynacare Laboratory Partnership, 245 Pall Mall St., London, ONT, Canada N6A 1P4, 519–679–1630

General Medical Laboratories, 36 South Brooks St., Madison, WI 53715, 608–267–6267

Kroll Laboratory Specialists, Inc., 1111 Newton St., Gretna, LA 70053, 504–361–8989/800–433–3823 (Formerly: Laboratory Specialists, Inc.)

LabOne, Inc., 10101 Renner Blvd., Lenexa, KS 66219, 913–888–3927/800–728–4064 (Formerly: Center for Laboratory Services, a Division of LabOne, Inc.)

Laboratory Corporation of America Holdings, 7207 N. Gessner Road, Houston, TX 77040, 713–856–8288/800–800–2387

St. Anthony Hospital Toxicology Laboratory, 1000 N. Lee St., Oklahoma City, OK 73101, 405–272–7052

Toxicology & Drug Monitoring Laboratory, University of Missouri Hospital & Clinics, 2703 Clark Lane, Suite B, Lower Level, Columbia, MO 65202, 573–882–1273

Toxicology Testing Service, Inc., 5426 N.W. 79th Ave., Miami, FL 33166, 305–593–2260

Universal Toxicology Laboratories (Florida), LLC, 5361 NW 33rd Avenue, Fort Lauderdale, FL 33309, 954–717–0300, 800–419–7187x419 (Formerly: Integrated Regional Laboratories, Cedars Medical Center, Department of Pathology)

Universal Toxicology Laboratories, LLC, 9930 W. Highway 80, Midland, TX 79706, 915–561–8851/888–953–8851

US Army Forensic Toxicology Drug Testing Laboratory, Fort Meade, Building 2490, Wilson Street, Fort George G. Meade, MD 20755–5235, 301–677–7085

*The Standards Council of Canada (SCC) voted to end its Laboratory Accreditation Program for Substance Abuse (LAPSA) effective May 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories will continue under DOT authority. The responsibility for conducting quarterly performance testing plus periodic on-site inspections of those LAPSA-accredited laboratories was transferred to the U.S. DHHS, with the DHHS' National Laboratory Certification Program (NLCP) contractor continuing to have an active role in the performance testing and laboratory inspection processes. Other Canadian laboratories wishing to be considered for the NLCP may apply directly to the NLCP contractor just as U.S. laboratories do.

Upon finding a Canadian laboratory to be qualified, the DHHS will recommend that DOT certify the laboratory (**Federal Register**, 16 July 1996) as meeting the minimum standards of the "Mandatory Guidelines for Workplace Drug Testing" (59 **Federal Register**, 9 June 1994, Pages 29908–29931). After receiving the DOT certification, the laboratory will be included in the monthly list of DHHS certified laboratories and participate in the NLCP certification maintenance program.

Richard Kopanda,

Executive Officer, Substance Abuse and Mental Health Services Administration.

BILLING CODE 4160–20–U

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4650–N–88]

Notice of Submission of Proposed Information Collection to OMB; HUD Mobility-Impaired Tenant Survey

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: *Comments Due Date:* January 9, 2002.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB approval number and should be sent to: Joseph F. Lackey, Jr., OMB Desk Officer, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Wayne Eddins, Reports Management Officer, Q, Department of Housing and Urban Development, 451 Seventh Street, Southwest, Washington, DC 20410; e-mail *Wayne_Eddins@HUD.gov;* telephone (202) 708–2374. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Eddins.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35). The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the OMB approval number, if applicable; (4) the description of the need for the information and its proposed use; (5) the agency form number, if applicable; (6) what members of the public will be affected by the proposal; (7) how frequently information submissions will be required; (8) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (9) whether the proposal is new, an extension, reinstatement, or revision of an information collection requirement; and (10) the name and telephone number of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

This Notice also lists the following information:

Title of Proposal: HUD Mobility-Impaired Tenant Survey.

OMB Approval Number: 2528–XXXX.

Form Numbers: None.

Description of the Need for the Information and its Proposed Use: The proposed survey to HUD Mobility-Impaired Tenants will attempt to obtain information regarding the reasonable accommodation process. The results of the survey will help HUD verify compliance with requirements for discrimination-free housing, including housing for the mobility impaired. The survey will be administered via the telephone and should take no more than 15 to 20 minutes per respondent. We anticipate 480 respondents to the survey, which is a one-time survey. The anticipated timeframe from survey start to survey completion is approximately 8 weeks.

Respondents: Individuals or Households, Federal Government, State, Local or Tribal Government.

Frequency of Submission: One-Time.

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Reporing burden	480		1		0.3		160

Total Estimated Burden Hours: 480.
Status: New Collection.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 35, as amended.

Dated: December 4, 2001.

Wayne Eddins,

Departmental Reports Management Officer, Office of the Chief Information Officer.

This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Eddins.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the paperwork Reduction Act (44 U.S.C. Chapter 35). The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the OMB approval number, if applicable; (4) the description of the need for the information and its proposed use; (5) the agency form number, if applicable; (6) what members of the public will be affected by the proposal; (7) how frequently information submissions will be required; (8) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (9) whether the proposal is new, an extension, reinstatement, or revision of an information collection requirement; and (10) the name and telephone number of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

This Notice also lists the following information:

Title of Proposal: Information Collection to Identify Users and Uses of Electronic Permitting Applications.

OMB Approval Number: 2528–XXXX.

Form Numbers: None.

Description of the Need for the Information and its Proposed Use: A survey of the uses and users of electronic permitting systems will assist communities and software developers to understand their requirements. This information will be published by HUD to aid in the development and selection of systems for use by community building code officers.

Respondents: Business or other for-profit, State, Local, or Tribal Government.

Frequency of Submission: One-Time.

Reporting Burden:

	Number of respondents	×	Frequency of responses	×	Hours per response	=	Burden hours
Application	200		1		2		400

Total Estimated Burden Hours: 400.
Status: New Collection.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 35, as amended.

Dated: December 4, 2001.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4558–N–07]

Mortgagee Review Board; Administrative Actions

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: In compliance with section 202(c) of the National Housing Act, notice is hereby given of the cause and description of administrative actions taken by HUD's Mortgagee Review Board against HUD-approved mortgagees.

FOR FURTHER INFORMATION CONTACT: D. Jackson Kinkaid, Secretary to the Mortgagee Review Board, 451 7th Street, SW., Washington, DC 20410, P–200, telephone: (202) 708–3041 extension 3574 (this is not a toll-free number). A Telecommunications Device for Hearing and Speech-Impaired Individuals (TTY) is available at 1 (800) 877–8339 (Federal Information Relay Service).

SUPPLEMENTARY INFORMATION: Section 202(c)(5) of the National Housing Act (added by section 142 of the Department of Housing and Urban Development Reform Act of 1989, Public Law 101–235, approved December 15, 1989), requires that HUD "publish a description of and the cause for administrative action against a HUD-approved mortgagee" by the Department's Mortgagee Review Board. In compliance with the requirements of Section 202(c)(5), notice is hereby given of administrative actions that have been taken by the Mortgagee Review Board from April 14, 2001 through September 30, 2001.

1. 1st American Home Loan, Merrilville, IN

[Docket No. 01–1470–MR]

Action: Settlement Agreement signed May 21, 2001. Without admitting fault or liability, 1st American Home Loan ("FAHL") agreed to a civil money penalty of $7,000. FAHL also agreed to indemnify HUD for any losses incurred on one loan.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: FAHL failed to ensure that loan officers

worked exclusively for FAHL; FAHL paid referral fees to other lenders; FAHL failed to establish, maintain and implement a Quality Control Plan; and FAHL failed to maintain complete loan origination files for review.

2. Altiva Financial Corporation, Formerly Known as MEGO Mortgage Corporation, Atlanta, GA

[Docket No. 01–1428–MR]

Action: In a letter dated May 18, 2001, the Board withdrew Altiva Financial Corporation's ("Altiva") HUD/FHA approval for three years. The Board also voted to impose a civil money penalty of $104,500.

Cause: HUD's Office of Inspector General made the following findings of violations of HUD/FHA requirements: Altiva failed to ensure that the loan amount did not exceed the cost of repairs described in the borrowers' Title I loan application in seventeen loans; Altiva failed to properly evaluate the borrowers' income and/or liabilities; Altiva failed to document the borrowers' source of funds for the initial payment; and Altiva failed to ensure that loan proceeds were only used for the eligible purposes cited in the loan application.

3. America's Mortgage, Inc., Roswell, GA

[Docket No. 00–1334–MR]

Action: Settlement Agreement signed May 3, 2001. Without admitting fault or liability, America's Mortgage, Inc. ("AMI") agreed to a civil money penalty of $3,000.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: AMI failed to file annual loan origination reports for 1996–1998, which supplements the requirements of the Home Mortgage Disclosure Act; AMI failed to establish, maintain and implement a Quality Control Plan in compliance with HUD/FHA requirements; and AMI failed to report to HUD a violation of law or regulation, false statement, or program abuse.

4. BancGroup Mortgage Corporation, Palos Hills, IL

[Docket No. 00–1159–MR]

Action: Settlement Agreement signed August 28, 2001. Without admitting fault or liability, BancGroup Mortgage Corporation ("BMC") agreed to a civil money penalty of $12,000. In addition, BMC agreed to refund all impermissible fees charged to borrowers on FHA/HUD loans it closed between September 1, 1998 and August 31, 1999.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: BMC failed to file annual loan origination reports for 1998, which supplements the requirements of the Home Mortgage Disclosure Act; BMC failed to establish, maintain and implement a Quality Control Plan in compliance with HUD/FHA requirements; BMC failed to retain documents originating mortgagees are required to maintain; BMC charged unallowable fees and allowed unexplained and/or pre-paid credits; and BMC failed to itemize on the HUD–1 Settlement Statement the items paid on behalf of the borrowers.

5. California Empire Financial Group, Inc., Rancho Cucamonga, CA

[Docket No. 00–1094–MR]

Action: Settlement Agreement signed June 1, 2001. Without admitting fault or liability, California Empire Financial Group, Inc. ("CEFG") agreed to a civil money penalty of $11,000. [For the prior **Federal Register** notice on the proposed settlement agreement, see 65 FR at 53731, September 5, 2000.]

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: CEFG allowed non-employees to originate HUD/FHA loans; and CEFG allowed employees to act as real estate agents and loan officers.

6. Casey Duncan Group, Inc., Timonium, MD

[Docket No. 01–1447–MR]

Action: In a letter dated May 8, 2001, the Board withdrew Casey Duncan Group, Inc.'s ("CDGI") HUD/FHA approval for five years.

Cause: In conjunction with a related MRB action, American SkyCorp, Inc., HUD's Departmental Enforcement Center observed the following violations of HUD/FHA requirements: CDGI failed to exclude participants that were suspended from participating in federal government programs; CDGI failed to meet basic lender approval requirements by its surrender of its license to originate mortgages in the State of Maryland; and CDGI failed to maintain the requirements for a main office.

7. Cendant Mortgage Corporation, Mt. Laurel, NJ

[Docket No. 01–1523–MR]

Action: Settlement Agreement signed September 25, 2001. Without admitting fault or liability, Cendant Mortgage Corporation ("CMC") agreed to a payment of $10,000. In addition, Cendant agreed to indemnify HUD for any losses incurred on 36 loans.

Cause: HUD's Quality Assurance Division made the following finding of violations of HUD/FHA requirements: CMC allowed a non FHA approved lender, Select Financial Services, to originate 63 HUD/FHA insured loans.

8. Colonial Atlantic Mortgage, Silver Spring, MD

[Docket No. 00–1162–MR]

Action: Settlement Agreement signed July 25, 2001. Without admitting fault or liability, Colonial Atlantic Mortgage ("CAM") agreed to a civil money penalty of $4,000.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: CAM failed to file annual loan origination reports for 1997–1998, which supplements the requirements of the Home Mortgage Disclosure Act; CAM accepted faxed copies of required documents in 2 loans; and CAM failed to have, implement and maintain an adequate Quality Control Plan that meets HUD guidelines.

9. Columbia National, Inc., Columbia, MD

[Docket No. 01–1405–MR]

Action: Settlement Agreement signed May 21, 2001. Without admitting fault or liability, Columbia National, Inc. ("CN") agreed to an administrative payment of $24,000. CN also agreed to indemnify HUD for any losses incurred on 24 loans.

Cause: CN self reported two loans to HUD after discovering fraud during the course of its own quality assurance audit of a branch office it later shut down. Thereafter, HUD's Quality Assurance Division initiated a review and made the following findings of violations of HUD/FHA requirements: CN used falsified documentation or conflicting information to originate loans and obtain HUD/FHA mortgage insurance; CN failed to document the borrower's source of funds used for down payment or closing costs; CN approved mortgage loans where loan origination documents passed through the hands of an interested third party; CN approved mortgage loans where the ratios exceeded HUD/FHA guidelines; CN approved mortgage loans where the borrower's stability of income was not adequately documented; CN failed to properly verify the borrower's previous rental history; CN approved mortgage loans where borrowers were charged fees which were not specifically permitted by HUD/FHA; CN failed to obtain insured ten year warranty plans from a HUD/FHA approved entity for high loan to value, new construction

loans; CN failed to obtain letters of credit reference where the borrower had not established traditional credit; CN failed to properly document the borrower's income; CN failed to ensure that the property's valuation conditions were met in accordance with HUD/FHA requirements; CN approved a mortgage loan with a reduced up-front mortgage insurance premium where the borrower did not meet the criteria for the reduced MIP as outlined by HUD/FHA requirements; and CN failed to ensure that the borrower met the minimum required cash investment.

10. Corona Hills Financial, Inc., d/b/a American Capitol Mortgage, Boise, ID

[Docket No. 00–1157–MR]

Action: Settlement Agreement signed June 1, 2001. Without admitting fault or liability, Corona Hills Financial, Inc. d/b/a/American Capitol Mortgage ("ACM") agreed to pay a civil money penalty of $5,500. ACM also agreed to surrender to HUD any assets that it accrued for the next 5 years up to $60,000.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: ACM failed to file an annual loan origination report for 1998 which supplements the requirements of the Home Mortgage Disclosure Act; ACM used independent contractors to originate HUD/FHA insured loans; ACM used false documentation to originate HUD/FHA insured loans; ACM failed to provide complete loan origination files for review; ACM used income/employment documents that do not support the borrower's income; ACM failed to include all known liabilities in calculating the ratios; ACM failed to properly document the source of funds for a gift; and ACM used an expired conditional commitment.

11. Cypress Financial Mortgage Corporation, Inc., Davie, FL

[Docket No. 00–1163–MR]

Action: In a letter dated May 18, 2001, the Board withdrew Cypress Financial Mortgage Corporation, Inc.'s ("Cypress") HUD/FHA approval for three years. The Board also voted to impose a civil money penalty of $22,000.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: Cypress failed to maintain and implement a Quality Control Plan; and Cypress used false information to originate loans to obtain HUD/FHA insurance and misrepresented the Title I program to borrowers.

12. DLM Financial Services Corporation, d/b/a First Financial Mortgage, a/k/a The Home Store, Fresno, CA

[Docket No. 01–1521–MR]

Action: In a letter dated August 16, 2001, the Board withdrew DLM Financial Services Corporation's ("DLM") [d/b/a First Financial Mortgage, a/k/a The Home Store] HUD/FHA approval for three years. The Board also voted to impose a civil money penalty of $65,000.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: DLM failed to maintain and implement a Quality control Plan in compliance with HUD requirements; DLM knowingly did business with a debarred, suspended, ineligible or voluntarily excluded individual; DLM used false information in originating an FHA insured loan; DLM allowed non-employees to originate HUD/FHA mortgage loans; DLM allowed employees to have dual employment; and DLM failed to retain complete origination files.

13. Eagle Home Loans and Realty, Inc., Sacramento, CA

[Docket No. 00–1129–MR]

Action: Settlement Agreement signed May 21, 2001. Without admitting fault or liability, Eagle Home Loans and Realty, Inc. ("EHLR") agreed to a civil money penalty of $1000. [For the prior **Federal Register** notice on the proposed settlement agreement, see 65 FR at 53732, September 5, 2000.]

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: EHLR failed to file annual loan origination reports for 1995 through 1999 which supplements the requirements of the Home Mortgage Disclosure Act; EHLR failed to maintain and implement a Quality Control Plan; EHLR shared office space with its parent company; and EHLR did not clearly identify the office space to the public.

14. First Funding Mortgage Bankers Corporation, Rosedale, NY

[Docket No. 00–1323–MR]

Action: Settlement Agreement signed June 1, 2001. Without admitting fault or liability, First Funding Mortgage Bankers Corporation ("FFMBC") agreed to a civil money penalty of $60,000. FFMBC also agreed to indemnify HUD for any losses incurred on 11 loans.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: FFMBC failed to maintain a Quality Control Plan in compliance with HUD requirements; FFMBC failed to submit One Time Mortgage Insurance Premiums Payments within 15 days of loan closing; FFMBC failed to determine that borrowers met minimum cash investment requirements; FFMBC failed to verify the source and adequacy of funds for the down payment and/or closing costs; FFMBC failed to verify income used to qualify the borrower; and FFMBC failed to resolve conflicts in information contained within the loan file prior to loan closing.

15. First Union Mortgage Corporation, Raleigh, NC

[Docket No. 01–1536–MR]

Action: Settlement Agreement signed September 18, 2001. Without admitting fault or liability, First Union Mortgage Corporation ("FUMC") agreed to indemnify HUD for any losses incurred on 4 loans.

Cause: HUD's Departmental Enforcement Center made the following findings of violations of HUD/FHA requirements resulting from a Quality Assurance Division review of Fidelity Home Mortgage Corporation, a loan correspondent that FUMC sponsored: FUMC failed to properly verify the source and adequacy of funds for the down payment and failed to properly verify income requirements.

16. Golden Home Mortgage Corporation, Concord, CA

[Docket No. 01–1471–MR]

Action: Settlement Agreement signed August 28, 2001. Without admitting fault or liability, Golden Home Mortgage Corporation ("GHMC") agreed to a civil money penalty of $20,000. In settlement, GHMC agreed to withdraw its appeal of the withdrawal of HUD/FHA approval for five years that the Board had imposed on GHMC in a letter dated January 29, 2001. It further agreed to forever forfeit its FHA approval.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: GHMC originated 19 HUD/FHA insured mortgages in which false statements were submitted to HUD and GHMC was aware of these false statements; GHMC failed to ensure that non-profit mortgagors did not exceed 10% profit on properties purchased from HUD with a 30 % discount; GHMC processed a loan that resulted in the Department over-insuring an FHA loan; GHMC failed to accurately prepare the closing instructions causing the sponsor to submit false and/or inaccurate HUD–1 Settlement Statements to the Department in 38 loans; GHMC used

falsified documentation in originating an FHA loan; GHMC falsely certified that a repair condition, the repair of a swimming pool, had been satisfied in one loan; GHMC processed loans containing false and/or inaccurate owner occupancy information in two loans; GHMC failed to properly document the transfer of gift funds in two loans; GHMC provided false statements and/or certifications concerning housing counseling in 16 loans; GHMC provided false information concerning face-to-face interviews, used non-employees to perform loan origination functions, and failed to meet face-to-face with first-time homebuyers in five loans; GHMC failed to process loan applications within HUD/FHA guidelines in four loans; GHMC charged unallowable fees on FHA loans in two loans; GHMC allowed a mortgagor to sign a blank document; and GHMC failed to file annual loan origination reports for 1996–1998, which supplements the requirements of the Home Mortgage Disclosure Act.

17. Herring National Bank, Vernon, TX

[Docket No. 01–1391–MR]

Action: Settlement Agreement signed August 28, 2001. Without admitting fault or liability, Herring National Bank ("Herring") agreed to a civil money penalty of $30,000. Herring also agreed to indemnify HUD for any losses incurred on 6 loans.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: Herring operated branch offices under prohibited branch arrangements; Herring failed to meet the requirements for late endorsements in three loans; Herring failed to adequately document the sufficiency and/or source of funds to close three transactions; Herring failed to support income used to qualify the mortgagor in one loan; and Herring failed to obtain the required field reviews on properties previously sold by HUD's Real Estate Owned Division in three loans.

18. Home Loan Mortgage Corporation, Hesperia, CA

[Docket No. 01–1426–MR]

Action: Settlement Agreement signed May 3, 2001. Without admitting fault or liability, Home Loan Mortgage Corporation ("HLMC") agreed to a civil money penalty of $144,000. HLMC also agreed to indemnify HUD for any losses incurred on 7 loans.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: HLMC failed to maintain and implement a quality control plan in compliance with HUD requirements; HLMC failed to remit timely Up Front Mortgage Insurance Premiums; HLMC failed to segregate escrow funds; HLMC failed to submit loans for endorsement in a timely manner; HLMC submitted ineligible loans for endorsement; HLMC used other entities to originate loans through branch office arrangements; HLMC used independent contractors as loan originators; and HLMC failed to properly verify the source and adequacy of funds for the down payment and/or closing.

19. InterAmerican Mortgage Corporation, Rosedale, NY

[Docket No. 01–1482–MR]

Action: Settlement Agreement signed July 25, 2001. Without admitting fault or liability, InterAmerican Mortgage Corporation ("IAMC") agreed to pay HUD $524,256.79, representing losses HUD incurred on 5 loans that were part of a prior August 27, 1997 Settlement Agreement with HUD.

Cause: The Board followed up on IAMC's failure to indemnify HUD on five loans which were the subject of an August 27, 1997 Settlement Agreement. This failure to indemnify violated HUD regulations and breached the 1997 Settlement Agreement.

20. Intercoastal Funding Corporation, Huntington Beach, CA

[Docket No. 00–1320–MR]

Action: Settlement Agreement signed May 3, 2001. Without admitting fault or liability, Intercoastal Funding Corporation agreed to a civil money payment of $11,000.

Cause: HUD's Quality Assurance Division made the following finding of violations of HUD/FHA requirements: Intercoastal Funding Corporation failed to maintain and implement a Quality Control Plan in compliance with HUD requirements.

21. J & R Mortgage, Inc., San Mateo, CA

[Docket No. 00–1127–MR]

Action: Settlement Agreement signed May 3, 2001. Without admitting fault or liability, J & R Mortgage, Inc. ("JRM") agreed to a civil money penalty of $25,000. JRM also agreed to indemnify HUD for any losses incurred on 6 loans.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: JRM used false information to originate 9 loans; JRM allowed non-employees to take loan applications in 9 loans; JRM permitted "straw buyers" to qualify for HUD/FHA insured mortgages in 3 loans; JRM failed to verify the source of funds used for borrowers' down payment and/or closing costs and thereby, did not ensure that borrowers met their minimum required investment in 4 loans; and JRM allowed real estate agents to accept second deeds of trust and/or promissory notes from mortgagors in exchange for making the mortgagors' minimum required investment in 3 loans.

22. Johnson Mortgage Corporation, New Orleans, LA

[Docket No. 01–1514–MR]

Action: Settlement Agreement signed July 25, 2001. Without admitting fault or liability, Johnson Mortgage Corporation ("JMC") agreed to a payment of $16,500.

Cause: HUD's Quality Assurance Division made the following finding of violations of HUD/FHA requirements: JMC failed to maintain and implement a Quality Control Plan in compliance with HUD/FHA requirements, despite previous findings on this requirement and JMC's assurance of corrective action.

23. Malone Mortgage Company America, Ltd., Carlsbad, CA

[Docket No. 00–1081–MR]

Action: Settlement Agreement signed May 21, 2001. Without admitting fault or liability, Malone Mortgage Company America, Ltd. "(MMC") agreed to a civil money penalty of $100,000. MMC also agreed to indemnify HUD for any losses incurred on 4 loans. [For the prior **Federal Register** notice on the proposed settlement agreement, see 65 FR at 53735, September 5, 2000.]

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: MMC employed, as a loan officer, an individual who was concurrently working for the mortgagor entity and had an ownership interest in another lending institution; MMC's files were found to contain false completion inspections and 203(k) escrow draws; MMC charged consulting fees and inspection fees that were unearned; MMC originated single-family 203(k) mortgages for the purpose of financing the acquisition of multifamily housing complexes with the knowledge that title to the properties would be subsequently transferred to limited partnerships; MMC processed, approved and closed mortgages where the mortgagor failed to meet the minimum capital investment requirements due to the receipt of Low Income Housing Tax Credits; MMC failed to verify adequate funds from an acceptable source to be used to close the mortgages and to meet the reserve requirements after closing the FHA

insured mortgages; MMC provided FHA insured financing to a nonprofit where there was less than an arms-length transaction between the nonprofit's officers and entities providing goods and services; MMC permitted the nonprofit mortgagor to close on FHA insured mortgages and subsequently sell the properties via Contract for Deed; MMC originated FHA insured mortgages using Uniform Residential Appraisal Reports (URAR) that were found to be deficient, which resulted in overstated values; MMC escrowed and released excess amounts for mortgage payments; MMC did not properly value commercial space that was acquired by an affiliate of the mortgagor entity; MMC failed to properly account for a credit that was to have been given to the mortgagor from the seller, thereby reducing the acquisition cost; MMC used an incorrect sales price when determining acquisition cost for the purpose of calculating maximum mortgage amounts; MMC submitted to HUD for endorsement loans that were closed incorrectly; MMC closed and submitted for endorsement mortgages on properties that exceeded the 4 unit limit in effect for single-family programs; MMC failed to obtain as-is appraisals on properties that were acquired as part of bulk purchases; MMC originated inaccurate correspondence that was used by the mortgagor when applying for Low Income Housing Tax Credits; MMC permitted the mortgagor to receive payment for sweat equity for repair items completed by the mortgagor; MMC processed, approved, and closed loans where the properties were not eligible for 203(k) mortgage insurance; MMC failed to ensure that rehabilitation work was completed in a timely manner; MMC approved and closed a loan with a high loan to value ratio on a property that was less than one year old; and MMC failed to resolve discrepancies in documents used to originate FHA insured mortgages.

24. Marathon Financial Corporation, Southfield, MI

[Docket No. 00–1362–MR]

Action: Settlement Agreement signed June 1, 2001. Without admitting fault or liability, Marathon Financial Corporation ("MFC") agreed to a civil money penalty of $15,000. MFC also agreed to indemnify HUD for any losses incurred in one loan.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: MFC failed to make timely payments of Upfront Mortgage Insurance Premiums; MFC shared office space and commingled employees with Miracle Financial, a non-HUD approved lender; MFC failed to obtain and analyze the terms and conditions of the real estate transaction to consider the acquisition cost of recently acquired properties in the underwriting of loans; MFC failed to properly verify the source and adequacy of funds for the down payment and/or closing cost; MFC charged borrowers fees which are not in compliance with HUD/FHA guidelines; and MFC failed to maintain and implement a quality control plan in compliance with HUD requirements.

25. Marketplace Home Mortgage, LLC, Edina, MN

[Docket No. 01–1479–MR]

Action: Settlement Agreement signed July 25, 2001. Without admitting fault or liability, Marketplace Home Mortgage, LLC ("MHM") agreed to a civil money penalty of $20,000. In addition, MHM agreed to indemnify HUD for any losses incurred on 4 loans.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: MHM allowed a non-FHA approved entity to originate 6 HUD/FHA loans that were registered with the Department as loans originated by MHM; and MHM failed to file annual loan origination reports for 1996–1997, which supplements the requirements of the Home Mortgage Disclosure Act.

26. Megamerica Mortgage Group, Inc., San Antonio, TX

[Docket No. 00–1319–MR]

Action: Settlement Agreement signed May 3, 2001. Without admitting fault or liability, Megamerica Mortgage Group, Inc. ("Megamerica") agreed to indemnify HUD for any losses incurred on 5 loans.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: Megamerica recruited non-HUD approved entities and allowed non-Megamerica employees to originate loans which Megamerica processed and submitted to be approved for FHA insurance; Megamerica allowed prohibited branch arrangements; Megamerica signed false Lender Certifications contained in addenda to the Uniform Residential Loan Applications; Megamerica made prohibited payments to entities that both prepared loan applications and received real estate commissions on the same FHA loan transactions; Megamerica failed to disclose payments to brokers on the HUD–1 Settlement Statements; and Megamerica failed to maintain complete loan files for a minimum period of two years from the date of insurance endorsement.

27. Mission Hills Mortgage Corporation, Santa Ana, CA

[Docket No. 00–1350–MR]

Action: Settlement Agreement signed July 25, 2001. Without admitting fault or liability, Mission Hills Mortgage Corporation ("MHMC") agreed to a civil money penalty of $60,000. In addition, MHMC agreed to indemnify HUD for any losses incurred on 15 loans. Further, MHMC agreed to audit its FHA/HUD loan files for a specific time period and refund any unallowable fees to mortgagors.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: MHMC failed to maintain and implement a quality control plan in compliance with HUD requirements; MHMC provided false information in originating and obtaining HUD/FHA mortgage insurance in one loan; MHMC failed to properly verify the source and adequacy of funds for the down-payment and/or closing; MHMC failed to properly verify credit history; MHMC failed to provide acceptable compensating factors for high ratios; MHMC failed to evaluate properly effective income; MHMC charged unallowable fees; MHMC failed to resolve discrepancies; MHMC failed to include liabilities in one loan; and MHMC failed to maintain complete origination files.

28. Molton, Allen & Williams Corporation, Birmingham, AL

[Docket No. 01–1544–MR]

Action: Settlement Agreement signed September 18, 2001. Without admitting fault or liability, Molton, Allen & Williams Corporation ("MAWC") agreed to indemnify HUD for any losses incurred on 2 loans.

Cause: HUD's Departmental Enforcement Center made the following finding of violations of HUD/FHA requirements resulting from a Quality Assurance Division review of Colonial Atlantic Mortgage, a loan correspondent that MAWC sponsored: MAWC failed to properly verify the source and adequacy of funds for the down payment or income requirements in two loans.

29. Money Line Classic Corporation, Whittier CA

[Docket No. 01–1398–MR]

Action: In a letter dated July 26, 2001, the Board voted to impose a civil money

penalty on Money Line Classic Corporation ("MLCC") of $45,000.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: MLCC failed to maintain and implement a Quality Control Plan in compliance with HUD requirements; MLCC failed to notify the Department of program abuses; MLCC failed to designate a senior corporate officer to conduct exclusively the affairs of MLCC during normal business hours; MLCC failed to provide office space that is clearly identified to the public; and MLCC failed to retain complete origination files.

30. Mortgage Loan Specialists, Inc., Solana Beach, CA

[Docket No. 01–1429–MR]

Action: Settlement Agreement signed July 18, 2001. Without admitting fault or liability, Mortgage Loan Specialists, Inc. ("MLS") agreed to a civil money penalty of $192,500.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: MLS allowed prohibited branch arrangements or net branches; MLS failed to file annual loan origination reports for 1997–1999, which supplements the requirements of the Home Mortgage Disclosure Act; and MLS failed to maintain and implement a Quality Control Plan.

31. MortgageOne Financial Services, Kissimmee, FL

[Docket No. 01–1472–MR]

Action: Settlement Agreement signed May 21, 2001. Without admitting fault or liability, MortgageOne Financial Services ("MOFS") agreed to a civil money penalty of $10,000.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: MOFS failed to implement a Quality Control Plan in compliance with HUD/FHA requirements; MOFS failed to assure that interested third parties did not participate in the origination and/or processing of loans to be insured by the Department; and MOFS falsely certified loan documents to obtain HUD/FHA insurance.

32. Mortgage One, Inc., Minneapolis, MN

[Docket No. 00–1343–MR]

Action: Settlement Agreement signed July 25, 2001. Without admitting fault or liability, Mortgage One, Inc. ("MOI") agreed to a civil money penalty of $15,000.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: MOI failed to maintain and implement a Quality Control Plan; MOI failed to file annual loan origination reports for 1996–1998, which supplements the requirements of the Home Mortgage Disclosure Act; MOI failed to conduct face-to-face interviews with four first time home buyers; MOI allowed non-MOI employees in six cases to take loan applications and process paperwork on HUD/FHA insured mortgages; and MOI used false information in originating seven loans and obtaining HUD/FHA mortgage insurance.

33. Norwest Mortgage, Inc., Des Moines, IA

[Docket No. 99–1038–MR]

Action: Settlement Agreement signed May 3, 2001. Without admitting fault or liability, Norwest Mortgage, Inc., now known as Wells Fargo Home Mortgage, Inc., ("Norwest") agreed to a civil money penalty of $75,000. Norwest also agreed to indemnify HUD for any losses incurred, including interest, from Norwest's submission of insurance claims on 39 loans that were subject to a 1996 settlement agreement. [For the prior **Federal Register** notice on the proposed settlement agreement, see 65 FR at 53736, September 5, 2000.]

Cause: Contrary to the terms of a March 22, 1996 Settlement Agreement, Norwest submitted claims for FHA insurance on 39 loans on which Norwest had agreed to not submit such claims.

34. PMA Mortgage, Inc., Long Beach, CA

[Docket No. 01–1485–MR]

Action: In a letter dated August 14, 2001, the Board withdrew PMA Mortgage, Inc."s ("PMA") HUD/FHA approval for three years.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: PMA failed to maintain and implement a quality control plan in compliance with HUD requirements; PMA used falsified documentation and/or conflicting information in originating loans and obtaining HUD/FHA mortgage insurance; PMA failed to properly verify the source and adequacy of funds for the down payment and/or closing costs; PMA failed to identify sales within the last 12 months on appraisals; and PMA requested a seller to backdate loan documents.

35. RBMG, Inc., Columbia SC

[Docket No. 01–1545–MR]

Action: Settlement Agreement signed September 25, 2001. Without admitting fault or liability, RBMG agreed to indemnify HUD for any losses incurred on six loans.

Cause: HUD's Quality Assurance Division made the following finding of violations of HUD/FHA requirements: RBMG failed to properly verify the source and adequacy of funds for the down payment or income requirements in six loans.

36. Twins, Inc., Columbia, SC

[Docket No. 00–1076–MR]

Action: Settlement Agreement signed May 21, 2001. Without admitting fault or liability, Twins, Inc. ("TI") agreed to a civil money penalty of $8,000. In addition, the Department reinstated TI as an FHA approved mortgagee. The Board had previously withdrawn TI's HUD/FHA approval for three years in a letter dated September 29, 2000. [For the prior **Federal Register** notice on the proposed settlement agreement, see 65 FR at 53737, September 5, 2000.]

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: TI shared office space with its parent company and maintained an office not clearly identified to the public; TI commingled employees with its parent company; TI used more than one entity to conduct its loan origination function; TI failed to maintain an adequate Quality Control Plan for the origination of HUD/FHA insured mortgages; TI failed to properly implement its Quality Control Plan; and TI charged mortgagors unallowable fees.

37. U.S. Lending Corporation, Long Beach, CA

[Docket No. 01–1537–MR]

Action: In a letter dated July 26, 2001, the Board withdrew U.S. Lending Corporation's ("USLC") HUD/FHA approval for five years. In addition, the Board voted to impose a civil money penalty of $35,000.

Cause: While preparing for an administrative hearing against Milestone Mortgage Corporation, HUD's Mortgagee Review Board staff learned that Milestone, despite its immediate withdrawal from FHA programs was operating under the name of U.S. Lending Corporation and was still originating FHA insured loans. The Board voted to immediately withdraw USLC's approval based on the following violations of HUD/FHA requirements: USLC circumvented the Mortgagee Review Board's withdrawal action against Milestone Mortgage Corporation; USLC failed to exclude participants that are suspended from participating in federal government programs; USLC

used non FHA approved offices to originate FHA insured mortgages; USLC failed to maintain complete origination files; USLC failed to maintain an office space that was separate and apart from that of another entity; USLC failed to meet the staffing requirement of at least two full-time employees at a main office; USLC failed to follow proper quality control procedures; and USLC failed to establish and maintain an adequate Quality Control Plan for the origination of HUD/FHA insured mortgages. [For the prior **Federal Register** notice relating to Milestone Mortgage Corporation, see 66 FR at page 38307, July 23, 2001.]

38. Valley Mortgage Company, Inc., McAllen, TX

[Docket No. 01–1411–MR]

Action: Settlement Agreement signed August 28, 2001. Without admitting fault or liability, Valley Mortgage Company, Inc., ("VMCI") agreed to a civil money penalty of $25,000. VMCI also agreed to indemnify HUD for any losses incurred on 11 loans. At the time of settlement, VMCI paid HUD an additional $77,604.22 for losses incurred on three loans upon which HUD had paid claims and had sold the property.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: VMCI failed to verify the source of funds for closing and/or to pay off debts; VMCI used inaccurate and/or unstable income to qualify mortgagors; VMCI omitted mortgagor liabilities and/or the liabilities of the non-purchasing spouse in one loan qualification; VMCI failed to adequately document mortgagors' credit histories in one loan; VMCI failed to update credit documents in excess of 120 days at the time of closing; VMCI failed to clarify or document important file discrepancies in one loan; VMCI closed a loan in excess of the maximum allowable resulting in an over-insured mortgage; and VMCI failed to perform sufficient investigation and analysis to certify that a condominium project satisfied the eligibility criteria for a "spot loan'.

39. West Coast Mortgage Securities, Inc., San Diego, CA

[Docket No. 00–1130–MR]

Action: Settlement Agreement signed August 28, 2001. Without admitting fault or liability, West Coast Mortgage Securities, Inc., ("WCMS") agreed to a civil money penalty of $1,000.

Cause: HUD's Quality Assurance Division made the following findings of violations of HUD/FHA requirements: WCMS failed to file annual loan origination reports for 1995–1999, which supplements the requirements of the Home Mortgage Disclosure Act; and WCMS failed to properly document liabilities.

Dated: December 3, 2001.

John C. Weicher,

Assistant Secretary for Housing—FHA, Commissioner, Chairman, Mortgagee Review Board.

[FR Doc. 01–30438 Filed 12–7–01; 8:45 am]

BILLING CODE 4210–27–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability; Draft Environmental Impact Statement on Light Goose Management; Extension of Comment Period

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability for public comment; extension of comment period.

SUMMARY: The U.S. Fish and Wildlife Service (Service) is extending the comment period on a Draft Environmental Impact Statement (DEIS) which is available for public review. The DEIS analyzes the potential environmental impacts of several management alternatives for addressing problems associated with overabundant light goose populations. The Service invites the public to comment on the DEIS.

DATES: Written comments on the DEIS must be received on or before January 25, 2002.

ADDRESSES: Requests for copies of the DEIS should be mailed to Chief, Division of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, ms 634—ARLSQ, 1849 C Street NW., Washington, D.C. 20240. Copies of the DEIS can be downloaded from the Division of Migratory Bird Management web site at *http://migratorybirds.fws.gov/issues/snowgse/tblcont.html*. Comments on the DEIS should be sent to the above address. Alternatively, comments may be submitted electronically to the following address: *white_goose_eis@fws.gov*.

FOR FURTHER INFORMATION CONTACT: Jon Andrew, Chief, Division of Migratory Bird Management, (703) 358–1714.

SUPPLEMENTARY INFORMATION: On September 28, 2001 (66 FR 49668), and October 5, 2001 (66 FR 51274), notices were published in the **Federal Register** announcing the availability of our DEIS on light goose management. On October 12, 2001 (66 FR 52147) we published a notice in the **Federal Register** to announce the schedule of public hearings to invite further public participation in the DEIS review process.

The DEIS evaluates four management alternatives to address habitat destruction and agricultural depredations caused by light geese on various breeding, migration, and wintering areas: (1) No Action or a continuation to manage light goose populations through existing wildlife management policies and practices (Alternative A); (2) modify harvest regulation options and refuge management (Alternative B) (PREFERRED); (3) implement direct agency control of light goose populations on migration and wintering areas in the U.S. (Alternative C); (4) seek direct light goose population control on breeding grounds in Canada (Alternative D). Our preferred alternative (Alternative B) modifies existing light goose hunting regulations to expand methods of take during normal hunting season frameworks. In addition, we propose to create a conservation order to allow take of light geese outside of normal hunting season frameworks. We would also modify management practices on certain National Wildlife Refuges to alter the availability of food and sanctuary to light geese. On October 12, 2001 (66 FR 52077) we published a proposed rule in the **Federal Register** that would implement our preferred alternative.

We have received a request to extend the comment period on the DEIS. The Service invites careful consideration by all parties, and welcomes serious scrutiny from those committed to the long-term conservation of migratory birds. Therefore, to facilitate substantive public review, we are extending the comment period from December 14, 2001, to January 25, 2002. Extension of the comment period on the proposed rule is made through a separate notice in the **Federal Register**.

In order to be considered, electronic submission of comments must include your name and postal mailing address; we will not consider anonymous comments. All comments received, including names and addresses, will become part of the public record. The public may inspect comments during normal business hours in Room 634—Arlington Square Building, 4401 N. Fairfax Drive, Arlington, Virginia. Requests for such comments will be handled in accordance with the Freedom of Information Act and the

Council on Environmental Quality's National Environmental Policy Act regulations [40 CFR 1506.6(f)]. Our practice is to make comments available for public review during regular business hours. Individual respondents may request that we withhold their home address from the record, which we will honor to the extent allowable by law. If a respondent wishes us to withhold his/her name and/or address, this must be stated prominently at the beginning of the comment.

Dated: November 19, 2001.

Kevin R. Adams,

Acting Deputy Director.

BILLING CODE 4310–55–P

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

Agency Information Collection Activities: Comment Request; Notice of Information Collection Under Review, Refugee/Asylee Relative Petition

The Department of Justice, Immigration and Naturalization Service has submitted the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. The proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for sixty days until February 8, 2002.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension of a currently approved collection.

(2) *Title of the Form/Collection:* Refugee/Asylee Relative Petition.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form I–730. Adjudications Division, Immigration and Naturalization Service.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or Households. This form will be used by an asylee or refugee to file on behalf of his or her spouse and/or children provided that the relationship to the refugee/asylee existed prior to their admission to the United States. The information collected on this form will be used by the Service to determine eligibility for the requested immigration benefit.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 86,400 responses at 35 minutes per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 50,371 annual burden hours.

If you have additional comments, suggestions, or need a copy of the proposed information collection instrument with instructions, or additional information, please contact Richard A. Sloan 202–514–3291, Director, Policy Directives and Instructions Branch, Immigration and Naturalization Service, U.S. Department of Justice, Room 4034, 425 I Street, NW., Washington, DC 20536. Additionally, comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time may also be directed to Mr. Richard A. Solan.

If additional information is required contact: Mr. Robert B. Briggs, Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Patrick Henry Building, 601 D Street, NW., Suite 1600, Washington, DC 20530.

Dated: December 3, 2001.

Richard A. Sloan,

Department Clearance Officer, United States Department of Justice, Immigration and Naturalization Service.

DEPARTMENT OF JUSTICE

Bureau of Justice Assistance

[OJP(BJA)–1343]

Announcement of the Availability of the State Criminal Alien Assistance Program for FY 2002

AGENCY: Office of Justice Programs, Bureau of Justice Assistance, Justice.

ACTION: Notice of solicitation.

SUMMARY: Announcement of the availability of the Bureau of Justice Assistance (BJA) State Criminal Alien Assistance Program (SCAAP) funding for FY 2002.

DATES: Applicant account registration through an Internet-based system begins on January 3, 2002 and continues until February 1, 2002. Submission of applications begins on January 3, 2002 and continues until February 1, 2002.

ADDRESS: Bureau of Justice Assistance, 810 Seventh Street, NW, Washington, DC 20531.

FOR FURTHER INFORMATION CONTACT: For SCAAP program guidance and technical assistance, please log on to the Bureau of Justice Assistance Home Page at: *http://www.ojp.usdoj.gov/BJA* and select "SCAAP" or call the Office of Justice Programs Grants Management System Hotline at 1–888–549–9901, Option #4. For general information about online application procedures for other solicitations, please call the U.S. Department of Justice Response Center 1–800–421–6770.

SUPPLEMENTARY INFORMATION:

Authority

This action is authorized under the Omnibus Crime Control and Safe Streets Act of 1968, sections 201–03, as amended, 42 U.S.C. 3721–23 (1994).

Background

SCAAP provides Federal assistance to states and units of general government for costs incurred for the imprisonment of undocumented criminal aliens, who are charged or convicted of one felony or two misdemeanor offenses. Potential applicants may no longer submit hard copy application forms and diskettes. For FY 2002, state and local governments apply for payment via a paperless, electronic, end-to-end distributive, Internet-based web-site application. BJA anticipates providing over 490 payments of varying amounts from a FY2002 funding total of approximately $550 million.

Potential applicants with questions should call the Office of Justice Programs Grants Management System

Hotline at 1–888–549–9901, Option #4. For access to program guidance and the online application, connect to *http://www.ojp.usdoj.gov/BJA* and select "SCAAP"

Dated: December 5, 2001.

Richard R. Nedelkoff,

Director, Bureau of Justice Assistance.

BILLING CODE 7510–01–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. They authorize the preservation of records of continuing value in the National Archives of the United States and the destruction, after a specified period, of records lacking administrative, legal, research, or other value. Notice is published for records schedules in which agencies propose to destroy records not previously authorized for disposal or reduce the retention period of records already authorized for disposal. NARA invites public comments on such records schedules, as required by 44 U.S.C. 3303a(a).

DATES: Requests for copies must be received in writing on or before January 24, 2002. Once the appraisal of the records is completed, NARA will send a copy of the schedule. NARA staff usually prepare appraisal memorandums that contain additional information concerning the records covered by a proposed schedule. These, too, may be requested and will be provided once the appraisal is completed. Requesters will be given 30 days to submit comments.

ADDRESSES: To request a copy of any records schedule identified in this notice, write to the Life Cycle Management Division (NWML), National Archives and Records Administration (NARA), 8601 Adelphi Road, College Park, MD 20740–6001. Requests also may be transmitted by FAX to 301–713–6852 or by e-mail to *records.mgt@arch2.nara.gov*. Requesters must cite the control number, which appears in parentheses after the name of the agency which submitted the schedule, and must provide a mailing address. Those who desire appraisal reports should so indicate in their request.

FOR FURTHER INFORMATION CONTACT: Michael Miller, Director, Modern Records Programs (NWM), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740–6001. Telephone: (301) 713–7110. E-mail: *records.mgt@arch2.nara.gov*.

SUPPLEMENTARY INFORMATION: Each year Federal agencies create billions of records on paper, film, magnetic tape, and other media. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA's approval, using the Standard Form (SF) 115, Request for Records Disposition Authority. These schedules provide for the timely transfer into the National Archives of historically valuable records and authorize the disposal of all other records after the agency no longer needs them to conduct its business. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

No Federal records are authorized for destruction without the approval of the Archivist of the United States. This approval is granted only after a thorough consideration of their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and whether or not they have historical or other value.

Besides identifying the Federal agencies and any subdivisions

requesting disposition authority, this public notice lists the organizational unit(s) accumulating the records or indicates agency-wide applicability in the case of schedules that cover records that may be accumulated throughout an agency. This notice provides the control number assigned to each schedule, the total number of schedule items, and the number of temporary items (the records proposed for destruction). It also includes a brief description of the temporary records. The records schedule itself contains a full description of the records at the file unit level as well as their disposition. If NARA staff has prepared an appraisal memorandum for the schedule, it too includes information about the records. Further information about the disposition process is available on request.

Schedules Pending

1. Department of the Army, Agency-wide (N1–AU–00–16, 7 items, 7 temporary items). Records relating to readiness training of senior intelligence officers. Included are such records as correspondence, planning committee invitations and minutes, on-going training files, budget and financial status reports, and inspection files. Also included are electronic copies of documents created using electronic mail and word-processing. This schedule authorizes the agency to apply the proposed disposition instructions to any recordkeeping medium.

2. Department of the Army, Agency-wide (N1–AU–01–10, 25 items, 25 temporary items). Short-term records documenting security measures undertaken to protect classified information and the activities and resources allocated to support military operations. Included are records relating to such matters as investigations of security breaches, the protection of automated systems, signal security operations, the allocation and distribution of communications security material, and strategic and tactical planning for military operations. Also included are electronic copies of documents created using electronic mail and word processing. This schedule allows the agency to expedite disposal of these records, which previously were approved for disposal. It also authorizes the agency to apply the proposed disposition instructions to any recordkeeping medium.

3. Department of Defense, Defense Contract Audit Agency (N1–372–01–2, 4 items, 2 temporary items). Records pertaining to legal matters not related to the mission of the agency, including files pertaining to standards of conduct and conflict of interest that do not relate to actual cases in the agency. Included are legal opinions and related background materials. Proposed for permanent retention are recordkeeping copies of legal opinions relating to the mission of the agency and standards of conduct records relating to actual cases in the agency. The related electronic copies of documents created using electronic mail and word processing were previously approved for disposal.

4. Department of Defense, Defense Contract Audit Agency, Agency-wide (N1–372–02–1, 6 items, 6 temporary items). Records relating to the use of Government charge cards for obtaining small purchase items. Included are such records as receipts, statements of charges and amounts due, certifications of payments to be made, and electronic copies of records created using electronic mail and word processing.

5. Department of Defense, National Imagery and Mapping Agency (N1–537–01–4, 65 items, 65 temporary items). Paper and electronic records relating to safety, health, and environmental matters, including electronic copies of documents created using electronic mail and word processing. Records relate to general medical and health matters, industrial hygiene, safety programs, fire prevention, and environmental protection.

6. Department of the Navy, Agency-wide. (N1–NU–02–1, 13 items, 9 temporary items). Records relating to investigations or inquiries conducted by the Navy Inspector General. Included are such records as case files, final investigative reports, working papers, correspondence, and final reports. Also included are electronic copies of documents created using electronic mail and word processing and a database used for tracking the progress of each investigation. Recordkeeping copies of historically significant case files are proposed for permanent retention.

7. Department of the Navy, Agency-wide, (N1–NU–02–2, 3 items, 3 temporary items). Records relating to non-combat counterintelligence investigations and inquiries conducted in order to determine the suitability of U.S. citizens and foreign nationals for base access and employment purposes. Also included are electronic copies of records created using electronic mail and word processing.

8. Federal Emergency Management Agency, Agency-wide (N1–311–01–1, 5 items, 4 temporary items). Records relating to pending legislation of interest to the agency, including electronic copies of records created using electronic mail and word processing. Proposed for permanent retention are recordkeeping copies of files, accumulated in the Office of General Counsel and the Office of Congressional and Legislative Affairs, that pertain to legislation that directly affects the agency's enabling legislation.

9. Federal Emergency Management Agency, Mitigation Directorate (N1–311–01–7, 5 items, 5 temporary items). Records relating to disaster response, including grant administration records relating to disaster response. Also included are records relating to FEMA activities to reduce and mitigate losses in future disasters including hazard mitigation, technical assistance, grants and agreements securing the development rights of disaster-prone parcels of land. Also included are electronic copies of documents created using electronic mail and word processing.

10. Federal Retirement Thrift Investment Board, Office of Automated Systems (N1–474–01–1, 2 items, 2 temporary items). Web site feedback records and statistical reports on web site utilization. This schedule reduces the retention period for the recordkeeping copies of these files, which were previously approved for disposal. Also included are electronic copies of documents created using electronic mail and word processing.

11. National Archives and Records Administration, Agency-wide (N1–64–02–2, 2 items, 2 temporary items). Security backups for agency desktop computer applications created and maintained to restore the system in the event of a system failure or other unintentional loss of data.

12. National Archives and Records Administration, Access Programs (N1–64–02–3, 3 items, 3 temporary items). Electronic systems containing researcher application information and data recording the movement of researchers within the agency's research complex in College Park, Maryland.

13. National Credit Union Administration, Agency-wide (N1–413–02–1, 10 items, 8 temporary items). Subject files, chronological files, and regional files, accumulated by offices other than the Office of the Board, and individual working files. Also included are electronic copies of documents created using electronic mail and word processing. Recordkeeping copies of agency directives and operating manual case files created in central and regional offices are proposed for permanent retention.

14. Nuclear Regulatory Commission, Office of the Secretary of the Commission (N1–431–01–2, 51 items, 39 temporary items). Electronic records in the Commission's Agencywide

Document Access and Management System (ADAMS) accumulated by the Office of the Secretary of the Commission, including electronic copies of records created using office automation tools and of records used to create ADAMS portable document format files. Records proposed for disposal include electronic recordkeeping copies of records related to committees and conferences for which the agency is not the sponsor, routine correspondence files, and rulemaking docket files. Paper copies of these records were previously approved for disposal. Series proposed for permanent retention include recordkeeping copies of such files as decisional dockets, records relating to committees and conferences sponsored by the agency, program correspondence at the Commission level, rulemaking records, and transcripts of Commission meetings.

15. Office of Personnel Management, Office of the Chief Information Officer (N1–478–02–1, 8 items, 8 temporary items). Year 2000 (Y2K) project records, including such records as plans, test documentation, correspondence, reports, and electronic copies of records created using electronic mail and word processing.

Dated: December 4, 2001.

SECURITIES AND EXCHANGE COMMISSION

Issuer Delisting; Notice of Application to Withdraw From Listing and Registration on the American Stock Exchange LLC (Quicksilver Resources Inc., Common Stock, $.001 par value) File No. 1–14837

December 4, 2001.

Quicksilver Resources Inc., a Delaware Corporation ("Issuer"), has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 12d2–2(d) thereunder,[2] to withdraw its Common Stock, $.001 par value ("Security"), from listing and registration on the American Stock Exchange LLC ("Amex").

On September 28, 2001, the Board of Directors of the Issuer unanimously approved a resolution to withdraw the Issuer's Security from listing on the Amex and to list the Security on the New York Stock Exchange, Inc. ("NYSE"). In making the decision to withdraw the Security from listing on the Exchange, the Issuer considered the direct and indirect costs and the division of the market resulting from dual listing. The Issuer states that trading in the Security ceased on the Amex on October 22, 2001 and began on the NYSE the same day.

The Issuer stated in its application that it has met the requirements of Amex Rule 18 by complying with all applicable laws in effect in the State of Delaware, in which it is incorporated and with the Amex's rules governing an issuer's voluntary withdrawal of a security from listing and registration. The Issuer's application relates solely to the Security's withdrawal from listing on the Amex and shall have no effect upon its listing on the NYSE or its registration under section 12(b) of the Act.[3]

Any interested person may, on or before December 27, 2001, submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609, facts bearing upon whether the application has been made in accordance with the rules of the Amex and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[4]

Jonathan G. Katz,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC–25308; File No. 812–12556]

First Variable Life Insurance Company, et al.

December 4, 2001.

AGENCY: Securities and Exchange Commission ("SEC or "Commission").

Summary of Application: Applicants seek an order pursuant to Section 26(c) of the Investment Company Act of 1940 ("1940 Act"), approving the substitution of shares of certain Portfolios of Variable Investors Series Trust ("VIST") for shares of certain portfolios of other variable insurance products funds as follows: (1) Shares of the Pilgrim Baxter Insurance Series Fund, Inc.—PBHG Small Cap Growth Portfolio for shares of the VIST Small Cap Growth Portfolio; (2) shares of the American Century VP International Growth Fund for shares of the VIST World Equity Portfolio; (3) shares of the American Century VP Ultra Fund for shares of the VIST Growth Portfolio; (4) shares of the American Century VP Income and Growth Fund for shares of the VIST Matrix Equity Portfolio; (5) shares of the Fidelity Variable Insurance Products Fund—Growth & Income Portfolio for shares of the VIST Growth & Income Portfolio; (6) shares of the Fidelity Variable Insurance Products Fund—Growth & Income Portfolio for shares of the VIST Multiple Strategies Portfolio; (7) shares of the Federated High Income Bond Fund II for shares of the VIST High Income Bond Portfolio; and (8) shares of the Federated U.S. Government Securities Fund II for shares of the VIST U.S. Government Bond Portfolio. Applicants also seek an order, pursuant to Section 17(b) of the 1940 Act, granting exemptions from Section 17(a) to permit Applicants to carry out the above-referenced substitution by means of in-kind redemption and purchase.

Applicants: First Variable Life Insurance Company ("First Variable"),

[4] 17 CFR 200.30–3(a)(1).

First Variable Annuity Fund E ("Account E"), First Variable Annuity Fund A ("Account A") and Separate Account VL ("Account VL") of First Variable Life Insurance Company. First Variable is referred to herein as the "Insurance Company Applicant." Account E, Account A and Account VL are referred to herein as the "Separate Account Applicants."

Filing Date: The application ("Application") was filed on June 21, 2001 and amendments thereto were filed on October 11, 2001 and December 3, 2001.

Hearing or Notification of Hearing: An order granting the Application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Secretary of the Commission and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on December 27, 2001, and should be accompanied by proof of service on Applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the requester's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Secretary of the Commission.

ADDRESSES: For the Commission: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. For Applicants: c/o Raymond A. O'Hara III, Esquire, Blazzard, Grodd & Hasenauer, PC, P.O. Box 5108, Westport, Connecticut 06881. Copies to: Steve M. Callaway, Esquire, Senior Associate Counsel, Protective Life Corporation, Birmingham, Alabama 35202.

FOR FURTHER INFORMATION CONTACT: Alison Toledo, Senior Counsel, or Lorna MacLeod, Branch Chief, Division of Investment Management, Office of Insurance Products, at (202) 942–0670.

SUPPLEMENTARY INFORMATION: The following is a summary of the Application. The complete Application is available for a fee from the Public Reference Branch of the Commission, 450 Fifth Street, NW., Washington, DC 20549, (tel. (202) 942–8090).

Applicants' Representations

1. First Variable is a stock life insurance company that was organized under Arkansas law in 1968. It engages principally in the business of variable life insurance, variable annuities and fixed annuities. First Variable holds licenses to sell insurance in 49 states, the District of Columbia and the U.S. Virgin Islands. On October 1, 2001, Protective Life Insurance Company, a subsidiary of Protective Life Corporation of Birmingham, Alabama, acquired the stock of First Variable from ILona Financial Group, Inc., formerly known as Irish Life of North America, Inc., which had owned all of the outstanding stock of First Variable until that date.

2. Account E is a segregated asset account of First Variable. Account E was established by First Variable on December 4, 1979, under Arkansas insurance laws. Account E is used to fund certain Contracts issued by First Variable. Account E is divided into several subaccounts, each of which invests in and reflects the investment performance of a specific underlying registered investment company or portfolio thereof. Account E is registered as a unit investment trust under the 1940 Act.

3. Account A is a segregated asset account of First Variable. Account A was established by First Variable on July 1, 1968 under Arkansas insurance laws. Account A is used to fund certain Contracts issued by First Variable. Account A is divided into several subaccounts, each of which invests in and reflects the investment performance of a specific underlying registered investment company or portfolio thereof. Account A is registered as a unit investment trust under the 1940 Act.

4. Account VL is a segregated asset account of First Variable. Account VL was established by First Variable on March 6, 1987, under Arkansas insurance laws. Account VL is used to fund certain Contracts issued by First Variable. Account VL is divided into several subaccounts, each of which invests in and reflects the investment performance of a specific underlying registered investment company or portfolio thereof. Account VL is registered as a unit investment trust under the 1940 Act.

5. The segregated asset accounts support certain variable annuity contracts and variable life insurance policies (collectively, the "Contracts") issued by the Insurance Company Applicant. Under the Contracts, First Variable reserves the right to substitute one or more of the variable investment options with another variable investment option. These contractual provisions have been disclosed in the prospectus or the statements of additional information relating to the contracts.

6. The Trust was organized as a Massachusetts business trust on December 23, 1986. The Trust is comprised of eight separate series ("Portfolios" or "Replaced Portfolios"). The Trust is registered as an open-end management investment company under the 1940 Act and its shares are registered as securities under the Securities Act of 1933 ("1933 Act"). The shares of the Trust are sold exclusively to the Separate Account Applicants to fund benefits under the Contracts. First Variable Advisory Services Corporation ("FVAS") is the investment adviser for the Trust. FVAS is a wholly-owned subsidiary of First Variable, the ultimate parent of which is Protective Life Corporation. FVAS has engaged sub-advisers for each of the Portfolios of the Trust to make investment decisions and place orders.

7. Applicants request the Commission's approval to effect the substitutions of the shares of portfolios of other variable insurance products funds ("Substituting Portfolios") for the shares of the Replaced Portfolios (the "Substitution"). The Substituting Portfolios are series of open-end management investment companies registered under the 1940 Act, the shares of which are registered as securities under the 1933 Act. Applicants represent that the Substituting Portfolios, in general, have similar investment objectives to, and more assets, better performance and lower expense ratios than, the Replaced Portfolios. The Replaced Portfolios and the corresponding Substituting Portfolios are as follows:

Replaced portfolios	Substituting portfolios
High Income Bond Portfolio.	Federated High Income Bond Fund II.
World Equity Portfolio	American Century VP International Growth Fund.
Small Cap Growth Portfolio.	PBHG Small Cap Growth Portfolio.
Matrix Equity Portfolio	American Century VP Income and Growth Fund.
U.S. Government Bond Portfolio.	Federated U.S. Government Securities Fund II.
Growth Portfolio	American Century VP Ultra Fund.
Multiple Strategies Portfolio.	Fidelity VIP Growth & Income Portfolio.
Growth & Income Portfolio.	Fidelity VIP Growth & Income Portfolio.

8. The investment objectives of the Replaced Portfolios and Substituted Portfolios are as follows:

(a) The stated objective for the High Income Bond Portfolio and the Federated Income Bond Fund II is to seek a high level of current income while secondarily seeking capital appreciation by investing primarily in fixed-income securities, including corporate bonds and notes, discount

bonds, zero-coupon bonds, convertible securities and preferred stocks and bonds issued with warrants, which are rated Baa or below by Moody's or BBB or below by Standard & Poor's or in unrated securities determined to be of comparable quality. The same individual, Mark E. Durbiano, manages both of these Portfolios.

(b) The World Equity Portfolio's stated objective is to seek maximum long-term total return by investing primarily in common stocks, and securities convertible into common stocks, traded in securities markets located around the world, including the United States. This objective is to be obtained via international blue chips and domestic U.S. small cap stocks. The American Century VP International Growth Portfolio's stated objective is to seek capital growth by investing primarily in large cap equities in developed countries around the world. The Portfolio also invests in preferred stock and convertible debt and it can invest in the United States.

Morningstar Inc. ("Morningstar"), a provider of mutual fund, stock and variable insurance investment information, assigns both of these Portfolios to a Large-Growth investment style box focusing on international equities.

(c) The objective of the Small Cap Growth Portfolio and the PBHG Small Cap Growth Portfolio is to seek capital appreciation by investing primarily in common stocks of emerging companies with the potential for significant capital appreciation and strong earnings growth with attendant risk. The Portfolios normally invest at least 65% of assets in common stocks and convertible securities issued by companies with market capitalization or annual revenues not exceeding $1 billion at the time of purchase. Both Portfolios are managed by the same entity—Pilgrim Baxter & Associates, Ltd.

(d) The Matrix Equity Portfolio's investment objective is to seek capital appreciation and current income by investing in a diversified portfolio of equity securities. The American Century VP Income and Growth Portfolio's investment objective is to seek capital growth by investing in common stocks, with income as a secondary objective.

Over the last ten years, both Portfolios have had substantially similar investment styles and Morningstar has categorized each fund as either being Large/Value or Large/Blend during that time period.

(e) The U.S. Government Bond Portfolio's investment objective is to seek current income and preservation of capital. Under normal circumstances, at least 80% of the Portfolios assets will be invested in U.S. Government Securities; the remainder may be invested in investment grade corporate securities and in cash and money market instruments. The Federated U.S. Government Securities Fund II's investment objective is to provide current income by investing at least 65% of its assets in U.S. government securities, including mortgage backed securities issued by U.S. government agencies. In addition, the Fund may invest up to 35% of its assets in investment grade non-government mortgage-backed securities.

Morningstar classifies both portfolios as Intermediate Government Bond Funds.

(f) The Growth Portfolio's investment objective is to seek capital growth; it also seeks current income when consistent with its primary objective. It pursues its objective by investing primarily in common stocks and securities convertible into common stock. Securities are selected on the basis of their issuers long-term potential for expanding their earnings, profitability, and size and on the basis of potential increases in market recognition of their securities. The American Century VP Ultra Fund's investment objective is to seek long-term capital growth. The Portfolio pursues this objective by investing in large company stocks that the manager believes will increase in value over time, using a growth investment strategy. The strategy looks for companies with earnings and revenues that are not only growing, but also growing at a successfully faster or accelerating pace.

Both portfolios are classified by Morningstar as large cap growth funds.

(g) The Multiple Strategies Portfolio's investment objective is to seek as high a level of total return as the manager considers consistent with prudent investment risk. The Portfolio invests in equity securities, fixed income securities and money market instruments. Equity securities are selected on the basis of their issuers long-term potential for expanding their earnings, profitability, and size and on the basis of potential increases in market recognition of their securities. The Fidelity VIP Growth & Income Portfolio's investment objective is to seek high total return through a combination of current income and capital appreciation. The Portfolio invests a majority of its assets in common stocks with a focus on those that pay current dividends and show potential for capital appreciation. The Portfolio also invests in bonds, including lower-quality debt securities, as well as stocks that are not currently paying dividends, but offer prospects for future income or capital appreciation.

(h) The Growth & Income Portfolio's investment objective is to seek growth of capital and income. The Portfolio pursues this objective by investing primarily in dividend-paying common stocks, as well as fixed income securities. The Fidelity VIP Growth & Income Portfolio's investment objective is to seek high total return through a combination of current income and capital appreciation. The Portfolio invests a majority of its assets in common stocks with a focus on those that pay current dividends and show potential for capital appreciation. The Portfolio also invests in bonds, including lower-quality debt securities, as well as stocks that are not currently paying dividends, but offer prospects for future income or capital appreciation.

Both of the Portfolios have been characterized by Morningstar as Large/Value and Large/Blend over the last 10 years.

9. For the shares of each Replaced Portfolio held on behalf of their respective Separate Accounts at the close of business on the date selected for the Substitution, First Variable will redeem those shares for cash or in-kind. Simultaneously, First Variable, on behalf of each of its Separate Account Applicants, will place a purchase order for shares of each Substituting Portfolio so that each purchase will be for the exact amount of the redemption proceeds, which may be partly or wholly in-kind. Accordingly, at all times monies attributable to Owners then invested in the Replaced Portfolio will remain fully invested and will result in no change in the amount of any Owner's contract value, death benefit or investment in the applicable Separate Account Applicant.

10. In connection with the redemption of all shares of each Replaced Portfolio, it is anticipated that the Replaced Portfolio will incur brokerage fees and expenses in connection with such redemption. To alleviate the potential impact, the redemptions for certain Replaced Portfolios will be effected partly for cash and partly for portfolio securities redeemed in-kind. In addition, Applicants will use the in-kind and cash redemption proceeds to purchase shares of the Substituting Portfolio. In effecting the in-kind redemptions and transfers, the Trust has informed the Applicants that it will comply with the requirements of Rule 17a–7 under the 1940 Act and the procedures established

thereunder by the Board of Trustees of the Trust.

11. As noted above, the portfolio securities received from the in-kind redemptions will be used together with the cash proceeds to purchase the shares of the Substituting Portfolios. The Applicants have determined that partially effecting the redemption of shares of the Replaced Portfolios in-kind is appropriate, based on the similarity of certain types of portfolio securities that may be held by the Replaced Portfolio and its corresponding Substituting Portfolio. The Trust has advised the Applicants that the valuation of any in-kind redemptions will be made on a basis consistent with the normal valuation procedures of the Replaced Portfolio and that of the Substituting Portfolio.

12. The full net asset value of the redeemed shares held by the Separate Account Applicants will be reflected in the Owners' contract values following the Substitution. The Applicants represent that the Owners will not bear, directly or indirectly any expenses, including brokerage expenses, for the Substitution so that the full net asset value of redeemed shares of the Replaced Portfolio held by the Separate Account Applicants will be reflected in the Owners' contract values following the Substitution.

13. The Trust is fully advised of the terms of the Substitution. Applicants anticipate that until the Substitution occurs, the Trust will conduct the trading of portfolio securities in accordance with the investment objectives and strategies stated in the Trust's prospectus and in a manner that provides for the anticipated redemptions of shares held by the Separate Account Applicants.

14. Applicants have determined that the Contracts allow the Substitution as described in the application, and that the transactions can be consummated as described therein under applicable insurance laws and under the Contracts. In addition, prior to effecting the Substitution, Applicants will have complied with any regulatory requirements they believe are necessary to complete the transactions in each jurisdiction where the Contracts are qualified for sale.

15. Affected Owners will not incur any fees or charges, directly or indirectly, as a result of the Substitution, nor will the rights or obligations of First Variable under the Contracts be altered in any way. The proposed Substitution will not have any adverse tax consequences to Owners. The proposed Substitution will not cause Contract fees and charges currently being paid by existing Owners to be greater after the proposed Substitution than before the proposed Substitution. The proposed Substitution will not be treated as a transfer for the purpose of assessing transfer charges. Moreover, First Variable will allow the Owners, with respect to shares substituted, to transfer the Contract values held in the subaccount invested in the Substituting Portfolio for a period of thirty-one days without collecting transfer fees or imposing any additional restrictions on transfers. Moreover, such a transfer will not be counted as a transfer request under any contractual provisions of the Contracts that limit the number of transfers that may be made without charge.

16. In anticipation of the filing of this Application, the respective Applicants have supplemented the prospectuses for the Contracts to reflect the proposed Substitution. Within five days after the Substitution, First Variable will send to Owners written notice of the Substitution (the "Notice"), identifying the shares of the Replaced Portfolios that have been eliminated and the shares of the Substituting Portfolios that have been substituted. First Variable will include in such mailing the applicable prospectus supplement for the Contracts of the Separate Account Applicants describing the Substitution. For those Contracts that already include as a variable investment option the Substituting Portfolio, First Variable does not intend to mail a copy of the prospectus for the Substituting Portfolio to the Owners, because they already will have received a copy of a prospectus that includes the Substituting Portfolio in the ordinary course. For those Contracts that do not include as a variable investment option the Substituting Portfolio, First Variable will have amended the applicable registration statement and will provide a copy of the prospectus supplement for the Contract and the prospectus for the Substituting Portfolio with the Notice. Owners will be advised in the Notice that for a period of thirty-one days from the mailing of the Notice, Owners may transfer all assets, as substituted, to any other available subaccount without limitation or charge (the "Free Transfer Period").

Applicants' Legal Analysis

1. Section 26(c) of the 1940 Act provides that "[i]t shall be unlawful for any depositor or trustee of a registered unit investment trust holding the security of a single issuer to substitute another security for such security unless the [SEC] shall have approved such substitution." Section 26(b) of the 1940 Act (now Section 26(c)) was enacted as part of the Investment Company Act Amendments of 1970. Prior to the enactment of these amendments, a depositor of a unit investment trust could substitute new securities for those held by the trust by notifying the trust's security holders of the substitution within five (5) days after the substitution. In 1966, Commission, concerned with the high sales charges then common to most unit investment trusts and the disadvantageous position in which such charges placed investors who did not want to remain invested in the substituted security, recommended that Section 26 be amended to require that a proposed substitution of the underlying investments of a trust receive prior Commission approval.

2. Applicants submit that the Substitution does not present the type of costly forced redemption or other harms that Section 26(c) was intended to guard against and is consistent with the protection of investors and the purposes fairly intended by the 1940 Act for the following reasons:

(a) The Substitution will continue to fulfill Owners' objectives and risk expectations, because the investment objectives of each Substituting Portfolio are substantially similar to those of each Replaced Portfolio.

(b) After receipt of the Notice informing an Owner of the Substitution, an Owner may request that his or her assets be reallocated to another subaccount at any time during the Free Transfer Period. The Free Transfer Period provides sufficient time for Owners to consider their reinvestment options;

(c) The Substitution will be at net asset value of the respective shares, without the imposition of any transfer or similar charge;

(d) Neither the Owners, the Replaced Portfolio nor the Substituting Portfolio will bear any costs of the Substitution, including brokerage fees, and accordingly, the Substitution will have no impact on the Owners' Contract values;

(e) The Substitution will in no way alter the contractual obligations of First Variable or the rights and privileges of Owners under the Contracts;

(f) The Substitution will in no way alter the tax benefits to Owners; and

(g) The Substitution is expected to confer certain economic benefits on Owners by virtue of enhanced asset size and lower expenses.

3. The Applicants have determined that each Substituting Portfolio is an appropriate replacement for each Replaced Portfolio and an appropriate investment vehicle for the Owners

because they share similar investment objectives. Accordingly, the Insurance Company Applicant has specifically determined that the Substituting Portfolios are appropriate investment vehicles for owners who have allocated values to the Replaced Portfolios and that the Substitution will be consistent with Owners' investment objectives.

4. As of December 31, 2000, each Substituting Portfolio had lower expense ratios than its corresponding Replaced Portfolio, and with the exception of American Century VP International Growth Fund, American Century VP Income and Growth Fund and American Century VP Ultra Fund, each Substituting Portfolio pays management fees that are equal to or less than the corresponding Replaced Portfolio. Applicants believe that the addition of assets resulting from the Substitution will likely result in lower expense ratios for the Owners that have allocated their Contract values to the Substituting Portfolios.

The expense structure of the American Century Fund is substantially different from that of the Trust. The Trust pays, in addition to a management fee, all of its own expenses, which may vary from year to year. In contrast, services provided by American Century under the American Century Management Agreement are offered under a unified fee arrangement. For the services it provides to the American Century Fund, American Century receives a unified management fee based on a percentage of the average net assets of the series of the Fund, including each of the American Century Substituting Portfolios. Out of that fee American Century pays all expenses of managing and operating the American Century Fund except brokerage expenses, taxes, interest, fees and expenses of the Fund's independent directors (including legal counsel fees), and extraordinary expenses. In each substution into the American Century Fund, the overall expense ratios of the Substituting Portfolios are lower and, in some cases, significantly so.

5. With respect to the First Variable separate accounts investing in the American Century Substituting Portfolios, Applicants represent that there will be no increase in the contract charges from their current levels for a period of at least two years from the date of the Commission order requested herein.

6. Applicants represent that First Variable does not currently receive (and will not receive for three years from the date of the Commission order requested herein) any direct or indirect benefit from the Substituting Portfolios (other than the American Century Substituting Portfolios), their advisers and/or their affiliates, that would exceed the amounts that First Variable or FVAS, the Trust's adviser, had received from the Replaced Portfolios, including without limitations, 12b-1, shareholder service, administrative or other service fees, revenue sharing or other arrangements, either with respect to specific reference to the Substituting Portfolios or as part of an overall business arrangement.

7. Applicants represent that the returns for most of the Substituting Portfolios have generally been higher than the returns of the corresponding Replaced Portfolios, and that while there is no guarantee that past performance will continue, the return data supports Applicants' view that the Substitution is not expected to give rise to diminution in performance or other adverse effects on Contract values.

8. Section 17(a)(1) of the 1940 Act prohibits any affiliated person of a registered investment company, or an affiliated person of an affiliated person, from selling any security or other property to such registered investment company. Section 17(a)(2) of the 1940 Act prohibits any of the persons described above from purchasing any security or other property from such registered investment company. The proposed Substitution will be effected in part through in-kind redemptions and purchases and may be deemed to entail the indirect purchase of shares of a related Substituting Portfolio with portfolio securities of the Replaced Portfolio and the indirect sale of securities of the Replaced Portfolio for shares of the Substituting Portfolio.

9. Section 17(b) of the 1940 Act provides that the Commission may grant an Order exempting transactions prohibited by Section 17(a) of the 1940 Act upon application if evidence establishes that:

(a) The terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve over-reaching on the part of any person concerned;

(b) The proposed transaction is consistent with the investment policy of each registered investment company concerned, as recited in its registration statement and reports filed under the 1940 Act; and

(c) The proposed transaction is consistent with the general purposes of the 1940 Act.

The Applicants represent that the terms of the proposed transactions, as described in this Application are: reasonable and fair, including the consideration to be paid and received; do not involve over-reaching; are consistent with the policies of the Replaced Portfolios of the Trust; and are consistent with the general purposes of the 1940 Act.

10. Applicants represent that for all the reasons stated above, with regard to Section 26(c) of the 1940 Act, the Substitution is reasonable and fair. It is expected that existing and future Owners will benefit from the consolidation of assets in the Substituting Portfolios. The transactions effecting the Substitution will be effected in conformity with Section 22(c) of the 1940 Act and Rule 22c–1 thereunder. Moreover, the partial in-kind redemptions of portfolios' securities of the Replaced Portfolios will be effected in conformity with Rule 17a–7 under the 1940 Act and the procedures of the Trust established pursuant to Rule 17a–7. The Owners' interests after the Substitution, in practical economic terms, will not differ in any measurable way from such interests immediately prior to the Substitution. In each case, the consideration to be received and paid is, therefore, reasonable and fair.

Conclusion

Applicants submit, for all of the reasons stated herein, that their requests meet the standards set out in Sections 6(c), 17(b) and 26(c) of the 1940 Act and that an Order should, therefore, be granted. Accordingly, Applicants request an Order pursuant to Sections 6(c), 17(b) and 26(c) of the 1940 Act approving the Substitution.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33–8039, 34–45124, FR–59]

Cautionary Advice Regarding the Use of "Pro Forma" Financial Information in Earnings Releases

AGENCY: Securities and Exchange Commission.

SUMMARY: The Securities and Exchange Commission is issuing a statement regarding the use by public companies of "pro forma" financial information in earnings releases.

FOR FURTHER INFORMATION CONTACT: John M. Morrissey, Deputy Chief Accountant,

at 202–942–4400, or Paula Dubberly, Chief Counsel of the Division of Corporation Finance, at 202–942–2900.

SUPPLEMENTARY INFORMATION: As we approach year end, we believe it is appropriate to sound a warning to public companies and other registrants who present to the public their earnings and results of operations on the basis of methodologies other than Generally Accepted Accounting Principles ("GAAP"). This presentation in an earnings release is often referred to as "pro forma" financial information. In this context, that term has no defined meaning and no uniform characteristics. We wish to caution public companies on their use of this "pro forma" financial information and to alert investors to the potential dangers of such information.

"Pro forma" financial information can serve useful purposes. Public companies may quite appropriately wish to focus investors' attention on critical components of quarterly or annual financial results in order to provide a meaningful comparison to results for the same period of prior years or to emphasize the results of core operations. To a large extent, this has been the intended function of disclosures in a company's Management's Discussion and Analysis section of its reports. There is no prohibition preventing public companies from publishing interpretations of their results, or publishing summaries of GAAP financial statements.

Moreover, as part of our commitment to improve the quality, timeliness, and accessibility of publicly available financial information, we believe that—with appropriate disclosures about their limitations—accurate interpretations of results and summaries of GAAP financial statements taken as a whole can be quite useful to investors.

Nonetheless, we are concerned that "pro forma" financial information, under certain circumstances, can mislead investors if it obscures GAAP results. Because this "pro forma" financial information by its very nature departs from traditional accounting conventions, its use can make it hard for investors to compare an issuer's financial information with other reporting periods and with other companies.

For these reasons, we believe it is appropriate to alert public companies and their advisors of the following propositions:

First, the antifraud provisions of the federal securities laws apply to a company issuing "pro forma" financial information. Because "pro forma" information is information derived by selective editing of financial information compiled in accordance with GAAP, companies should be particularly mindful of their obligation not to mislead investors when using this information.

Second, a presentation of financial results that is addressed to a limited feature of a company's overall financial results (for example, earnings before interest, taxes, depreciation, and amortization), or that sets forth calculations of financial results on a basis other than GAAP, raises particular concerns. Such a statement misleads investors when the company does not clearly disclose the basis of its presentation. Investors cannot understand, much less compare, this "pro forma" financial information without any indication of the principles that underlie its presentation. To inform investors fully, companies need to describe accurately the controlling principles. For example, when a company purports to announce earnings before "unusual or nonrecurring transactions," it should describe the particular transactions and the kind of transactions that are omitted and apply the methodology described when presenting purportedly comparable information about other periods.

Third, companies must pay attention to the materiality of the information that is omitted from a "pro forma" presentation. Statements about a company's financial results that are literally true nonetheless may be misleading if they omit material information. For example, investors are likely to be deceived if a company uses a "pro forma" presentation to recast a loss as if it were a profit, or to obscure a material result of GAAP financial statements, without clear and comprehensible explanations of the nature and size of the omissions.

Fourth, we commend the earnings press release guidelines jointly developed by the Financial Executives International and the National Investors Relations Institute and we encourage public companies to consider and follow those recommendations before determining whether to issue "pro forma" results, and before deciding how to structure a proposed "pro forma" statement. A presentation of financial results that is addressed to a limited feature of financial results or that sets forth calculations of financial results on a basis other than GAAP generally will not be deemed to be misleading merely due to its deviation from GAAP if the company in the same public statement discloses in plain English how it has deviated from GAAP and the amounts of each of those deviations.

Fifth, as always, and especially in light of the disclosure that we expect to see accompanying these presentations, we encourage investors to compare any summary or "pro forma" financial presentation with the results reported on GAAP-based financials by the same company. Read before you invest; understand before you commit.

Companies with questions about the use of "pro forma" financial presentations in earnings releases are encouraged to call John M. Morrissey, Deputy Chief Accountant, at 202–942–4400, or Paula Dubberly, Chief Counsel of the Division of Corporation Finance, at 202–942–2900. Investors are encouraged to read our investor alert on "pro forma" financial statements (available at *http://www.sec.gov/investor.shtml*).

By the Commission.

Dated: December 4, 2001.

Jonathan G. Katz,

Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster #3378]

State of Texas; Disaster Loan Areas

Medina County and the contiguous counties of Atascosa, Bandera, Bexar, Frio, Uvalde and Zavala in the State of Texas constitute a disaster area as a result of severe storms and tornadoes that occurred on October 12, 2001. Applications for loans for physical damage as a result of this disaster may be filed until the close of business on February 1, 2002 and for economic injury may be filed until the close of business on September 3, 2002 at the address listed below or other locally announced locations: U.S. Small Business Administration, Disaster Area 3 Office, 4400 Amon Carter Blvd., Suite 102, Ft. Worth, TX 76155.

The interest rates are:

	(Percent)
For Physical Damage:	
Homeowners with Credit Available Elsewhere	6.500
Homeowners without Credit Available Elsewhere	3.250
Businesses with Credit Available Elsewhere	8.000
Businesses and Non-Profit Organizations without Credit Available Elsewhere	4.000

	(Percent)
Others (Including Non-Profit Organizations) with Credit Available Elsewhere	6.375
For Economic Injury:	
Businesses and Small Agricultural Cooperatives without Credit Available Elsewhere	4.000

The number assigned to this disaster for physical damage is 337811 and for economic injury is 9N6700.

BILLING CODE 8025–01–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Determinations Under the African Growth and Opportunity Act

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: The United States Trade Representative has determined that Namibia has adopted an effective visa system and related procedures to prevent unlawful transshipment and the use of counterfeit documents in connection with shipments of textile and apparel articles and has implemented and follows, or is making substantial progress toward implementing and following, the customs procedures required by the African Growth and Opportunity Act. Therefore, imports of eligible products from Namibia qualify for the textile and apparel benefits provided under the AGOA.

EFFECTIVE DATE: December 3, 2001.

FOR FURTHER INFORMATION CONTACT: Chris Moore, Director for African Affairs, Office of United States Trade Representative, (202) 395–9514.

SUPPLEMENTARY INFORMATION: The African Growth and Opportunity Act (Title I of the Trade and Development Act of 2000, Public Law 106–200) (AGOA) provides preferential tariff treatment for imports of certain textile and apparel products of beneficiary sub-Saharan African countries. The textile and apparel trade benefits under the AGOA are available to imports of eligible products from countries that the President designates as "beneficiary sub-Saharan African countries," provided that these countries (1) have adopted an effective visa system and related procedures to prevent unlawful transshipment and the use of counterfeit documents, and (2) have implemented and follow, or are making substantial progress toward implementing and following, certain customs procedures that assist the Customs Service in verifying the origin of the products.

In Proclamation 7350 (Oct. 2, 2000), the President designated Namibia as a "beneficiary sub-Saharan African country." Proclamation 7350 delegated to the Office of United States Trade Representative (USTR) the authority to determine whether designated countries have met the two requirements described above. The President directed the USTR to announce any such determinations in the **Federal Register** and to implement them through modifications of the Harmonized Tariff Schedule of the United States (HTS). Based on actions that Namibia has taken, I have determined that Namibia has satisfied these two requirements.

Accordingly, pursuant to the authority vested in the USTR by Proclamation 7350, U.S. note 7(a) to subchapter II of chapter 98 of the HTS and U.S. note 1 to subchapter XIX of chapter 98 of the HTS are each modified by inserting "Namibia" in alphabetical sequence in the list of countries. The foregoing modifications to the HTS are effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after the effective date of this notice. Importers claiming preferential tariff treatment under the AGOA for entries of textile and apparel articles should ensure that those entries meet the applicable visa requirements. *See Visa Requirements Under the African Growth and Opportunity Act*, 66 FR 7837 (2001).

Robert B. Zoellick,

United States Trade Representative.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Aviation Proceedings, Agreements Filed During the Week Ending November 23, 2001

The following Agreements were filed with the Department of Transportation under provisions of 49 U.S.C. Sections 412 and 414. Answers may be filed within 21 days after the filing of the applications.

Docket Number: OST–2001–11027.
Date Filed: November 19, 2001.
Parties: Members of the International Air Transport Association.
Subject:
Telex Mail Vote A105 dated October 2, 2001
Resolution 832 (to defer implementation of the weekly remittance procedures in Malaysia until 1 April 2002)
Telex dated November 6, 2001—Declaration of Approval
Intended effective date: 23 October 2001.

Docket Number: OST–2001–11035.
Date Filed: November 20, 2001.
Parties: Members of the International Air Transport Association.
Subject:
PTC23 AFR–TC3 0136 dated 29 October 2001
Mail Vote 0177—TC23/TC123 Africa-Japan/Korea
Expedited Resolution 010k
PTC23 AFR–TC3 0147 dated 23 November 2001 (Affirmative)
PTC23 AFR–TC3 0137 dated 29 October 2001
Mail Vote 0178—TC23/TC123 Africa-South East Asia Expedited
Resolution 010L
PTC23 AFR–TC3 00148 dated 23 November 2001 (Affirmative)
Intended effective date: 1 December 2001.

Docket Number: OST–2001–11044.
Date Filed: November 23, 2001.
Parties: Members of the International Air Transport Association.
Subject:
PTC COMP 0879 dated 23 November 2001
Mail Vote 182—Resolution 010n
TC2/12/23/123 Special Passenger Amending Resolution from Latvia
Intended effective date: 1 February 2002.

Docket Number: OST–2001–11045.
Date Filed: November 23, 2001.
Parties: Members of the International Air Transport Association.
Subject:

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Advisory Circular 33.17–1, Fire Prevention

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability of proposed advisory circular.

SUMMARY: This notice announces the availability of proposed Advisory Circular (AC) 33.17–1, titled "Fire Prevention".

DATES: Comments must be received on or before February 8, 2002.

ADDRESSES: Send all comments on the proposed AC to the Federal Aviation Administration, Attn: Marc Bouthillier, Engine and Propeller Standards Staff, ANE–110, Engine and Propeller Directorate, Aircraft Certification Service, 12 New England Executive Park, Burlington, MA 01803–5299.

FOR FURTHER INFORMATION CONTACT: Marc Bouthillier, Engine and Propeller Standards Staff, ANE–110, at the above address, telephone (781) 238–7120, fax (781) 238–7199. If you have access to the Internet, you may also obtain further information by writing to the following address: *"marc.bouthillier@faa.gov"*.

SUPPLEMENTARY INFORMATION:

Comments Invited

A copy of the proposed AC may be obtained by contacting the person named under **FOR FURTHER INFORMATION CONTACT**, or Internet users may obtain a copy at the following address: *"http://www.airweb.faa.gov/rgl"*. Interested persons are invited to comment on the proposed AC, and to submit such written data, views, or arguments as they desire. Commenters must identify the subject of the AC, and submit comments to the address specified above. All communications received on or before the closing date for comments will be considered by the Engine and Propeller Directorate, Aircraft Certification Service, before issuance of the final AC.

Background

This draft advisory circular (AC) would provide guidance and acceptable methods, but no the only methods that may be used to demonstrate compliance with the fire prevention requirements under Title 14 Code of Federal Regulations (14 CFR), part 33. Section 33.17 is the primary section addressed in this proposed AC, although other sections of part 33 that address fire prevention may also be applicable. Other related parts and sections are listed in AC 20–135, Powerplant Installation and Propulsion System Component Fire Protection Methods, Standards and Criteria, Appendix 1. This proposed AC is intended to provide guidance relating to these requirements, and is considered a supplement to AC 20–135.

This advisory circular would be published under the authority granted to the Administrator by 49 U.S.C. 106(g), 40113, 44701–44702, 44704, and would provide guidance for the requirements in 14 CFR part 33.

Issued in Burlington, Massachusetts on November 30, 2001.

Fran Favara,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Public Notice For Waiver of Aeronautical Land-Use Assurance; Toledo Express Airport; Toledo, OH

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of intent of waiver with respect to land.

SUMMARY: The Federal Aviation Administration (FAA) is considering a proposal to change a portion of airport land from aeronautical use to non-aeronautical use and to authorize the sale of the airport property. The proposal consists of sixty-seven parcels of land totaling approximately 122.5 acres for industrial land use. Current use and present condition is vacant grassland. There are no impacts to the airport by allowing the airport to dispose of this property. The land was acquired under FAA Project No(s). AIP–3–39–0077–1190, AIP–3–39–0077–1692, AIP–3–39–0077–1993, AIP–3–39–0077–2293, AIP–3–39–0077–2594, and AIP–3–39–0077–2794. Approval does not constitute a commitment by the FAA to financially assist in the sale of the subject airport property nor a determination that all measures covered by the program are eligible for Airport Improvement Program funding from the FAA. The disposition of proceeds from the sale of the airport property will be in accordance with the FAA's Policy and Procedures Concerning the Use of Airport Revenue, published in the **Federal Register** on February 16, 1999. This proposal is for approximately 122.5 acres in total.

In accordance with section 47107(h) of title 49, United States Code, this notice is required to be published in the **Federal Register** 30 days before modifying the land-use assurance that requires the property to be used for an aeronautical purpose. The proposed land will be used for commercial/industrial development, which will provide additional jobs in an economically challenged area and enhance the aesthetics of the surrounding community.

The proceeds from the sale of the land will be reinvested in an approved noise compatibility project as prescribed by the Secretary of Transportation, or be paid to the Secretary of Transportation for deposit in the Trust Fund.

DATES: Comments must be received on or before January 9, 2002.

FOR FURTHER INFORMATION CONTACT: Mr. Lawrence C. King, Federal Aviation Administration, Great Lakes Region, Detroit Airports District Office, DET ADO–670.2, Willow Run Airport, East, 8820 Beck Road, Belleville, Michigan 48111, (734) 487–7293. Documents reflecting this FAA action may be reviewed at this same location or at Toledo Express Airport, Toledo, Ohio.

SUPPLEMENTARY INFORMATION: Following is a legal description of the property located in Lucas County, Ohio, and described as follows:

East 1

A parcel of land being part of Lots 3 and 4 in Ellwood Farms and Lots 13 and 14 in Hamlin's Subdivision, all in the Northeast quarter of Section 12, Town 7 North, Range 9 East, Monclova Township, Lucas County, Ohio, and being more particularly described as follows:

Commencing at the point of intersection of the South line of the Northeast quarter of said Section 12 with the Northeasterly line of the Ohio Turnpike, said point being the TRUE POINT OF BEGINNING of the parcel here in described;

thence on the Northeasterly line of the Ohio Turnpike, the following five calls: Northwesterly, on a curve to the right, a distance of 692.28 feet to a point, said curve having a radius of 22778.31 feet, a central angle of 01°44′29″, a chord bearing of North 70°43′05″ West, and a chord distance of 692.25 feet; South 00°36′17″ West, a distance of 21.22 feet to a point; Northwesterly, on a curve to the right, a distance of 209.03 feet to a point, said curve having a radius of 22798.31 feet, a central angle of 00°31′31″, a chord bearing of North 69°36′09″ West, and a chord distance of 209.03 feet; South 20°39′36″ West, a distance of 10.00 feet to a point; Northwesterly, on a curve to the right, a distance of 383.19 feet to the intersection with the West line of Lot 13 in Hamlin's Subdivision, said curve having a radius of 22808.31 feet, a central angle of 00°57′45″, a chord bearing of North 68°51′31″ West, and a chord distance of 383.19 feet;

thence North 00°45′49″ East, on the West line of said Lot 13, a distance of 473.70 feet to a point;

thence North 45°32′23″ East, a distance of 330.31 feet to the intersection with the Southwesterly right-of-way line of Garden Road, said point being 30.00 feet Southwesterly from as measured at right angles to the centerline of Garden Road;

thence South 44°27′37″ East, on the Southwesterly right-of-way line of Garden Road, said line being 30.00 feet Southwesterly from and parallel to the centerline of Garden Road, a distance of 1316.48 feet to a point;

thence South 45°32′23″ West, continuing on the right-of-way line of Garden Road, a distance of 50.00 feet to a point;

thence Southeasterly, on a curve to the left, a distance of 197.75 feet to the intersection with the South line of the Northeast quarter of Section 2, said curve having a radius of 652.94 feet, a central angle of 17°21′10″, a chord bearing of South 53°08′12″ East, and a chord distance of 197.00 feet to a point;

thence South 89°44′04″ West, on the said South line of the Northeast quarter, a distance of 54.18 feet to the TRUE POINT OF BEGINNING of the parcel herein described, said parcel containing 12.6 acres of land, more or less, subject to all easements; zoning restrictions of record and legal highways

The bearings used herein are for the purpose of describing angles only and are not referenced to true or magnetic North. This legal does not represent a boundary survey and is based on tax descriptions of the subject parcels.

East 2

A parcel of land being part of Lots 2, 3, 4 and 6 in Ellwood Farms in the Northeast quarter of Section 2, Town 7 North, Range 9 East, Monclova Township, Lucas County, Ohio, and being more particularly described as follows:

Commencing at the Southeast corner of the Northeast quarter of said Section 2, also being the intersection of the centerline of Eber Road (right-of-way varies), and the centerline of Garden Road (right-of-way varies);

thence North 00°27′34″ East line of the Northeast quarter, and the centerline of Eber Road, a distance of 330.06 feet to a point;

thence South 89°32′19″ West, a distance of 60.00 feet to a point on the south line of Lot 2 in Ellwood Farms, said point being on the West right-of-way line of Eber Road and being the TRUE POINT OF BEGINNING of the parcel here in described ;

thence south 89°32′19″ West, on the south line of Lot 2, a distance of 609.54 feet to the intersection with the East line of Lot 3 in Ellwood Farms;

thence South 00°31′55″ West, on the East line of Lot 3, a distance of 145.74 feet to the intersection with the Northeasterly right-of-way line of Garden Road;

thence Northwesterly, on a curve to the right, a distance of 36.44 feet to a point, said curve having a radius of 522.94 feet, a chord bearing of North 46°27′45″ West, and a chord distance of 36.43 feet;

thence South 45°32′23″ West, continuing on the Northeasterly right-of-way line of Garden Road, a distance of 20.00 feet to a point that is 30.00 feet Northeasterly from as measured at right angles to the centerline of Garden Road;

thence North 44°27′37″ West, on a line 30.00 feet Northeasterly from and parallel to the centerline of Garden Road, a distance of 645.32 feet to the intersection with the North line of Lot 4 in Ellwood Farms;

thence North 89°32′02″ East, on the North line of said Lot 4 and Lot 3, a distance of 497.11 feet to the Northeast corner of Lot 3, also being the Southwest corner of Lot 6;

thence North 00°31′54″ East, on the West line of Lot 6, a distance of 165.01 feet to the intersection with the North line of the South one-half of Lot 6;

thence North 89°31′54″ East, on the said North line of the South one-half of Lot 6, a distance of 638.91 feet to the intersection with the West line of Eber Road, said point being 30.00 feet Westerly from as measured at right angles to the centerline of Eber Road;

thence on the West line of Eber Road, the following seven calls: South 00°27′34″ West, a distance of 292.75 feet to a point; North 89°32′26″ West, a distance of 10.00 feet to a point; South 00°27′34″ West, a distance of 75.00 feet to a point; North 89°32′26″ West, a distance of 10.00 feet to a point; South 00°27′34″ West, a distance of 100.00 feet to a point; North 89°32′26″ West, a distance of 10.00 feet to a point; South 00°27′34″ West, a distance of 27.82 feet to the TRUE POINT OF BEGINNING of the parcel herein described, said parcel containing 10.0 acres of land, more or less, subject to all easements, zoning restrictions of record and legal highways

The bearings used herein are for the purpose of describing angles only and are not referenced to true or magnetic North. This legal does not represent a boundary survey and is based on tax descriptions or the subject parcels.

East 3

A parcel of land being part of East one-half of the West one-half of the Northwest quarter of Section 1, Town 7 North, Range 9 East, Springfield Township, Lucas County, Ohio, and being more particularly described as follows:

Commencing at the Southwest corner of the Northwest quarter of Section 1, said point also being the intersection of the centerline of Eber Road with the centerline of Garden Road;

then South 89°25′45″ East, on the South line of the Northwest quarter of Section 1, also being the centerline of Garden road (60 foot right-of-way), a distance of 670.38 feet to the intersection with the West line of the East one-half of the West one-half of the Northwest quarter of Section 1, said point also being the TRUE POINT OF BEGINNING of the parcel herein described;

thence North 00°27′03″ East, on the said West line of the East one-half of the West one-half of the Northwest quarter of Section 1, a distance of 656.52 feet to the intersection with the North line of the South 10 acres of the East one-half of the West one-half of the Northwest quarter of Section 1;

thence South 89°25′45″ East, on the said North line of the South 10 acres of the East one-half of the West one-half of the Northwest quarter of Section 1, a distance of 490.29 feet to the intersection with the East line of the West 120.00 feet of the East 300.00 feet of the South 10 acres of the East one-half of the West one-half of the Northwest quarter of Section 1;

thence South 00°26′33″ West, on the said East line of the West 120.00 feet of the East 300.00 feet of the South 10 acres of the East one-half of the West one-half of the Northwest quarter of Section 1, a distance of 656.52 feet to the intersection with the South line of the Northwest quarter of Section 1, also being the centerline of Garden Road;

thence North 89°25′45″ West, on the south line of the Northwest quarter of Section 1 and the centerline of Garden Road, a distance of 490.38 feet to the TRUE POINT OF BEGINNING of the parcel herein described, said parcel containing 7.4 acres of land, more or less, subject to all easements, zoning restrictions of record and legal highways

The bearings used herein are for the purpose of describing angles only and are not referenced to true or magnetic North. This legal does not represent a boundary survey and is based on tax descriptions of the subject parcels.

East 4

A parcel of land being part of East one-half of the Northwest quarter of Section 1, Lots 145 through 160, Lot 176 and that portion of Leighton Drive vacated in Trotter Whelan Co. Plat 3 Subdivision, all in Town 7 North, Range 9 East, Springfield Township, Lucas County, Ohio, and being more particularly described as follows:

Commencing at the Southeast corner of Lot 145 in Trotter Whelan Co. Plat 3, also being the intersection of the North line of Garden Road and West line of Mescher road, said point being the TRUE POINT OF BEGINNING of the parcel herein described;

thence North 89°25′45″ West, on the South line of Lots 145 through 147 in said Trotter Whelan Co. Plat 3, also being the North right-of-way line of Garden Road, said line of the Northwest quarter of Section 1, a distance of 348.60 feet to the Southwest corner of said Lot 147;

thence South 00°25′32″ West, a distance of 40.00 feet to the intersection with the South line of the Northwest quarter of Section 1, also being the centerline of Garden Road;

thence North 89°25′45″ West, on the South line of the Northwest quarter of Section 1, also being the centerline of Garden Road (60 foot right-of-way), a distance of 486.97 feet to the intersection with the East line of the West 96.75 feet of the East one-half of the Northwest quarter of Section 1;

thence North 00°26′33″ East, on the said East line of the West 96.75 feet of the East one-half of the Northwest quarter of Section 1, a distance of 441.13 feet to the intersection with the centerline of a ditch;

thence South 79°30′54″ East, on the centerline of said ditch, a distance of 494.44 feet to the intersection with the West line of Lot 148 in Trotter Whelan Co. Plat 3;

thence North 00°25′32″ East, on the West line of Lots 148 through 160 and Lot 176, a distance of 1251.00 feet to the Northwest corner of Lot 160;

thence South 89°34′28″ East, on the North line of Lot 160, a distance of 348.60 feet to the Northeast corner of Lot 160, on the Westerly right-of-way line of Mescher Drive (80 foot right-of-way);

thence South 00°25′32″ West, on the East line of Lots 145 through 160, and the East line of that portion of Leighton Drive vacated, said line also being the Westerly right-of-way line of Mescher Drive, a distance of 1567.88 feet to the TRUE POINT OF BEGINNING of the parcel herein described, said parcel containing 17.0 acres of land, more or less, subject to all easements, zoning restrictions of record and legal highways

The bearings used herein are for the purpose of describing angles only and are not referenced to true or magnetic North. This legal does not represent a boundary survey and is based on tax descriptions of the subject parcels.

East 5

A parcel of land being Lots 119 through 144 in Trotter Whelan Co. Plat 3 Subdivision, in Town 7 North, Range 9 East, Springfield Township, Lucas County, Ohio, and being more particularly described as follows:

Commencing at the Southeast corner of Lot 142 in Trotter Whelan Co. Plat 3, being on the North right-of-way line of Garden Road, said point being the TRUE POINT OF BEGINNING of the parcel herein described;

thence North 89°25′45″ West, on the South line of Lots 142 through 144 in said Trotter Whelan Co. Plat 3, and on the North right-of-way line of Garden Road, said line being 40.00 feet Northerly of and parallel to the South line of the Northwest quarter of Section 1, a distance of 328.70 feet to the Southwest corner of said Lot 144, also being the intersection with the East line of Mescher Drive (80 foot right-of-way);

thence North 00°25′32″ East, on the East line of said Mescher Drive and as extended past Leighton Drive and Block Drive, also being the West line of Lots 119 through 144, a distance of 2617.72 feet to the Northwest corner of Lot 119;

thence South 89°40′48″ East, on the North line of Lot 119, a distance of 328.7 feet to the Northeast corner of Lot 119 at the intersection with the East line of the Northwest quarter of Section 1;

thence South 00°25′32″ West, on the said East line of Lots 119 through 144 and Lots 174 and 175 also being the East line of the Northwest quarter of Section 1, a distance of 2619,16 feet to the TRUE POINT OF BEGINNING of the parcel herein described, said parcel containing 19.7 acres of land, more or less, subject to all easements, zoning restrictions of record and legal highways, excepting that part of the previously described parcel lying within the right-of-way's of Leighton Drive and Block Drive

The bearings used herein are for the purpose of describing angles only and are not referenced to true or magnetic North. This legal does not represent a boundary survey and is based on tax descriptions of the subject parcels.

East 6

A parcel of land being part of the Southwest quarter of the Northeast quarter of Section 1, Town 7 North, Range 9 East, Springfield Township, Lucas County, Ohio, and being more particularly described as follows:

Commencing at the center of said Section 1, point also being on the centerline of Garden Road (60 foot right-of-way);

thence South 90°25′45″ East, on the south line of the Northeast quarter of Section 1, and on the centerline of Garden Road, a distance of 335.09 feet to the Intersection with the West line of the East one-half of West one-half of the Southwest quarter of the Northeast quarter of Section 1, said point being the TRUE POINT OF BEGINNING of the parcel herein described;

thence North 00°25′22″ East, on the said West line of the East one-half of the West one-half of the Southwest quarter of the Northeast quarter of Section 1, a distance of 665.12 feet to the intersection with the North line of the South one-half of the West one-half of the Southeast quarter of the Northeast quarter of Section 1;

thence South 89°29′09″ East, on the said North line of the South one-half of the West one-half of the Southeast quarter of the Northeast quarter of Section 1, a distance of 335.06 feet to the intersection with the East line of the West one-half of the Southwest quarter of the Northeast quarter of Section 1;

thence South 00°25′12″ West, on the said East line of the West one-half of the Southwest quarter of the Northeast quarter of Section 1, a distance of 665.45 feet to the intersection with the South line of the Northeast quarter of Section 1, also being the centerline of Garden Road;

thence North 89°25′45″ West, on the South line of the Northeast quarter of Section 1, and on the centerline of Garden Road, a distance of 335.09 feet to the TRUE POINT OF BEGINNING of the parcel herein described, said parcel containing 5.1 acres of land, more or less, subject to all easements, zoning restrictions of record and legal highways

The bearings used herein are for the purpose of describing angles only and are not referenced to true or magnetic North. This legal does not represent a boundary survey and is based on tax descriptions of the subject parcels.

East 7

A parcel of land being part of the Southwest quarter of the Northeast quarter of Section 1, Town 7 North, Range 9 East, Springfield Township, Lucas County, Ohio, and being more particularly described as follows:

Commencing at the Southeast corner of the Southwest quarter of the

Northeast quarter of Section 1, said point being on the centerline of Garden Road (60 foot right-of-way) and also being the TRUE POINT OF BEGINNING of the parcel herein described;

thence North 89°25′45″ West, on the South line of the Northeast quarter of Section 1 and on the centerline of Garden Road, a distance of 30.13 feet to a point;

thence North 00°32′19″ East, a distance of 732.50 feet to a point;

thence North 89°25′45″ West, a distance of 306.51 feet to a point;

thence South 00°25′03″ West, a distance of 732.50 feet to the intersection with the South line of the Northeast quarter of Section 1, also being the centerline of Garden Road;

thence North 89°25′45″ West, on the South line of the Northeast quarter of Section 1 and the centerline of Garden Road, a distance of 221.22 feet to a point;

thence North 00°25′12″ East, a distance of 1331.12 feet to the intersection with the North line of the Southwest quarter of the Northeast quarter of Section 1;

thence South 89°32′31″ East, on the said North line of the Southwest quarter of the Northeast quarter of Section 1, a distance of 556.18 feet to the intersection with the East line of the Southwest quarter of the Northeast quarter of Section 1;

thence South 00°24′53″ West, on the East line of the Southwest quarter of the Northeast quarter of Section 1, a distance of 1332.22 feet to the TRUE POINT OF BEGINNING of the parcel herein described, said parcel containing 11.8 acres of land, more or less, subject to all easements, zoning restrictions of record and legal highways

The bearings used herein are for the purpose of describing angles only and are not referenced to true or magnetic North. This legal does not represent a boundary survey and is base don tax descriptions of the subject parcels.

East 8

A parcel of land being part of Original Lot 1 in Fractional Section 6, Town 7 North, Range 10 East, Springfield Township, Lucas County, Ohio, and being more particularly described as follows:

Commencing at the Northeast corner of said Original Lot 1, point being on the centerline of Crissey Road (60 foot right-of-way), said point also being the TRUE POINT OF BEGINNING of the parcel herein described;

thence South 00°47′46″ West, on the East line of said Original Lot 1, and on the centerline of Crissey Road, a distance of 289.97 feet to a point;

thence North 89°51′04″ West, a distance of 1502.37 feet to the intersection with the West line of said Lot 1, also being the West line of Fractional Section 6;

thence North 00°24′14″ East, on the East line of Original Lot 1, a distance of 289.95 feet to the intersection with the North line of Original Lot 1, also being the North line of Fractional Section 6;

thence South 89°51′04″ East, on the North line of Original Lot 1, and the North line of Fractional Section 6, a distance of 1504.36 feet to the TRUE POINT OF BEGINNING of the parcel herein described, said parcel containing 10.0 acres of land, more or less, subject to all easements, zoning restrictions of record and legal highways

The hearings used herein are for the purpose of describing angles only and are not referenced to true or magnetic North. This legal does not represent a boundary survey and is based on tax descriptions of the subject parcels.

East 10

A parcel of land being part of the Southwest quarter of Section 1, Town 7 North, Range 9 East, Springfield Township, Lucas County, Ohio, and being more particularly described as follows:

Commencing at the Southwest corner of said Section 1, said point being the point of intersection of the centerline of Eber Road (60 foot right-of-way) and the centerline of Weckerly Road (60 foot right-of-way), and also being the TRUE POINT OF BEGINNING of the parcel herein described;

thence North 00°59′13″ East, on the West line of the Southwest quarter of Section 1 also being the centerline of Eber Road, a distance of 194.83 feet to the intersection with the North line of the South 6 acres of the West one-half of the Southwest quarter of Section 1;

thence North 89°39′14″ East, on the said North line of the South 6 acres of the West one-half of the Southwest quarter of Section 1, a distance of 1341.41 feet to the intersection with the East line of the West one-half of the Southwest quarter of Section 1;

thence South 00°58′47″ West, on the East line of the West one-half of the Southwest quarter of Section 1, a distance of 194.83 feet to the intersection with the South line of the Southwest quarter of Section 1, also being the centerline of Weckerly Road;

thence South 89°39′14″ West, on the South line of the Southwest quarter of Section 1, and the centerline of Weckerly Road, a distance of 1341.43 feet to the TRUE POINT OF BEGINNING of the parcel herein described, said parcel containing 6.0 acres of land, more or less, subject to all easements, zoning restrictions of record and legal highways

The bearings used herein are for the purpose of describing angles only and are not referenced to true or magnetic North. This legal does not represent a boundary survey and is based on tax descriptions of the subject parcels.

East 11

A parcel of land being part of the Northwest quarter of Section 12, Town 7 North, Range 9 East, Springfield Township, Lucas County, Ohio, and being more particularly described as follows:

Commencing at the Northwest corner of the Northwest quarter of Section 12, said point also being the intersection of the centerline of Eber Road (60 foot right-of-way), and also being the TRUE POINT OF BEGINNING of the parcel herein described;

thence North 89°39′14″ East, on the North line of the Northwest quarter of Section 12 and the centerline of Weckerly Road, a distance of 1154.40 feet to the intersection with a line that is 187.00 feet Westerly from and parallel to the East line of the Northwest quarter of the Northwest quarter of Section 12;

thence South 00°48′25″ West, on the said line that is 187.00 feet Westerly from and parallel to the East line of the Northwest quarter of the Northwest quarter of Section 12, a distance of 487.20 feet to the intersection with a line that is 487.20 feet Southerly from and parallel to the North line of the Northwest quarter of Section 12;

thence North 89°39′14″ East, on the said line being 487.20 feet Southerly from and parallel to the North line of the Northwest quarter of Section 12, a distance of 187.04 feet to the intersection with the East line of the Northwest quarter of the Northwest quarter of Section 12;

thence South 00°48′25″ West, on the said East line of the Northwest quarter of the Northwest quarter of Section 12, a distance of 324.97 feet to the intersection with the South line of the North 25 acres of the Northwest quarter of the Northwest quarter of Section 12;

thence South 89°39′14″ West, on the said South line of the North 25 acres of the Northwest quarter of the Northwest quarter of Section 12, a distance of 1339.07 feet to the intersection with the West line of the Northwest quarter of Section 12, also being the centerline of Eber Road;

thence North 00°38′24″ East, on the West line of the Northwest quarter of

Section 12 and the centerline of Eber Road, a distance of 812.12 feet to the TRUE POINT OF BEGINNING of the parcel herein described, said parcel containing 22.9 acres of land, more or less, subject to all easements, zoning restrictions of record and legal highways

The bearings used herein are for the purpose of describing angles only and are not referenced to true or magnetic North. This legal does not represent a boundary survey and is based on tax descriptions of the subject parcels.

Issued in Belleville, Michigan, October 5, 2001.

Irene R. Porter,

Federal Aviation Administration

Noise Exposure Map Notice and Receipt of Noise Compatibility Program and Request for Review

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure maps submitted by Seattle-Tacoma Internation Airport under the provisions of 49 U.S.C. 47503 (a) and 14 CFR part 150 are in compliance with applicable requirements. The FAA also announces that its is reviewing the proposed noise compatibility program that was submitted for Seattle-Tacoma International Airport under Part 150 in conjunction with the noise exposure maps, and that this program will be approved or disapproved on or before June 3, 2002.

EFFECTIVE DATE: The effective date of the FAA's determination on the Seattle-Tacoma International Airport noise exposure maps and the start of its review of the associated noise compatibility program is December 3, 2001. The public comment period ends January 31, 2002.

FOR FURTHER INFORMATION CONTACT: Dennis Ossenkop, FAA, Airports Division, ANM–611, 1601 Lind Avenue, SW., Renton, Washington, 98055–4056. Comments on the proposed noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: The notice announces that the FAA finds that the noise exposure maps for Seattle-Tacoma International Airport are in compliance with applicable requirements of Part 150, effective December 3, 2001. Further, FAA is reviewing a proposed noise compatibility program for that airport which will be approved or disapproved on or before June 3, 2002. This notice also announces the availability of this program for public review and comment.

Under 49 U.S.C. 47503(a), and airport operator may submit to the FAA a noise exposure map which meets applicable regulations and which depicts noncompatible land uses as of the date of submission of such map, a description of projected aircraft operations, and the ways in which such operations will affect such map. 49 U.S.C. 47503 (a)(1) requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies and persons using the airport.

An airport operator who has submitted a noise exposure map that has been found by FAA to be in compliance with the requirements of Federal Aviation Regulation (FAR) Part 150, promulgated pursuant to 49 U.S.C. 47503 (A) may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

The Manager of the Airfield Line of Business of Seattle-Tacoma International Airport submitted to the FAA noise exposure maps, descriptions and other documentation which were produced during an airport Noise Compatibility Study. It was requested that the FAA review the noise mitigation measures be approved as a noise compatibility program under 49 U.S.C. 47504.

The FAA has completed its review of the noise exposure maps and related descriptions submitted by Seattle-Tacoma Internation Airport. The specific maps under consideration are Figures C40 and F1 in the submission. The FAA has determined that these maps for Seattle-Tacoma International Airport are in compliance with applicable requirements. This determination is effective on December 3, 2001. FAA's determination on an airport operator's noise exposure maps is limited to the determination that the mans were developed in accordance with the procedures contained in Appendix A of FAR Part 150. Such determination does not constitute approval of the applicant's data, information or plans, or a commitment to a noise compatibility program or to fund implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on noise exposure maps submitted under 49 U.S.C. 47503, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of 49 U.S.C. 47507. These functions are inseparable from the ultimate land control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the maps depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public agencies and planning agencies with which consultation is required under 49 U.S.C. 47503(a)(1). The FAA has relied on the certification by the airport operator, under section 150.21 of the FAR part 150, that the statutorily required consultation has been accomplished.

The FAA has formally received the noise compatibility program for Seattle-Tacoma International Airport, also effective on December 3, 2001. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on or before June 3, 2002.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR part 150, paragraph 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments, other than those properly addressed to the local land use authorities, will be considered by the FAA to the extent practicable. Copies of

the noise exposure maps, the FAA's evaluation of the maps, and the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, 800 Independence Avenue, SW., Room 621, Washington, DC.

Federation Aviation Administration, Airports Division, Suite 315, 1601 Lind Avenue, SW., Renton, Washington.

Federal Aviation Administration, Seattle Airports District Office, 1601 Lind Ave. SW., Suite 250, Renton, Washington.

Seattle-Tacoma International Airport, Noise Abatement Office, Main Terminal, Room 6619, Mezzanine Level, Seattle, Washington.

Questions may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT**.

Issued in Renton, Washington, December 3, 2001.

Lowell H. Johnson,

Manager, Airports Division, ANM–600, Northwest Mountain Region.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Rule on Application (02–05–C–00–CPR) To Impose and Use a Passenger Facility Charge (PFC) at the Natrona County International Airport, Submitted by the County of Natrona, WY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comments on the application to impose and use a PFC at the Natrona County International Airport under the provisions of 49 U.S.C. 40117 and Part 158 of the Federal Aviation Regulations (14 CFR 158).

DATES: Comments must be received on or before January 9, 2002.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Alan Wiechmann, Manager, Denver Airports District Office, DEN–ADO; Federal Aviation Administration, 26805 E. 68th Avenue, Suite 224; Denver, CO 80249–6361.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Dan E. Mann, Airport Manager, at the following address: Natrona County International Airport, 8500 Airport Parkway, Casper, Wyoming 82604.

Air Carriers and foreign air carriers may submit copies of written comments previously provided to the Natrona County International Airport, under section 158.23 of part 158.

FOR FURTHER INFORMATION CONTACT: Mr. Chris Schaffer, (303) 342–1258; Denver Airports District Office, DEN–ADO; Federal Aviation Administration; 26805 E. 68th Avenue, Suite 224; Denver, CO 80249–6361. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application (02–05–C–00–CPR) to impose and use a PFC at Natrona County International Airport, under the provisions of 49 U.S.C. 40117 and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On December 3, 2001, the FAA determined that the application to impose and use a PFC submitted by the County of Natrona, Wyoming, was substantially complete within the requirements of section 158.25 of part 158. The FAA will approve or disapprove the application, in whole or part, no later than February 26, 2002.

The following is a brief overview of the application.

Level of the proposed PFC: $4.50.

Proposed charge effective date: January 1, 2002.

Proposed charge expiration date: October 1, 2010.

Total requested for use gpproval: $2,660,000.

Brief description of proposed projects: Rehabilitate aircraft parking apron, Terminal renovation, Rehabilitative taxiway C, Acquire snow removal equipment.

Class or classes of air carriers which the public agency has requested not be required to collect PFC's: None.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT** and at the FAA Regional Airports Office located at: Federal Aviation Administration, Northwest Mountain Region, Airports Division, ANM–600, 1601 Lind Avenue S.W., Suit4e 315, Renton, WA 98055–4056. In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Natrona County International Airport.

Issued in Renton, Washington on December 3, 2001.

Warren D. Ferrell,

Acting Manager, Planning, Programming, and Capacity Branch, Northwest Mountain Region.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

Reports, Forms and Record Keeping Requirements; Agency Information Collection Activity Under OMB Review

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collections and their expected burden. The **Federal Register** Notice with a 60-day comment period was published on February 28, 2001 [66 FR 12829–12831].

DATES: Comments must be submitted on or before January 9, 2002.

FOR FURTHER INFORMATION CONTACT: Alberto Jimenez at the National Highway Traffic Safety Administration, Office of Defects and Investigations (NSA–10.1), 202–366–5212. 400 Seventh Street, SW, Room 5219, Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

National Highway Traffic Safety Administration

Title: Consumer Complaint/Recall Audit Information.

OMB Number: 2127—0008.

Type of Request: Reinstatement, with change, of a previously approved collection for which approval has expired.

Abstract: Vehicle owners provide the agency with information on problems they are experiencing with their vehicles/equipment by an initial call to the agency's toll-free Auto Safety Hotline and by written letters. A Vehicle Owner's Questionnaire (VOQ), HS Form 350, or HS Form 350C is forwarded to the owner. A cover letter of explanation is also sent with the VOQs. The letter is to facilitate and simplify the collection process on the complaint. Frequently, written letters do not provide complete

data of the specific problem(s) on the vehicle or equipment. If incomplete information is received, the HS–350 is sent to the owner for additional information. If the problem concerns a child safety seat, the HS–350C, is sent. The information received on these forms is essential to NHTSA's defects investigation program. The thousands of individual reports received each year are used to help identify safety problems for investigation and possible recalls. This information identifies defect trends in vehicles and vehicle equipment and alerts the agency of these problems.

Affected Public: Individuals or households.

Estimated Total Annual Burden: 45,045.

ADDRESS: Send comments, within 30 days, to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725–17th Street, NW., Washington, DC 20503, Attention NHTSA Desk Officer.

Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Departments estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

A comment to OMB is most effective if OMB receives it within 30 days of publication.

Issued in Washington, D.C., on November 26, 2001.

Delmas Johnson,

Acting Associate Administrator for Administration.

SUPPLEMENTARY INFORMATION:

National Highway Traffic Safety Administration

Title: 49 CFR part 541, Consolidated Labeling Requirements for 49 CFR 571.115, parts 565, 541, and 567.

OMB Number: 2127–0510.

Type of Request: Extension of a currently approved information collection.

Abstract: The Motor Vehicle Information and Cost Savings Act was amended by the Anti-Car Theft Act of 1992 (Pub. L. 102–519). The enacted Theft Act state that passenger vehicles, and light-duty trucks with a gross vehicle weight rating of 6,000 pounds or less be covered under the Theft Prevention Standard. Each major component part must be either labeled or affixed with the VIN and its replacement component part must be marked with the DOT symbol, the letter (R) and the manufacturers' logo.

Affected Public: Individuals or households, business or other for-profit.

Estimated Total Annual Burden: 456,212.

ADDRESSES: Send comments, within 30 days, to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725–17th Street, NW., Washington, DC 20503, Attention NHTSA Desk Officer.

Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Departments estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

A Comment to OMB is most effective if OMB receives it within 30 days of publication.

Issued in Washington, D.C., on November 26, 2001.

SUPPLEMENTARY INFORMATION:

National Highway Traffic Safety Administration

Title: Voluntary Child Safety Registration Form.

OMB Number: 2127—0576.

Type of Request: Reinstatement, with change, of a previously approved collection for which approval has expired.

Abstract: Chapter 301 of Title 49 of the United States Code provides that if either NHTSA or a manufacturer determines that motor vehicles or items of motor vehicle equipment contain a defect that relates to motor vehicle safety or fail to comply with an applicable Federal Motor Vehicle Safety Standard, the manufacturer must notify

owners and purchasers of the defect or noncompliance and must provide a remedy without charge. Pursuant to 49 CFR Part 577 Defects and noncompliance notification for equipment items, including child safety seats, must be sent "by first class mail to the most recent purchaser known to the manufacturer." In the absence of a registration system, many owners of child safety seats are not notified of safety defects and noncompliance, since the manufacturer is not aware of their identities.

Affected Public: Individuals or households.

Estimated Total Annual Burden: 120.

ADDRESSES: Send comments, within 30 days, to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725–17th Street, NW, Washington, DC 20503, Attention NHTSA Desk Officer.

BILLING CODE 4910–59–P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Docket No. 42052]

Union Pacific Railroad Company—Petition for Declaratory Order—Unilaterally Imposed Interchange Charges

AGENCY: Surface Transportation Board, DOT.

ACTION: Notice of further proceedings.

SUMMARY: This proceeding was instituted by the Surface Transportation Board (Board) in response to a request for a declaratory order concerning ways in which rail carriers deal with interchange delays. However, because issues regarding interchange delays are usually addressed under the framework of the industry-wide Car Service and Car Hire Agreement (CS/CH Agreement) and Code of Car Service Rules/Code of Car Hire Rules (CS/CH Rules) administered by the Association of American Railroads (AAR), we are requesting that, before we take action, AAR convene a meeting with railroads, shippers, and other involved parties to discuss ways to address issues concerning delays in the interchange of railroad cars between railroads, and to develop proposals for addressing incidences of traffic delays associated with such interchange. We are further requesting that AAR file a report with the Board, describing the progress made at the meeting(s) and recommending how best to proceed to resolve these issues.

DATES: We request that AAR convene a meeting with railroads, shippers and other involved parties, as described herein, by February 8, 2002. Additional meetings may be held as determined by AAR and the involved parties. AAR's report, as described herein, is due by March 11, 2002.

ADDRESSES: The original and 10 copies of AAR's report, referring to STB Docket No. 42052, should be sent to: Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, NW., Washington, DC 20423–0001, ATTN: STB Docket No. 42052. AAR should also make a copy of its report available to all participants in the meeting, and any other involved parties upon request.

FOR FURTHER INFORMATION CONTACT: Beryl Gordon, (202) 565–1600. [TDD for the hearing impaired: 1–800–877–8339.]

SUPPLEMENTARY INFORMATION: By notice served and published June 13, 2000, 65 FR 37205, in response to a petition filed by Union Pacific Railroad Company (UP), a declaratory order proceeding was instituted by the Board under 5 U.S.C. 554(e) to address questions concerning the right of a rail carrier to impose penalty charges unilaterally against other rail carriers for delays in accepting cars in interchange. Comments were requested from interested parties.

As indicated in our notice, the controversy centers on "tariff" provisions issued by respondents Indiana Harbor Belt Railroad Company (Indiana Harbor Belt), Iowa Interstate Railroad, Ltd., and City of Tacoma, Tacoma Public Utilities, d/b/a Tacoma Rail and Tacoma Beltline Railroad, pursuant to which penalty charges would be imposed when cars are not pulled from interchange within specified time limits. UP asserts that such interchange issues are subject to the CS/CH Agreement and CS/CH Rules, unless the rail carriers enter into alternative agreements. UP seeks a declaration from the Board that, under 49 U.S.C. 11121, a rail carrier may not unilaterally impose such charges on another carrier for delayed interchange of cars, either by "tariff" or otherwise, and that interchange-related charges imposed by one rail carrier on another must be either permitted by agreement of the carriers involved or specifically authorized by the Board.

Comments were received from Class I railroads, short line railroads, shippers, and labor interests.[1] A substantial number of these comments focused on the effect that a declaratory order might have on switching services in the vicinity of Chicago, IL. We have considered all of the comments carefully, and we find that there are significant issues to be resolved, which could have an impact on the important matter of fluidity throughout the rail system. Because we believe that resolution of these issues can best be achieved through the cooperation of all segments of the railroad industry, rather than a decision by the Board on a particular controversy, we are deferring final Board action to provide an opportunity for such private-sector discussions.

Discussion and Conclusions

Interchange of traffic among railroads is a fundamental operational component of the national railroad network. It is important that interchange be accomplished in an economical and efficient manner. The interchange of traffic is typically a straightforward and reasonably uniform process in which all carriers participate for the benefit of themselves and the shipping public.

Sometimes parties differ as to how such interchange can be accomplished to best meet the needs of all concerned. We can resolve these sorts of disputes, if the parties cannot do so themselves, and we will resolve the issues raised here if it is necessary for us to do so. However, the national railroad system functions best on the basis of good faith cooperation among all railroads, both

[1] Indiana Harbor Belt has moved to strike portions of UP's reply, tendering, in the alternative, a surreply to what it asserts are new arguments presented in that reply. UP filed a reply to the motion to strike and, in the alternative, a surreply. Given our action here, we do not find good cause to strike the challenged material, nor will any party be prejudiced by leaving it (and UP's and Indiana Harbor Belt's surreplies) in the record.

large and small. If we were to rule against UP and find that carriers are not prohibited from unilaterally imposing interchange charges, the result could be a variety of charges, imposed pursuant to the actions of one carrier and the responses of another, that would not be conducive to the cooperation necessary for a seamless, efficient national rail network. The U.S. Department of Transportation filed comments suggesting that we urge the rail industry to meet and attempt to negotiate an effective and equitable resolution of these issues. We agree that broader industry discussion of those issues would be preferable. Therefore, in the spirit of cooperation, before we undertake to resolve this matter, we will first give those directly affected by the issues UP has raised, both in the Chicago area and elsewhere, an opportunity to establish workable solutions.

The Board has successfully encouraged private-sector negotiation to resolve other difficult issues. For example, during implementation of the merger between UP and Southern Pacific Transportation Company and its affiliates,[2] UP was directed to convene meetings with shippers, involved railroads, and other interested parties to address concerns pertaining to the Houston Terminal, leading to a coordinated plan for improving the utilization of Houston area infrastructure.[3] Then, during our review of the division of Conrail's assets, we directed CSX and Norfolk Southern to convene meetings with shippers, involved railroads, and other interested parties to discuss opportunities to improve the Buffalo, NY area rail infrastructure, which resulted in service improvements and better communication.[4] Also, in an effort to address congestion in the Chicago, IL area, the individual railroads and AAR, at the urging of the Board and other interested parties, have been working together to improve rail operations in Chicago through the development of the Chicago Service Plan and the establishment of the Chicago Planning Group and the Chicago Transportation Coordination Office. Most recently, we directed railroads to negotiate, in accordance with a 1986 agreement, concerning disputes with private tank car owners about certain charges being levied by The Burlington Northern and Santa Fe Railway Company and UP.[5]

As signatories to the CS/CH Agreement, operating railroads, including Class I, short line, regional and terminal railroads, have agreed to use the CS/CH Rules as a means both to coordinate their operations and to resolve areas of dispute that arise. Accordingly, we are requesting AAR to convene a meeting with shippers, railroads, and other involved parties to discuss more fully the available means of improving coordination of interchange of traffic in Chicago and elsewhere, and file a report with the Board. The report should describe the results of the meeting and should present suggestions for the best ways to address issues concerning delays in interchange, including the appropriate use of the CS/CH Rules.[6] AAR should explain if changes are needed to the terms and application of the CS/CH Rules, why they may be needed, how these changes may most effectively be implemented, and the possible timetable for implementing such changes. Once the report is filed, we will determine what further action is appropriate.

We encourage AAR to reach out to all involved parties[7] and to work with them to achieve the common goal of improving interchange of cars in general and reducing the opportunity for delay of rail traffic in interchange, not only in the Chicago area, but across the Nation as well.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

It is ordered:

1. Indiana Harbor Belt's motion to strike is denied. The surreplies of Indiana Harbor Belt and UP are accepted.

2. AAR is requested to convene a meeting with railroads, shippers, and other involved parties to discuss issues concerning delays in the interchange of railroad cars, consistent with this decision, by February 8, 2002.

3. AAR should provide a report to the Board by March 11, 2001. AAR should also make a copy of its initial report available to all meeting participants, and any other involved parties upon request.

4. This decision is effective on December 10, 2001.

Decided: December 3, 2001.

By the Board, Chairman Morgan, Vice Chairman Clyburn, and Commissioner Burkes.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–00–P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Docket No. AB–55 (Sub–No. 601X)]

CSX Transportation, Inc.—Abandonment Exemption—In Lenoir County, NC

On November 20, 2001, CSX Transportation, Inc. (CSXT) filed with the Surface Transportation Board (Board) a petition under 49 U.S.C. 10502 for exemption from the provisions of 49 U.S.C. 10903 to abandon a portion of its line of railroad in the Southern Region, known as the Florence Division, Parmele Subdivision, extending from railroad milepost AA–173.09 to railroad milepost AA–173.70 a distance of 0.61 miles, in Elmer, Lenoir County, NC. The line traverses United States Postal Service Zip Code 28501 and includes no stations.

The line does not contain federally granted rights-of-way. Any documentation in CSXT's possession will be made available promptly to those requesting it.

The interest of railroad employees will be protected by the conditions set forth in *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979).

By issuance of this notice, the Board is instituting an exemption proceeding pursuant to 49 U.S.C. 10502(b). A final decision will be issued by March 8, 2002.

Any offer of financial assistance (OFA) under 49 CFR 1152.27(b)(2) will be due no later than 10 days after service of a decision granting the petition for exemption. Each offer must be accompanied by a $1,000 filing fee. *See* 49 CFR 1002.2(f)(25).

All interested persons should be aware that, following abandonment of rail service and salvage of the line, the line may be suitable for other public

---

[2] The merger was approved by the Board in *Union Pacific/Southern Pacific Merger*, 1 S.T.B. 233 (1996), *aff'd, Western Coal Traffic League v. STB*, 169 F.3d 775 (D.C. Cir. 1999).

[3] *Joint Petition for Service Order*, STB Service Order No. 1518 *et al.*, (STB served Feb. 25, 1998), slip op. at 5.

[6] The CS/CH Rules include arbitration as a means of resolving disputes between participating carriers.

[7] Participation in the meetings should be open to large and small railroads, shippers and other involved parties.

use, including interim trail use. Any request for a public use condition under 49 CFR 1152.28 or for trail use/rail banking under 49 CFR 1152.29 will be due no later than December 31, 2001. Each trail use request must be accompanied by a $150 filing fee. *See* 49 CFR 1002.2(f)(27).

All filings in response to this notice must refer to STB Docket No. AB–55 (Sub-No. 601X) and must be sent to: (1) Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, NW., Washington, DC 20423–0001, and (2) Paul R. Hitchcock, 500 Water Street–J150, Jacksonville, FL 32202. Replies to the CSXT petition are due on or before December 31, 2001.

Persons seeking further information concerning abandonment procedures may contact the Board's Office of Public Services at (202) 565–1592 or refer to the full abandonment or discontinuance regulations at 49 CFR part 1152. Questions concerning environmental issues may be directed to the Board's Section of Environmental Analysis (SEA) at (202) 565–1552. [TDD for the hearing impaired is available at 1–800–877–8339.]

An environmental assessment (EA) (or environmental impact statement (EIS), if necessary) prepared by SEA will be served upon all parties of record and upon any agencies or other persons who commented during its preparation. Other interested persons may contact SEA to obtain a copy of the EA (or EIS). EAs in these abandonment proceedings normally will be made available within 60 days of the filing of the petition. The deadline for submission of comments on the EA will generally be within 30 days of its service.

Board decisions and notices are available on our Web site at "www.stb.dot.gov."

Decided: November 30, 2001.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–00–P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Docket No. AB–290 (Sub-No. 217X]

Norfolk Southern Railway Company—Abandonment Exemption—in Buchanan County, VA

Norfolk Southern Railway Company (NSR) has filed a verified notice of exemption under 49 CFR 1152 Subpart F—*Exempt Abandonments* to abandon a 0.4-mile line of railroad between mileposts LS–0.0 and LS–0.4, at Long Spur Jct. to end of track in Buchanan County, VA (line).[1] The line traverses United States Postal Service Zip Code 24614.

Applicant has certified that: (1) No local or overhead traffic has moved over the line for at least 2 years; (2) any overhead traffic, if there is any, can be rerouted over other lines; (3) no formal complaint filed by a user of rail service on the line (or by a state or local government agency acting on behalf of such user) regarding cessation of service over the line is either pending with the Surface Transportation Board (Board) or any U.S. District Court or has been decided in favor of complainant within the 2-year period; and (4) the requirements at 49 CFR 1105.7 (environmental reports), 49 CFR 1105.8 (historic reports), 49 CFR 1105.11 (transmittal letter), 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to this exemption, any employee adversely affected by the abandonment shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must me filed. Provided no formal expression of intent to file an offer of financial assistance (OFA) has been received, this exemption will be effective on January 9, 2002, unless stayed pending reconsideration. Petitions to stay that do not involve environmental issues,[2] formal expressions of intent to file an OFA under 49 CFR 1152.27(c)(2),[3] and trail use/rail banking requests under 49 CFR 1152.29 must be filed by December 20, 2001. Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by December 31, 2001, with the Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, NW., Washington, DC 20423–00001.

A copy of any petition filed with the Board should be sent to applicant's representative: James R. Paschall, Esq., Norfolk Southern Corporation, Three Commercial Place, Norfolk, VA 23510. If the verified notice contains false or misleading information, the exemption is void *ab initio*.

Applicant has filed a separate environmental report which address the abandonment's effects, if any, on the environment and historic resources. SEA will issue an environmental assessment (EA) by December 17, 2001. Interested persons may obtain a copy of the EA by writing to SEA (Room 500, Surface Transportation Board, Washington, DC 20423–0001) or by calling SEA, at (202) 565–1552. Comments on environmental and historic preservation matters must be filed with 15 days after the EA becomes available to the public.

Environmental, historic preservation, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Pursuant to the provisions of 49 CFR 1151.29(e)(2), NSR shall file a notice of consummation with the Board to signify that it has exercised the authority granted and fully abandoned the line. If consummation has not been effected by NSR's filing of a notice of consummation by December 10, 2002, and there are no legal or regulatory barriers to consummation, the authority to abandon will automatically expire.

Board decisions and notices are available on our website at *www.stb.dot.gov*.

Decided: November 30, 2001.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

[FR Doc. 01–30446 Filed 12–7–01; 8:45 am]

BILLING CODE 4915–00–P

[1] NSR notes that authority to discontinue operations on the line was granted by the former Interstate Commerce Commission. *See Norfolk and Western Railway Company—Discontinuance Exemption—in Buchanan County, VA*, Docket No. AB–290 (Sub-No. 102X) (ICC served Sept. 25, 1990–)

[2] The Board will grant a stay if an informed decision on environmental issues (whether raised by a party or by the Board's Section of Environmental Analysis (SEA) in its independent investigation) cannot by made before the exemption's effective date. *See Exemption of out-of-Service Rail Lines*, 5 I.C.C. 2d 377 (1980). Any request for a stay should be filed as soon as possible so that the Board may take appropriate action before the exemption's effective date.

[3] Each offer of financial assistance must be accompanied by the filing fee, which currently is set at $1000. *See* 49 CFR 1002.2(f)(25).

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Docket No. AB–290 (Sub-No. 235X)]

Norfolk Southern Railway Company—Abandonment Exemption—in McDowell County, WV

Norfolk Southern Railway Company (NSR) has filed a notice of exemption under 49 CFR 1152 subpart F—*Exempt Abandonments* to abandon a 4.58-mile

line of railroad between milepost RP–0.0 at Roderfield and milepost RP–4.58 at Premier, in McDowell County, WV. The line traverses United States Postal Service Zip Codes 24878 and 24881.

NSR has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) any overhead traffic, if there is any, can be rerouted over other lines; (3) no formal complaint filed by a user of rail service on the line (or by a state or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Surface Transportation Board (Board) or with any U.S. District Court or has been decided in favor of complainant within the 2-year period; and (4) the requirements at 49 CFR 1105.7 (environmental reports), 49 CFR 1105.8 (historic reports), 49 CFR 1105.11 (transmittal letter), 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to this exemption, any employee adversely affected by the abandonment and discontinuance shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must be filed. Provided no formal expression of intent to file an offer of financial assistance (OFA) has been received, this exemption will be effective on January 9, 2002, unless stayed pending reconsideration.[1] Petitions to stay that do not involve environmental issues,[2] formal expressions of intent to file an OFA under 49 CFR 1152.27(c)(2),[3] and trail use/rail banking requests under 49 CFR 1152.29 must be filed by December 20, 2001. Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by December 31, 2001, with: Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, NW., Washington, DC 20423.

A copy of any petition filed with the Board should be sent to NSR's representative: James R. Paschall, General Attorney, Norfolk Southern Corporation, Three Commercial Place, Norfolk, VA 23510.

If the verified notice contains false or misleading information, the exemption is void *ab initio*.

NSR has filed an environmental report which addresses the effects, if any, of the abandonment and discontinuance on the environment and historic resources. SEA will issue an environmental assessment (EA) by December 14, 2001. Interested persons may obtain a copy of the EA by writing to SEA (Room 500, Surface Transportation Board, Washington, DC 20423) or by calling SEA, at (202) 565–1552. Comments on environmental and historic preservation matters must be filed within 15 days after the EA becomes available to the public.

Environmental, historic preservation, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Pursuant to the provisions of 49 CFR 1152.29(e)(2), NSR shall file a notice of consummation with the Board to signify that it has exercised the authority granted and fully abandoned its line. If consummation has not been effected by NSR's filing of a notice of consummation by December 10, 2002, and there are no legal or regulatory barriers to consummation, the authority to abandon will automatically expire.

Board decisions and notices are available on our Web site at "www.stb.dot.gov."

Decided: December 3, 2001.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

[FR Doc. 01–30447 Filed 12–7–01; 8:45 am]

BILLING CODE 4915–00–P

[1] While the applicant initially indicated a proposed consummation date of January 8, 2002, because the verified notice was filed on November 20, 2001, consummation may not take place prior to January 9, 2002. Applicant's representative has subsequently confirmed that the correct consummation date is on or after January 9, 2002.

[2] The Board will grant a stay if an informed decision on environmental issues (whether raised by a party or by the Board's Section of Environmental Analysis (SEA) in its independent investigation) cannot be made before the exemption's effective date. *See Exemption of Out-of-Service Rail Lines*, 5 I.C.C.2d 377 (1989). Any request for a stay should be filed as soon as possible so that the Board may take appropriate action before the exemption's effective date.

[3] Each offer of financial assistance must be accompanied by the filing fee, which currently is set at $1000. *See* 49 CFR 1002.2(f)(25).

DEPARTMENT OF THE TREASURY

Federal Law Enforcement Training Center

FLETC Cheltenham, MD; Notice of Availability of Document for Review

AGENCY: Federal Law Enforcement Training Center, Treasury.

ACTION: Notice of availability of environmental assessment for public review.

SUMMARY: Notice is hereby given that the Federal Law Enforcement Training Center (FLETC), pursuant to the National Environmental Policy Act of 1969 (NEPA), the Council on Environmental Quality Regulations for Implementing the National Environmental Policy Act (40 CFR parts 1500–1508), and Department of the Treasury Directive 75–02 (Department of the Treasury Environmental Quality Program), has prepared an Environmental Assessment (EA) related to the renovation of the former Naval Communications Detachment Cheltenham, MD to provide a law enforcement requalification training facility for use by a wide variety of federal, state, and local agencies located in the metropolitan Washington, DC area. The proposed action includes demolition and renovation of existing buildings for use as classrooms, simulators, locker facilities, storage, etc., and construction of a free-standing, completely enclosed, environmentally safe indoor firearms training range and an outdoor vehicle training range. Vegetation manipulation will occur for aesthetic purposes, wildlife habitat improvement, wildfire hazard control, and insect/disease reduction.

The public and resource agencies were invited to attend a public meeting held October 24, 2001, and participate in the planning and analysis of the proposed project. At that meeting the FLETC discussed the environmental review process, described the project and alternatives under consideration, discussed the scope of environmental issues to be investigated in accordance with the requirements of NEPA, and answered questions from attendees.

An Environmental Assessment document has been prepared in accordance with NEPA and Department of the Treasury requirements, addressing the various project alternatives, their potential environmental impacts, and issues raised during the October 24 public meeting. This document will be available for public review and comment from December 17, 2001 until January 16, 2002 at the following locations:

1. Prince George's County Memorial Library System, Surratts-Clinton Branch, 9400 Piscataway Road, Clinton, MD 20735, 301–868–9200
2. Department of the Treasury, Library, Main Treasury Building, 1500 Pennsylvania Avenue NW, Washington, DC 20220, Contact Bill McGovern at 282–622–0043

The EA will also be viewable as a PDF file on the FLETC's Internet site at

http://www.fletc.gov/evs/cheltenham.htm for the same time period.

Significant comments received from the public and agencies during the review period will be addressed in the EA and included in an Appendix. Should the FLETC determine, based on the public's comments and the information presented in the Environmental Assessment, that the impacts of the demolition/renovation, construction, and operation of the facility will not have a significant environmental impact, it will prepare a Finding of No Significant Impact (FONSI) for publication in the **Federal Register** and in a newspaper in general circulation at the project location. Should significant environmental impacts be determined to exist due to the project, the FLETC will proceed with the preparation of an Environmental Impact Statement, per the requirements of NEPA, the Council on Environmental Quality, and its own environmental policies and procedures.

DATES: Written comments concerning the EA should be received on or before January 16, 2002, to be assured of consideration.

ADDRESSES: Direct all written comments to Ms. Susan Shaw, NEPA Coordinator/Project Manager, c/o FLETC Cheltenham Facility, 9000 Commo Road, Cheltenham, MD 20623–5000.

FOR FURTHER INFORMATION CONTACT: Susan Shaw, NEPA Coordinator/Project Manager, FLETC, at (912) 261–4557. Ms. Shaw's e-mail address is *sshaw@fletc.treas.gov*. Information is also available from Bob Smith, Chief, Cheltenham Operations at (301) 868–5830. Mr. Smith's e-mail address is *rsmith@fletc.treas.gov*.

SUPPLEMENTARY INFORMATION: The Federal Law Enforcement Training Center has a mission of providing high quality, cost-effective training of federal law enforcement personnel. The FLETC proposes with this action to provide requalification-training services in the Washington, DC area by renovating the former Naval Communications Detachment Cheltenham, MD facility, which has been inactive since 1998. Providing these requalification services in the Washington, DC area will eliminate the need for Washington, DC area law enforcement agencies to travel to the FLETC's Glynco, GA facility, reducing associated costs and time demands.

The FLETC Cheltenham facility is located approximately 15 miles southeast of Washington, DC, in Prince George's County, MD. The project site is situated east of Maryland Route 5 and west of Maryland Route 301, approximately 3 miles south of Andrews Air Force Base.

Authority: The Council on Environmental Quality's National Environmental Policy Act, 40 CFR parts 1500 *et seq.*

Dated: December 5, 2001.

Bruce Bowen,

Assistant Director, Office Of Compliance, Federal Law Enforcement Training Center.

[FR Doc. 01–30424 Filed 12–7–01; 8:45 am]

BILLING CODE 4810–32–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Revenue Procedure 98–55

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Revenue Procedure 98–55, Extension of Relief for Late S Elections.

DATES: Written comments should be received on or before February 8, 2002, to be assured of consideration.

ADDRESSES: Direct all written comments to George Freeland, Internal Revenue Service, room 5575, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the revenue procedure should be directed to Allan Hopkins, (202) 622–6665, Internal Revenue Service, room 5244, 1111 Constitution Avenue NW., Washington, DC 20224.

SUPPLEMENTARY INFORMATION:

Title: Extension of Relief for Late S Elections.

OMB Number: 1545–1548.

Revenue Procedure Number: Revenue Procedure 98–55.

Abstract: Revenue Procedure 98–55 updates the Service's instructions for requesting relief for a late S corporation election and other late elections that must be filed by or for an S corporation. Revenue Procedure 98–55 provides that a corporation will have 12 months from the original due date for the S election (but not later than the due date for the tax return for the first year it intended to be an S corporation) to request relief for a late S election by filing Form 2553, Election by a Small Business Corporation, and attaching a statement explaining the reason for the failure to file a timely S corporation election.

Current Actions: There are no changes being made to the revenue procedure at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 25,000.

Estimated Time Per Respondent: 1 hour.

Estimated Total Annual Burden Hours: 25,000.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: November 27, 2001.

George Freeland,

IRS Reports Clearance Officer.

BILLING CODE 4830–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0614]

Proposed Information Collection Activity: Proposed Collection; Comment Request

AGENCY: Veterans Health Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Veterans Health Administration (VHA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of a currently approved collection, and allow 60 days for public comment in response to the notice. This notice solicits comments for information needed to identify individuals at risk for stress-related illnesses.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before February 8, 2002.

ADDRESSES: Submit written comments on the collection of information to Ann W. Bickoff, Veterans Health Administration (193B1), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420 or e-mail *ann.bickoff@mail.va.gov*. Please refer to "OMB Control No. 2900–0614" in any correspondence.

FOR FURTHER INFORMATION CONTACT: Ann W. Bickoff (202) 273–8310 or FAX (202) 273–9381. These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Pub. L. 104–13; 44 U.S.C., 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VHA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VHA's functions, including whether the information will have practical utility; (2) the accuracy of VHA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title and Form Number: Phase IV of Study of Individuals at Risk for Stress Related Illnesses, VA Form 10–21036(NR).

OMB Control Number: 2900–0614.

Type of Review: Revision of a currently approved collection.

Abstract: Phases I and II of this study are completed. The collection of information associated with Phase III is also completed. Phase IV is intended to complete VA's study of the "psychological and biomedical measurements for early identification of individuals at risk for stress-related illness." The information collected will be used to produce a reliable inventory of psychosocial risk and resilience factors for contemporary military personnel and then demonstrate its validity visàvis Gulf War veterans' self-reported somatic and psychological symptoms and judgments of health-related quality of life.

Affected Public: Individuals or households.

Estimated Annual Burden: 313 hours.

Estimated Average Burden Per Respondent: 45 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 417.

Dated: November 7, 2001.

By direction of the Secretary.

Barbara H. Epps,

Management Analyst, Information Management Service.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0029]

Proposed Information Collection Activity: Proposed Collection; Comment Request

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Veterans Benefits Administration (VBA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice. This notice solicits comments on the information needed from a private sector sales broker to submit an offer to VA on behalf of a prospective purchaser of a VA-acquired property.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before February 8, 2002.

ADDRESSES: Submit written comments on the collection of information to Nancy J. Kessinger, Veterans Benefits Administration (20S52), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420 or e-mail *irmnkess@vba.va.gov*. Please refer to "OMB Control No. 2900–0029" in any correspondence.

FOR FURTHER INFORMATION CONTACT: Nancy J. Kessinger at (202) 273–7079 or FAX (202) 275–5947.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Public Law 104–13; 44 U.S.C., 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Titles

a. Offer to Purchase and Contract of Sale, VA Form 26–6705.

b. Credit Statement of Prospective Purchaser, VA Form 26–6705b.

c. Addendum to VA Form 26–6705 Offer to Purchase and Contract of Sale, VA Form 26–6705d

OMB Control Number: 2900–0029.

Type of Review: Extension of a currently approved collection.

Abstract

a. VA Form 26–6705 is used by the private sector sales broker to submit an offer to the VA on behalf of a prospective purchaser of a VA-acquired property. The form will be prepared for each proposed contract submitted to the VA. If the VA accepts the offer to purchase, it then becomes a contract of sale. The form defines the terms of sale, provides the prospective purchaser with a receipt for his/her earnest money deposit, eliminates the need for separate transmittal of a purchase offer and develops the contract without such intermediate processing steps and furnishes evidence of the station decision with respect to the acceptance of the contract as tendered. Without this information, a determination of the best offer for a property cannot be made.

b. VA Form 26–6705b is used as a credit application to determine the creditworthiness of a prospective purchaser in those instances when the prospective purchaser seeks VA vendee financing, along with VA Form 26–6705. In such sales, the offer to purchase will not be accepted until the purchaser's income and credit history have been verified and a loan analysis has been completed, indicating loan approval. Without this information, the creditworthiness of a prospective purchaser cannot be determined and the offer to purchase cannot be accepted.

c. VA Form 26–6705d is an addendum to VA Form 26–6705 for use in Virginia. It includes requirements of State law, which must be acknowledged by the purchaser at or prior to closing.

Affected Public: Individuals or households.

Estimated Annual Burden: 57,917 hours.

a. VA Form 26–7605—35,000 hours.
b. VA Form 26–6705b—22,500 hours.
c. VA Form 26–6705d—417 hours.

Estimated Average Burden Per Respondent: 20 minutes (average).

a. VA Form 26–7605—21 minutes.
b. VA Form 26–6705b—20 minutes.
c. VA Form 26–6705d—5 minutes.

Frequency of Response: Generally one-time.

Estimated Number of Total Respondents: 172,500.

a. VA Form 26–7605—100,000.
b. VA Form 26–6705b—67,500.
c. VA Form 26–6705d—5,000.

Dated: November 7, 2001.

By direction of the Secretary.

Barbara H. Epps,

Management Analyst, Information Management Service.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0570]

Proposed Information Collection Activity: Proposed Collection; Comment Request

AGENCY: Veterans Health Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Veterans Health Administration (VHA) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of a currently approved collection, and allow 60 days for public comment in response to the notice. This notice solicits comments on the burden estimates relating to customer satisfaction surveys.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before February 8, 2002.

ADDRESSES: Submit written comments on the collection of information to Ann Bickoff, Veterans Health Administration (193B1), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420 or e-mail: *ann.bickoff@mail.va.gov*. Please refer to "OMB Control No. 2900–0570" in any correspondence.

FOR FURTHER INFORMATION CONTACT: Ann Bickoff at (202) 273–8310.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Public Law 104–13; 44 U.S.C., 3501–3520), Federal agencies must obtain approval from OMB for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VHA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VHA's functions, including whether the information will have practical utility; (2) the accuracy of VHA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: Generic Clearance for the Veterans Health Administration Customer Satisfaction Surveys.

OMB Control Number: 2900–0570.

Type of Review: Revision of a currently approved collection.

Abstract: Executive Order 12862, Setting Customer Service Standards, requires Federal agencies and departments to identify and survey its customers to determine the kind and quality of services they want and their level of satisfaction with existing services. VHA uses customer satisfaction surveys to gauge customer perceptions of VA services as well as customer expectations and desires. The results of these information collections lead to improvements in the quality of VHA service delivery by helping to shape the direction and focus of specific programs and services.

Affected Public: Individuals or households.

Listing of Survey Activities

I. Special Emphasis Programs

The following list of activities is a compendium of customer satisfaction survey plans by VHA. Different special emphasis programs will be surveyed annually; however, program selections have not been made for FYs 2002–2004. Burden hours for the out-years are based on FY 2001 estimates (Burden hours per respondent: 15 minutes).

Year	Number of respondents	Estimated annual burden (in hours)	Frequency
2002	50,000	12,500	Annually.
2003	50,000	12,500	Annually.
2004	50,000	12,500	Annually.

II. Local Facilities Surveys

Year	Number of respondents	Estimated annual burden (in hours)	Frequency
2002	288,780	62,569	One-time.
2003	288,780	62,569	One-time.
2004	288,780	62,569	One-time.

Most customer satisfaction surveys will be recurring so that VHA can create ongoing measures of performance and to determine how well the Agency meets customer service standards. Each collection of information will consist of the minimum amount of information necessary to determine customer needs and to evaluate VHA's performance. VHA expects to distribute written surveys with a total annual burden of approximately 75,069 hours in FYs 2002, 2003, and 2004 (Burden hours per respondent: 13 minutes).

Dated: November 27, 2001.

By direction of the Secretary.

Donald L. Neilson,

Director, Information Management Service.

Corrections

Federal Register
Vol. 66, No. 237
Monday December 10, 2001

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

FEDERAL TRADE COMMISSION

16 CFR Part 305

Rules Concerning Disclosures Regarding Energy Consumption and Water Use of Certain Home Appliances and Other Products Under the Energy Policy and Conseravation Act ("Appliance Labeling Rule")

Correction

In rule document 01–28438 beginning on page 57867, in the issue of Monday, November 19, 2001, make the following corrections:

PART 305 [AMENDED]

1.On page 58768, the heading for Appendix A2 to Part 305 should read "Appendix A2 to Part 305.—Refrigerators and Refrigerators–Freezers With Manual Defrost".

2.On the same page in the table for Appendix A2 to Part 305, in the column under the heading Low, in the ninth line,"(396)" should read "396".

3.On the same page, in the table for Appendix A2 to Part 305, in the column under the heading High, in the ninth line,"(438)" should read "438".

Part II

Department of the Interior

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Determination of Critical Habitat for the Oahu Elepaio (Chasiempis sandwichensis ibidis); Final Rule

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AG99

Endangered and Threatened Wildlife and Plants; Determination of Critical Habitat for the Oahu Elepaio (*Chasiempis sandwichensis ibidis*)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), designate critical habitat for the Oahu elepaio pursuant to the Endangered Species Act of 1973, as amended (Act). The Oahu elepaio is a forest bird found only on the island of Oahu and is listed as endangered under the Act. The critical habitat consists of five units whose boundaries encompass a total area of approximately 26,661 hectares (ha) (65,879 acres (ac)) in the Koolau and Waianae mountains on the island of Oahu, Hawaii. Critical habitat identifies specific areas that are essential to the conservation of a listed species and that may require special management considerations or protection. As required by section 4 of the Act, we considered economic and other relevant impacts prior to making a final decision on what areas to designate as critical habitat.

DATES: This rule is effective January 9, 2002.

FOR FURTHER INFORMATION CONTACT: Marilet A. Zablan, Vertebrate Conservation Coordinator, or Eric VanderWerf, Biologist, Pacific Islands Fish and Wildlife Office, U.S. Fish and Wildlife Service, 300 Ala Moana Boulevard, Room 3–122, Box 50088, Honolulu, Hawaii 96850 (telephone: 808/541–3441; facsimile: 808/541–3470).

SUPPLEMENTARY INFORMATION:

Background

The Oahu elepaio (*Chasiempis sandwichensis ibidis*) is a small forest-dwelling bird approximately 12.5 grams (0.43 ounces) in weight and 15 centimeters (cm) (6 inches (in)) in length, and is a member of the monarch flycatcher family Monarchidae (VanderWerf 1998). It is dark brown above and white below, with light brown streaks on the breast. The tail is long (6.5 cm, 2.6 in) and often held up at an angle. Adults have conspicuous white wing bars, a white rump, and white tips on the tail feathers. The throat is white with black markings in both sexes, but males tend to have more black on the chin than females. Juveniles and subadults are reddish above, with a white belly and rusty wing-bars. The bill is medium-length, straight, and black, with the base of the lower mandible bluish-gray in adults and yellow in juveniles. The legs and feet are dark gray and the iris is dark brown (VanderWerf 1998).

Three subspecies of elepaio are recognized, each found only on a single island: the Oahu elepaio; the Hawaii elepaio (*Chasiempis s. sandwichensis*); and the Kauai elepaio (*C. s. sclateri*). The forms on different islands are similar in ecology and behavior, but differ somewhat in coloration and vocalizations (Conant 1977, van Riper 1995, VanderWerf 1998). The taxonomy used in this rule follows Pratt *et al.* (1987) and Pyle (1997), in which all forms are regarded as subspecies, but the form on each island was originally described as a separate species. The Oahu form was known as *C. s. gayi* (Wilson 1891) until Olson (1989) pointed out that the epithet *ibidis* (Stejneger 1887) has priority. The elepaio comprises a monotypic genus that is found only in the Hawaiian Islands (VanderWerf 1998). Its closest relatives are other monarch flycatchers from the Pacific region (Pratt *et al.* 1987, Sibley and Ahlquist 1985).

The Oahu elepaio occurs in a variety of forest types, but is most common in riparian vegetation along streambeds and in mesic forest with a tall canopy and a well-developed understory (Shallenberger and Vaughn 1978, VanderWerf *et al.* 1997). Population density is roughly 50 percent lower in shorter dry forest on ridges (VanderWerf *et al.* 1997). Elepaio currently are not found in very wet, stunted forest on windswept summits or in very dry shrub land, but these areas may be used by individuals dispersing among subpopulations. Forest structure appears to be more important to elepaio than plant species composition (VanderWerf *et al.* 1997), and unlike many Hawaiian forest birds, elepaio have adapted relatively well to disturbed forest composed of introduced plants (Conant 1977, VanderWerf *et al.* 1997, VanderWerf 1998). Fifty-five percent of the current range is dominated by introduced plants and 45 percent is dominated by native plants (VanderWerf *et al.* 2001). This observation does not imply that elepaio prefer introduced plant species, but probably reflects a preference by elepaio for riparian vegetation in valleys and the high degree of habitat disturbance and abundance of introduced plants in riparian areas (VanderWerf *et al.* 1997). Of the 45 percent dominated by native plants, 23 percent is categorized as wet forest, 17 percent as mesic forest, and 5 percent as dry forest, shrub land, and cliffs (Hawaii Heritage Program 1991).

Plant species composition in elepaio habitat varies considerably depending on location and elevation, but some of the most common native plants in areas where elepaio occur are ohia (*Metrosideros polymorpha*), papala kepau (*Pisonia umbellifera*), lama (*Diospyros sandwicensis*), mamaki (*Pipturus albidus*), kaulu (*Sapindus oahuensis*), hame (*Antidesma platyphyllum*), and alaa (*Pouteria sandwicensis*), and some of the most common introduced plants are guava (*Psidium guajava*), strawberry guava (P. cattleianum), kukui (*Aleurites moluccana*), mango (Mangifer indica), Christmasberry (*Schinus terebinthifolius*), and ti (*Cordyline terminalis*) (VanderWerf *et al.* 1997, VanderWerf 1998).

The current population of Oahu elepaio is approximately 1,982 birds distributed in six core subpopulations and several smaller subpopulations (Table 1, Figure 1; VanderWerf *et al.* 2001).

VOL 66 ISS 237 DEC 10 2001 UMI

The only previous population estimate (200–500 birds; Ellis *et al.* 1992) was not accurate because little information was available when the estimate was made. The number of birds is divided about evenly between the Waianae Mountains in the west and the Koolau Mountains in the east, with three core subpopulations in each mountain range. At least 10 tiny remnant subpopulations consisting mostly or entirely of males remain in both the Waianae and Koolau mountains (Table 1). These remnant subpopulations were much larger or continuous with other subpopulations in the past, but because of their very small size, skewed sex ratio, and geographic isolation, these relicts likely will disappear in a few years as the last adults die.

The breeding population, about 1,774 birds, is less than the total population because of a male-biased sex ratio; only 84 percent of territorial males have mates in large populations (VanderWerf *et al.* 2001), and many small, declining populations contain mostly males (Table 1). The genetically effective population size, a measure that takes into account genetic population structure and variation in number of individuals over time, is probably even smaller than the breeding population because of the geographically fragmented distribution (Grant and Grant 1992). Offspring dispersal distances in elepaio are usually less than one kilometer (km) (0.62 mile (mi)) and adults have high site fidelity (VanderWerf 1998), but most elepaio populations on Oahu are separated by many kilometers of unsuitable urban or agricultural habitat. There may be some exchange among subpopulations within each mountain range, but dispersal across the extensive pineapple fields that separate the Waianae and Koolau mountains is unlikely. While the current distribution superficially appears to constitute a metapopulation, it is uncertain if dispersal occurs among subpopulations.

Before humans arrived, forest covered about 127,000 ha (313,690 ac) on Oahu (Figure 2; Hawaii Heritage Program 1991), and it is likely that elepaio once inhabited much of that area (VanderWerf *et al.* 2001). Reports by early naturalists indicate that elepaio were once widespread and abundant on Oahu. Bryan (1905) called the Oahu elepaio "the most abundant Hawaiian species on the mountainside all the way from the sea to well up into the higher elevations." Perkins (1903) remarked on its "universal distribution * * * from the lowest bounds to the uppermost edge of continuous forest." Seale (1900) stated the elepaio was "the commonest native land bird to be found on the island," while MacCaughey (1919) described it as "the most abundant representative of the native woodland avifauna" and "abundant in all parts of its range." The historical range of the Oahu elepaio apparently included most forested parts of the island, and it was formerly abundant.

Despite its adaptability, the Oahu elepaio has seriously declined since the arrival of humans, and it has disappeared from many areas where it was formerly common (Shallenberger 1977, Shallenberger and Vaughn 1978, Williams 1987, VanderWerf *et al.* 1997). The aggregate geographic area of all current subpopulations is approximately 5,660 ha (13,980 ac) (see Table 1) (VanderWerf *et al.* 2001). The Oahu elepaio thus currently occupies only about 4 percent of its original prehistoric range, and its range has declined by roughly 96 percent since humans arrived in Hawaii 1,600 years ago (Kirch 1982). In 1975, elepaio inhabited approximately 20,900 ha (51,623 ac) on Oahu, almost four times the area of the current range (Figure 2; VanderWerf *et al.* 2001). The range of the Oahu elepaio has thus declined by roughly 75 percent in the last 25 years. Much of the historical decline of the Oahu elepaio can be attributed to habitat loss, especially at low elevations. Fifty-six percent of the original prehistoric range has been developed for urban or agricultural use, and practically no elepaio remain in developed areas (VanderWerf *et al.* 2001).
